**Struktur Organisasi Saat Ini**  
Current Organizational Structure**Pengembangan Modul Teknologi Informasi 2025**

Pada tahun 2025, pengembangan inisiatif Teknologi Informasi difokuskan untuk mendukung pencapaian sasaran strategis perusahaan melalui peningkatan kapabilitas digital, efisiensi proses bisnis, serta penguatan tata kelola TI. Berbagai rencana kerja telah dirancang dan diimplementasikan secara terstruktur guna memastikan keselarasan antara kebutuhan bisnis dan solusi teknologi yang dikembangkan. Seiring dengan pelaksanaan inisiatif tersebut, sejumlah pencapaian telah berhasil diraih dan memberikan kontribusi nyata terhadap peningkatan kinerja operasional perusahaan, adapun diantaranya adalah sebagai berikut :

- **Digitalisasi Operasi**  
Pada tahun 2025, MIND ID Group mengakselerasi transformasi digital melalui implementasi digitalisasi terintegrasi. Beberapa inisiatif yang telah dijalankan meliputi pengembangan Digital Gold oleh ANTAM, Digital Twin oleh INALUM untuk mendukung efisiensi operasional, penerapan operational control tower oleh PTBA sebagai pusat kendali operasional terintegrasi, serta implementasi fuel management system oleh TIMAH untuk meningkatkan pengendalian dan efisiensi penggunaan bahan bakar. Upaya ini mencerminkan komitmen MIND ID Group dalam memperkuat keunggulan operasional dan daya saing perusahaan secara berkelanjutan.
- **IT Cybersecurity**  
MIND ID menerapkan berbagai kontrol keamanan siber yang terus diperbarui dengan mengacu pada NIST Cybersecurity Framework (CSF) sebagai kerangka kerja global dalam pengelolaan risiko keamanan siber. Pada tahap *Identify*, MIND ID menetapkan aset kritis dan mengidentifikasi risiko melalui penerapan standar ISO 27001, ISO 22301, dan ISO 20000-1, manajemen risiko, sistem *ticketing*, serta pengukuran kematangan keamanan siber bekerja sama dengan Badan Siber dan Sandi Negara (BSSN). Tahap

**Information Technology Module Development 2025**

In 2025, the development of Information Technology initiatives will focus on supporting the achievement of the company's strategic goals by enhancing digital capabilities, improving business process efficiency, and strengthening IT governance. Various work plans have been designed and implemented in a structured manner to ensure alignment between business needs and the technology solutions being developed. Along with the implementation of these initiatives, several achievements have been achieved and have made a significant contribution to improving the company's operational performance, including the following:

- **Digitalisasi Operasi**  
In 2025, MIND ID Group accelerated its digital transformation through the implementation of integrated digitalization. Several initiatives that have been implemented include the development of Digital Gold by ANTAM, Digital Twin by INALUM to support operational efficiency, the implementation of an operational control tower by PTBA as an integrated operational control center, and the implementation of a fuel management system by TIMAH to improve control and efficiency of fuel use. These efforts reflect MIND ID Group's commitment to strengthening operational excellence and the company's competitiveness in a sustainable manner.
- **IT Cybersecurity**  
MIND ID implements various cybersecurity controls that are continuously updated with reference to the NIST Cybersecurity Framework (CSF) as a global framework for managing cybersecurity risks. In the *Identify* phase, MIND ID defines critical assets and identifies risks through the implementation of ISO 27001, ISO 22301, and ISO 20000-1 standards, risk management, a ticketing system, and cybersecurity maturity measurement in collaboration with the National Cyber and Crypto Agency

*Protect* difokuskan pada pencegahan serangan melalui program awareness, perlindungan endpoint, keamanan DNS dan email berlapis, *network access control*, NGFW berlapis, serta enkripsi perangkat. Pada tahap *Detect*, MIND ID melakukan deteksi dini melalui dark web monitoring, honeypot, monitoring jaringan, *vulnerability dan privileged access management*, *penetration testing*, serta SOC terkelola 24x7. Sementara itu, tahap *Response* memastikan insiden dapat ditangani secara cepat melalui dukungan tim forensik dan *incident response*. Selain aspek teknologi, MIND ID juga memperkuat *Human Firewall* melalui LMS terintegrasi, *phishing simulation*, kampanye edukasi, dan webinar keamanan siber.

MIND ID menjalankan program *Security Awareness* untuk menurunkan risiko keamanan dari faktor manusia dengan hasil yang terukur, terbukti dari penurunan tingkat kompromi phishing credential harvesting secara signifikan dari 22% menjadi 7%. Keberhasilan ini didukung oleh dua kali simulasi phishing sebagai sarana evaluasi dan penguatan kontrol, webinar yang diikuti lebih dari 1.300 peserta di seluruh entitas holding, serta kampanye berkelanjutan melalui media internal seperti video edukasi, poster, dan banner. kedepannya, program ini akan diperkuat melalui integrasi dengan KPI pegawaimelalui kewajiban modul LMS, peningkatan variasi dan kompleksitas simulasi untuk menekan risiko *malware attachment*, serta pemberian insentif bagi pegawai yang aktif belajar dan melaporkan indikasi phishing.

Berikut adalah jumlah serangan MIND ID yang terjadi periode 2025:

(BSSN). The *Protect* phase focuses on preventing attacks through awareness programs, endpoint protection, layered DNS and email security, network access control, layered NGFW, and device encryption. In the *Detect* phase, MIND ID performs early detection through dark web monitoring, honeypots, network monitoring, vulnerability and privileged access management, penetration testing, and a 24x7 managed SOC. Meanwhile, the *Response* phase ensures incidents can be handled quickly through the support of forensic and incident response teams. In addition to technological aspects, MIND ID also strengthens the Human Firewall through an integrated LMS, phishing simulations, educational campaigns, and cybersecurity webinars.

MIND ID runs a *Security Awareness* program to reduce security risks from human factors with measurable results, proven by a significant decrease in the level of credential harvesting phishing compromises from 22% to 7%. This success is supported by two phishing simulations as a means of evaluation and strengthening controls, webinars attended by more than 1,300 participants across all holding entities, and ongoing campaigns through internal media such as educational videos, posters, and banners. In the future, this program will be strengthened through integration with employee KPIs through mandatory LMS modules, increasing the variety and complexity of simulations to reduce the risk of malware attachments, and providing incentives for employees who actively learn and report indications of phishing.

The following is the number of MIND ID attack that occurred in the 2025 period:

**Jumlah serangan Periode Jan - Des 2025**  
Number of attacks Period Jan - Dec 2025

Gambar tersebut menggambarkan alur penanganan insiden keamanan siber di MIND ID selama periode Januari–Desember 2025 dalam bentuk *funnel* dan ringkasan metrik. Dari sisi kiri, terlihat bahwa organisasi menerima 27.228.843.059 *raw events*, yaitu seluruh aktivitas atau log keamanan yang masuk dari berbagai sistem. Dari jumlah yang sangat besar ini, dilakukan proses penyaringan dan analisis sehingga hanya 103.545 kejadian yang teridentifikasi sebagai *identified threats*, yaitu aktivitas yang berpotensi mengandung ancaman siber dan perlu dianalisis lebih lanjut.

Tahap berikutnya menunjukkan bahwa dari *identified threats* tersebut, hanya **58.057** yang dikonfirmasi sebagai *valid threats*, menandakan efektivitas proses korelasi dan validasi dalam menekan *false positive*. Selanjutnya, dari ancaman valid tersebut, hanya **1.755 kasus** yang meningkat menjadi *case notification* dan memerlukan penanganan operasional oleh tim keamanan. *Funnel* di bagian bawah juga menunjukkan bahwa seluruh proses pengendalian ini berhasil mencegah eskalasi lebih lanjut, terbukti dengan tidak adanya *security incident* yang tercatat, sehingga mencerminkan kematangan kapabilitas deteksi, analisis, dan respons keamanan siber di MIND IDIT.

- **Application & Data**

Sebagai *enabler* strategis yang berperan penting dalam menyelaraskan kompleksitas bisnis yang tinggi serta integrasi seluruh rantai nilai industri pertambangan, teknologi informasi menjadi fondasi utama bagi MIND ID untuk menerapkan sistem yang terstandarisasi, andal, dan sesuai dengan praktik terbaik global. Peran IT ini diwujudkan melalui inisiasi program **1ERP**, di mana pada tahun 2025, implementasi telah dimulai oleh **INALUM, MIT, dan PTBA** sebagai fase dalam *roadmap* transformasi digital Grup. Tahapan awal ini difokuskan pada pengintegrasian proses bisnis secara *end-to-end* mulai dari perencanaan strategis hingga pelaporan akhir guna menghapus silo informasi melalui pembentukan *single source of truth*. Dengan sentralisasi data ini, Grup mendapatkan kinerja secara *real-time*, sekaligus memperkuat mekanisme kontrol dan mitigasi risiko operasional. Selanjutnya untuk ANTAM dan TIMAH di tahun 2026 sedang melakukan persiapan untuk nantinya akan mulai implementasi pada tahun 2027.

Sebagai bagian dari komitmen untuk menjadi perusahaan tambang kelas dunia, MIND ID telah melakukan Transformasi Digital dalam pengelolaan Keselamatan, Kesehatan, dan Keamanan Kerja (*Health, Safety, and Security/HSS*) dengan menginisiasi pengembangan Aplikasi e-HSS (*Electronic Health, Safety, and Security*) sebagai langkah strategis transformasi digital dalam pengelolaan Keselamatan, Kesehatan, dan Keamanan Kerja (HSS) di seluruh Grup MIND ID, yang mengintegrasikan pelaporan dan investigasi kecelakaan kerja di entitas MIND ID, memantau pelaporan serta tindak lanjut investigasi di seluruh Anggota Holding, serta mengkonsolidasikan informasi kinerja pengelolaan HSS pada tingkat Grup MIND ID dalam satu ekosistem digital terstandarisasi yang dapat diakses melalui platform web dan mobile.

The figure depicts the cybersecurity incident handling flow at MIND ID during the period January–December 2025 in the form of a funnel and a summary of metrics. On the left side, it can be seen that the organization received 27,228,843,059 raw events, which are all incoming security activities or logs from various systems. Of this enormous number, a filtering and analysis process was performed, resulting in only 103,545 events being identified as identified threats, activities that have the potential to contain cyber threats and require further analysis.

The next step shows that of the identified threats, only 58,057 were confirmed as valid threats, indicating the effectiveness of the correlation and validation process in reducing false positives. Furthermore, of these valid threats, only 1,755 cases were escalated to case notifications, requiring operational handling by the security team. The funnel at the bottom also shows that this entire control process successfully prevented further escalation, as evidenced by the absence of recorded security incidents, thus reflecting the maturity of MIND IDIT's cybersecurity detection, analysis, and response capabilities.

- **Application & Data**

As a strategic enabler that plays a crucial role in aligning the high business complexity and integration of the entire mining industry value chain, information technology is the main foundation for MIND ID to implement a standardized, reliable system that aligns with global best practices. This IT role is realized through the initiation of the **1ERP** program, where in 2025, implementation has begun by **INALUM, MIT, and PTBA** as a phase in the Group's digital transformation roadmap. This initial stage focuses on integrating end-to-end business processes from strategic planning to final reporting to eliminate information silos through the establishment of a *single source of truth*. With this data centralization, the Group obtains real-time performance, while strengthening control mechanisms and mitigating operational risks. Furthermore, ANTAM and TIMAH are currently making preparations for implementation in 2026 and will begin in 2027.

As part of its commitment to becoming a world-class mining company, MIND ID has undertaken a Digital Transformation in the management of Occupational Safety, Health, and Security (HSS) by initiating the development of the e-HSS (Electronic Health, Safety, and Security) Application as a strategic step in digital transformation in the management of Occupational Safety, Health, and Security (HSS) throughout the MIND ID Group, which integrates reporting and investigation of work accidents in MIND ID entities, monitors reporting and follow-up of investigations across Holding Members, and consolidates HSS management performance information at the MIND ID Group level in a standardized digital ecosystem that can be accessed via web and mobile platforms.

Implementasi Aplikasi e-HSS memungkinkan pelaporan insiden secara real-time dengan mekanisme persetujuan berjenjang otomatis dengan memasukkan modul proses investigasi melalui metode investigasi kecelakaan kerja yang sistematis seperti SCAT dan ICAM untuk menemukan akar penyebab insiden, serta penyediaan HSS Dashboard yang memberikan visibilitas menyeluruh terhadap pemenuhan indikator kinerja leading dan lagging Indicator untuk mendukung pengambilan keputusan berbasis data dan penguatan budaya keselamatan kerja yang berkelanjutan. Selain itu, Aplikasi e-HSS juga memiliki proses pemantauan tindak lanjut berupa tindakan korektif yang perlu dilakukan berdasarkan hasil investigasi, audit, observasi, inspeksi, rapat komite K3 dan lainnya.

Selanjutnya, pengembangan e-HSS akan difokuskan pada penguatan integrasi dengan sistem terkait di seluruh unit kerja Anggota Holding, pengembangan kapabilitas analitik termasuk *predictive safety analytics* dan pemantauan kesehatan pekerja yang lebih komprehensif, serta penguatan infrastruktur DevOps dan keamanan siber guna memastikan skalabilitas, keandalan, dan integritas sistem seiring dengan pertumbuhan dan kompleksitas operasional Grup MIND ID.

Selain Digitalisasi dalam bidang *Health, Safety* dan *Security*, selanjutnya MIND ID juga melakukan digitalisasi dalam mendukung agenda dekarbonisasi nasional dan penguatan praktik *Environmental, Social, and Governance* (ESG), perusahaan telah meluncurkan inisiatif Digitalisasi Perhitungan Emisi Gas Rumah Kaca (GRK) melalui pengembangan platform digital terintegrasi untuk menghitung emisi secara terstandarisasi pada Scope 1 (energi, Industrial Processes and Product Use/IPPU, serta *Forestry and Other Land Use/FOLU*) dan Scope 2 di seluruh lini bisnis Grup MIND ID, dengan metodologi yang selaras dengan protokol global dan regulasi nasional. Implementasi platform ini memperkuat tata kelola lingkungan Perusahaan melalui penyediaan data emisi yang lebih akurat dan terverifikasi, sehingga memungkinkan identifikasi sumber emisi utama serta mendukung pengambilan keputusan strategis dalam optimalisasi energi dan efisiensi operasional. Ke depan, kapabilitas platform akan terus dikembangkan untuk mencakup perhitungan Scope 3, pembaruan fitur secara berkala, serta pemanfaatan analitik data dalam mendukung transisi energi terbarukan dan pengelolaan limbah, sebagai bagian dari upaya berkelanjutan Grup MIND ID dalam mewujudkan ekosistem ekonomi hijau yang berkelanjutan.

- **IT Infrastructure**

Saat ini MIND ID menggunakan konsep hybrid *datacenter* antara *on-premises* dan *cloud based*. Di *on-premises* mengoperasikan 27 node atau server dengan total 557 virtual server yang berjalan pada teknologi *Hyperconverged Infrastructure* (HCI). Seluruh lingkungan tersebut menggunakan dua tipe platform HCI berbeda untuk

The implementation of the e-HSS Application allows real-time incident reporting with an automatic tiered approval mechanism by including an investigation process module through systematic work accident investigation methods such as SCAT and ICAM to find the root cause of the incident, as well as the provision of an HSS Dashboard that provides comprehensive visibility into the fulfillment of leading and lagging performance indicators to support data-based decision making and strengthening a sustainable work safety culture. In addition, the e-HSS Application also has a follow-up monitoring process in the form of corrective actions that need to be taken in accordance with the results of investigations, audits, observations, inspections, K3 committee meetings and others.

Furthermore, the development of e-HSS will focus on strengthening integration with related systems across all work units of Holding Members, developing analytical capabilities including predictive safety analytics and more comprehensive worker health monitoring, as well as strengthening DevOps and cybersecurity infrastructure to ensure the scalability, reliability, and integrity of the system along with the growth and complexity of MIND ID Group's operations.

In addition to Digitalization in the field of *Health, Safety* and *Security*, MIND ID also conducts digitalization in supporting the national decarbonization agenda and strengthening *Environmental, Social, and Governance* (ESG) practices, the company has launched the Digitalization of Greenhouse Gas (GHG) Emission Calculation initiative through the development of an integrated digital platform to calculate emissions in a standardized manner in Scope 1 (energy, Industrial Processes and Product Use/IPPU, and *Forestry and Other Land Use/FOLU*) and Scope 2 across all MIND ID Group business lines, with a methodology aligned with global protocols and national regulations. The implementation of this platform strengthens the Company's environmental governance by providing more accurate and verified emission data, thus enabling the identification of key emission sources and supporting strategic decision-making in energy optimization and operational efficiency. Going forward, the platform's capabilities will continue to be developed to include Scope 3 calculations, regular feature updates, and the use of data analytics in supporting renewable energy transitions and waste management, as part of the MIND ID Group's ongoing efforts to realize a sustainable green economy ecosystem.

- **IT Infrastructure**

MIND ID currently utilizes a hybrid *datacenter* concept, combining *on-premises* and *cloud-based* data. On-premises, it operates 27 nodes or servers with a total of 557 virtual servers running on *Hyperconverged Infrastructure* (HCI) technology. The entire environment utilizes two different types of HCI platforms to meet the need for architectural

flexibility. From the cloud side, it currently serves as a Disaster Recovery Center (DRC) hosted on Amazon Cloud Services (AWS).

#### Hybrid (On-Premises dan Cloud)

Perbedaan pada platform manajemen, standar konfigurasi, dan *lifecycle management* mengharuskan infrastruktur dikelola melalui proses, alat, dan prosedur yang tidak seragam. Fragmentasi ini menyebabkan meningkatnya kebutuhan kompetensi teknis, pemisahan proses operasional harian, serta desain *Disaster Recovery* yang lebih rumit karena keterbatasan interoperabilitas antar-platform. Selain itu, kapasitas komputasi dan penyimpanan tidak dapat dipool secara terpadu, sehingga menciptakan keterbatasan dalam optimalisasi sumber daya dan efisiensi scaling.

Differences in management platforms, configuration standards, and lifecycle management require infrastructure to be managed through heterogeneous processes, tools, and procedures. This fragmentation leads to increased technical competency requirements, separation of daily operational processes, and more complex Disaster Recovery designs due to limited interoperability between platforms. Furthermore, compute and storage capacity cannot be pooled together, creating limitations in resource optimization and scaling efficiency.

Di luar aspek teknis, struktur dukungan vendor, lisensi, dan pemeliharaan juga harus dikelola secara terpisah untuk masing-masing platform. Hal ini berdampak pada peningkatan beban administratif, biaya operasional, dan kebutuhan koordinasi multi-vendor. Secara keseluruhan, kondisi ini menunjukkan urgensi untuk mempertimbangkan konsolidasi platform atau penerapan standar operasional yang lebih ketat guna menekan risiko, meningkatkan efisiensi operasional, serta memastikan keberlanjutan dan keandalan pengelolaan infrastruktur MIND ID ke depan.

Beyond technical aspects, vendor support structures, licensing, and maintenance must also be managed separately for each platform. This results in increased administrative burdens, operational costs, and the need for multi-vendor coordination. Overall, this situation highlights the urgency to consider platform consolidation or the implementation of stricter operational standards to mitigate risks, increase operational efficiency, and ensure the sustainability and reliability of MIND ID infrastructure management going forward.

Pada tahun 2025 terdapat beberapa downtime yang telah direncanakan (*Planned*) serta yang tidak direncanakan (*Unplanned*) dengan total 44.2 jam dengan detail berikut;

- *Planned*: 38.7 jam
- *Unplanned*: 5.5 jam

In 2025 there were several planned and unplanned downtimes totaling 44.2 hours with the following details;

MIND ID juga secara rutin memastikan fitur *Disaster Recovery Center* (DRC) dapat digunakan untuk menunjang operasional serta bisnis perusahaan, pada tahun 2025 telah dilakukan DR Drill test untuk mensimulasikan kondisi jika terjadi bencana pada tanggal 30 Agustus 2025 dengan total waktu 4 Jam 11 menit. Total waktu meleset 11 menit dari waktu yang di tentukan dari ketentuan selama 4 jam namun masih dalam waktu toleransi MTPD selama 6 jam.

MIND ID also routinely ensures that the Disaster Recovery Center (DRC) feature can be used to support the company's operations and business. In 2025, a DR Drill test was conducted to simulate conditions if a disaster occurs on August 30, 2025, with a total time of 4 hours and 11 minutes. The total time missed by 11 minutes from the specified time of 4 hours but was still within the MTPD tolerance time of 6 hours.

# Tata Kelola Pengadaan Barang dan Jasa

## Procurement Governance for Goods and Services

Dalam penyelenggaraan pengadaan barang dan jasa, MIND ID menerapkan Tata Kelola Pengadaan Barang dan Jasa yang berpedoman pada Peraturan Direksi No. PER-001/DIR/2025 yang selanjutnya diperbarui melalui Peraturan Direksi No. PER-008/DIR/2025 pada November 2025 tentang Pedoman Pengadaan Barang dan Jasa. Peraturan ini menjadi landasan utama dalam mengatur proses pengadaan, kewenangan, fungsi, serta hak dan kewajiban para pihak yang terlibat di lingkungan MIND ID, guna memastikan penerapan prinsip tata kelola pengadaan yang baik, transparansi, akuntabilitas, serta kepatuhan terhadap peraturan perundang-undangan dan kebijakan internal Perusahaan.

Tujuan ditetapkan Peraturan Direksi tentang Pedoman Pengadaan Barang dan Jasa adalah untuk mengatur dan menyelaraskan pelaksanaan pengadaan yang dibiayai melalui anggaran Perusahaan maupun anggaran bersama di lingkungan Grup MIND ID. Melalui pedoman ini, proses pengadaan diharapkan dapat dilaksanakan secara efektif, efisien, terintegrasi, dan berorientasi pada penciptaan nilai tambah, sekaligus mendukung penguatan tata kelola, dan pengendalian risiko.

Selain Peraturan Direksi, MIND ID menetapkan Kebijakan Pelaksana Pengadaan Barang dan Jasa Grup MIND ID sebagai bagian dari standarisasi dan implementasi *best practice* dalam pelaksanaan pengadaan di seluruh Grup MIND ID. Kebijakan ini memberikan pedoman teknis dan administratif yang terintegrasi, menyelaraskan pemahaman antara holding dan anak usaha, serta memastikan pemenuhan kebutuhan barang dan jasa secara efektif, efisien, akuntabel, dan dapat dipertanggungjawabkan, termasuk keseragaman data dalam pelaporan kinerja pengadaan.

Jenis pengadaan serta realisasi pengadaan barang dan jasa tahun 2025 di MIND ID adalah sebagai berikut:

In the implementation of procurement of goods and services, MIND ID applies Goods and Services Procurement Governance which is guided by the Board of Directors Regulation No. PER-001/DIR/2025 which was subsequently updated through the Board of Directors Regulation No. PER-008/DIR/2025 in November 2025 concerning Guidelines for Procurement of Goods and Services. This regulation is the main basis in regulating the procurement process, authority, function, as well as the rights and obligations of the parties involved in the MIND ID environment, in order to ensure the implementation of good procurement governance principles, transparency, accountability, and compliance with laws and regulations and internal Company policies.

The purpose of establishing the Board of Directors Regulation on Guidelines for Procurement of Goods and Services is to regulate and harmonize the implementation of procurement funded through the Company's budget and joint budget within the MIND ID Group. Through this guideline, the procurement process is expected to be performed effectively, efficiently, integrated, and oriented towards creating added value, while also supporting the strengthening of governance and risk control.

In addition to the Board of Directors Regulation, MIND ID establishes the MIND ID Group Goods and Services Procurement Implementation Policy as part of the standardization and implementation of best practices in procurement implementation across the MIND ID Group. This policy provides integrated technical and administrative guidelines, aligns understanding between the holding and subsidiaries, and ensures the fulfillment of goods and services needs effectively, efficiently, accountably, and responsibly, including uniformity of data in procurement performance reporting.

Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. ### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. Such key audit matters were addressed in the context of our audit of the consolidated financial statements taken as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on such key audit matters. For each of the key audit matters below, our description of how our audit addressed such key audit matters is provided in such context.

As of December 31, 2025, the Group identified impairment indicators on certain fixed assets with total carrying values amounting to approximately Rp7.6 trillion or equivalent to 2% from total consolidated assets.

Accordingly, on December 31, 2025, the Group performed an impairment test for each cash-generating unit ("CGU") that included these fixed assets, involving the estimation of the recoverable amount of each respective CGU and its comparison to the related carrying amount.

### Uji penurunan nilai aset tetap (lanjutan)

#### Penjelasan atas hal audit utama (lanjutan):

Hal ini mengharuskan manajemen dan pakar manajemen yang ditugaskan menggunakan estimasi dan pertimbangan yang signifikan, seperti menentukan model keuangan, metodologi penilaian, asumsi utama terkait harga komoditas, pengeluaran operasional di masa depan, dan tingkat diskonto dalam estimasi nilai terpulihkan tiap UPK, serta mengidentifikasi tiap UPK atas masing-masing aset tetap tersebut serta menentukan aset yang dapat diatribusikan dalam masing-masing UPK tersebut. Oleh karena itu, uji penurunan nilai ini adalah hal audit utama bagi kami. Pengungkapan atas uji penurunan nilai ini dipaparkan pada Catatan 2 dan 15 atas laporan keuangan konsolidasian terlampir.

#### Respons audit:

Kami mengevaluasi rancangan dan pengendalian utama atas proses uji penurunan nilai aset tetap. Dengan dibantu pakar auditor, kami mengevaluasi kelayakan metodologi penilaian dan model keuangan yang digunakan serta asumsi utama yang digunakan dalam estimasi jumlah terpulihkan, yaitu tingkat diskonto dan proyeksi harga jual produk dengan membandingkannya ke sumber data yang dapat diakses publik.

Kami juga mengevaluasi kelayakan proyeksi informasi keuangan yang melandasi model keuangan yang disiapkan oleh manajemen dengan membandingkannya ke catatan dan dokumen keuangan historis Grup. Kami mengevaluasi kelayakan identifikasi UPK dan alokasi aset terkait kedalam UPK terkait. Kami juga mengevaluasi kecukupan pengungkapan terkait dengan uji penurunan nilai aset tetap ini dalam catatan atas laporan keuangan konsolidasian terlampir.

## Key audit matters (continued)

### Impairment test of fixed assets (continued)

#### Description of the key audit matter (continued):

This required the management and the engaged management's expert to apply significant estimates and judgments, such as determining financial model, valuation methodology, key assumptions related to future commodity prices, future operating expenditure and the discount rate used in estimating the recoverable amount of each CGU, as well as identifying each CGU for the respective fixed assets and determining the assets attributable to each CGU. Accordingly, this impairment test is a key audit matter for us. Disclosures regarding this impairment test is described in Notes 2 and 15 to the accompanying consolidated financial statements.

#### Audit response:

We evaluated the design of the key controls over the process of impairment test for fixed assets. Assisted by our auditor's expert, we evaluated the appropriateness of the valuation methodology and financial models used, as well as the key assumptions used in estimating the recoverable amounts, such as the discount rate and projected selling prices of products by comparing them to the publicly available data source.

We also evaluated the appropriateness of the projected financial information underlying the financial model prepared by the management by comparing them with the Group's historical financial data dan documents. We evaluated the appropriateness of the CGU's identification as well as the allocation of assets to those CGUs. We also assessed the adequacy of the related disclosures for this impairment test made in the notes to the accompanying consolidated financial statements.

##### Pengakuan pendapatan

##### Penjelasan atas hal audit utama:

Pendapatan konsolidasian Grup untuk tahun yang berakhir pada tanggal 31 Desember 2025 sebesar Rp159 triliun, terutama merupakan penjualan logam mulia (emas), logam dasar (aluminium, tembaga dan nikel) serta batubara. Hal ini merupakan ukuran penting yang digunakan untuk mengevaluasi kinerja Grup dan merupakan pendorong utama profitabilitas. Pendapatan diakui pada saat kendali atas barang dialihkan kepada pelanggan pada waktu tertentu, dengan jumlah yang mencerminkan imbalan yang diharapkan Grup dapat diperoleh atas pertukaran barang tersebut.

Pendapatan mungkin diakui secara tidak tepat untuk meningkatkan hasil usaha dan pertumbuhan pendapatan sejalan dengan tujuan Grup. Karena signifikansi keuangannya, kesalahan penyajian atas pendapatan dapat berdampak signifikan pada laporan keuangan konsolidasian secara keseluruhan dan keputusan yang dibuat oleh para pemangku kepentingan. Oleh karena itu, pengakuan pendapatan merupakan hal audit utama bagi kami. Catatan 2 dan 29 pada laporan keuangan konsolidasian terlampir menyajikan pengungkapan atas pendapatan Grup.

##### Revenue recognition

##### Description of the key audit matter:

The Group's consolidated revenue for the year ended December 31, 2025 amounting to Rp159 trillion, which primarily arises from sales of precious metal (gold), base metals (aluminum, copper and nickel) and coal. It is an important measure used to evaluate the performance of the Group and is the main driver of profitability. Revenues are recognized when control of the goods is transferred to customers at a point in time, at an amount that reflects the consideration to which the Group expects to be entitled for the exchange of those goods.

Revenues may be inappropriately recognized to improve business results and achieve revenue growth in line with the objectives of the Group. Due to its financial significance, misstatement in revenue can significantly impact the overall consolidated financial statements and the decisions made by shareholders. Accordingly, revenue recognition is a key audit matter to us. Notes 2 and 29 to the accompanying consolidated financial statements provide the relevant disclosures on the Group's revenue.

### Pengakuan pendapatan (lanjutan)

#### Respons audit:

Kami mengevaluasi dan menguji rancangan dan efektivitas kendali utama atas proses pendapatan. Atas dasar sampel, kami melakukan pengujian rinci terhadap transaksi pendapatan dengan melakukan verifikasi ke dokumen pendukungnya untuk memastikan keterjadian atas pendapatan serta telah diakui sesuai dengan standar akuntansi yang berlaku dan pada periode yang tepat. Atas dasar sampel, kami melakukan pengujian rinci atas transaksi pendapatan yang dicatat menjelang dan tepat setelah tanggal 31 Desember 2025 untuk memastikan bahwa pendapatan tersebut telah diakui pada periode yang tepat.

Kami juga melakukan pengujian rinci dengan menentukan akun buku besar yang digunakan untuk mencatat entri antara pendapatan, piutang usaha, dan kas di bank, serta menggunakan korelasi (pencatatan entri jurnal) antara tiga akun tersebut untuk melakukan kembali (reperform) pencatatan entri jurnal. Kami melengkapi prosedur ini dengan pengujian informasi yang dihasilkan oleh Grup atas entri jurnal penerimaan kas untuk memastikan bahwa kas tersebut adalah kas sebenarnya yang diterima dari pelanggan. Kami juga mengevaluasi kepatutan dan kecukupan penyajian dan pengungkapan yang relevan terkait pendapatan dalam catatan atas laporan keuangan konsolidasian sesuai dengan standar akuntansi yang relevan.

## Key audit matters (continued)

### Revenue recognition (continued)

#### Audit response:

We evaluated and assessed the design and operating effectiveness of the key controls over the revenue process. On a sample basis, we also performed test of details on the revenue transactions by verifying supporting documents to ensure the occurrence of the revenue and whether they have been recognized in accordance with the applicable accounting standards and on the proper period. On a sample basis, we performed test of details on revenue transactions recorded approaching and immediately after December 31, 2025 to ensure these revenues were recognized in the correct period.

We also performed test of details by identifying which general ledger accounts are used to post entries between revenue, trade receivables, and cash in banks and use the correlation (journal entry postings) among these three accounts to reperform the posting of journal entries. We supplemented this procedure by testing the information produced by the Group over the cash journal entries to ensure they are real cash from customers. We also evaluated the appropriateness and adequacy of the presentation and the relevant disclosures related to revenue in the notes to the accompanying consolidated financial statements in accordance with the relevant accounting standards.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting, unless management either intends to liquidate the Group or to cease its operations, or has no realistic alternative but to do so.

#### Tanggung jawab auditor terhadap audit atas laporan keuangan konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.

#### Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. - Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Further, the Minister of Finance issued the Decree No. 516/KMK.06/2022 regarding the Value Determination of the Government of Republic of Indonesia's Equity Participation in the Establishment of a State-owned Enterprise in the Mining Sector.

Amendemen tersebut juga mensyaratkan pengungkapan informasi yang memungkinkan pengguna laporan keuangan untuk memahami bagaimana ketidakmampuan mata uang tersebut untuk dipertukarkan dengan mata uang lainnya memengaruhi, atau diharapkan akan memengaruhi, kinerja keuangan, posisi keuangan, dan arus kas entitas.

Amendemen ini tidak berdampak terhadap laporan keuangan konsolidasian Grup.

Selain itu, entitas diwajibkan untuk mengklasifikasikan seluruh pendapatan dan beban dalam laporan laba rugi ke dalam salah satu dari lima kategori: operasi, investasi, pendanaan, pajak penghasilan, dan operasi yang dihentikan.

Standar ini juga mensyaratkan pengungkapan ukuran kinerja yang didefinisikan manajemen, subtotal pendapatan dan beban, serta mencakup persyaratan baru terkait agregasi dan disagregasi informasi keuangan.

**d. Prinsip-prinsip konsolidasi**

Laporan keuangan konsolidasian meliputi  
laporan keuangan Perusahaan dan entitas-  
entitas anak. Kendali diperoleh bila Grup  
terekspose atau memiliki hak atas imbal hasil  
variabel dari keterlibatannya dengan *investee*  
dan memiliki kemampuan untuk  
mempengaruhi imbal hasil tersebut melalui  
kekuasaannya atas *investee*. Dengan  
demikian, investor mengendalikan *investee*  
jika dan hanya jika investor memiliki seluruh  
hal berikut ini:

- i) Kekuasaan atas *investee*, yaitu hak yang  
ada saat ini yang memberi investor  
kemampuan kini untuk mengarahkan  
aktivitas relevan dari *investee*,
- ii) Ekspose atau hak atas imbal hasil  
variabel dari keterlibatannya dengan  
*investee*, dan
- iii) Kemampuan untuk menggunakan  
kekuasaannya atas *investee* untuk  
mempengaruhi jumlah imbal hasil.

Bila Grup tidak memiliki hak suara atau hak  
serupa secara mayoritas atas suatu *investee*,  
Grup mempertimbangkan semua fakta dan  
keadaan yang relevan dalam mengevaluasi  
apakah mereka memiliki kekuasaan atas  
*investee*, termasuk:

- i) Pengaturan kontraktual dengan pemilik  
hak suara lainnya dari *investee*,
- ii) Hak yang timbul atas pengaturan  
kontraktual lain, dan
- iii) Hak suara dan hak suara potensial yang  
dimiliki Grup.

PSAK 119: Subsidiaries without Public  
Accountability - Disclosures (continued)

PSAK 119 will become effective for reporting  
periods beginning on or after January 1, 2027,  
with early application permitted. The Group  
anticipates that the new standard will have no  
material effect on the Group's financial  
statements.

**d. Principles of consolidation**

The consolidated financial statements  
comprise the financial statements of the  
Company and its subsidiaries. Control is  
achieved when the Group is exposed, or has  
rights, to variable returns from its involvement  
with the investee and has the ability to affect  
those returns through its power over the  
investee. Thus, the Group controls an investee  
if and only if the Group has all of the following:

- i) Power over the investee, that is existing  
rights that give the Group current ability to  
direct the relevant activities of the  
investee,
- ii) Exposure, or rights, to variable returns  
from its involvement with the investee, and
- iii) The ability to use its power over the  
investee to affect its returns.

When the Group has less than a majority of the  
voting or similar rights of an investee, the  
Group considers all relevant facts and  
circumstances in assessing whether it has  
power over an investee, including:

- i) The contractual arrangement with the  
other vote holders of the investee,
- ii) Rights arising from other contractual  
arrangements, and
- iii) The Group's voting rights and potential  
voting rights.

**d. Prinsip-prinsip konsolidasi (lanjutan)**

Grup menilai kembali apakah mereka mengendalikan *investee* bila fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari ketiga elemen dari pengendalian. Konsolidasi atas entitas-entitas anak dimulai sejak Grup memperoleh pengendalian atas entitas anak dan berakhir pada saat Grup kehilangan pengendalian atas entitas anak. Aset, liabilitas, penghasilan dan beban dari entitas anak yang diakuisisi pada tahun tertentu disertakan dalam laporan keuangan konsolidasian sejak tanggal Grup memperoleh kendali sampai tanggal Grup tidak lagi mengendalikan entitas anak tersebut.

Seluruh laba rugi dan setiap komponen penghasilan komprehensif lain ("PKL") diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali ("KNP"), walaupun hal ini akan menyebabkan saldo KNP yang defisit. Bila dipandang perlu, penyesuaian dilakukan terhadap laporan keuangan entitas anak untuk diselaraskan dengan kebijakan akuntansi Grup.

Seluruh aset dan liabilitas, ekuitas, penghasilan dan beban dan arus kas atas transaksi antar anggota Grup dieliminasi sepenuhnya pada saat konsolidasi.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian, dicatat sebagai transaksi ekuitas. Bila kehilangan pengendalian atas suatu entitas anak, maka Grup menghentikan pengakuan atas aset (termasuk *goodwill*), liabilitas dan komponen lain dari ekuitas terkait, dan selisihnya diakui pada laba rugi. Bagian dari investasi yang tersisa diakui pada nilai wajar.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**d. Principles of consolidation (continued)**

The Group re-assesses whether or not it controls an *investee* if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income ("OCI") are attributed to the equity holders of the parent of the Group and to the non-controlling interests ("NCI"), even if this results in the NCI having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intra-group assets and liabilities, equity, income, expenses and cash flows relation to transactions between members of the Group are eliminated in full on consolidation.

A change in the parent's ownership interest in a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it derecognizes the related assets (including *goodwill*), liabilities, NCI and other component of equity, while the difference is recognized in the profit or loss. Any investment retained is recognized at fair value.

**e. Kombinasi bisnis dan goodwill**

Kombinasi bisnis dicatat dengan menggunakan metode akuisisi. Biaya perolehan dari sebuah akuisisi diukur pada nilai agregat imbalan yang dialihkan, diukur pada nilai wajar pada tanggal akuisisi dan jumlah setiap KNP pada pihak yang diakuisisi. Untuk setiap kombinasi bisnis, Grup memilih apakah mengukur KNP pada entitas yang diakuisisi baik pada nilai wajar ataupun pada proporsi kepemilikan KNP atas aset neto yang teridentifikasi dari entitas yang diakuisisi. Biaya-biaya akuisisi yang timbul dibebankan langsung dan disertakan dalam beban administrasi.

Grup menentukan bahwa mereka telah mengakuisisi bisnis ketika rangkaian aktivitas dan aset yang diakuisisi mencakup input dan proses substantif yang bersama-sama secara signifikan berkontribusi pada kemampuan untuk menghasilkan output. Proses yang diperoleh adalah substantif jika penting bagi kemampuan untuk terus menghasilkan output, dan input yang diperoleh mencakup tenaga kerja yang terorganisir dengan keterampilan, pengetahuan, atau pengalaman yang diperlukan untuk melakukan proses itu atau secara signifikan berkontribusi pada kemampuan untuk terus menghasilkan output dan dianggap unik atau langka atau tidak dapat diganti tanpa biaya, usaha, atau penundaan yang signifikan dalam kemampuan untuk terus menghasilkan output.

Ketika melakukan akuisisi atas sebuah bisnis, Grup mengklasifikasikan dan menentukan aset keuangan yang diperoleh dan liabilitas keuangan yang diambil alih berdasarkan pada persyaratan kontraktual, kondisi ekonomi dan kondisi terkait lain yang ada pada tanggal akuisisi.

Dalam suatu kombinasi bisnis yang dilakukan secara bertahap, Grup mengukur kembali kepentingan ekuitas yang dimiliki sebelumnya pada pihak yang diakuisisi pada nilai wajar tanggal akuisisi dan mengakui keuntungan atau kerugian yang dihasilkan.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**e. Business combinations and goodwill**

*Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any NCI in the acquiree. For each business combination, the Group elects whether it measures the NCI in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are directly expensed and included in administrative expenses.*

*The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.*

*When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.*

*If the business combination is achieved in stages, the acquisition date fair value of the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.*

**e. Kombinasi bisnis dan goodwill (lanjutan)**

Setiap imbalan kontinjensi yang akan ditransfer oleh perusahaan pengakuisisi akan diakui pada nilai wajar pada tanggal akuisisi. Imbalan kontinjensi yang diklasifikasikan sebagai ekuitas tidak diukur kembali dan penyelesaian selanjutnya adalah diperhitungkan dalam ekuitas. Imbalan kontinjensi yang diklasifikasikan sebagai aset atau liabilitas yaitu instrumen keuangan dan dalam lingkup PSAK 109, diukur pada nilai wajar dengan perubahan nilai wajar yang diakui dalam laba rugi sesuai dengan PSAK 109. Imbalan kontinjensi lain yang tidak termasuk dalam PSAK 109 diukur sebesar nilai wajar pada setiap tanggal pelaporan dengan perubahan nilai wajar yang diakui pada laba rugi.

Bila pencatatan awal kombinasi bisnis belum dapat diselesaikan pada tanggal pelaporan, Grup melaporkan jumlah sementara bagi item yang pencatatannya belum dapat diselesaikan tersebut.

Periode pengukuran adalah periode setelah tanggal akuisisi yang didalamnya Grup dapat melakukan penyesuaian atas jumlah sementara yang diakui dalam kombinasi bisnis tersebut. Selama periode pengukuran, Grup mengakui penambahan aset atau liabilitas bila terdapat informasi terbaru yang diperoleh mengenai fakta dan keadaan pada tanggal akuisisi, yang bila diketahui pada saat itu, akan menyebabkan pengukuran atas aset dan liabilitas pada tanggal tersebut.

Periode pengukuran berakhir pada saat pengakuisisi menerima informasi yang diperlukan mengenai fakta dan keadaan pada tanggal akuisisi atau mengetahui bahwa informasi lainnya tidak dapat diperoleh, namun tidak lebih dari satu tahun dari tanggal akuisisi.

Pada tanggal akuisisi, goodwill awalnya diukur pada harga perolehan yang merupakan selisih lebih nilai agregat dari imbalan yang dialihkan dan jumlah setiap KNP atas selisih jumlah dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih.

(continued)**

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as equity is not re-measured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PSAK 109, is measured at fair value with the changes in fair value recognized in the statement of profit or loss in accordance with PSAK 109. Other contingent consideration that is not within the scope of PSAK 109 is measured at fair value at each reporting date with changes in fair value recognized in profit or loss.

If the initial accounting for a business combination is incomplete by the end of the reporting, the Group reports provisional amounts for the items for which the accounting is incomplete.

The measurement period is the period after the acquisition date during which the Group may adjust the provisional amounts recognized for a business combination. During the measurement period, the Group recognizes additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date.

The measurement period ends as soon as the acquirer receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable but shall not exceed one year from the acquisition date.

At acquisition date, goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for NCI over the net identifiable assets acquired and liabilities assumed.

**e. Kombinasi bisnis dan goodwill (lanjutan)**

Jika imbalan tersebut lebih rendah dari nilai wajar aset neto entitas anak yang diakuisisi, selisih tersebut diakui pada laba rugi sebagai keuntungan dari pembelian dengan diskon setelah sebelumnya manajemen melakukan penilaian atas identifikasi dan nilai wajar dari aset yang diperoleh dan liabilitas yang diambil alih.

Setelah pengakuan awal, *goodwill* diukur pada jumlah tercatat dikurangi akumulasi kerugian penurunan nilai. Untuk tujuan pengujian penurunan nilai, *goodwill* yang diperoleh dari suatu kombinasi bisnis, sejak tanggal akuisisi dialokasikan kepada setiap Unit Penghasil Kas ("UPK") dari Grup yang diharapkan akan menerima manfaat dari sinergi kombinasi tersebut, terlepas dari apakah aset atau liabilitas lain dari pihak yang diakuisisi dialokasikan kepada UPK tersebut.

Jika *goodwill* telah dialokasikan pada suatu UPK dan operasi tertentu atas UPK tersebut dihentikan, maka *goodwill* yang diasosiasikan dengan operasi yang dihentikan tersebut termasuk dalam jumlah tercatat operasi tersebut ketika menentukan keuntungan atau kerugian dari pelepasan. *Goodwill* yang dilepaskan tersebut diukur berdasarkan nilai relatif operasi yang dihentikan terhadap bagian dari UPK yang ditahan

Kombinasi bisnis entitas sepengendali

Kombinasi bisnis entitas sepengendali dicatat dengan menggunakan metode penyatuan kepentingan, dimana selisih antara jumlah imbalan yang dialihkan dengan jumlah tercatat aset neto entitas yang diakuisisi diakui sebagai bagian dari akun "Tambahan Modal Disetor" pada laporan posisi keuangan konsolidasian.

Dalam menerapkan metode penyatuan kepentingan tersebut, unsur-unsur laporan keuangan dari entitas yang bergabung disajikan seolah-olah penggabungan tersebut telah terjadi sejak awal periode entitas yang bergabung berada dalam kesepengendalian.

**e. Business combinations and goodwill (continued)**

*If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in profit or loss as gain on bargain purchase after previously assessing the identification and fair value measurement of the acquired assets and the assumed liabilities.*

*After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's Cash-generating Units ("CGU") that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are allocated to those CGUs.*

*Where goodwill forms part of a CGU and part of the operations within that CGU is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.*

Business combinations under common control

*Business combinations under common control are accounted for using the pooling-of-interests method, whereby the difference between the considerations transferred and the book value of the net assets of the acquiree is recognized as part of "Additional Paid-in Capital" account in the consolidated statement of financial position.*

*In applying the said pooling-of-interest method, the components of the financial statements of the combining entities are presented as if the combination has occurred since the beginning of the period of the combining entity become under common control.*

**f. Investasi pada entitas asosiasi**

Entitas asosiasi adalah entitas yang terhadapnya Grup memiliki pengaruh signifikan. Pengaruh signifikan adalah kekuasaan untuk berpartisipasi dalam keputusan kebijakan keuangan dan operasional *investee*, tetapi tidak mengendalikan atau mengendalikan bersama atas kebijakan tersebut.

Investasi Grup pada entitas asosiasi dicatat dengan menggunakan metode ekuitas. Dalam metode ekuitas, investasi awalnya diakui pada harga perolehan pada saat tanggal perolehan. Nilai tercatat investasi disesuaikan untuk mengakui perubahan bagian Grup atas aset neto entitas asosiasi sejak tanggal perolehan. *Goodwill* yang terkait dengan entitas asosiasi termasuk dalam jumlah tercatat investasi dan tidak diamortisasi dandiui untuk penurunan nilai secara terpisah dari investasi terkait. Ketika bagian Grup atas nilai wajar neto aset dan liabilitas teridentifikasi melebihi biaya perolehan, selisih tersebut diakui sebagai pendapatan dalam bagian laba atau rugi Grup pada periode perolehan.

Setelah tanggal perolehan, Grup melakukan penyesuaian yang diperlukan atas bagian Grup atas laba atau rugi entitas asosiasi. Penyesuaian ini mencakup depresiasi atas aset yang dapat disusutkan berdasarkan nilai wajar aset tersebut pada tanggal perolehan, serta pengakuan atas setiap rugi penurunan nilai yang berkaitan dengan *goodwill* atau aset tetap.

Laba rugi konsolidasian mencerminkan bagian dari Grup atas hasil operasi dari entitas asosiasi. Perubahan PKL dari entitas asosiasi disajikan sebagai bagian dari PKL Grup. Selain itu, bila terdapat perubahan yang diakui langsung pada ekuitas entitas asosiasi, Grup mengakui bagiannya atas perubahan, jika sesuai, dalam laporan perubahan ekuitas konsolidasian. Keuntungan atau kerugian yang belum direalisasi sebagai hasil dari transaksi-transaksi antara Grup dengan entitas asosiasi dieliminasi sesuai dengan kepemilikan dalam entitas asosiasi.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**f. Investment in associates**

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and policy decisions of the investee, but is not control or joint control over those policies.

The Group's investment in its associate is accounted for using the equity method. Under the equity method, the investment in an associate is initially recognized at cost on the date of acquisition. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate since the acquisition date. *Goodwill* relating to the associate is included in the carrying amount of the investment and is neither amortized nor tested for impairment individually. When the Group's share of the net fair value exceeds the cost, the difference is recognized as income in the Group's share of profit or loss in the period of acquisition.

After the date of acquisition, the Group makes the necessary adjustments to its share of the associate's profit or loss. These adjustments include depreciation of the depreciable assets based on their fair values at the acquisition date and recognition of any impairment losses relating to a goodwill or fixed assets.

The consolidated profit or loss reflects the Group's share of the results of operations of the associate. Any change in OCI of the associate is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the associate, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

**f. Investasi pada entitas asosiasi (lanjutan)**

Gabungan bagian Grup atas laba rugi entitas asosiasi disajikan pada muka laba rugi dan penghasilan komprehensif lain konsolidasian (sebagai laba atau rugi) di luar laba usaha dan mencerminkan laba atau rugi setelah pajak dan kepentingan nonpengendali pada entitas anak dari entitas asosiasi.

Laporan keuangan entitas asosiasi disusun atas periode pelaporan yang sama dengan Grup.

Setelah penerapan metode ekuitas, Grup menentukan apakah diperlukan untuk mengakui tambahan rugi penurunan nilai atas investasi Grup dalam entitas asosiasi. Grup menentukan pada setiap tanggal pelaporan apakah terdapat bukti yang obyektif yang mengindikasikan bahwa investasi dalam entitas asosiasi mengalami penurunan nilai. Dalam hal ini, Grup menghitung jumlah penurunan nilai berdasarkan selisih antara jumlah terpulihkan atas investasi dalam entitas asosiasi dan nilai tercatatnya dan mengakuiinya dalam laba rugi.

Pada saat kehilangan pengaruh signifikan atas entitas asosiasi, Grup mengukur dan mengakui bagian investasi tersisa pada nilai wajar. Selisih antara nilai tercatat entitas asosiasi dan nilai wajar investasi yang tersisa dan penerimaan dari pelepasan investasi diakui pada laba rugi.

**g. Investasi pada ventura bersama**

Menurut PSAK 111, pengaturan bersama diklasifikasikan sebagai operasi bersama atau ventura bersama bergantung pada hak dan kewajiban kontraktual para investor bukan struktur hukum dari pengaturan bersama. **f. Investment in associates (continued)**

*The aggregate of the Group's share of profit or loss of an associate is shown on the consolidated statement of profit or loss and other comprehensive income (as profit or loss) outside operating profit and represents profit or loss after tax and NCI in the subsidiaries of the associate.*

*The financial statements of the associate are prepared for the same reporting period of the Group.*

*After application of the equity method, the Group determines whether it is necessary to recognize an additional impairment loss on the Group's investment in its associate. The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the investment in associate and its carrying value, and recognizes the amount in profit or loss.*

*Upon loss of significant influence over the associate, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associate and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.*

**g. Investment in joint venture**

*Under PSAK 111, investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor rather than the legal structure of the joint arrangement. The Group has assessed the nature of its joint arrangement and determined them to be a joint venture. A joint venture is accounted for using the equity method, after initially being recognized at cost in the consolidated statement of financial position.*

**n. Instrumen keuangan**

Instrumen keuangan adalah setiap kontrak yang menambah nilai aset keuangan bagi satu entitas dan liabilitas keuangan atau ekuitas bagi entitas lain.

**Aset keuangan**

Pengakuan dan pengukuran awal

Aset keuangan diklasifikasikan pada saat pengakuan awal untuk selanjutnya diukur pada biaya perolehan komprehensif lain ("NWPKL"), atau nilai wajar melalui laba rugi ("NWLRL").

Pada pengakuan awal, Grup mengukur aset keuangan pada nilai wajarnya ditambah biaya transaksi, dalam hal aset keuangan tidak diukur pada NWLRL. Piutang usaha yang tidak mengandung komponen pembiayaan yang signifikan, dimana Grup telah menerapkan cara praktis, yaitu diukur pada harga transaksi yang ditentukan sesuai PSAK 115: Pendapatan dari kontrak dengan pelanggan, seperti diungkapkan pada Catatan 2j.

Agar aset keuangan diklasifikasikan dan diukur pada biaya perolehan diamortisasi atau NWPKL, aset keuangan harus menghasilkan arus kas yang semata dari pembayaran pokok dan bunga ("SPPB") dari jumlah pokok terutang. Penilaian ini disebut sebagai uji SPPB dan dilakukan pada tingkat instrumen.

Model bisnis Grup untuk mengelola aset keuangan mengacu pada bagaimana mereka mengelola aset keuangannya untuk menghasilkan arus kas. Model bisnis menentukan apakah arus kas akan dihasilkan dari penerimaan arus kas kontraktual, penjualan aset keuangan, atau keduanya.

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income ("FVOCI"), and fair value through profit or loss ("FVTPL").

At initial recognition, the Group measures a financial asset at its fair value plus transaction costs, in the case of a financial asset not at FVTPL. Trade receivables that do not contain a significant financing component, for which the Group has applied the practical expedient are measured at the transaction price determined under PSAK 115: Revenue from contracts with customers, as disclosed in Note 2j.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest ("SPPI")' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Pengukuran selanjutnya

Untuk tujuan pengukuran selanjutnya, aset keuangan diklasifikasikan dalam empat kategori:

- Aset keuangan pada biaya perolehan diamortisasi (instrumen utang),
- Aset keuangan pada NWPKL dengan pendauran laba dan rugi kumulatif (instrumen utang),
- Aset keuangan pada NWPKL tanpa pendauran laba dan rugi kumulatif setelah penghentian pengakuan (instrumen ekuitas), dan
- Nilai wajar melalui laba rugi (NWLR).

Pengukuran selanjutnya dari aset keuangan tergantung kepada klasifikasi masing-masing aset keuangan seperti berikut ini:

Aset keuangan pada biaya perolehan diamortisasi (instrumen utang)

Grup mengukur aset keuangan pada biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

- Aset keuangan dimiliki dalam model bisnis dengan tujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual, dan
- Persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang merupakan SPPB dari jumlah pokok terutang.

Aset keuangan yang diukur pada biaya perolehan diamortisasi selanjutnya diukur dengan menggunakan metode suku bunga efektif ("SBE") dan menjadi subjek penurunan nilai. Keuntungan dan kerugian diakui dalam laba rugi pada saat aset dihentikan pengakuannya, dimodifikasi atau diturunkan nilainya.

Aset keuangan Grup yang diukur pada biaya perolehan diamortisasi termasuk piutang usaha dan lain-lain dan pinjaman kepada pihak berelasi yang merupakan bagian dari aset keuangan tidak lancar lainnya.

Subsequent measurement

*For purposes of subsequent measurement, financial assets are classified in four categories:*

- *Financial assets at amortized cost (debt instruments),*
- *Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments),*
- *Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), and*
- *Fair value through profit or loss (FVTPL).*

*The subsequent measurement of financial assets depends on their classification as described below:*

Financial assets at amortized cost (debt instruments)

*The Group measures financial assets at amortized cost if both of the following conditions are met:*

- *The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows, and*
- *The contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding.*

*Financial assets at amortized cost are subsequently measured using the effective interest ("EIR") method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.*

*The Group's financial assets at amortized cost includes trade and other receivables and loans to related parties under other non-current financial assets.*

Aset keuangan pada NWPKL dengan  
pendauran laba dan rugi kumulatif (instrumen  
utang)

Untuk instrumen utang yang diukur pada NWPKL, pendapatan bunga, revaluasi mata uang asing dan kerugian penurunan nilai atau pembalikan diakui dalam laporan laba rugi dan dihitung dengan cara yang sama seperti untuk aset keuangan yang diukur pada biaya perolehan diamortisasi. Perubahan nilai wajar yang tersisa diakui di PKL. Pada saat penghentian pengakuan, perubahan nilai wajar kumulatif yang diakui di PKL direklasifikasi ke laba rugi.

Instrumen utang Grup yang diukur pada NWPKL termasuk investasi pada instrumen utang dengan kuotasi yang termasuk dalam aset keuangan tidak lancar lainnya.

Aset keuangan pada NWPKL tanpa pendauran  
laba dan rugi kumulatif setelah penghentian  
pengakuan (instrumen ekuitas)

Pada pengakuan awal, Grup dapat memilih untuk menetapkan klasifikasi yang tidak dapat dikembalikan atas investasi pada instrumen ekuitas sebagai NWPKL jika memenuhi definisi ekuitas sesuai PSAK 232: Instrumen keuangan: Penyajian dan tidak dimiliki untuk diperdagangkan. Klasifikasi ditentukan atas basis instrumen per instrumen.

Keuntungan dan kerugian atas aset keuangan ini tidak pernah didaur ke laba rugi, dan aset keuangan ini tidak menjadi subjek penurunan nilai. Dividen diakui sebagai penghasilan lain-lain dalam laba rugi pada saat hak atas pembayaran telah ditetapkan.

Grup memilih untuk mengklasifikasi secara takterbatalkan investasi ekuitas yang tidak terdaftar di bursa masuk dalam kategori ini.

Financial assets at FVOCI with recycling of  
cumulative gains and losses (debt instruments)

For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the statement of profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value change recognized in OCI is recycled to profit or loss.

The Group's debt instruments at FVOCI include investments in quoted debt instruments included under other non-current financial assets.

Financial assets designated at FVOCI with no  
recycling of cumulative gains and losses upon  
derecognition (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its investments in equity instruments at FVOCI when they meet the definition of equity under PSAK 232: Financial instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss, and these financial assets are not subject to impairment assessment. Dividends are recognized as other income in the profit or loss when the right of payment has been established.

The Group elected to classify irrevocably its non-listed equity investments under this category.

Aset keuangan pada nilai wajar melalui laba rugi ("NWLR")

Aset keuangan pada NWLR tercatat dalam laporan posisi keuangan pada nilai wajar dengan perubahan neto nilai wajar yang diakui dalam laporan laba rugi.

Kategori ini termasuk instrumen derivatif dan investasi ekuitas yang diperdagangkan di bursa efek yang mana oleh Grup diklasifikasikan secara takterbatalkan pada NWPKL. Dividen atas investasi ekuitas yang tercatat di bursa diakui sebagai pendapatan lain-lain dalam laporan laba rugi pada saat hak atas pembayaran telah ditetapkan.

Derivative melekat dalam kontrak hibrida, dengan liabilitas keuangan atau kontrak utama non-keuangan, dipisahkan dari kontrak utamanya dan dicatat sebagai derivatif terpisah jika: karakteristik ekonomi dan risiko tidak berkaitan erat dengan kontrak utamanya; instrumen terpisah dengan persyaratan yang sama dengan derivatif melekat akan memenuhi definisi derivatif; dan kontrak hibrida ini tidak diukur pada NWLR. Derivatif melekat diukur pada nilai wajar dengan perubahan nilai wajar diakui dalam laba rugi. Penilaian ulang hanya terjadi jika terdapat perubahan baik dalam persyaratan kontrak yang secara signifikan mengubah arus kas yang sebaliknya akan diperlukan, atau reklasifikasi aset keuangan diluar dari kategori NWLR.

Subsequent measurement (continued)

Financial assets at fair value through profit or loss ("FVTPL")

Financial assets at FVTPL are carried in the statement of financial position at fair value with net changes in fair value recognized in the statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at FVOCI. Dividends on listed equity investments are recognized as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at FVTPL. Embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the FVTPL category.

Penghentian pengakuan

Aset keuangan (atau, sesuai dengan kondisinya, bagian dari aset keuangan atau bagian dari kelompok aset keuangan serupa) terutama dihentikan pengakuannya (yaitu, dihapuskan dari laporan posisi keuangan konsolidasian Grup) ketika:

- Hak untuk menerima arus kas dari aset telah berakhir; atau
- Grup telah mengalihkan haknya untuk menerima arus kas dari aset atau menanggung kewajiban untuk membayar arus kas yang diterima tersebut secara penuh tanpa penundaan yang material kepada pihak ketiga berdasarkan kesepakatan 'pass-through', dan salah satu dari (a) Grup telah mengalihkan secara substansial seluruh risiko dan manfaat atas aset, atau (b) Grup tidak mengalihkan maupun tidak memiliki secara substansial atas seluruh risiko dan manfaat atas aset, tetapi telah mengalihkan kendali atas aset.

Ketika Grup telah mengalihkan haknya untuk menerima arus kas dari suatu aset atau telah menandatangani kesepakatan 'pass-through', Grup mengevaluasi jika, dan sejauh mana, Grup masih mempertahankan risiko dan manfaat atas kepemilikan aset. Ketika Grup tidak mengalihkan maupun seluruh risiko dan manfaat atas aset dipertahankan secara substansial, maupun tidak mengalihkan kendali atas aset, Grup tetap mengakui aset yang dialihkan sebesar keterlibatan berkelanjutan. Dalam kasus tersebut, Grup juga mengakui liabilitas terkait. Aset yang dialihkan dan liabilitas terkait diukur dengan basis yang mencerminkan hak dan kewajiban yang masih dipertahankan oleh Grup.

Keterlibatan berkelanjutan dalam bentuk jaminan atas aset yang ditransfer, diukur pada nilai yang lebih rendah antara jumlah tercatat awal aset dan jumlah maksimum imbalan yang dibutuhkan oleh Grup untuk membayar kembali.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Penurunan nilai

Grup mengakui penyisihan Kerugian Kredit Ekspektasian (KKE) untuk semua instrumen utang yang bukan diukur pada NWLR dan kontrak jaminan keuangan. KKE ditentukan atas perbedaan antara arus kas kontraktual menurut kontrak dan semua arus kas yang diharapkan akan diterima oleh Grup, yang didiskontokan dengan perkiraan SBE orisinal. Arus kas yang diharapkan mencakup setiap arus kas dari penjualan agunan yang dimiliki atau perbaikan kredit lainnya yang merupakan bagian yang tidak terpisahkan dalam ketentuan kontrak.

KKE diakui dalam dua tahap. Bila belum terdapat peningkatan risiko kredit signifikan sejak pengakuan awal, KKE diakui untuk kerugian kredit yang dihasilkan dari peristiwa gagal bayar yang mungkin terjadi dalam jangka waktu 12 bulan ke depan (KKE 12 bulan). Namun, bila telah terdapat peningkatan signifikan risiko kredit sejak pengakuan awal, penyisihan kerugian diakui untuk kerugian kredit yang diperkirakan selama sisa umur aset, tanpa mempertimbangkan waktu gagal bayar (KKE sepanjang umurnya).

Karena aset kontrak, piutang usaha dan piutang lain-lainnya tidak memiliki komponen pembiayaan signifikan, Grup menerapkan pendekatan yang disederhanakan dalam perhitungan KKE. Oleh karena itu, Grup tidak menelusuri perubahan dalam risiko kredit, namun justru mengakui penyisihan kerugian berdasarkan KKE sepanjang umurnya pada setiap tanggal pelaporan. Grup membentuk matriks provisi berdasarkan pengalaman kerugian kredit masa lampau, disesuaikan dengan perkiraan masa depan (*forward-looking*) atas faktor yang spesifik untuk debitur dan lingkungan ekonomi.

Impairment

*The Group recognizes an allowance for ECL for all debt instruments not held at FVTPL and financial guarantee contracts. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original EIR. The expected cash flows include any cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms*

*ECLs are recognized in two stages. When there has not been a significant increases in credit risks since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). But, when there have been significant increases in credit risks since initial recognition, a loss allowance is recognized for credit losses expected over the remaining life of the asset, irrespective of timing of the default (a lifetime ECL).*

*Because its contract assets, trade and other receivables do not contain significant financing component, the Group applies a simplified approach in calculating ECL. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECL at each reporting date. The Group established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.*

Penurunan nilai (lanjutan)

Untuk instrumen utang pada NWPKL, Grup menerapkan penyederhanaan sehubungan dengan risiko kredit rendah. Setiap tanggal pelaporan, Grup mengevaluasi apakah instrumen utang tersebut dianggap memiliki risiko kredit rendah dengan menggunakan semua informasi yang wajar dan terdorong yang tersedia tanpa biaya atau usaha yang berlebihan. Dalam melakukan evaluasi tersebut, Grup menilai kembali peringkat kredit internal dari instrumen utang tersebut. Selain itu, Grup mempertimbangkan bahwa telah terjadi peningkatan risiko kredit secara signifikan ketika pembayaran kontraktual lebih dari 90 hari dari tanggal jatuh tempo.

Instrumen utang Grup pada NWPKL hanya terdiri dari obligasi kuotasi yang dinilai dalam kategori investasi teratas (Sangat Baik dan Baik) dan, oleh karena itu, dianggap sebagai investasi dengan risiko kredit rendah. Merupakan kebijakan Grup untuk mengukur KKE pada instrumen tersebut setiap 12 bulan. Namun, jika terjadi peningkatan risiko kredit secara signifikan sejak diterbitkan, penyisihan akan didasarkan pada KKE sepanjang umurnya. Grup menggunakan peringkat baik untuk menentukan apakah risiko kredit dalam instrumen utang telah meningkat secara signifikan dan juga untuk mengestimasi KKE.

Grup menganggap aset keuangan dalam gagal bayar ketika pembayaran kontraktual telah lewat 90 hari dari tanggal jatuh tempo. Namun, dalam kasus tertentu, Grup juga dapat mempertimbangkan aset keuangan menjadi gagal bayar ketika informasi internal atau eksternal menunjukkan bahwa besar kemungkinan Grup tidak menerima jumlah kontraktual terutang secara penuh sebelum memperhitungkan perbaikan kredit yang dimiliki oleh Grup. Aset keuangan dihapuskan jika tidak terdapat ekspektasi yang wajar untuk memulihkan arus kas kontraktual.

Impairment (continued)

For debt instruments at FVOCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 90 days past due.

The Group's debt instruments at FVOCI comprise solely of quoted bonds that are graded in the top investment category (Very Good and Good) and, therefore, are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Pengakuan dan pengukuran awal

Liabilitas keuangan diklasifikasikan, pada pengakuan awal, sebagai liabilitas keuangan yang diukur pada NWLR, utang dan pinjaman atau derivatif ditetapkan sebagai instrumen lindung nilai pada lindung nilai yang efektif, sesuai dengan kondisinya.

Semua liabilitas keuangan diakui pada nilai wajar saat pengakuan awal dan, dalam hal liabilitas keuangan diklasifikasi sebagai utang dan pinjaman, diakui pada nilai wajar setelah dikurangi biaya transaksi yang dapat diatribusikan secara langsung.

Grup menetapkan liabilitas keuangannya sebagai utang dan pinjaman, seperti utang usaha dan lain-lain, akrual, liabilitas imbalan kerja jangka pendek, pinjaman bank, utang obligasi dan liabilitas *supplier financing*.

Pengukuran selanjutnya

Pengukuran selanjutnya dari liabilitas keuangan ditentukan oleh klasifikasinya sebagai berikut:

**Liabilitas keuangan pada NWLR**

Liabilitas keuangan yang diukur pada NWLR mencakup liabilitas keuangan yang dimiliki untuk diperdagangkan dan liabilitas keuangan yang diukur pada NWLR yang ditetapkan saat pengakuan awal.

Liabilitas keuangan diklasifikasikan sebagai dimiliki untuk diperdagangkan, jika liabilitas keuangan tersebut diperoleh untuk tujuan dibeli kembali dalam waktu dekat. Kategori ini juga mencakup instrumen keuangan derivatif yang dilakukan oleh Grup dimana instrumen derivatif tersebut tidak ditetapkan sebagai instrumen lindung nilai dalam hubungan lindung nilai sebagaimana didefinisikan dalam PSAK 109: Instrumen keuangan. Derivatif melekat yang dipisahkan juga diklasifikasikan sebagai dimiliki untuk diperdagangkan kecuali ditetapkan sebagai instrumen lindung nilai yang efektif.

Initial recognition and measurement

*The Group designates its financial liabilities as loans and borrowings, such as trade and other payables, accrued expense, short-term employee benefit liabilities, bank borrowings and supplier financing liabilities.*

Subsequent measurement

*The subsequent measurement of financial liabilities depends on their classification as described below:*

**Financial liabilities at FVTPL**

*Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.*

*Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Liabilitas keuangan pada NWLR (lanjutan)

Keuntungan atau kerugian atas liabilitas yang dimiliki untuk diperdagangkan diakui dalam laporan laba rugi.

Liabilitas keuangan yang diukur pada NWLR yang ditetapkan saat pengakuan awal harus memenuhi kriteria dalam PSAK 109 dan ditetapkan pada tanggal pengakuan awal. Grup tidak menetapkan liabilitas keuangan apapun sebagai liabilitas yang diukur pada NWLR.

Liabilitas keuangan pada biaya perolehan diamortisasi (Utang dan pinjaman)

**i) Utang dan pinjaman jangka panjang yang dikenakan bunga**

Setelah pengakuan awal, utang dan pinjaman jangka panjang yang berbunga diukur pada biaya perolehan yang diamortisasi dengan menggunakan metode SBE. Pada tanggal pelaporan, biaya bunga yang masih harus dibayar dicatat secara terpisah, dari pokok pinjaman terkait, dalam bagian liabilitas jangka pendek. Keuntungan dan kerugian diakui pada laba rugi ketika liabilitas dihentikan pengakuannya maupun melalui proses amortisasi menggunakan metode SBE.

Biaya amortisasi dihitung dengan mempertimbangkan setiap diskonto atau premium atas akusisi dan komisi atau biaya yang merupakan bagian tidak terpisahkan dari SBE. Amortisasi SBE dicatat sebagai beban keuangan pada laba rugi.

**ii) Utang dan akrual**

Liabilitas untuk utang usaha dan utang lain-lain jangka pendek, biaya masih harus dibayar dan liabilitas imbalan kerja jangka pendek dinyatakan sebesar jumlah tercatat (jumlah nosional), yang kurang lebih sebesar nilai wajarnya.

Subsequent measurement (continued)

Financial liabilities at FVTPL (continued)

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in PSAK 109 are satisfied. The Group has not designated any financial liability as at FVTPL.

Financial liabilities at amortized cost (Loans and borrowings)

**i) Long-term interest-bearing loans and borrowings**

Subsequent to initial recognition, long-term interest-bearing loans and borrowings are measured at amortized acquisition costs using EIR method. At the reporting dates, accrued interest is recorded separately from the associated borrowings within the current liabilities section. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance costs in the profit or loss.

**ii) Payables and accruals**

Liabilities for current trade and other accounts payable, accrued expenses and short-term employee benefit liability are stated at carrying amounts (notional amounts), which approximate their fair values.

Biaya pengembangan yang dikeluarkan oleh atau atas nama Grup diakumulasikan secara terpisah untuk setiap *area of interest* pada saat cadangan terpulihkan yang secara ekonomis dapat diidentifikasi. Biaya tersebut termasuk biaya yang dapat diatribusikan secara langsung pada konstruksi tambang dan infrastruktur terkait, tidak termasuk biaya aset berwujud dan hak atas tanah yang dicatat sebagai aset tetap.

Derecognition

*A financial liability is derecognized when the obligation under the contract is discharged or cancelled or expires.*

*When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as derecognition of the original liability and recognition of a new liability, and the difference in the respective carrying amounts is recognized in the profit or loss.*

**Offsetting of financial instruments**

*Financial assets and financial liabilities are offset, and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.*

**o. Mining properties**

*Development expenditure incurred by or on behalf of the Group is accumulated separately for each area of interest in which economically recoverable resources have been identified. Such expenditure comprises costs directly attributable to the construction of a mine and the related infrastructure and excludes physical assets and land rights, which are recorded as fixed assets.*

**o. Properti pertambangan (lanjutan)**

Aktivitas eksplorasi dan evaluasi meliputi pencarian sumber daya mineral setelah Grup memperoleh hak hukum untuk mengeksplorasi suatu wilayah tertentu dan menyelesaikan penentuan kelayakan teknis dan penilaian komersial atas sumber daya mineral teridentifikasi. Ketika keputusan pengembangan telah diambil, jumlah tercatat aset eksplorasi dan evaluasi pada *area of interest* tertentu dipindahkan sebagai tambang dalam pengembangan pada "properti pertambangan" dan digabung dengan pengeluaran biaya pengembangan selanjutnya.

Tambang dalam pengembangan direklasifikasi ke Properti pertambangan - tambang yang berproduksi ("tambang yang berproduksi") pada akhir tahap *commissioning*, ketika tambang tersebut mampu beroperasi sesuai dengan maksud manajemen.

Tambang dalam pengembangan tidak disusutkan sampai direklasifikasi menjadi tambang yang berproduksi.

Ketika timbul biaya pengembangan lebih lanjut atas properti pertambangan setelah dimulainya produksi, maka biaya tersebut akan dicatat sebagai bagian dari tambang yang berproduksi apabila terdapat kemungkinan besar tambahan manfaat ekonomis masa depan sehubungan dengan biaya tersebut akan mengalir ke Grup. Apabila tidak, biaya tersebut dibebankan sebagai biaya produksi.

Tambang yang berproduksi diamortisasi dengan menggunakan metode unit produksi, dengan perhitungan terpisah yang dibuat untuk setiap *area of interest*.

Properti pertambangan teridentifikasi yang diperoleh melalui suatu kombinasi bisnis pada awalnya diakui sebagai aset sebesar nilai wajarnya. Pengeluaran pengembangan yang terjadi setelah akuisisi properti pertambangan dicatat berdasarkan kebijakan akuntansi yang dijelaskan di atas.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**o. Mining properties (continued)**

Exploration and evaluation activity involves the search for mineral resources after the Group has obtained legal rights to explore in a specific area and completed the determination of technical feasibility and the assessment of commercial viability of an identified resource. Once a development decision has been taken, the carrying amount of the exploration and evaluation assets in respect of the area of interest is transferred to mines under development under "mining properties" and aggregated with the subsequent development expenditure.

Mines under development are reclassified as Mining properties - mines in production ("mines in production") at the end of the commissioning phase, when the mine is capable of operating in the manner intended by management.

No depreciation is recognized for mines under development until they are reclassified as mines in production.

When further development expenditure is incurred on mining properties after the commencement of production, the expenditure is carried forward as part of mines in production when it is probable that additional future economic benefits associated with the expenditure will flow to the Group. Otherwise, such expenditure is classified as a cost of production.

Mines in production are amortized using the units-of-production method, with separate calculations being made for each area of interest.

Identifiable mining properties acquired in a business combination are initially recognized as assets at their fair value. Development expenses incurred subsequent to the acquisition of the mining properties are accounted for in accordance with the policy outlined above.

**o. Properti pertambangan (lanjutan)**

Tambang dalam pengembangan dan tambang yang berproduksi diuji penurunan nilainya sesuai dengan kebijakan akuntansi Catatan 2r.

**p. Aset tetap**

**Tanah**

Grup menganalisis fakta dan keadaan untuk masing-masing jenis hak atas tanah dalam menentukan akuntansi untuk masing-masing hak atas tanah tersebut sehingga dapat merepresentasikan dengan tepat suatu kejadian atau transaksi ekonomis yang mendasarinya. Jika hak atas tanah tersebut tidak mengalihkan pengendalian atas aset pendasar kepada Grup, melainkan mengalihkan hak untuk menggunakan aset pendasar, Grup menerapkan perlakuan akuntansi atas transaksi tersebut sebagai sewa berdasarkan PSAK 116: Sewa. Jika hak atas tanah secara substansi menyerupai pembelian tanah, maka Grup menerapkan PSAK 216: Aset Tetap.

Tanah tidak disusutkan, kecuali untuk tanah tertentu di mana Grup telah menentukab bahwa tanah tersebut memiliki umur ekonomis yang terbatas karena digunakan untuk operasi utama Grup yang terletak di daerah terpencil. Tanah tersebut disusutkan menggunakan metode garis lurus sesuai perkiraan panjang jadwal operasi utama Grup di lokasi tanah tersebut.

**Aset tetap lainnya**

Aset tetap lainnya pada awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan agar aset siap digunakan.

Setelah pengakuan awal, aset ini dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan kerugian penurunan nilai.

POLICIES INFORMATION (continued)**

**o. Mining properties (continued)**

*Mines under development and mines in production are tested for impairment in accordance with the accounting policy described in Note 2r.*

**p. Fixed assets**

**Land**

*The Group analyses the facts and circumstances for each type of land rights in determining the accounting for each of these land rights so that it can accurately represent the underlying economic event or transaction. If the land rights do not transfer control of the underlying assets to the Group, but give the rights to use the underlying assets, the Group applies the accounting treatment of these transactions as leases under PSAK 116: Leases. If the land rights are substantially similar to land purchases, the Group applies PSAK 216: Fixed Assets.*

*Land is not depreciated, except for certain land where the Group has determined that the land has limited economic lives because the land is used for the Group's main operation located in remote area. Such land is depreciated using the straight-line method over the estimated operation period of the Group where the land is located.*

**Other fixed assets**

*All other fixed assets are initially recognized at cost, which comprises its purchase price and any costs directly attributable in bringing the asset to its working condition and to the location where it is intended to be used.*

*Subsequent to initial recognition, these assets are carried at cost less any subsequent accumulated depreciation and impairment losses.*

<sup>\*)</sup> Umur aset tetap 50 tahun hanya untuk aset tetap yang ada di Inalum.

Jumlah tercatat aset ini direviu atas penurunan nilai jika terdapat peristiwa atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat mungkin tidak dapat seluruhnya terealisasi.

Jumlah tercatat komponen dari suatu aset dihentikan pengakuannya pada saat dilepaskan atau saat sudah tidak ada lagi manfaat ekonomi masa depan yang diharapkan dari penggunaan maupun pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan tersebut (ditentukan sebesar selisih antara jumlah hasil pelepasan neto dan jumlah tercatatnya) dimasukkan ke dalam laba rugi pada tahun penghentian pengakuan tersebut dilakukan.

Nilai residu, umur manfaat dan metode penyusutan aset tetap dievaluasi setiap akhir tahun pelaporan dan disesuaikan secara prospektif jika dipandang perlu.

Aset tetap dalam penyelesaian dicatat sebesar biaya perolehan, yang mencakup kapitalisasi beban pinjaman dan biaya-biaya lainnya yang terjadi sehubungan dengan pendanaan aset tetap dalam penyelesaian tersebut. Akumulasi biaya perolehan akan direklasifikasi ke akun "Aset Tetap" yang bersangkutan pada saat aset tetap tersebut telah selesai dikerjakan dan siap untuk digunakan. Aset tetap dalam penyelesaian tidak disusutkan sampai memenuhi syarat pengakuan sebagai aset tetap seperti diungkapkan di atas.

**Aset tetap lainnya (lanjutan)**

Beban pemeliharaan dan perbaikan dibebankan pada laba rugi pada saat terjadinya. Beban pemugaran dan penambahan dalam jumlah besar dikapitalisasi kepada jumlah tercatat aset terkait bila besar kemungkinan bagi Grup manfaat ekonomi masa depan menjadi lebih besar dari standar kinerja awal yang ditetapkan sebelumnya dan disusutkan sepanjang sisa masa manfaat aset terkait.

**q. Properti investasi**

Properti investasi merupakan tanah atau bangunan yang dimiliki untuk sewa operasi, dan tidak digunakan maupun dijual dalam kegiatan operasi. Properti investasi juga mencakup properti yang sedang dikonstruksi atau dikembangkan untuk digunakan sebagai properti investasi di masa depan.

Properti investasi diukur pada awalnya sebesar biaya perolehan, termasuk biaya transaksi. Setelah pengakuan awal, properti investasi dinyatakan sebesar nilai wajar yang mencerminkan kondisi pasar pada tanggal pelaporan. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar properti investasi dimasukkan dalam laba rugi pada periode terjadinya, termasuk dampak pajak yang terkait. Nilai wajar ditentukan berdasarkan penilaian tahunan yang dilakukan oleh penilai independen eksternal terakreditasi yang menerapkan Standar Penilaian Indonesia yang diterbitkan oleh Masyarakat Profesi Penilai Indonesia (MAPPI).

Properti investasi dihentikan pengakuannya ketika telah dilepaskan (yaitu, pada tanggal penerima memperoleh kendali) atau ketika tidak lagi digunakan secara permanen dan tidak ada manfaat ekonomi masa depan yang diharapkan dari pelepasannya. Selisih antara hasil pelepasan neto dan jumlah tercatat aset diakui dalam laba rugi pada periode penghentian pengakuan. Dalam menentukan jumlah imbalan dari penghentian pengakuan properti investasi, Grup mempertimbangkan dampak dari imbalan variabel, keberadaan komponen pembiayaan yang signifikan, imbalan non-kas, dan imbalan yang harus dibayar kepada pembeli (jika ada).

POLICIES INFORMATION (continued)**

**p. Fixed assets (continued)**

**Others fixed assets (continued)**

*Repairs and maintenance expenses are taken to the profit or loss when they are incurred. The cost of major renovation and restoration is included in the carrying amount of the related asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group and is depreciated over the remaining useful life of the related asset.*

**q. Investment properties**

*Investment properties represent land or buildings that are held for operating lease, rather than for use or sale in the ordinary course of business. Investment property also includes property that is being constructed or developed for future use as an investment property.*

*Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in profit or loss in the period in which they arise, including the corresponding tax effect. Fair values are determined based on an annual valuation performed by an accredited external independent valuer applying Indonesian Valuation Standards issued by the Indonesian Society of Appraisers (MAPPI).*

*Investment properties are derecognized either when they have been disposed of (i.e., at the date the recipient obtains control) or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of derecognition. In determining the amount of consideration from the derecognition of investment property the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer (if any).*

**q. Properti investasi (lanjutan)**

Transfer dilakukan ke (atau dari) properti investasi hanya jika ada perubahan penggunaan. Untuk pengalihan dari properti investasi ke properti yang digunakan sendiri, biaya yang diperhitungkan untuk akuntansi selanjutnya adalah nilai wajar pada tanggal perubahan penggunaan. Jika properti yang digunakan sendiri menjadi properti investasi, Grup mencatat properti tersebut sesuai dengan kebijakan yang tercantum dalam aset tetap sampai dengan tanggal perubahan penggunaan.

**r. Penurunan nilai aset non-keuangan**

Pada setiap tanggal pelaporan, Grup menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat pengujian penurunan nilai aset (yaitu aset takberwujud dengan umur manfaat tidak terbatas, aset takberwujud yang belum dapat digunakan, atau *goodwill* yang diperoleh dalam suatu kombinasi bisnis) diperlukan, maka Grup membuat estimasi formal jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau UPK dikurangi biaya untuk menjual dengan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain. Jika nilai tercatat aset atau UPK lebih besar daripada jumlah terpulihkannya, maka aset tersebut dipertimbangkan mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar jumlah terpulihkannya.

Grup mendasarkan perhitungan penurunan nilai pada rincian perhitungan anggaran atau prakiraan yang disusun secara terpisah untuk masing-masing UPK Grup atas aset individual yang dialokasikan. Perhitungan anggaran dan prakiraan ini secara umum mencakup periode selama lima atau sepuluh tahun sesuai dengan stabilitas arus kas perkebunan terkait. Setelah periode yang dianggarkan proyeksi arus kas diestimasi dengan melakukan ekstrapolasi proyeksi yang dianggarkan dengan menggunakan tingkat pertumbuhan jangka panjang yang tetap.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**q. Investment properties (continued)**

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

**r. Impairment of non-financial assets**

The Group assesses at the each reporting date whether there is an indication that an asset may be impaired. If any such indication exists or when annual impairment testing for an asset (i.e. an intangible asset with an indefinite useful life, an intangible asset not yet available for use, or goodwill acquired in a business combination) is required, the Group makes an estimate of the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

The Group bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five or ten years in accordance with the stability of each estate's cash flows. Beyond the forecasted period, the estimated cash flows are determined by extrapolating the forecasted cash flows using a steady long term growth rate.

**r. Penurunan nilai aset non-keuangan  
(lanjutan)**

Dalam menghitung nilai pakai, estimasi arus kas masa depan neto didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset. Dalam menentukan nilai wajar dikurangi biaya untuk menjual, digunakan harga penawaran pasar terakhir, jika tersedia. Jika tidak terdapat transaksi tersebut, Grup menggunakan model penilaian yang sesuai untuk menentukan nilai wajar aset. Perhitungan-perhitungan ini dikuatkan oleh penilaian berganda atau indikator nilai wajar yang tersedia.

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laba rugi sesuai dengan kategori biaya yang konsisten dengan fungsi dari aset yang diturunkan nilainya.

Untuk aset selain *goodwill*, penilaian dilakukan pada akhir setiap tanggal pelaporan apakah terdapat indikasi bahwa rugi penurunan nilai yang telah diakui dalam tahun sebelumnya mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka entitas mengestimasi jumlah terpulihkan aset atau UPK tersebut. Kerugian penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain *goodwill* dibalik hanya jika terdapat perubahan asumsi-asumsi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Dalam hal ini, jumlah tercatat aset dinaikkan ke jumlah terpulihkannya. Pembalikan tersebut dibatasi sehingga jumlah tercatat aset tidak melebihi jumlah terpulihkannya maupun jumlah tercatat, neto setelah penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada periode/tahun sebelumnya. Pembalikan rugi penurunan nilai diakui pada laba rugi. Setelah pembalikan tersebut, penyusutan aset tersebut disesuaikan di periode mendatang untuk mengalokasikan jumlah tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**r. Impairment of non-financial assets  
(continued)**

In assessing the value in use, the estimated net future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used to determine the fair value of the assets. These calculations are corroborated by valuation multiples or other available fair value indicators.

Impairment losses of continuing operations, if any, are recognized in the profit or loss in those expense categories consistent with the functions of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the asset's or CGU's recoverable amount is estimated. A previously recognized impairment loss for an asset other than goodwill is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The reversal is limited so that the carrying amount of the assets does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior periods/years. Reversal of an impairment loss is recognized in the profit or loss. After such a reversal, the depreciation charge on the said asset is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

**r. Penurunan nilai aset non-keuangan  
(lanjutan)**

*Goodwill* diuji untuk penurunan nilai setiap tahun dan ketika terdapat indikasi bahwa nilai tercatatnya mungkin mengalami penurunan nilai. Penurunan nilai bagi *goodwill* ditetapkan dengan menentukan jumlah tercatat tiap UPK (atau kelompok UPK) terkait dari *goodwill* tersebut. Jika jumlah terpulihkan UPK kurang dari jumlah tercatatnya, rugi penurunan nilai diakui. Rugi penurunan nilai terkait *goodwill* tidak dapat dibalik pada tahun berikutnya.

**s. Biaya pinjaman**

Biaya pinjaman terdiri dari beban bunga dan biaya lain yang ditanggung Grup sehubungan dengan peminjaman dana. Biaya pinjaman yang dapat diatribusikan langsung dengan perolehan, pembangunan atau pembuatan aset kualifikasian dikapitalisasi sebagai bagian biaya perolehan aset tersebut. Biaya pinjaman lainnya diakui sebagai beban pada saat terjadi Grup.

**t. Sewa**

Grup menilai pada saat inisiasi kontrak apabila kontrak tersebut adalah, atau mengandung, sewa. Yaitu, bila kontrak tersebut memberikan hak untuk mengendalikan penggunaan aset identifikasi selama suatu jangka waktu untuk dipertukarkan dengan imbalan.

**Grup sebagai penyewa**

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk semua sewa, kecuali untuk sewa jangka-pendek dan sewa yang aset dasarnya bernilai-rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak-guna yang mewakili hak untuk menggunakan aset dasar.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**r. Impairment of non-financial assets  
(continued)**

*Goodwill* is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for *goodwill* by assessing the recoverable amount of each CGU (or group of CGUs) to which the *goodwill* relates. Where the recoverable amount of the CGU is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to *goodwill* cannot be reversed in future years.

**s. Borrowing costs**

*Borrowing costs* consist of interest expenses and other financing charges that the Group incurs in connection with the borrowing funds. *Borrowing costs* that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of the related asset. All other borrowing costs are recognized as expenses when incurred.

**t. Leases**

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

**The Group as lessee**

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Grup mengakui aset hak-guna pada tanggal permulaan sewa (yaitu tanggal aset pendasar tersedia untuk digunakan). Aset hak-guna diukur pada harga perolehan, dikurangi akumulasi penyusutan dan penurunan nilai, serta disesuaikan dengan pengukuran kembali liabilitas sewa. Biaya perolehan aset hak-guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang terjadi, dan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan dikurangi setiap insentif sewa yang diterima. Aset hak-guna disusutkan dengan metode garis lurus selama masa sewa.

Jika kepemilikan aset pendasar sewa beralih ke Grup pada akhir masa sewa atau biaya perolehan aset hak-guna merefleksikan Grup akan mengeksekusi opsi beli, maka penyusutan aset hak-guna dihitung menggunakan estimasi masa manfaat aset. Aset hak-guna juga dievaluasi untuk penurunan nilai (Note 2r).

Liabilitas sewa

Pada tanggal permulaan sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini pembayaran sewa yang harus dilakukan selama masa sewa.

Pembayaran sewa juga mencakup harga pelaksanaan dari opsi beli yang secara wajar pasti dilaksanakan oleh Grup dan pembayaran penalti untuk mengakhiri sewa, jika masa sewa merefleksikan adanya opsi dapat mengakhiri sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau tarif diakui sebagai beban pada periode terjadinya peristiwa atau kondisi yang memicu terjadinya pembayaran tersebut.

**t. Leases (continued)**

**The Group as lessee (continued)**

Right-of-use assets

*The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.*

*If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also assessed for impairment (Note 2r).*

Lease liabilities

*At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term.*

*The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.*

**t. Sewa (lanjutan)**

**Grup sebagai penyewa (lanjutan)**

Liabilitas sewa (lanjutan)

Dalam menghitung nilai kini pembayaran sewa, Grup menggunakan Suku Bunga Pinjaman Inkremental ("SBPI") pada tanggal permulaan sewa karena suku bunga implisit dalam sewa tidak dapat langsung ditentukan. Setelah tanggal permulaan, jumlah kewajiban sewa ditingkatkan untuk mencerminkan akresi bunga (atas efek diskonto) dan dikurangi untuk pembayaran sewa yang dilakukan. Selain itu, nilai tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan masa sewa, perubahan pembayaran sewa, atau perubahan penilaian atas opsi untuk membeli aset pendasar.

Sewa jangka pendek dan sewa dengan aset bernilai rendah

Grup menerapkan pengecualian pengakuan sewa jangka pendek untuk sewa yang jangka waktu sewanya pendek (yaitu, sewa yang memiliki jangka waktu sewa 12 bulan atau kurang dari tanggal permulaan dan tidak memiliki opsi beli). Grup juga menerapkan pengecualian pengakuan sewa dengan aset bernilai rendah untuk sewa yang aset pendasarnya dianggap bernilai rendah. Pembayaran sewa untuk sewa jangka pendek dan sewa dari aset bernilai rendah diakui sebagai beban dengan metode garis lurus selama masa sewa.

**u. Imbalan kerja**

**Kewajiban jangka pendek**

Liabilitas untuk imbalan kerja jangka pendek diakui ketika pekerja memberikan jasa terkait dan diukur berdasarkan jumlah yang diperkirakan akan dibayar ketika liabilitas diselesaikan. Liabilitas tersebut akan dibayarkan dalam waktu 12 bulan sejak akhir periode pelaporan sehingga disajikan sebagai liabilitas imbalan karyawan jangka pendek pada laporan posisi keuangan konsolidasian.

**2. SUMMARY OF MATERIAL ACCOUNTING  
POLICIES INFORMATION (continued)**

**t. Leases (continued)**

**The Group as lessee (continued)**

Lease liabilities (continued)

In calculating the present value of lease payments, the Group uses its Incremental Borrowing Rate ("IBR") at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). The Group also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value underlying assets are recognized as expense on a straight-line basis over the lease term.

**u. Employee benefits**

**Short-term obligations**

Liabilities for short-term employee benefits are recognized when the employees render the related services and measured at the amounts expected to be paid when the liabilities are settled. The liabilities are expected to be paid within 12 months from the end of the reporting period and therefore, presented as short-term employee benefit liabilities in the consolidated statement of financial position.

**Kewajiban pensiun**

Grup memiliki berbagai program pensiun sesuai dengan undang-undang dan peraturan ketenagakerjaan yang berlaku dan kebijakan Grup. Grup memiliki program imbalan pasti dan iuran pasti. Program pensiun imbalan pasti adalah program pensiun yang menentukan jumlah imbalan pensiun yang akan diberikan, biasanya berdasarkan pada satu faktor atau lebih seperti usia, masa kerja atau kompensasi. Program pensiun iuran pasti adalah sebuah program pensiun dimana Grup akan membayar iuran tetap kepada sebuah entitas yang terpisah dan tidak memiliki kewajiban hukum atau konstruktif untuk membayar kontribusi lebih lanjut apabila dana pensiun tersebut tidak memiliki aset yang memadai untuk membayar seluruh imbalan karyawan yang berhubungan dengan pelayanan yang diberikan oleh karyawan pada periode kini dan sebelumnya.

Kewajiban program pensiun imbalan pasti yang diakui di laporan posisi keuangan konsolidasian adalah nilai kini kewajiban imbalan pasti pada tanggal laporan posisi keuangan konsolidasian dikurangi nilai wajar aset program. Kewajiban imbalan pasti dihitung setiap tahun oleh aktuaris independen dengan menggunakan metode *projected unit credit*.

Nilai kini kewajiban imbalan pasti ditentukan dengan mendiskontokan estimasi arus kas keluar di masa depan dengan menggunakan tingkat bunga obligasi pemerintah (dengan pertimbangan saat ini tidak terdapat pasar aktif untuk obligasi korporat berkualitas tinggi) dalam mata uang yang sama dengan mata uang imbalan yang akan dibayarkan dan waktu jatuh temponya kurang lebih sama dengan kewajiban yang bersangkutan.

Biaya bunga neto dihitung dengan menerapkan tingkat diskonto terhadap saldo neto kewajiban imbalan pasti dan nilai wajar aset program. Biaya ini termasuk dalam beban imbalan kerja dalam laba rugi.

POLICIES INFORMATION (continued)**

**u. Employee benefits (continued)**

**Pension obligations**

*The Group has various pension schemes in accordance with prevailing labour related laws and regulations and the Group's policy. The Group has both defined benefit and defined contribution plans. A defined pension benefit plan is a pension plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors, such as age, years of service or compensation. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity and will have no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.*

*The liability recognized in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the consolidated statement of financial position date, less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.*

*The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the interest rates of government bonds (considering that currently there is no deep market for high quality corporate bonds) that are denominated in the currency in which the benefit will be paid and that have terms to maturity approximating the terms of the related pension obligation.*

*The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefits expense in profit or loss.*

**Kewajiban pensiun (lanjutan)**

Keuntungan dan kerugian atas pengukuran kembali yang timbul dari penyesuaian dan perubahan dalam asumsi-asumsi aktuarial langsung dibebankan atau dikreditkan pada penghasilan komprehensif lainnya pada saat terjadinya. Keuntungan dan kerugian ini termasuk di dalam laba ditahan pada laporan posisi keuangan konsolidasian.

Perubahan nilai kini atas kewajiban imbalan pasti yang timbul dari amandemen program atau pembatasan langsung diakui dalam laba rugi sebagai biaya jasa lalu.

Biaya jasa lalu diakui secara langsung di laba rugi.

Oleh karena Peraturan Pemerintah Pengganti Undang-undang tentang Cipta Kerja No. 2/2022 ("UU Cipta Kerja", (UUCK)) mengharuskan entitas membayar jumlah minimum tertentu kepada para pekerja yang telah memasuki usia pensiun yang ditentukan berdasarkan masa kerja, Grup rentan terhadap kemungkinan untuk membayar kekurangan apabila iuran kumulatif program pensiun dan hasil pengembaliannya kurang dari jumlah minimum tertentu tersebut.

Sebagai akibatnya, jika imbalan pensiun sesuai Peraturan Pemerintah Pengganti Undang-undang tentang Cipta Kerja No. 2/2022 ("UU Cipta Kerja", (UUCK)) lebih besar dari program pensiun iuran pasti dan manfaat pasti yang ada, selisih tersebut harus diakui oleh Grup sebagai bagian dari liabilitas imbalan pensiun.

**Pension obligations (continued)**

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited in OCI in the period in which they arise. They are included in retained earnings in the consolidated statement of financial position.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service costs.

Past-service costs are recognized immediately in profit or loss.

Since the Government Regulation in Lieu of Law No. 2/2022 (the "Cipta Kerja Law", (UUCK)) requires an entity to pay to a worker entering into pension age a certain minimum amount based on the worker's length of service, the Group is exposed to the possibility of having to make further payments to reach that certain amount in particular when the cumulative contributions to the pension plans and the return thereon are less than that minimum amount.

Consequently, if the pension benefits based on Government Regulation in Lieu of Law No. 2/2022 (the "Cipta Kerja Law", (UUCK)) are higher than those based on existing defined contribution and benefit pension plans of the Group, the difference shall be recognized by the Group as part of the overall pension benefits obligation.

**Imbalan kesehatan pascakerja**

Grup menyediakan imbalan kesehatan pascakerja untuk pensiunan. Hak atas imbalan ini pada umumnya diberikan apabila karyawan bekerja sampai usia pensiun dan memenuhi masa kerja minimum tertentu. Perkiraan biaya imbalan ini dicatat sebagai akrual sepanjang masa kerja karyawan, dengan menggunakan metode yang sama dengan metode yang digunakan dalam perhitungan program pensiun imbalan pasti. Kewajiban ini dinilai setiap tahun oleh aktuaris independen yang memenuhi syarat.

Grup juga memberikan imbalan pascakerja lainnya kepada semua karyawan tetapnya. Liabilitas imbalan pascakerja lainnya dicatat berdasarkan perhitungan aktuarial dengan menggunakan metode projected unit credit yang dilakukan oleh aktuaris independen.

Imbalan yang diberikan adalah imbalan pasti yang berkaitan dengan kematian, cacat tetap, masa persiapan pensiun dan imbalan pensiun yang tergantung dari lamanya masa kerja. Grup mengakui timbulnya biaya pada saat Grup menerima manfaat ekonomis dari jasa yang diberikan karyawan.

**Imbalan kerja jangka panjang lainnya**

Grup memberikan imbalan jangka panjang lainnya seperti uang penghargaan, santunan kematian, penghargaan pengabdian, dan uang pisah. Imbalan berupa uang penghargaan diberikan apabila karyawan bekerja hingga mencapai usia pensiun. Santunan kematian diberikan bila pegawai dan anggota keluarga tertentu meninggal dunia. Nilai imbalan yang diberikan didasari pada Peraturan Perusahaan atau PKB. Sedangkan imbalan berupa uang pisah, dibayarkan kepada karyawan yang mengundurkan diri secara sukarela, setelah memenuhi minimal masa kerja tertentu. **Post-employment medical benefits**

*The Group provides post-employment medical benefits to their retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and satisfying a certain minimum service period. The expected costs of these benefits are accrued over the period of employment, using methodology similar for defined benefit pension plans. These obligations are valued annually by independent qualified actuaries.*

*The Group also provides other post-employment benefits for all of its permanent employees. The liability in respect of other post-employment benefits is recorded based on actuarial calculations using the projected unit credit method by independent actuaries.*

*This benefit scheme is a defined benefit arrangement providing for death, permanent disability, retirement preparation period and retirement benefits depending on the periods of completed service. The Group recognizes the expense for the benefits when the Group receives the economic benefits arising from services provided by its employees.*

**Other long-term employee benefits**

*The Group also provides other long-term benefits such as long service reward, death allowance, jubilee rewards, and separation reward. The long service reward is paid when the employees reach their retirement age. Death allowance is paid when the employee or the qualified family members pass away. The value of benefits provided to the employee is based on the Company Regulation or the CLA. The separation reward benefit is paid to employees in the event of voluntary resignation, subject to a minimum number of years of service. These benefits have been accounted for using the same methodology as for the defined benefit pension plan.*

**Pesangon pemutusan kontrak kerja**

Pesangon pemutusan kontrak kerja terutang ketika Grup memberhentikan hubungan kerja sebelum usia pensiun normal atau ketika seorang pekerja menerima penawaran mengundurkan diri secara sukarela dengan kompensasi imbalan pesangon. Pesangon pemutusan kontrak kerja diakui saat yang mana yang lebih cepat antara ketika Grup sudah tidak dapat menarik penawaran atas pesangon pemutusan kontrak kerja dan ketika Grup mengakui biaya restrukturisasi terkait.

Semua imbalan yang membutuhkan adanya pelayanan kerja di masa mendatang bukan merupakan pesangon pemutusan kontrak kerja. Pada situasi di mana suatu penawaran diajukan agar karyawan sukarela mengundurkan diri, pesangon pemutusan kontrak kerja diukur berdasarkan jumlah karyawan yang diharapkan menerima penawaran tersebut. Imbalan yang jatuh tempo lebih dari 12 bulan setelah tanggal pelaporan didiskontokan ke nilai masa kini.

**Termination benefits**

Termination benefits are payable when employment is terminated by the Group before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. A liability for a termination benefit will be recognized at the earliest of when the Group can no longer withdraw the offer of the termination benefit and when the Group recognizes any related restructuring costs.

Any benefit that requires future service is not a termination benefit. In case an offer is made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the reporting date are discounted to their present value.

**v. Provisions**

Provisions are recognized when the Group has a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Provision for asset dismantling costs is estimated based on certain assumptions and carried at fair value based on applicable discount rates.

These obligations are measured at the present value of the expenditure that is expected to be required to settle the obligation using a discount rate that reflects current market assessments of the time value of money and the risks specific to the obligations. The unwinding of the effect of discounting the estimated liability is recognized as a finance cost.*

Sebagai tanggapan terhadap penerapan kerangka Pilar 2 Organisasi untuk Kerja Sama dan Pembangunan Ekonomi (*Organisation for Economic Co-operation and Development* atau "OECD"), pada tanggal 31 Desember 2024, Pemerintah Indonesia menetapkan aturan kerangka Pilar 2 ("Pillar 2") melalui Peraturan Menteri Keuangan No. 136/2024 (PMK 136/2024). Pilar 2 sesuai PMK 136/2024 akan berlaku untuk tahun fiskal yang dimulai pada atau setelah tanggal 1 Januari 2025. Untuk tahun yang berakhir pada 31 Desember 2025, Grup telah menerapkan amendemen PSAK 212: Pajak Penghasilan, yang memberikan pengecualian wajib sementara dari pengakuan atau pengungkapan pajak tangguhan terkait Pilar 2. PMK136/2024 menerapkan mekanisme perpajakan baru yang mensyaratkan Perusahaan Multinasional ("PMN") untuk membayar pajak tambahan padayurisdiksi tertentu ketika tarif pajak efektif yang ditentukan per yurisdiksi menurut Pilar 2 lebih rendah dari tarif minimum 15,00%.

Grup telah melakukan evaluasi atas potensi eksposur terhadap pajak penghasilan Pilar 2 sesuai Laporan per negara (*Country by Country Report* atau "CbCR") dan informasi keuangan tahun 2025 untuk entitas-entitas konstituen dalam Grup dan menetapkan dampaknya adalah tidak material.

Pajak tangguhan (lanjutan)

Liabilitas pajak tangguhan diakui untuk semua perbedaan temporer yang kena pajak, kecuali:

- i) liabilitas pajak tangguhan yang terjadi dari pengakuan awal *goodwill* atau dari aset atau liabilitas dari transaksi yang bukan transaksi kombinasi bisnis, dan pada waktu transaksi tidak mempengaruhi laba akuntansi dan laba kena pajak/rugi pajak;
- ii) dari perbedaan temporer kena pajak atas investasi pada entitas anak, yang saat pembalikannya dapat dikendalikan dan besar kemungkinannya bahwa beda temporer itu tidak akan dibalik dalam waktu dekat.

Aset pajak tangguhan diakui untuk seluruh perbedaan temporer yang dapat dikurangkan dan akumulasi rugi pajak belum dikompensasi, bila kemungkinan besar laba kena pajak akan tersedia sehingga perbedaan temporer dapat dikurangkan tersebut, dan rugi pajak belum dikompensasi, dapat dimanfaatkan, kecuali:

- i) jika aset pajak tangguhan timbul dari pengakuan awal aset atau liabilitas dalam transaksi yang bukan transaksi kombinasi bisnis dan tidak mempengaruhi laba akuntansi maupun laba kena pajak/rugi pajak; atau
- ii) dari perbedaan temporer yang dapat dikurangkan atas investasi pada entitas anak, aset pajak tangguhan hanya diakui bila besar kemungkinannya bahwa beda temporer itu tidak akan digbalik dalam waktu dekat dan laba kena pajak dapat dikompensasi dengan beda temporer tersebut.

Jumlah tercatat aset pajak tangguhan ditelaah pada setiap tanggal pelaporan dan diturunkan apabila laba kena pajak mungkin tidak memadai untuk mengkompensasi sebagian atau semua manfaat aset pajak tangguhan. Aset pajak tangguhan yang tidak diakui ditinjau ulang pada setiap tanggal pelaporan dan akan diakui apabila besar kemungkinan bahwa laba kena pajak pada masa yang akan datang akan tersedia untuk pemulihannya.

Deferred tax (continued)

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- i) where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- ii) in respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences and carry forward of unused tax losses, to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and the carry forward of unused tax losses can be utilized, except:

- i) where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- ii) in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of a deferred tax asset is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the benefit of that deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI YANG SIGNIFIKAN**

Penyusunan laporan keuangan konsolidasian sesuai dengan Standar Akuntansi Keuangan di Indonesia mengharuskan manajemen untuk membuat estimasi, asumsi dan penilaian yang mempengaruhi jumlah aset dan liabilitas yang dilaporkan dan pengungkapan aset dan liabilitas kontinjensi pada tanggal laporan keuangan konsolidasian, serta jumlah pendapatan dan beban selama periode pelaporan.

Estimasi, asumsi dan penilaian tersebut dievaluasi secara terus menerus dan berdasarkan pengalaman historis dan faktor-faktor lainnya, termasuk harapan peristiwa di masa mendatang yang memungkinkan.

Grup telah mengidentifikasi kebijakan akuntansi yang signifikan berikut dimana dibutuhkan pertimbangan, estimasi dan asumsi signifikan yang dibuat dan di mana hasil aktual dapat berbeda dari estimasi tersebut berdasarkan asumsi dan kondisi yang berbeda dan dapat mempengaruhi secara material hasil keuangan atau posisi keuangan yang dilaporkan dalam periode mendatang.

**z. Earnings per share**

*Earnings per share is computed based on the weighted average number of issued and fully paid shares during the period.*

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS**

*The preparation of consolidated financial statements in conformity with Indonesian Financial Accounting Standards requires management to make estimates, assumptions and judgements that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period.*

*Estimates, assumptions and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.*

*The Group has identified the following critical accounting policies under which significant judgements, estimates and assumptions are made and where actual results may differ from these estimates under different assumptions and conditions and may materially affect financial results or the financial position reported in future periods.*

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI  
YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan**

**(a) Estimasi umur manfaat atas aset tetap**

Grup melakukan penelaahan umur manfaat aset tetap secara berkala berdasarkan kondisi teknis, perkembangan teknologi di masa depan dan perilaku pasar. Hasil operasi di masa depan dapat dipengaruhi secara material oleh perubahan-perubahan dalam estimasi yang diakibatkan oleh perubahan faktor-faktor yang disebutkan di atas.

**(b) Penurunan nilai atas aset non-keuangan**

Grup melakukan tes penurunan nilai setiap tahun untuk *goodwill*. Aset non-keuangan lainnya ditelaah untuk penurunan nilai apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat aset melebihi nilai yang dapat diperoleh kembali. Nilai yang dapat diperoleh kembali suatu aset atau unit penghasil kas ditentukan berdasarkan yang lebih tinggi antara harga jual neto dan nilai pakai, yang dihitung berdasarkan asumsi dan estimasi manajemen. Perubahan asumsi penting, termasuk ekspektasi kapasitas produksi dan volume penjualan, harga jual komoditas logam (dengan mempertimbangkan harga saat ini dan masa lalu, tren harga dan faktor-faktor terkait), sumber daya dan cadangan mineral, biaya operasi, biaya penutupan dan rehabilitasi serta belanja modal di masa depan, dapat mempengaruhi nilai yang dapat diperoleh kembali secara material.

**(c) Estimasi cadangan batubara dan mineral**

Cadangan batubara dan mineral merupakan estimasi jumlah hasil yang dapat dieksploitasi secara ekonomis dan legal dari properti pertambangan Grup. Dalam memperkirakan cadangan batubara dan mineral diperlukan beberapa asumsi seperti faktor geologi, teknis dan ekonomi, termasuk jumlah, teknik produksi, rasio pengupasan tanah, biaya produksi, biaya transportasi, permintaan komoditas, harga komoditas dan nilai tukar mata uang.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions**

**(a) Estimated useful lives of fixed assets**

The Group periodically reviews the "estimated useful lives of fixed assets based on technical specification, future technological developments and market behaviour. Future results of operations could be materially affected by changes in the estimates brought about by changes in the factors mentioned above.

**(b) Impairment of non-financial assets**

The Group tests whether goodwill has suffered any impairment on an annual basis. Other non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset exceeds its recoverable amount. The recoverable amount of an asset or a cash generating unit is determined based on the higher of its fair value less costs to sell and its VIU, calculated on the basis of management's assumptions and estimates. Changing the key assumptions, including the expected production capacity and sales volume, metal commodity selling prices (considering current and historical prices, price trends and related factors), mineral resources and reserves, operating costs, closure and rehabilitation costs and future capital expenditures, could materially affect the recoverable amount.

**(c) Coal and mineral reserve estimates**

Coal and mineral reserves are estimates of the amount of output that can be economically and legally exploited from the Group's mining properties. In order to estimate coal and mineral reserves, assumptions are required about a range of geological, technical and economic factors, including quantities, production techniques, stripping ratio, production costs, transportation costs, commodity demand, commodity prices and exchange rates.

YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

(c) Estimasi cadangan batubara dan mineral (lanjutan)

Estimasi jumlah dan/atau nilai kandungan cadangan batubara dan mineral memerlukan ukuran, bentuk dan kedalaman body atau lahan batubara dan mineral yang ditentukan dengan melakukan analisis data geologis seperti sampel pengeboran. Proses ini mungkin memerlukan pertimbangan geologis yang kompleks dan sulit dalam menginterpretasikan data.

Karena asumsi-asumsi ekonomi yang digunakan untuk membuat estimasi atas jumlah cadangan berubah dari waktu ke waktu dan karena adanya data geologi tambahan yang dihasilkan selama periode operasi, maka jumlah estimasi cadangan dapat berubah dari waktu ke waktu. Perubahan cadangan yang dilaporkan dapat mempengaruhi hasil keuangan dan posisi keuangan Grup dalam berbagai bentuk, diantaranya:

- nilai tercatat aset dapat terpengaruh akibat perubahan estimasi arus kas masa depan.
- penyusutan, deplesi dan amortisasi yang dibebankan ke laba rugi dan penghasilan komprehensif lain dapat berubah jika beban-beban tersebut ditentukan berdasarkan unit produksi, atau jika masa manfaat ekonomi umur aset berubah.
- pembongkaran, restorasi lahan dan provisi lingkungan dapat berubah jika terjadi perubahan estimasi cadangan yang mempengaruhi ekspektasi akan waktu atau biaya kegiatan ini.
- nilai tercatat aset/liabilitas pajak tangguhan dapat berubah karena perubahan estimasi pemulihan manfaat pajak.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

(c) Coal and mineral reserve estimates (continued)

*Estimating the quantity and/or mineral content of coal and mineral reserves requires the size, shape and depth of coal and mineral bodies or fields to be determined by analysing geological data such as drilling samples. This process may require complex and difficult geological judgements to interpret the data.*

*Because the economic assumptions used to estimate reserves change from period to period and because additional geological data is generated during the course of operations, reserves estimates may change from period to period. Changes in the reported reserves may affect the Group's financial results and financial position in a number of ways, including the following:*

- *asset carrying values may be affected due to changes in estimated future cash flows.*
- *depreciation, depletion and amortization charged to profit or loss and other comprehensive income may change where such charges are determined on a units of production basis, or where the useful economic lives of assets change.*
- *decommissioning, site restoration and environmental provision may change where changes in estimated reserves affect expectations about the timing or cost of these activities.*
- *the carrying value of deferred tax assets/liabilities may change due to changes in estimates of the likely recovery of the tax benefits.*

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI  
YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

- (d) Provisi untuk reklamasi lingkungan dan penutupan tambang

Kebijakan akuntansi Grup atas pengakuan provisi untuk reklamasi lingkungan dan penutupan tambang membutuhkan estimasi dan asumsi yang signifikan seperti persyaratan kerangka hukum dan peraturan yang relevan; besarnya kemungkinan kontaminasi serta waktu, luas dan biaya yang dibutuhkan untuk kegiatan reklamasi lingkungan dan penutupan tambang. Ketidakpastian ini dapat mengakibatkan perbedaan antara jumlah pengeluaran aktual di masa depan dari jumlah yang disisihkan saat ini. Jika jumlah pengeluaran pengelolaan lingkungan hidup yang terjadi pada tahun berjalan sehubungan dengan kegiatan periode lalu lebih besar dari jumlah yang telah dibentuk, selisihnya akan dibebankan di periode kelebihan tersebut timbul. Provisi yang diakui pada setiap lokasi ditinjau secara berkala dan diperbarui berdasarkan fakta-fakta dan keadaan pada saat itu.

- (e) Liabilitas imbalan pascakerja

Nilai kini liabilitas pensiun tergantung pada sejumlah faktor yang ditentukan berdasarkan basis dari aktuarial dengan menggunakan sejumlah asumsi. Asumsi yang digunakan dalam menentukan beban/(pendapatan) neto untuk pensiun termasuk tingkat diskonto, kenaikan gaji di masa depan, perubahan remunerasi masa depan, tingkat pengurangan karyawan, kenaikan biaya kesehatan, tingkat harapan hidup dan periode sisa yang diharapkan dari masa aktif karyawan. Setiap perubahan dalam asumsi-asumsi ini akan berdampak pada nilai tercatat atas liabilitas pensiun.

Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini. Informasi tambahan diungkapkan pada Catatan 26.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

- (d) Provision for environmental reclamation and mine closure

The Group's accounting policy for the recognition of environmental reclamation and mine closure provision requires significant estimates and assumptions such as requirements of the relevant legal and regulatory framework; the magnitude of possible contamination and the timing, extent and costs of required environmental reclamation and mine closure activity. These uncertainties may result in future actual expenditure differing from the amounts currently provided. If total current year expenditure related to past activity is higher than the existing balance, the differences will be charged to the periods where the excess arises. The provision recognized for each site is periodically reviewed and updated based on the facts and circumstances available at the time.

- (e) Post-employment benefit liabilities

The present value of the pension obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost/(income) for pensions include the discount rate, future salary increase, future remuneration changes, employee attrition rates, future medical cost increase, life expectancy and the expected remaining periods of service of employees. Any changes in these assumptions will have an impact on the carrying amount of the pension obligation.

Other key assumptions for pension obligations are based in part on current market conditions. Additional information is disclosed in Note 26.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI  
YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

- (f) Cadangan kerugian penurunan nilai piutang usaha

Grup menggunakan matriks provisi untuk menghitung KKE piutang usaha. Tingkat provisi adalah berdasarkan hari jatuh tempo atas kelompok segmen pelanggan yang mempunyai karakteristik risiko kredit yang serupa (misalnya: berdasarkan geografi, tipe produk, tipe dan/atau peringkat pelanggan, dan nilai pertanggungan dari *letters of credit* dan bentuk lain).

Matriks provisi pada mulanya didasarkan pada tingkat gagal bayar historis Grup yang diobservasi. Grup akan memperbaharui matriks untuk menyesuaikan pengalaman kerugian kredit historis dengan informasi *forward-looking*. Sebagai contoh, jika perkiraan atas kondisi ekonomi diperkirakan memburuk selama periode/tahun depan, yang dapat menyebabkan meningkatnya jumlah gagal bayar, tingkat gagal bayar historis disesuaikan. Pada setiap tanggal pelaporan, tingkat gagal bayar historis diperbaharui dan perubahan estimasi *forward-looking* dianalisis.

Penilaian atas korelasi antara tingkat gagal bayar historis yang diobservasi, perkiraan atas kondisi ekonomi dan KKE merupakan estimasi yang signifikan. Jumlah KKE paling dipengaruhi oleh perubahan keadaan dan perkiraan kondisi ekonomi. Pengalaman kerugian kredit historis Grup dan perkiraan kondisi ekonomi juga mungkin tidak menggambarkan gagal bayar aktual pelanggan di masa yang akan datang.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

- (f) Allowance for impairment losses on trade receivables

*The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar credit risk characteristics (e.g., by geography, product type, customer type and/or rating, and coverage by letters of credit and other forms).*

*The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward looking information. For instance, if forecast economic conditions are expected to deteriorate over the next period or year, which can lead to an increased number of defaults, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.*

*The assessment of the correlation between historical observed default rates and forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future.*

YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

(g) Nilai realisasi neto persediaan

Nilai realisasi neto merupakan jumlah neto yang diharapkan oleh entitas terealisasi dari penjualan persediaan pada bisnis normal. Nilai wajar merefleksikan harga di mana transaksi untuk menjual persediaan yang sama di pasar utama (atau paling menguntungkan) untuk persediaan yang terletak di partisipan pasar pada tanggal pengukuran. Estimasi nilai realisasi neto berdasarkan bukti yang paling andal yang tersedia pada saat estimasi dibuat, pada jumlah persediaan yang diharapkan untuk terealisasi. Estimasi ini mempertimbangkan fluktuasi harga atau biaya secara langsung terkait dengan peristiwa yang terjadi setelah akhir periode dimana peristiwa tersebut menyatakan kondisi yang terjadi pada akhir tahun.

(h) Properti investasi

Nilai wajar properti investasi diukur berdasarkan pada nilai pasar, dimana nilai tersebut diasumsikan dari jumlah nilai properti yang dapat dipertukarkan pada tanggal penilaian antara pihak pembeli dan penjual yang berkeinginan melalui transaksi yang wajar (*arm's length transaction*) setelah kegiatan pemasaran yang layak dimana kedua belah pihak tersebut memiliki pengetahuan yang memadai. Apabila tidak tersedia harga terkini dalam pasar aktif, penilaian dibuat dengan mempertimbangkan teknik penilaian lainnya. Grup menggunakan penilai independen eksternal yang memiliki kualifikasi profesional serta berpengalaman dalam lokasi dan kategori properti yang dinilai untuk mengestimasi nilai wajar portofolio properti investasi Grup.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

(g) Net realizable value of inventories

Net realizable value refers to the net amount that an entity expects to realize from the sale of inventory in the ordinary course of business. Fair value reflects the price at which an orderly transaction to sell the same inventory in the principal (or most advantageous) market for that inventory would take place between market participants at the measurement date. Estimates of net realizable value are based on the most reliable evidence available at the time the estimates are made, of the amount the inventories are expected to realize. These estimates take into consideration fluctuations of price or cost directly relating to events occurring after the end of the period to the extent that such events confirm conditions existing at the end of the year.

(h) Investment properties

The fair values of investment properties are based on market values, being the estimated amount for which a property could be exchanged on the date of the valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably. In the absence of current prices in an active market, the valuations are prepared by considering other valuation techniques. The Group uses external independent valuers with appropriately recognized professional qualifications and recent experience in the location and category of property being valued to estimate the fair value of its investment properties portfolio.

YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

- (i) Akuisisi entitas anak, ventura bersama dan entitas asosiasi

Proses awal atas akuisisi entitas anak, ventura bersama dan entitas asosiasi melibatkan identifikasi dan penentuan nilai wajar yang akan dialokasikan untuk aset, liabilitas dan liabilitas kontinjensi yang dapat diidentifikasi dari entitas yang diakuisisi. Nilai wajar aset tetap, properti pertambangan, aset tidak lancar lainnya dan opsi beli ditentukan oleh penilai independen dengan mengacu pada harga pasar atau nilai sekarang dari arus kas neto yang diharapkan dari aset tersebut. Setiap perubahan dalam asumsi dan estimasi yang digunakan dalam menentukan nilai wajar serta kemampuan manajemen untuk mengukur secara andal imbalan kontinjensi entitas yang diakuisisi akan berdampak pada jumlah tercatat dari aset dan liabilitas ini.

- (j) Penilaian instrumen derivatif

Instrumen derivatif dicatat pada nilai wajar dan Grup mengevaluasi kualitas dan keandalan asumsi dan data yang digunakan untuk mengukur nilai wajar dalam tiga tingkat hierarki.

Perbedaan pada setiap tingkatan metode penilaian dijelaskan sebagai berikut:

1. Harga dikutip (tidak disesuaikan) dari pasar yang aktif untuk aset atau liabilitas yang identik (Tingkat 1);
2. Input selain harga yang dikutip dari pasar yang disertakan pada Tingkat 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung (yaitu sebagai sebuah harga) atau secara tidak langsung (yaitu sebagai turunan dari harga) (Tingkat 2);
3. Input untuk aset atau liabilitas yang tidak didasarkan pada data pasar yang dapat diobservasi (informasi yang tidak dapat diobservasi) (Tingkat 3).

Penggunaan informasi dan asumsi yang berbeda dapat mempengaruhi estimasi Perusahaan atas nilai wajar instrumen keuangan derivatif.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

- (i) Acquisitions of subsidiaries, joint ventures and associates

*The initial process on the acquisition of subsidiaries, joint ventures and associates involves identifying and determining the fair values to be assigned to the identifiable assets, liabilities and contingent liabilities of the acquired entities. The fair values of fixed assets, mining properties, other non-current assets and call options are determined by independent valuers by reference to market prices or present value of expected net cash flows from the assets. Any changes in the assumptions used and estimates made in determining the fair values, and management's ability to measure reliably the contingent consideration of the acquired entity will impact the carrying amount of these assets and liabilities.*

- (j) Valuation of derivative instruments

*Derivative instruments are carried at fair value and the Group evaluates the quality and reliability of the assumptions and data used to measure fair value in the three hierarchy levels.*

*The different levels of valuation methods have been defined as follows:*

1. Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
2. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2);
3. Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

*The use of a different information and assumptions may impact the Company's estimate of the fair value of its derivative financial instruments*

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI  
YANG SIGNIFIKAN (lanjutan)**

**3.1 Estimasi dan asumsi akuntansi yang signifikan (lanjutan)**

**(k) Aset pajak tangguhan**

Aset pajak tangguhan diakui atas seluruh rugi fiskal yang belum digunakan sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia sehingga rugi fiskal tersebut dapat digunakan. Estimasi signifikan digunakan oleh manajemen dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak dan strategi perencanaan pajak masa depan.

**(l) Uji penurunan nilai aset tidak lancar dan goodwill**

Penerapan metode akuisisi dalam suatu kombinasi bisnis mensyaratkan penggunaan estimasi akuntansi secara ekstensif dalam mengalokasikan harga beli kepada nilai pasar wajar aset dan liabilitas yang diakuisisi, termasuk aset takberwujud. Akuisisi bisnis tertentu oleh Grup menimbulkan goodwill, yang tidak diamortisasi namun diuji bagi penurunan nilai setiap tahunnya dan setiap terdapat indikasi penurunan nilai.

Perhitungan arus kas masa depan dalam menentukan nilai wajar aset tetap, tanaman perkebunan dan aset tidak lancar lainnya dari entitas yang diakuisisi pada tanggal akuisisi melibatkan estimasi yang signifikan. Walaupun manajemen berkeyakinan bahwa asumsi yang digunakan adalah tepat dan memiliki dasar yang kuat, perubahan signifikan pada asumsi tersebut dapat mempengaruhi secara material evaluasi atas nilai terpulihkan dan dapat menimbulkan penurunan nilai sesuai PSAK 236: Penurunan Nilai Aset.

Goodwill diuji untuk penurunan nilai setiap tahun dan jika terdapat indikasi penurunan nilai, sedang aset tidak lancar dalam lingkup PSAK 236 hanya diuji untuk penurunan nilai bila terdapat identifikasi atas indikasi penurunan nilai. Manajemen menggunakan pertimbangan dalam mengestimasi jumlah terpulihkan dan menentukan adanya indikasi penurunan nilai.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.1 Significant accounting estimates and assumptions (continued)**

**(k) Deferred tax asset**

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management estimates are required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

**(l) Impairment test of non-current assets and goodwill**

Application of acquisition method on a business combination requires extensive use of accounting estimates to allocate the purchase price to the fair market values of the assets and liabilities acquired, including intangible assets. Certain business acquisitions of the Group have resulted in goodwill, which is not amortized but subject to an annual impairment testing and whenever indicators of impairment exist.

Computation of future cash flows in determining the fair values of fixed assets, plantations and other non-current assets of the acquirees at the dates of acquisitions involves significant estimations. While the management believes that the assumptions are appropriate and reasonable, significant changes of those assumptions used may materially affect its assessment of recoverable values and may lead to future impairment charges under PSAK 236: Impairment of Assets.

Goodwill is subject to annual impairment test and whenever there is an indication that such asset may be impaired, while non-current assets under the scope of PSAK 236 are only tested for impairment whenever there is identification of impairment indicators. Management uses its judgment in estimating the recoverable value and determining if there is any indication of impairment.

**3.2 Pertimbangan**

**(a) Ketidakpastian eksposur perpajakan**

Grup beroperasi di bawah peraturan perpajakan di berbagai wilayah/yurisdiksi di mana Grup beroperasi. Selain itu, Grup juga dikenakan beberapa pajak daerah. Pertimbangan yang signifikan diperlukan untuk menentukan provisi pajak penghasilan dan pajak daerah.

Apabila terdapat perbedaan perhitungan pajak antara keputusan final dengan jumlah yang telah dicatat, perbedaan tersebut akan berdampak pada pajak penghasilan dan pajak tangguhan dalam tahun dimana penentuan pajak tersebut dibuat.

**(b) Penentuan mata uang fungsional**

Dalam proses penerapan kebijakan akuntansi Grup, manajemen harus membuat pertimbangan dalam penentuan mata uang fungsional dari setiap entitas anggota Grup, yang memiliki pengaruh signifikan terhadap jumlah yang dicatat dalam laporan keuangan konsolidasian.

Mata uang fungsional dari masing-masing entitas di dalam Grup adalah mata uang masing-masing dari lingkungan ekonomi utama dimana entitas tersebut beroperasi. Mata uang tersebut antara lain adalah, mata uang yang mempengaruhi secara signifikan terhadap harga jual barang dan jasa (dari negara yang kekuatan persaingan dan peraturannya besar menentukan harga jual barang dan jasa), tenaga kerja, material dan biaya lain dan mata uang atas dana yang dihasilkan dari kegiatan pembiayaan.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.2 Judgements**

**(a) Uncertain tax exposure**

*The Group is subject to taxes in numerous areas/jurisdictions in which the Group operates. On the other hand, several regional taxes are also applicable for the Group. Significant judgement is required in determining the provision for income tax and regional taxes.*

*Where the final outcome of these matters is different from the amounts initially recorded, such differences will have an impact on the income tax and deferred income tax provision in the year in which this determination is made.*

**(b) Determination of functional currency**

*In the process of applying the Group's accounting policies, management has to make a judgement on the determination of the functional currency of each of the Group's entities, which has a significant effect on the amounts recognized in the consolidated financial statements.*

*The functional currency of each entity within the Group is the currency of the primary economic environment in which each of the entities operates. It is the currency, among other factors, that mainly influences the sales prices for goods and services of the country (whose competitive forces and regulations mainly determine the sales prices of its goods and services), labours, materials and other costs and the currency in which funds from financing activities are generated.*

**3.2 Pertimbangan (lanjutan)**

- (c) Penilaian apakah Perusahaan memiliki pengendalian atas Antam, Timah dan Bukit Asam

Pengendalian meliputi kekuasaan investor atas *investee*, eksposur, atau hak-haknya, terhadap imbal hasil variabel dari keterlibatannya dengan *investee*, dan kemampuannya untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi imbal hasil tersebut. Laporan keuangan konsolidasian meliputi laporan keuangan Antam, Timah, dan Bukit Asam di mana Perusahaan melalui saham Seri B (lihat Catatan 28), memiliki kepemilikan mayoritas pada entitas anak tersebut. Pemerintah Republik Indonesia merupakan pemegang saham Seri A Dwiwarna pada entitas-entitas tersebut. Dalam menilai apakah Perusahaan memiliki pengendalian atas entitas-entitas tersebut, Perusahaan telah mendapatkan Surat Kuasa Khusus yang diterbitkan oleh Menteri BUMN Republik Indonesia yang telah memberikan kuasa khusus kepada Perusahaan untuk melakukan tindakan-tindakan yang menjadi kewenangan dan/atau hak pemegang saham Seri A Dwiwarna. Kuasa khusus tersebut telah memberi Perusahaan kemampuan untuk mengarahkan kegiatan anak perusahaan tersebut yang secara signifikan mempengaruhi tingkat pengembalian mereka dan dengan demikian, merupakan pengendalian *unilateral*.

- (d) Penilaian apakah Grup memiliki pengendalian atas PTFI

Pengendalian meliputi kekuasaan investor atas *investee*, eksposur, atau hak-haknya, terhadap imbal hasil variabel dari keterlibatannya dengan *investee*, dan kemampuannya untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi imbal hasil tersebut. Grup mempertimbangkan pengaturan yang ada di dalam Perjanjian Pemegang Saham antara Perusahaan, IPMM, PTFI dan Freeport-McMoran Inc. ("FCX") dalam menentukan apakah Grup memiliki pengendalian atas PTFI.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,

**3.2 Judgements (continued)**

- (c) Assessment of whether the Company has control over Antam, Timah and Bukit Asam

The existence of control encompasses the investor's power over the investee, its exposure, or rights, to variable returns from its involvement with the investee, and its ability to use its power over the investee to affect its returns. The consolidated financial statements include the financial statements of Antam, Timah, and Bukit Asam in which the Company holds, through Series B shares (see Note 28), the majority of the ownership interest in those subsidiaries. The Government of the Republic of Indonesia is the holder of the Series A Dwiwarna share in these entities. In assessing whether the Company has control over these entities, the Company has obtained a Specific Authority Letter issued by the Minister of State-Owned Enterprises of the Republic of Indonesia, which grants the Company the specific authority to exercise the authority and/or rights entitled to the Series A Dwiwarna share. This specific authority has granted the Company the ability to direct the activities of those subsidiaries that significantly affect their returns and as such, constitute *unilateral control*.

- (d) Assessment of whether the Group has control over PTFI

The existence of control encompasses the investor's power over the investee, its exposure, or rights, to variable returns from its involvement with the investee, and its ability to use its power over the investee to affect its returns. The Group has considered the arrangements in the Shareholders Agreement between the Company, IPMM, PTFI and Freeport-McMoran Inc. ("FCX") in determining whether the Group has control over PTFI.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI  
YANG SIGNIFIKAN (lanjutan)**

**3.2 Pertimbangan (lanjutan)**

- (d) Penilaian apakah Grup memiliki pengendalian atas PTFI (lanjutan)

Berdasarkan Perjanjian Pemegang Saham, Perusahaan dan IPMM ("Grup") mempunyai hak suara yang penting dalam tata kelola perusahaan PTFI melalui keterwakilan Grup di Dewan Komisaris, Direksi, Komite Nominasi, Komite Operasional dan Komite Keuangan. Grup memiliki jumlah perwakilan yang sama dengan FCX di Dewan Komisaris, Direksi, Komite Nominasi dan Komite Keuangan. Direksi pada periode pertama ditunjuk dan disetujui bersama-sama oleh Pemegang Saham PTFI. FCX memiliki perwakilan yang lebih banyak pada Komite Operasi, suatu komite yang mengatur aktivitas yang berhubungan dengan operasi pertambangan PTFI seiring dengan sistem pengawasan dan keseimbangan yang diberlakukan dimana Komite Operasi bertanggung jawab kepada Direksi dan pemegang saham.

FCX sebagai pemegang saham memiliki keahlian teknis untuk mengoperasikan tambang PTFI dimana Grup FCX menyediakan jasa-jasa yang dibutuhkan untuk mendukung kegiatan operasional PTFI, termasuk konsultasi dan saran operasional pertambangan, eksplorasi, geologi, rekomendasi operasional pertambangan, teknologi informasi manajemen dan jasa-jasa administrasi lainnya yang dibutuhkan oleh PTFI.

Meskipun Grup memiliki kepemilikan saham sebesar 51,24% atas saham PTFI, Grup akan bekerja bersama FCX untuk mengawasi proses pengambilan keputusan manajemen, sementara FCX terus memimpin kegiatan operasional pertambangan PTFI. Sehingga, Grup tidak memiliki kekuasaan *unilateral* untuk mengendalikan kegiatan operasi dan keuangan PTFI dan perwakilan Grup dalam Dewan Komisaris, Direksi, Komite Nominasi, Komite Keuangan dan Komite Operasi tidak menunjukkan suatu pengendalian *unilateral*.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.2 Judgements (continued)**

- (d) Assessment of whether the Group has control over PTFI (continued)

*Based on the Shareholders Agreement, the Company and IPMM (the "Group") has substantive voting rights in PTFI corporate governance by having representatives on the Board of Commissioners, Board of Directors, Nomination Committee, Operating Committee and Finance Committee. The Group has the same number of representatives as FCX on the Board of Commissioners, Board of Directors, Nomination Committee and Finance Committee. The initial members of the Board of Directors are jointly appointed and approved by the shareholders of PTFI. FCX has more representatives on the Operating Committee, the body that governs the relevant activities of the mining operations of PTFI along with monitoring and balancing systems that are designed in which the Operating Committee is responsible to the Board of Directors and the shareholders.*

*FCX as the shareholder has the technical expertise to operate PTFI's mines where FCX Group provided the services needed to support PTFI's operational activities, including consultation and advice on mining operations, exploration, geology, and mining operational recommendation, management information technology and other administrative services needed by PTFI.*

*Despite the Group having 51.24% share ownership in PTFI, the Group will work together with FCX to supervise management's decision making process, while FCX continues to lead the mining operation of PTFI. Therefore, the Group does not have the unilateral power to control the operation and financial activities of PTFI and the Group's representatives on the Board of Commissioners, Board of Directors, Nomination Committee, Finance Committee and the Operating Committee of PTFI do not constitute unilateral control.*

**3.2 Pertimbangan (lanjutan)**

**(e) Sewa**

Penentuan apakah suatu perjanjian mengandung unsur sewa membutuhkan pertimbangan yang cermat untuk menilai apakah perjanjian tersebut memberikan hak untuk mendapatkan secara substansial seluruh manfaat ekonomis dari penggunaan aset identifikasian dan hak untuk mengarahkan penggunaan aset identifikasian, bahkan jika hak tersebut tidak dijabarkan secara eksplisit di perjanjian.

Karena Grup tidak dapat dengan mudah menentukan suku bunga implisit, manajemen menggunakan suku bunga pinjaman incremental Grup sebagai tingkat diskonto. Ada beberapa faktor yang perlu dipertimbangkan dalam menentukan suku bunga pinjaman inkremental, yang banyak di antaranya memerlukan pertimbangan untuk dapat secara andal mengukur penyesuaian yang diperlukan untuk sampai pada tingkat diskonto akhir.

Dalam menentukan suku bunga pinjaman inkremental, Grup mempertimbangkan faktor-faktor utama berikut: risiko kredit korporat Grup, jangka waktu sewa, jangka waktu pembayaran sewa, lingkungan ekonomi, waktu di mana sewa dimasukkan, dan mata uang di mana pembayaran sewa ditentukan.

Dalam menentukan jangka waktu sewa, Grup mempertimbangkan semua fakta dan keadaan yang menimbulkan insentif ekonomi untuk menggunakan opsi perpanjangan, atau tidak menggunakan opsi penghentian. Opsi perpanjangan (atau periode setelah opsi penghentian kontrak kerja) hanya termasuk dalam jangka waktu sewa jika cukup pasti akan diperpanjang (atau tidak dihentikan).

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.2 Judgements (continued)**

**(e) Leases**

*Determining whether an arrangement is or contains a lease requires careful judgement to assess whether the arrangement conveys a right to obtain substantially all the economic benefits from use of the asset throughout the period of use and right to direct the use of the asset, even if the right is not explicitly specified in the arrangement.*

*Since the Group could not readily determine the implicit rate, management uses the Group's incremental borrowing rate as a discount rate. There are a number of factors to consider in determining an incremental borrowing rate, many of which need judgement in order to be able to reliably quantify any necessary adjustments to arrive at the final discount rates.*

*In determining incremental borrowing rate, the Group considers the following main factors: the Group's corporate credit risk, the lease term, the lease payment term, the economic environment, the time at which the lease is entered into, and the currency in which the lease payments are denominated.*

*In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).*

**3.2 Pertimbangan (lanjutan)**

**(e) Sewa (lanjutan)**

Untuk sewa bangunan, kendaraan, mesin dan peralatan, berikut merupakan faktor-faktor yang pada umumnya paling relevan:

- Jika terdapat penalti yang signifikan untuk mengakhiri (atau tidak memperpanjang), Grup biasanya cukup pasti untuk memperpanjang (atau tidak mengakhiri).
- Jika prasarana diperkirakan mempunyai nilai sisa yang signifikan, Grup biasanya cukup pasti untuk memperpanjang (atau tidak mengakhiri).
- Jika tidak, Grup mempertimbangkan faktor lain termasuk jangka waktu sewa historis dan biaya dan gangguan bisnis yang timbul untuk menggantikan aset sewa tersebut.

Mayoritas opsi perpanjangan untuk sewa, selain kategori bangunan, tidak dimasukkan ke dalam liabilitas sewa, karena Grup dapat mengganti aset tanpa biaya signifikan atau halangan bisnis.

**(f) Ketidakpastian atas hasil sengketa hukum**

Seperti yang diungkapkan dalam Catatan 37, Antam menjadi tergugat dalam sejumlah kasus hukum. Manajemen melakukan kajian secara hati-hati atas dampak keuangan dari kasus hukum terhadap Grup. Proses kajian tersebut melibatkan penggunaan berbagai pertimbangan dan asumsi. Oleh karena karakteristik kasus hukum yang umumnya berlangsung lama dan dapat memiliki interpretasi hukum yang berbeda-beda, terdapat ketidakpastian yang signifikan atas hasil dari tuntutan hukum.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,  
ESTIMATES AND ASSUMPTIONS (continued)**

**3.2 Judgements (continued)**

**(e) Leases (continued)**

*For leases of building, vehicle, machinery and equipment, the following factors are normally the most relevant:*

- *If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).*
- *If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).*
- *Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.*

*Most extension options in leases, except for buildings category, have not been included in the lease liability, because the Group could replace the assets without significant cost or business disruption.*

**(f) Uncertainty on the resolution of legal disputes**

*As disclosed in Note 37, Antam has been named a defendant in a number of lawsuits. Management carefully assesses their financial impacts on the Group. Such assessments would typically involve significant use of judgement and estimates. Given the typically long process of litigation and possible different legal interpretations, there remain inherently significant uncertainties on the outcome of the legal cases.*

**4b. Penyertaan modal dari Pemerintah  
Indonesia**

Bersamaan dengan efektifnya pengurangan modal Inalum, Pemerintah Indonesia membentuk Perusahaan dengan melakukan penyertaan modal atas saham-saham milik Negara pada Inalum, Antam, Bukit Asam, Timah dan PTFI (*vested*) sebagai modal pendirian Perusahaan.

Pada tanggal 31 Desember 2025 dan 2024, modal saham Perusahaan disetorkan dalam bentuk pengalihan saham yang sebelumnya dimiliki oleh Pemerintah Indonesia terbagi atas 119.090.865 saham dengan nilai nominal Rp1.000.000 (nilai penuh), dan telah ditempatkan dan disetor penuh sebanyak 119.090.865 saham sebesar Rp119.090.865 sebagaimana tertuang dalam Akta Notaris No. 59 tanggal 17 Februari 2023 oleh Jose Dima Satria, S.H., M.Kn., lihat Catatan 28 untuk detail penyertaan modal saham oleh Pemerintah Indonesia.

Perbedaan antara jumlah penyertaan modal dari Pemerintah Indonesia untuk Perusahaan dengan nilai tercatat atas penyertaan modal Negara Republik Indonesia pada Inalum sebelum dialihkan, termasuk modal saham Inalum yang sebelumnya dimiliki oleh Pemerintah Indonesia sebesar Rp5.431.240, dicatat pada "Tambahan modal disetor" dalam ekuitas Grup sebesar Rp57.960.448.

Sebagai akibat dari restrukturisasi Grup Inalum dan Perusahaan, seluruh posisi keuangan dan hasil operasi (termasuk saldo laba dan cadangan lainnya) dari Inalum digabungkan ke dalam laporan keuangan konsolidasian Perusahaan. **10. INSTRUMEN DERIVATIF (lanjutan)**

Lindung nilai arus kas (lanjutan)

Timah (lanjutan)

Pergerakan nilai wajar atas instrumen derivatif yang didesignasikan sebagai lindung nilai arus kas pada tanggal 31 Desember 2025 adalah Rp18.706 (2024: Rp14.191). Pergerakannya dibebankan ke penghasilan komprehensif lain.

Antam

Saat ini, Antam memiliki pinjaman dalam mata uang asing dengan tingkat suku bunga mengambang sebesar 3M Term SOFR + Margin.

Untuk melindungi pinjaman dari risiko perubahan nilai mata uang asing dan meningkatnya tingkat suku bunga, pada bulan Agustus 2025, Antam menandatangani perjanjian fasilitas transaksi *cross currency swap* dengan Deutsche Bank AG.

Antam akan membayar bunga pada tingkat suku bunga tetap dan menerima bunga pada tingkat suku bunga mengambang. Antam juga akan membayar nilai tukar tarif tetap dan menerima nilai tukar spot saat pembayaran pinjaman.

Terdapat hubungan ekonomi antara item yang dilindungi dan instrumen lindung nilai, karena ketentuan dalam *cross currency swap* sesuai dengan pinjaman berjangka dalam mata uang asing dengan suku bunga mengambang, termasuk jumlah nominal, jatuh tempo, tanggal pembayaran, dan tanggal penyesuaian. Antam telah menetapkan rasio lindung nilai sebesar 1:1 untuk hubungan lindung nilai tersebut, mengingat risiko dasar dari *cross currency swap* benar-benar cocok dengan komponen risiko yang dilindungi.

Ketidakefektifan lindung nilai atas arus kas tersebut dapat timbul dari:

- Risiko kredit rekanan yang memengaruhi pergerakan nilai wajar instrumen lindung nilai dan item yang dilindungi nilai secara berbeda; dan
- Perubahan pada perkiraan arus kas dari item yang dilindungi nilai dan instrumen lindung nilai.

Untuk tahun yang berakhir pada tanggal 31 Desember 2025, kerugian neto atas transaksi derivatif *cross currency swap* sebesar Rp101.125, disajikan sebagai bagian dari penghasilan komprehensif lainnya.

**10. DERIVATIVE INSTRUMENTS (continued)**

Cash flows hedges (continued)

Timah (continued)

Fair value movement of derivative instruments designated as cash flow hedges as at December 31, 2025 was Rp18,706 (2024: Rp14,191). The movement was charged to other comprehensive income.

Antam

Currently, Antam has foreign currency loans with floating interest rates of 3M Term SOFR + Margin.

To protect the loans from the risk of foreign currency fluctuations and rising interest rates, in August 2025, the Company signed a cross currency swap transaction facility agreement with Deutsche Bank AG.

Antam will pay interest at a fixed interest rate and receive interest at a floating interest rate. Antam will also pay a fixed exchange rate and receive the spot exchange rate when repaying the loan.

There is an economic relationship between the hedged item and the hedging instrument, as the terms of the cross currency swap align with those of the floating-rate foreign currency loan, including notional amount, maturity, payment dates, and reset dates. Antam has established a hedge ratio of 1:1 for the hedging relationship, given that the underlying risk of the cross currency swap perfectly matches the hedged risk component.

The hedge ineffectiveness can arise from:

- The counterparties' credit risk differently impacting the fair value movements of the hedging instruments and hedged items; and
- Changes to the forecasted amount of cash flows of hedged items and hedging instruments.

For year ended December 31, 2025, net loss on derivative transactions cross currency swap amounting to Rp101,125 presented as part of other comprehensive income.

PTFI bergerak di bidang eksplorasi, tambang dan pengolahan bijih tembaga, emas dan perak di Papua. Mulai dari Desember 2018, PTFI beroperasi menggunakan kerangka Izin Usaha Pertambangan Khusus ("IUPK"), sebelumnya PTFI beroperasi menggunakan kerangka Kontrak Karya ("CoW"). IUPK PTFI memberikan izin kepada PTFI untuk melanjutkan operasi pertambangan hingga Desember 2031, dengan hak untuk memperpanjang hak pertambangan hingga Desember 2041. Ketentuan fiskal utama yang ditetapkan dalam IUPK antara lain tarif pajak penghasilan badan sebesar 25,00%, kewajiban penerimaan negara bukan pajak ("PNBP") sebesar 4,00% yang dihitung dari laba netto, kewajiban pendapatan pemerintah daerah sebesar 6,00% yang dihitung dari laba netto, dan tarif royalti sebesar 4,00% untuk tembaga, 3,75% untuk emas, dan 3,25% untuk perak.

On December 21, 2018, Inalum entered into a series of transactions as one package as part of the PTFI share divestment. Inalum acquired 100.00% of PT Indocopper Investama's ("PTII") shares from FCX and International Support LLC ("International Support") for a total consideration of US\$350,000,000 or equivalent to Rp5,068,350 to own 9.36% of PTFI shares owned by PTII. The key fiscal terms set forth in the IUPK include a 25.00% corporate income tax rate, a 4.00% non-tax state revenue ("PNBP") obligation calculated on net profits, a 6.00% regional governments revenue obligation calculated on net profits, and royalty rates of 4.00% for copper, 3.75% for gold and 3.25% for silver.

**12. INVESTASI PADA PTFI (lanjutan)**

Ketika PTFI masih beroperasi dalam kerangka CoW, di tahun 1996, PTFI dan PTRTI menandatangani Perjanjian Partisipasi dimana antara lain, PTRTI memiliki hak pembagian hasil produksi dan kewajiban pembiayaan sebesar 40,00% Hak Partisipasi di CoW PTFI. Hak dan hasil produksi adalah sebesar 40,00% diatas "metal strip" sampai dengan batasan volume produksi dan penjualan tertentu dan setelahnya 40,00% atas semua produksi.

Grup menominasikan PTFI sebagai Pembeli untuk mengakuisisi 100,00% saham PTRTI dari Penjual Saham PTRTI sedangkan Perusahaan dan IPMM masing-masing mendapatkan 20,60% dan 19,40% saham baru yang diterbitkan oleh PTFI atau 40,00% saham secara keseluruhan. Sesuai dengan kesepakatan antara Grup dan FCX, semua hak dan kewajiban PTRTI yang ada dalam Perjanjian Partisipasi telah direplikasi ke dalam Perjanjian Pemegang Saham yang ditandatangani pada saat penyelesaian akuisisi PTFI dan Pengambilan Saham PTFI ("Transaksi"). Setelah Transaksi ini, Grup memiliki kepemilikan saham secara legal di PTFI sebesar 51,24% yang terdiri dari kepemilikan sebelumnya yang dimiliki langsung oleh Inalum dan melalui IPMM masing-masing sebesar 9,36% atau dimiliki oleh Grup sebesar 18,72% yang telah terdilusi menjadi masing-masing 5,62% atau 11,24% secara keseluruhan dan tambahan saham baru yang dimiliki oleh Grup sebesar 40,00% yang terdiri dari kepemilikan Perusahaan secara langsung 20,60% dan melalui IPMM sebesar 19,40%.

Sebagai akibat replikasi dari Perjanjian Partisipasi, Grup harus melakukan kontribusi belanja modal perluasan kepada PTFI sesuai dengan jadwal yang telah disepakati sampai dengan 31 Desember 2022 ("Periode Awal" berakhir). Total kontribusi belanja modal yang dibayar oleh Grup selama Periode Awal adalah AS\$741.581.501.

Berdasarkan Perjanjian Pemegang Saham antara Grup, PTFI, dan FCX tertanggal 21 Desember 2018, FCX dan Grup juga meneruskan pengaturan ekonomis atas pendapatan dan pembagian biaya yang terdapat dalam Perjanjian Partisipasi antara PTFI dan PTRTI. Akibatnya, kepemilikan ekonomis Grup di PTFI dan hak Grup terhadap dividen PTFI sebesar 18,72% sampai berakhirnya Periode Awal dan 51,24% setelahnya, sesuai dengan kepemilikan saham Grup di PTFI. Sejak 1 Januari 2023, untuk tujuan akuntansi metode ekuitas, kepemilikan ekonomis atas laba PTFI dan hak Grup terhadap dividen PTFI meningkat menjadi 51,24%.

**12. INVESTMENT IN PTFI (continued)**

During PTFI's operation under the CoW framework, in 1996, PTFI and PTRTI had signed a Participating Agreement, in which PTRTI has the right to a share of production and funding obligation of a 40.00% Participating Interest in the CoW of PTFI. The right and return of production are 40.00% above "metal strip" until a certain production volume and sales threshold and after that 40.00% for all production.

The Group nominated PTFI as the Purchaser of 100.00% of PTRTI's shares from the PTRTI Share Seller while the Company and IPMM will have 20.60% and 19.40% of PTFI's new shares, respectively, that were issued by PTFI or 40.00% shares in total. As agreed between the Group and FCX, all of the rights and obligations of PTRTI in the Participating Agreement have been replicated to the Shareholders Agreement that was signed at the completion of the PTFI acquisition and PTFI Share Subscription (the "Transaction"). After the Transaction, the Group has 51.24% legal ownership in PTFI which consists of prior ownership directly owned by Inalum and through IPMM each 9.36% or in total 18.72% owned by the Group, which was then diluted into 5.62% each or 11.24% in total, and additional new shares owned by the Group was 40.00% which consist of 20.60% directly owned by the Company and 19.40% through IPMM.

As a result of the replication of the Participating Agreement, the Group must contribute for the expansion of capital expenditures to PTFI pursuant to the predetermined schedule until December 31, 2022 (the "Initial Period" ended). The total capital expenditure paid by the Group during the Initial Period amounted to US\$741,581,501.

Under the Shareholders Agreement entered between the Group, PTFI, and FCX on December 21, 2018, FCX and the Group also retained the economics of the revenue and cost-sharing arrangements under the Participating Agreement between PTFI and PTRTI. As a result, the Group's economic interest in PTFI and the Group's entitlement to PTFI's dividend was 18.72% until the Initial Period ended and 51.24% thereafter, according to the Group's share ownership in PTFI. Starting from January 1, 2023, for the purposes of the equity method of accounting, the economic interest in PTFI's profit and the Group's entitlement to PTFI dividends have increased to 51.24%.

**12. INVESTASI PADA PTFI (lanjutan)**

Grup juga mempertimbangkan Perjanjian Induk dengan Pemerintah Indonesia, Pemerintah Daerah Papua dan Pemerintah Daerah Mimika yang telah ditandatangani pada tanggal 12 Januari 2018. Berdasarkan Perjanjian Induk tersebut, Pemerintah Daerah Papua dan Pemerintah Daerah Mimika, melalui Badan Usaha Milik Daerah ("BUMD") telah sepakat untuk melakukan penyertaan saham di IPMM (sebagai Perseroan Khusus) untuk mendapatkan kepemilikan ekonomis di PTFI secara efektif 10,00%. Sampai dengan tanggal penyelesaian laporan keuangan konsolidasian ini, pengalihan atas penyertaan saham PTFI ke BUMD Papua belum terjadi. Sehingga pada tanggal 31 Desember 2025, IPMM masih dimiliki penuh oleh Perusahaan.

Untuk tahun yang berakhir 31 Desember 2025, dividen yang dibagikan oleh PTFI kepada Grup adalah sebesar AS\$1.026.535.032 atau setara dengan Rp16.912.044 (2024: AS\$1.443.967.469 atau setara dengan Rp22.882.407).

Berikut ini merupakan ringkasan atas informasi keuangan dari PTFI:

**12. INVESTMENT IN PTFI (continued)**

The Group also considered the Heads of Agreement between the GoI, Government of Papua and Mimika Regencies that was signed on January 12, 2018. Based on the Heads of Agreement, the Government of Papua and Mimika Regencies agreed to subscribe for shares in IPMM (as a Special Purpose Company) through a regional state-owned enterprise ("BUMD") in order to have 10.00% effective economic ownership in PTFI. Until the completion of these consolidated financial statements, transfer of shares in PTFI to the BUMD Papua has not yet occurred. Hence, as at December 31, 2025, IPMM is wholly owned by the Company.

For the year ended December 31, 2025, dividends distributed by PTFI to the Group were US\$1,026,535,032 or equivalent to Rp16,912,044 (2024: US\$1,443,967,469 or equivalent to Rp22,882,407).

Pada tanggal laporan keuangan konsolidasian per tanggal 31 Desember 2024, Perusahaan masih dalam proses untuk memperoleh nilai wajar neto dari aset dan liabilitas teridentifikasi PTVI, kepentingan pemegang saham lain pada PTVI (jika ada), imbalan yang dialihkan untuk VCL-SMM-VJP, kepentingan ekuitas pada pihak diakuisisi yang sebelumnya dimiliki oleh pihak pengakuisisi, dan *goodwill* yang dihasilkan atau keuntungan dari pembelian dengan diskon.

Sebagai dampak akuntansi dari akuisisi 15,15% saham PTVI, Perusahaan mencatat keuntungan sementara dari pembelian dengan diskon sebesar Rp1.881.125 dan dicatat sebagai bagian dari bagian laba neto dari investasi pada entitas asosiasi dan ventura bersama.

Selanjutnya, pada tanggal 29 Oktober 2025, Perusahaan telah mendapatkan hasil penilaian akhir KJPP Kusnanto & Rekan atas nilai wajar neto dari aset dan liabilitas teridentifikasi PTVI dengan tanggal penilaian 28 Juni 2024. Berdasarkan penilaian akhir tersebut, tidak terdapat penyesuaian signifikan yang diperlukan atas keuntungan sementara dari pembelian dengan diskon yang telah dicatat Perusahaan pada laporan keuangan konsolidasian per tanggal 31 Desember 2024.

Pada akuisisi sebelumnya di tahun 2020, PTVI telah ditetapkan sebagai entitas asosiasi dari Grup dan investasi pada PTVI telah dicatat menggunakan metode ekuitas. Berdasarkan hasil penelaahan terhadap IRA 2024, Perusahaan memiliki pengendalian bersama dengan VCL dan tidak menyebabkan perubahan perlakuan akuntansi di dalam laporan keuangan Perusahaan, sehingga kepemilikan 34,00% saham PTVI setelah transaksi jual beli saham kepemilikan PTVI dari VCL, SMM dan VJP dan akuisisi saham baru PTVI dari PMHMETD tetap dicatat menggunakan metode ekuitas.

*As of the issuance date of the consolidated financial statements as of December 31, 2024, the Company was still in the process to obtain the net fair value of PTVI's identifiable assets and liabilities, non-controlling interest in PTVI (if any), the consideration transferred to VCL-SMM-VJP, the equity interest for the acquiree previously held by the acquirer, and the resulting goodwill or the gain from bargain purchase.*

*As for the accounting impact of acquisition of 15,15% PTVI's share, the Company recorded a provisional bargain purchase gain amounting to Rp1,881,125 and was recorded as part of share in net profit from investment in associates and joint ventures.*

*Subsequently, on October 29, 2025, the Company obtained the final valuation report from KJPP Kusnanto & Rekan regarding the fair value of PTVI's identifiable net assets and liabilities with valuation date on June 28, 2024. Based on the final valuation, no significant adjustments were required to the provisional bargain purchase gain recognized in the Group's consolidated financial statements as of December 31, 2024.*

*In the prior acquisition in 2020, PTVI has been determined as an associate of the Group and investment in PTVI has been accounted for using the equity method of accounting. Based on the IRA 2024's assessment, the Company has a joint control with VCL and does not result in changes of accounting treatment in the financial statements, thus the ownership of 34.00% PTVI's share after the sale and purchase of share ownership PTVI from VCL, SMM and VJP, and PTVI's new shares acquired from PMHMETD remain been accounted for using equity method.*

**15. FIXED ASSETS (continued)**

As at December 31, 2025, the land owned by the Group mainly comprised land with "Hak Guna Bangunan" titles which will expire on various dates ranging from 1 (one) to 30 (thirty) years and some of the lands can be extended. Referencing the historical practices, management believes that there will be no difficulties in obtaining the extension of the land rights as the plots of land were acquired legally and are supported by sufficient evidence of ownership.

The Group leases machinery, equipment, vehicles and heavy equipment under non-cancellable lease agreements. The lease terms are between three and five years, and ownership of the assets lies within the Group. None of the leased assets were sub-leased by the Group to third parties.

The depreciation of fixed assets for the year ended December 31, 2025 and 2024 were allocated as follows:

|                               |

| General and administrative    |

| Other expenses                |

**28. MODAL SAHAM (lanjutan)**

**Saham treasuri Bukit Asam (lanjutan)**

Saham hasil pembelian kembali tahun 2015 tersebut masih tersisa sebanyak 27.147.900 lembar sampai dengan 31 Desember 2024. Sedangkan pada saham hasil pembelian kembali tahun 2020 per 31 Desember 2025 tercatat sebanyak 6.302.000 lembar. Dengan demikian, per 31 Desember 2025, total saham treasuri Bukit Asam sebanyak 33.449.900 lembar.

Sesuai ketentuan Surat OJK No. S-68/D.04/2023 tanggal 2 Maret 2023, Bukit Asam diwajibkan kembali untuk melakukan pelepasan saham treasuri terhitung setelah tanggal 31 Maret 2023 dengan batas waktu yang akan ditentukan kembali oleh OJK. Pada tanggal 4 September 2023, OJK menerbitkan Surat No. S-2222/PM.21/2023 yang memperjelas tata cara perhitungan terkait tenggat waktu pelepasan saham treasuri.

Sebagai tindak lanjut kewajiban tersebut, maka pada tanggal 28 Maret 2024, Bukit Asam menjual sebanyak 27.147.900 saham treasuri dengan harga penjualan sebesar Rp2.950/lembar saham (nilai penuh). Saham treasuri Bukit Asam sebanyak 6.302.000 lembar wajib dialihkan paling lambat sebelum tanggal 31 Maret 2029.

**Divestasi SDA Antam**

Pada tanggal 28 Desember 2023, Antam menyelesaikan transaksi divestasi atas 49.00% kepemilikan pada SDA kepada HongKong Ningbo Contemporary Brup Lygend Co., Limited ("HKCBL") untuk imbalan kas sebesar Rp6.451.459 dan imbalan kontinjensi berdasarkan tambahan cadangan nikel yang ditemukan di area pertambangan SDA pada periode tertentu sebagaimana diatur dalam Perjanjian Jual Beli Saham ("SPA").

Pasca divestasi SDA, Antam tidak kehilangan pengendalian atas SDA. Proporsi ekuitas yang dimiliki oleh kepentingan nonpengendali berubah menjadi 49,00%, sehingga Grup menyesuaikan jumlah tercatat kepentingan nonpengendali untuk mencerminkan perubahan kepemilikan terhadap SDA. Kepentingan nonpengendali dicatat sebesar bagian proporsional kepentingan nonpengendali atas nilai tercatat aset neto SDA. Antam mengakui selisih antara nilai wajar imbalan yang diterima dan jumlah tercatat kepentingan nonpengendali yang disesuaikan secara langsung dalam ekuitas (pada akun tambahan modal disetor) sebesar Rp5,70 triliun (nilai penuh).

**28. SHARE CAPITAL (continued)**

**Treasury shares of Bukit Asam (continued)**

The remaining shares from 2015 buyback are 27,147,900 as of December 31, 2024. Meanwhile, the shares from the 2020 buyback as of December 31, 2025 were recorded at 6,302,000 shares. Thus, as of December 31, 2025, Bukit Asam's total treasury shares are 33,449,900 shares.

In accordance with the provisions of OJK Letter No. S-68/D.04/2023 dated March 2, 2023, Bukit Asam is required to re-release treasury shares effective after March 31, 2023 with a deadline to be determined again by OJK. On September 4, 2023, OJK issued Letter No. S-2222/PM.21/2023 which clarified the calculation procedures related to the deadline for the release of treasury shares.

As a follow-up to this obligation, on March 28, 2024, Bukit Asam sold 27,147,900 treasury shares at a selling price of Rp2,950/share (full amount). Bukit Asam's treasury shares totaling 6,302,000 shares must be transferred no later than March 31, 2029.

**Divestment of SDA Antam**

On December 28, 2023, Antam completed the divestment of a 49.00% interest in SDA to HongKong Ningbo Contemporary Brup Lygend Co., Limited ("HKCBL") for a cash consideration of Rp6,451,459 and a contingent consideration based on additional nickel reserves found in the mining area of SDA during a certain period as determined in the Share Purchase Agreement ("SPA").

After the divestment of SDA, Antam does not lose control over SDA. The proportion of equity held by non-controlling interests changed to 49.00%, and therefore, the Group adjusted the carrying amount of non-controlling interests to reflect the change in ownership of SDA. The non-controlling interest is recorded at the non-controlling interest's proportionate interest of the carrying value of SDA's net assets. Antam recognized directly in equity (in the additional paid-in capital account) any difference between the fair value of the consideration received and the adjusted carrying amount of non-controlling interests amounting Rp5.70 trillion (full amount).

**a. Perjanjian pemegang saham PTFI antara PT Indonesia Papua Metal dan Mineral, FCX dan Perusahaan**

Sesuai dengan perjanjian pemegang saham yang telah ditandatangani antara Perusahaan, PTII (IPMM), PTFI, dan FCX setelah penyelesaian Akuisisi Saham PTFI tanggal 21 Desember 2018, bahwa antara selesainya Akuisisi Saham PTFI dan pada tanggal yang jatuh lebih awal antara (i) 31 Desember 2022 atau (ii) produksi kumulatif dan penjualan emas dan tembaga PTFI melebihi jumlah yang telah ditentukan ("Periode Awal"), Perusahaan dan FCX akan mempertahankan hak ekonomi atas pendapatan dan pembagian biaya sehubungan dengan PTFI dengan cara yang sama seolah-olah usaha patungan antara PTFI dengan PTRTI masih ada. Penyerahan produk akan dilakukan secara berkala selama jangka waktu tertentu sebagaimana disepakati kedua belah pihak.

**37. SIGNIFICANT AGREEMENTS, COMMITMENTS AND CONTINGENCIES**

**a. PTFI shareholders agreement among PT Indonesia Papua Metal dan Mineral, FCX and the Company**

Pursuant to a shareholders agreement which has been entered into between the Company, PTII (IPMM), PTFI and FCX after the completion of PTFI Share Acquisition on December 21, 2018, it is contemplated that, between the completion of the PTFI Share Acquisition and the earlier of (i) December 31, 2022 or (ii) PTFI's cumulative production and sales of gold and copper exceeding predetermined amounts (the "Initial Period"), the Company and FCX will retain the economic rights to revenue and cost sharing arrangements in relation to PTFI in the same manner as though PTFI's joint venture with PTRTI was still in place. Following the Initial Period, it is intended that the economic rights to revenue and cost sharing arrangements in relation to PTFI will reflect the Company's and FCX's respective equity interests in PTFI.

**b. Sales agreements**

**h. Perjanjian jual beli tenaga listrik dengan  
PLN untuk Proyek Haltim**

Pada bulan Maret 2022, Antam melakukan penandatanganan Perjanjian Jual Beli Tenaga Listrik ("PJBT") dengan PLN, dimana PLN akan menyediakan, mengoperasikan, melakukan pemeliharaan pembangkit dan menyalurkan tenaga listrik dengan total kebutuhan sebesar 75 MW untuk memenuhi kebutuhan listrik pabrik Proyek Haltim dan kebutuhan usaha Antam selama 30 tahun ke depan. Harga jual tenaga listrik yang akan dibayarkan Antam kepada PLN mencakup tarif tetap dan tarif variabel mengikuti harga bahan bakar yang berlaku pada periode penagihan, berdasarkan formula sebagaimana ditentukan di dalam PJBT.

Selanjutnya pada bulan Mei 2023, dilakukan amandemen terhadap PJBT yang pada intinya mengubah jangka waktu penyediaan listrik dari yang semula 30 tahun menjadi 3 tahun, dengan mempertimbangkan, antara lain rencana pengembangan kawasan industri PT Feni Haltim sebagai bagian dari kerja sama pengembangan ekosistem baterai kendaraan listrik (EV Battery) dengan mitra.

Berdasarkan amandemen PJBT di atas, Antam diwajibkan untuk membayarkan biaya mobilisasi kepada PLN senilai Rp719.902 dan biaya preservasi senilai Rp20.484 kepada PLN. Selain itu, terdapat pula liabilitas kontinjensi terkait biaya demobilisasi sejumlah Rp645.396 yang bergantung kepada tujuan pemanfaatan pembangkit tersebut di masa depan.

**h. Power purchase agreement with PLN for  
Haltim Project**

In March 2022, Antam signed a Power Purchase Agreement ("PPA") with PLN, under which PLN will provide, operate, perform maintenance of the power plant and distribute electricity with a total need of 75 MW to satisfy the electricity needs of the Haltim Project plant of Antam and also for Antam's business needs for the next 30 years. The sales prices of electricity that Antam will pay to PLN includes a fixed tariff and a variable tariff depending on the applicable fuel cost during the billing period, in accordance with the formula set out in the PPA.

Subsequently, in May 2023 the amendment to PPA was signed, which was essentially amending the period of electricity provision from 30 years to 3 years, with due consideration to, among others, the development plan of PT Feni Haltim's industrial park as part of cooperation on the development of electric vehicle battery ecosystem (EV Battery) with the partner.

Based on the above amendment of the PPA, Antam is obligated to pay PLN mobilization cost of Rp719,902 and preservation cost of Rp20,484. In addition, there is a contingent liability relating to the demobilization costs amounting to Rp645,396 which depends on the purpose of utilization of the power plant in the future.

**s. Forestry regulation**

In April 2021, the Ministry of Environment and Forestry issued Ministerial Regulation No. 7/2021 concerning Forestry Planning, Change of Forest Area Designation and Change of Forest Area Function, and Use of Forest Area ("Regulation No. 7/2021"), which has been partially revoked by Minister of Environment and Forestry Regulation No. 14/2023.

Based on Regulation No. 7/2021, Borrow-to-Use Forest Area Permit ("IPPKH") was changed to the Forest Area Use Permit ("PPKH"). Antam's existing IPPKHs which are still valid are grandfathered and are treated as PPKHs until their expiries. PPKH is granted for a maximum period equal to the period of Antam's mining business license period if a number of specified requirements is met. IPPKH is granted for two years for further exploration activities in the production-operation stage and can be extended.

**v. Rencana pengusahaan WIUPK di blok  
Bahodopi Utara dan blok Matarape**

Pada Agustus 2018, Antam ditunjuk oleh Kementerian ESDM sebagai pemenang lelang di blok tambang nikel Bahodopi Utara di Morowali, Sulawesi Tengah, dan blok tambang nikel Matarape di Konawe Utara, Sulawesi Tenggara, konsesi yang sebelumnya dipegang oleh PTVI.

Menindaklanjuti surat tersebut, Antam melakukan pembayaran tagihan Kompensasi Data Informasi ("KDI") sebesar masing-masing Rp184.800 dan Rp184.050 untuk WIUPK blok Bahodopi Utara dan blok Matarape yang merupakan salah satu persyaratan untuk pengajuan permohonan IUPK Eksplorasi terkait. Grup mencatat pembayaran atas KDI blok Matarape dan blok Bahodopi Utara pada laporan posisi keuangan konsolidasian dalam aset lainnya. Pinjaman yang diperoleh Grup dari investor untuk melakukan pembayaran KDI dicatat pada laporan posisi keuangan konsolidasian sebagai liabilitas lainnya.

Pada 28 Juni 2021, Kementerian ESDM menerbitkan Permen ESDM Nomor 16 Tahun 2021 tentang Perubahan atas Permen ESDM Nomor 7 Tahun 2020 mengenai Tata Cara Pemberian Wilayah, Perizinan, dan Pelaporan pada Kegiatan Usaha Pertambangan Mineral dan Batubara.

Sebagai tindaklanjut dari Permen ESDM Nomor 16 Tahun 2021, pada tanggal 2 November 2024, sebagai bagian dari proses restrukturisasi penyertaan saham pada TMS (perusahaan patungan yang akan mengelola blok Matarape), Antam melakukan pengalihan Aset KDI untuk blok Matarape kepada TMS berdasarkan Perjanjian Pengalihan Aset KDI dengan nilai Rp285.255. Kenaikan nilai Aset KDI sebesar Rp101.205 dihitung oleh penilai independen yang terdaftar di OJK. Pengukuran nilai wajar atas aset KDI menggunakan kombinasi metode biaya pengganti baru dari pendekatan biaya dan metode transaksi sebelumnya dari pendekatan pasar dan oleh karena itu merupakan pengukuran nilai wajar tingkat 2 dan 3 dari tingkatan hierarki nilai wajar.

**v. Business cooperation of WIUPK in North  
Bahodopi and Matarape blocks**

On August 2018, Antam was appointed by the MoEMR, as the winner of the auction for the nickel block of North Bahodopi in Morowali, Central Sulawesi and the nickel block of Matarape in North Konawe, Southeast Sulawesi, the concessions of which were formerly held by PTVI.

Following the appointments, Antam made payments of Compensation for Information Data ("KDI") amounting to Rp184,800 and Rp184,050, respectively, for the WIUPK of North Bahodopi and Matarape blocks as one of the requirements for submitting a request for the related Exploration IUPK. The Group recorded the KDI payments for Matarape block and North Bahodopi block in the consolidated statement of financial position under other assets. Loans obtained by the Group from investors to make the KDI payments are recorded in the consolidated statement of financial position as other liabilities.

On June 28, 2021, MoEMR enacted MEMR Regulation No. 16/2021 concerning the first amendment to the MEMR Regulation No. 7/2020 concerning Procedures for the Granting of Areas, Licensing, and Reporting in Relation to Mineral and Coal Mining Business Activities.

As a follow-up to MEMR Regulation No. 16/2021, on November 2, 2024, as part of the restructuring process of the investment in TMS (a joint venture company that will manage the Matarape block), Antam transferred the KDI Assets for the Matarape block to TMS based on the KDI Asset Transfer Agreement with a value of Rp285,255. The increase in the value of KDI Assets amounting to Rp101,205 was calculated by an independent appraiser registered in OJK. The fair value measurement of KDI's assets uses a combination of the new replacement cost method of the cost approach and the prior transaction method of the market approach and therefore represents fair value measurements at levels 2 and 3 of the fair value hierarchy.

**37. PERJANJIAN PENTING, IKATAN DAN KONTINJENSI (lanjutan)**

**v. Rencana pengusahaan WIUPK di blok Bahodopi Utara dan blok Matarape (lanjutan)**

Berdasarkan Perjanjian Pengalihan Aset KDI blok Matarape:

- Sejumlah Rp184.050 dikompensasikan dengan pengalihan kewajiban pembayaran Antam kepada PT Tambang Nikel Permai ("TNP"), salah satu pemegang saham TMS, atas pinjaman yang diberikan TNP kepada Antam, yang sebelumnya dicatat sebagai liabilitas lainnya di dalam laporan keuangan konsolidasian.
- Sejumlah Rp101.205 akan dikompensasikan dengan diakuinya utang TMS kepada Antam, yang diatur dalam Perjanjian Pengakuan Utang tanggal 2 November 2024.
- Berdasarkan Perjanjian Pengakuan Utang, utang tersebut akan dilunasi oleh TMS dalam jangka waktu 10 tahun dan akan dikenakan bunga, dimana tingkat suku bunga yang digunakan akan disepakati dalam waktu 6 bulan sejak ditandatanganinya Perjanjian Pengakuan Utang.

Selanjutnya, pada tanggal 4 November 2024, penyertaan saham pada TMS telah direstrukturisasi sehingga komposisi kepemilikan saham pada TMS dimiliki oleh Antam, BUMD dan TNP masing-masing sebesar 41,00%, 10,00% dan 51,00%. Atas kepemilikan Antam pada TMS, TMS ditetapkan sebagai entitas asosiasi Grup (Catatan 13b).

Pada tanggal 7 Desember 2022, Kementerian ESDM mengeluarkan keputusan yang pada prinsipnya mencabut WIUPK untuk blok tambang Bahodopi Utara, yang sebelumnya telah diterbitkan ESDM pada tanggal 1 Agustus 2018. Pencabutan ini merupakan tindak lanjut ESDM atas keputusan Mahkamah Agung sehubungan dengan sengketa hukum atas kepemilikan lahan antara Antam dengan PT Oti Eya Abadi ("OEA") yang dimenangkan oleh OEA di tingkat Kasasi pada tanggal 22 April 2022.

Pada tanggal 21 Desember 2023, Antam memperoleh informasi keputusan atas upaya hukum luar biasa yang memperkuat posisi Antam.

**37. SIGNIFICANT AGREEMENTS, COMMITMENTS AND CONTINGENCIES (continued)**

**v. Business cooperation of WIUPK in North Bahodopi and Matarape blocks (continued)**

*Based on the Matarape block KDI Asset Transfer Agreement:*

- An amount of Rp184,050 was offset by the transfer of Antam's payment obligation to TNP, one of the shareholders of TMS, for the loan provided by PT Tambang Nikel Permai ("TNP") to Antam, which was previously recorded as other liabilities in the consolidated financial statements.*
- An amount of Rp101,205 will be compensated by the recognition of TMS' payable to Antam, as stipulated in the Debt Recognition Agreement dated November 2, 2024.*
- Based on the Debt Recognition Agreement, the debt will be repaid by TMS within 10 years and will bear interest, where the interest rate used will be agreed within 6 months from the signing of the Debt Recognition Agreement.*

*Furthermore, on November 4, 2024, the investment in TMS has been restructured so that the composition of share ownership in TMS is owned by Antam, BUMD and TNP amounting to 41.00%, 10.00% and 51.00%, respectively. Due to Antam's ownership in TMS, TMS has been determined as an associate of the Group (Note 13b).*

*On December 7, 2022, the MoEMR issued a decree that in principle revoked the WIUPK for the North Bahodopi mining block, which was previously issued by MoEMR on August 1, 2018. This revocation is the response of the MoEMR following the verdict of the Supreme Court with respect to the legal dispute of land ownership between Antam and PT Oti Eya Abadi ("OEA"), which resulted in the favour of OEA at the Cassation level on April 22, 2022.*

*As at December 21, 2023, Antam obtained information on the verdict on extraordinary legal remedies which strengthened Antams position.*

pengiriman emas batangan**

Sejak tahun 2020, Antam menjadi tergugat dalam sejumlah kasus hukum terkait transaksi penjualan emas batangan. Kasus-kasus tersebut sebagian besar terkait dengan klaim bahwa Antam belum menyerahkan emas batangan yang telah disepakati kepada penggugat selaku pembeli dengan klaim kerugian materiil dan immateriil dengan sejumlah sekitar Rp2,2 triliun (nilai penuh) pada tanggal 31 Desember 2024. Informasi yang biasanya disyaratkan oleh PSAK 237: Provisi, Liabilitas Kontinjensi dan Aset Kontinjensi, tidak diungkapkan karena dapat membentuk prasangka tertentu atas penyelesaian permasalahan hukum tersebut.

Sejak tahun 2022 sampai dengan tahun berjalan, Antam telah mendapatkan informasi putusan atas beberapa kasus hukum ini. Untuk putusan yang tidak menguntungkan bagi Antam maupun kasus hukum yang masih berjalan, manajemen akan terus menempuh seluruh upaya hukum yang ada dan tersedia demi mempertahankan hak-hak dan kepentingan Antam. Sejalan dengan maksud untuk membela posisi Antam, Antam dapat mengajukan upaya hukum terhadap pihak tertentu yang telah menimbulkan kerugian terhadap Antam.

Antam telah mengajukan gugatan atas salah satu kasus hukum di mana Antam meminta pembatalan atas seluruh transaksi pembelian emas terkait dalam kasus hukum tersebut. Antam meminta pihak pembeli tertentu untuk mengembalikan sebanyak 5,90 ton emas kepada Antam. Setelah menerima pengembalian emas tersebut, Antam akan mengembalikan uang kepada pihak pembeli senilai Rp3,60 triliun (nilai penuh). Selain itu, Antam juga menuntut ganti rugi materiil dan immateriil dengan jumlah sekitar Rp5 triliun (nilai penuh) untuk kasus hukum ini. Pada tanggal 18 Maret 2025, Antam telah menerima putusan atas gugatan ini dan tidak melakukan upaya hukum lebih lanjut.

**x. Legal cases related to gold bar deliveries**

*Since 2020, Antam has been named a defendant in a number of lawsuits related to gold bar sales transactions. The cases are mostly related to claims that Antam did not deliver the agreed amount of gold bars to the plaintiffs as the buyers are seeking material and non-material losses totalling approximately Rp2.2 trillion (full amount) as at December 31, 2024. The information usually required by PSAK 237: Provisions, Contingent Liabilities and Contingent Assets, is not disclosed on the grounds that it can be expected to prejudice the outcome of the litigation.*

*From 2022 until current period, Antam received information regarding the verdicts for some of these lawsuits. For the verdicts unfavourable to Antam as well as for the other remaining outstanding lawsuits, management shall continue to take all existing and available legal remedies to defend the rights and interests of Antam. pengiriman emas batangan (lanjutan)**

Selain itu, terhadap hasil panggilan teguran (*aanmaning*) kepada Antam atas putusan peninjauan kembali sehubungan dengan salah satu kasus hukum, Antam telah mengajukan permohonan penetapan *non-executable* terhadap putusan tersebut, serta mengajukan upaya hukum lanjutan. Hal ini karena terdapat perkara tindak pidana korupsi dan perdata yang berkaitan erat dengan substansi pelaksanaan putusan peninjauan kembali yang tidak menguntungkan Antam. Apabila putusan peninjauan kembali tersebut dilaksanakan, maka dapat menimbulkan potensi kerugian negara yang signifikan.

Pada tanggal penerbitan laporan keuangan konsolidasian ini, atas permohonan penetapan putusan *non-executable* yang diajukan oleh Antam, terdapat informasi pada situs Sistem Informasi Penelusuran Perkara ("SIPP") PN Surabaya yang menyatakan bahwa pelaksanaan eksekusi putusan tidak dapat dilaksanakan karena tidak ada tindak lanjut dari pemohon eksekusi.

Pada tanggal 8 November 2023, Antam telah melakukan permohonan Peninjauan Kembali Kedua di PN Surabaya dengan dasar pengajuannya adalah adanya putusan yang telah berkekuatan hukum tetap dan bertentangan dengan putusan Peninjauan Kembali Pertama.

Pada bulan Juli 2025, Antam menerima salinan resmi Putusan Peninjauan Kembali Kedua dari Mahkamah Agung yang mengabulkan permohonan Peninjauan Kembali Kedua Antam atas salah satu permasalahan hukum terkait dengan pengiriman emas batangan. Dampak dari putusan ini telah direfleksikan di laporan keuangan konsolidasian Grup pada 31 Desember 2025.

Antam juga akan terus melakukan upaya hukum lanjutan sehubungan dengan keputusan atas permasalahan hukum terkait dengan pengiriman emas batangan lainnya.

(continued)**

In addition, regarding the results of the summons for warning (*aanmaning*) to Antam concerning the verdict of judicial review on certain lawsuit, Antam has submitted a request for a non-executable verdict, as well as filing further legal action. This is based on the fact that there are cases of corruption and civil crimes which are closely related to the substance of the implementation of the judicial review decision which does not benefit Antam. If the verdict of judicial review is implemented, it may result in a significant amount of potential state losses.

As of the issuance date of these consolidated financial statements, the formal decision for the non-executable verdict request submitted by Antam, there is information on the Case Tracking Information System ("SIPP") website of the Surabaya District Court stating that the execution of the verdict could not be carried out because there is no further follow-up action from the applicant.

On November 8, 2023, Antam submitted a request for the Second Judicial Review at the Surabaya District Court with the basis of the application being a decision which has permanent legal force and is in conflict with the decision of the First Judicial Review.

In July 2025, Antam received an official Verdict of the Second Judicial Review by the Supreme Court which granted Antam's request for the Second Judicial Review of one of the legal issues related to gold bars deliveries. Impact of this verdict has been reflected in the Group's consolidated financial statements as at December 31, 2025.

Antam will also take further legal actions with respect to other verdict on legal cases related to gold bar deliveries.

**y. Permasalahan hukum terkait kontrak pemurnian dengan PT Loco Montrado**

Pada tanggal 8 November 2021, PT Loco Montrado ("LoMon") mendaftarkan gugatan wanprestasi (cidera janji) kepada Pengadilan Negeri Jakarta Selatan dimana LoMon menggugat bahwa Antam belum melaksanakan seluruh kewajiban Antam dalam perjanjian pengolahan anoda logam yang ditandatangani Antam dan LoMon pada Mei 2017.

Sehubungan dengan kasus hukum ini, LoMon menggugat Antam untuk membayar kerugian materiil dan immateriil serta melakukan penyerahan anoda logam sebanyak 5,36 ton dengan kandungan emas sekitar 1,00% - 5,00% dengan jumlah klaim kurang lebih sebesar Rp859 miliar (nilai penuh). Informasi yang biasanya disyaratkan oleh PSAK 237: Provisi, Liabilitas Kontinjensi dan Aset Kontinjensi tidak diungkapkan karena dapat membentuk prasangka tertentu atas penyelesaian permasalahan hukum tersebut.

Pada tanggal 14 Desember 2023 telah dibacakan Putusan Mahkamah Agung RI No. 4355 K/PDT/2023 dengan amar putusan pada pokoknya tidak menguntungkan Antam, maka atas Putusan Kasasi tersebut manajemen meyakini bahwa klaim LoMon tidak berdasar dan akan terus membela posisi Antam dalam kasus ini.

Pada tanggal 6 Februari 2025, Antam telah mengajukan upaya hukum lanjutan yakni mengajukan upaya Peninjauan Kembali dan belum ada putusan hingga tanggal penyelesaian laporan keuangan konsolidasian.

**y. Legal cases related to refinery contract with PT Loco Montrado**

On November 8, 2021, PT Loco Montrado ("LoMon") registered a default claim in the South Jakarta District Court where LoMon claimed that Antam has not fully performed all of its obligations under the refinery contract of metal anode which was signed by Antam and LoMon in May 2017.

In relation to this lawsuit, LoMon claims that Antam should pay material and nonmaterial losses, and must deliver metal anode of 5.36 tons with a gold content between 1.00% - 5.00%, with a total amount of claims approximating Rp859 billion (full amount). The information usually required by PSAK 237: "Provisions, Contingent Liabilities and Contingent Assets, is not disclosed on the grounds that it can be expected to prejudice the outcome of the litigation.

On December 14, 2023, the Republic of Indonesia Supreme Court Decision No. 4355 K/PDT/2023 with the decision basically not benefiting Antam, then based on the Cassation Decision management believes that the claim from LoMon is without merit and has therefore taken vigorous steps to defend against it.

On February 6, 2025, Antam submitted further legal action by submitting an effort for judicial review and no decision has been issued as of the completion date of the consolidated financial statements.

Pendapatan dari operasi terdiri atas pendapatan dari penjualan atau pengalihan produksi pertambangan di mana nilai penjualan produk pertambangan harus didasarkan pada harga pasar mineral yang dipublikasikan (misalnya harga berdasarkan LME) pada saat penjualan terjadi, atau pada harga jual aktual (jika tidak ada acuan harga pasar).</li> <li>Jika harga jual aktual lebih tinggi dari harga pasar yang dipublikasikan, harga jual aktual harus digunakan. Grup dapat menggunakan harga jual aktual hanya jika perbedaannya berada dalam kisaran 3,00% dari harga pasar relevan yang dipublikasikan.</li> <li>- Pengurangan yang diizinkan dan tidak diizinkan dalam perhitungan pajak badan umumnya sesuai dengan peraturan Pajak Penghasilan yang berlaku. Namun, pengurangan tertentu mengikuti aturan yang ditetapkan dalam peraturan khusus tambang yang sudah ada seperti ketentuan untuk biaya reklamasi (mengikuti Peraturan Menteri Keuangan No.219/PMK.011/2012).</li> <li>- Rasio utang terhadap modal juga sesuai dengan peraturan Pajak Penghasilan yang berlaku (yaitu Peraturan Menteri Keuangan No. 169/PMK.010/2015) dan oleh karenanya saat ini rasio utang terhadap modal adalah maksimum 4:1.</li> </ul> <p><b>ad. Income from operations consists of income from the sale or transfer of mining production where the value of the mining product sales should be based on the published market price of minerals (e.g., prices per the LME) at the time the sale occurs, or the actual selling price (but only if there is no market price reference).</li> <li>If the actual selling price is higher than the published market price, the actual selling price should be used. The Group can use the actual selling price only if the discrepancy is within 3.00% of the relevant published market price.</li> <li>- Allowable and non-allowable deductions in the corporate income tax calculation are generally according to the prevailing Income Tax regulations. Certain deductions however follow the rules set out in existing mine-specific regulations such as provisions for reclamation costs (which follows MoF Regulation No.219/PMK.011/2012).</li> <li>- The debt-to-equity ratio is also in line with the prevailing Income Tax regulations (i.e. MoF Regulation No. 169/PMK.010/2015) and therefore is currently a maximum 4:1 debt-to-equity ratio.</li> </ul> <p><b>ad. **al. Rangkaian transaksi di GAG**

Pada tanggal 3 Oktober 2024, GAG telah menyelesaikan rangkaian transaksi sebagai berikut:

- 1) GAG membeli 30,00% saham JLMI yang dimiliki oleh NII dengan pembayaran kas sebesar AS\$102.500.000 (Catatan 13b).
- 2) GAG menerima uang muka pembelian dari UMT sebesar AS\$45.000.000 sesuai *Prepayment Agreement* terkait sebagian pemasokan bijih nikel yang akan dikirimkan oleh GAG kepada UMT sesuai *Ore Supply Agreement*. Dana yang didapatkan GAG dari UMT digunakan sebagai bagian dari pembayaran atas pembelian saham JLMI.

Sebagai salah satu syarat dalam pemberian uang muka pembelian oleh UMT kepada GAG sesuai *prepayment agreement*, GAG memberikan jaminan melalui penggadaian saham JLMI yang dimilikinya kepada UMT sebanyak 2.634.147 lembar saham atau sebesar 13,17% dari seluruh saham ditempatkan dan disetor JLMI. Namun, penggadaian saham tidak mengakibatkan UMT memiliki hak suara pemegang saham serta pengaruh signifikan pada JLMI sehingga GAG tetap mempertahankan pengaruh signifikan atas JLMI.

- 3) Setelah GAG efektif menjadi pemegang saham JLMI, GAG memberikan pinjaman pemegang saham kepada JLMI sebesar AS\$18.000.000 dengan jangka waktu 2 tahun sesuai Perjanjian Pinjaman Pemegang Saham.

**al. Series of transaction in GAG**

On October 3, 2024, GAG has completed the series of transactions as follow:

- 1) GAG purchased 30.00% of JLMI's shares owned by NII with cash consideration of US\$102,500,000 (Note 13b).
- 2) GAG received advanced payments from UMT amounting to US\$45,000,000 based on *Prepayment Agreement* in relation to a portion of the nickel ore supply to be delivered by GAG to UMT in accordance with *Ore Supply Agreement*. The funds obtained by GAG from UMT were used as part of the payment of the purchased JLMI's share.

As one of the conditions in the provision of advance payment by UMT to GAG pursuant to the prepayment agreement, GAG provides collateral through the pledge of JLMI shares owned by UMT amounting to 2,634,147 shares or 13.17% of the total issued and paid-up shares of JLMI. However, the pledge of shares does not result in UMT having voting rights of shareholders as well as significant influence on JLMI, thus GAG still maintains significant influence over JLMI.

- 3) After GAG effectively became shareholder of JLMI, GAG has provided shareholder loan to JLMI amounting to US\$18,000,000 with a terms of 2 years based on *Shareholder Loan Agreement*.

**40. MANAJEMEN RISIKO KEUANGAN (lanjutan)**

**(1) Faktor risiko keuangan (lanjutan)**

Manajemen risiko dijalankan oleh satuan kerja *risk management* yang bertanggung jawab langsung kepada Direksi. Direksi bertugas untuk menjamin kecukupan prosedur dan metodologi pengelolaan terhadap risiko-risiko keuangan, yang meliputi identifikasi risiko secara akurat, pengukuran, pemantauan dan pengendalian risiko keuangan.

**a. Risiko harga komoditas**

Harga komoditas sangat tidak stabil seiring perubahan permintaan dan penawaran pelanggan. Saat ini terdapat risiko yang sangat tinggi bahwa harga produk Grup (seperti batubara, emas, timah, aluminium, feronikel) akan mengalami fluktuasi yang cukup signifikan. Walaupun basis pelanggan Grup terdiversifikasi dan tidak tergantung pada satu pasar atau negara saja, pendapatan Grup tetap dapat mengalami dampak negatif dari menurunnya harga komoditas.

Grup berkeyakinan bahwa cara mengelola risiko atas harga komoditas yang paling cepat adalah dengan menurunkan biaya produksi. Grup memiliki rencana untuk terus melakukan efisiensi antara lain dengan peremajaan alat-alat produksi, komitmen untuk menggunakan bahan bakar yang lebih murah seperti gas alam, batubara atau tenaga air. Sebagai tambahan, Grup juga menggunakan harga rata-rata untuk periode tertentu untuk penjualan beberapa produknya.

Grup, melalui entitas anaknya yang bergerak pada bisnis perdagangan komoditas yaitu MIT dan Indometal (London) Limited juga memiliki kontrak *forward* untuk harga komoditas tertentu dengan pihak ketiga.

**b. Risiko mata uang asing**

Risiko mata uang adalah risiko dimana nilai wajar atau arus kas masa datang dari suatu instrumen keuangan akan berfluktuasi akibat perubahan nilai tukar mata uang asing. Eksposur Grup terhadap fluktuasi nilai tukar terutama berasal dari kas dan setara kas, deposito berjangka, piutang usaha, piutang lain-lain, aset keuangan pada nilai wajar melalui penghasilan komprehensif lain, utang usaha, akrual, pinjaman bank, liabilitas sewa, utang obligasi dan utang lain-lain.

**40. FINANCIAL RISK MANAGEMENT (continued)**

**(1) Financial risk factors (continued)**

Risk management is carried out by the risk management task force that is directly responsible to the Board of Directors. The Board ensures the sufficiency of all procedures and methodology of financial risk management, which consists of accuracy of risk identification, measurement, monitoring and financial risk control.

**a. Commodity price risks**

Commodity prices are very unstable due to changes in supply and demand from customers. Currently, there is a high risk that prices of the Group's products (i.e. coal, gold, tin, aluminium, ferronickel) will fluctuate significantly. Although the Group has diversified customers and does not depend on a specific market or country, the Group's revenue could be negatively impacted by the decrease in commodity prices.

The Group believes that the fastest way to manage the commodity price risk is by decreasing the production costs. The Group has plans to continuously reduce its costs by, among other things, revitalising its production facilities and its commitment to use cheaper fuel sources, such as natural gas, coal, or hydro power. In addition, the Group also uses average prices for certain periods to sell some of its products.

Group, through its subsidiaries which engage in commodity trading business, MIT and Indometal (London) Limited also has forward contracts for certain commodity prices with third parties.

**b. Foreign currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to exchange rate fluctuations results primarily from cash and cash equivalents, time deposits, trade receivables, other receivables, financial assets at fair value through other comprehensive income, trade payables, accruals, bank borrowings, lease liabilities, bonds payable and other liabilities.

**40. MANAJEMEN RISIKO KEUANGAN (lanjutan)**

**(1) Faktor risiko keuangan (lanjutan)**

**b. Risiko mata uang asing (lanjutan)**

Keterkaitan dari fluktuasi harga produk Grup sesuai dengan harga yang diperdagangkan di pasar internasional dengan fluktuasi nilai tukar mata uang dianggap sebagai lindung nilai alami untuk mengurangi risiko mata uang asing Grup.

Jika nilai tukar Rupiah melemah atau menguat sebesar 5% dibandingkan dengan nilai tukar mata uang Dolar AS, atau sebaliknya, pada tanggal 31 Desember 2025 (dengan semua variabel lainnya dianggap tidak berubah), maka laba sebelum pajak penghasilan konsolidasian Grup untuk tahun yang berakhir 31 Desember 2025 akan menurun atau meningkat sebesar Rp2.735.804 (2024: Rp3.314.322), terutama berasal dari kerugian atau keuntungan atas penjabaran liabilitas neto yang didenominasi dalam mata uang asing pada tanggal pelaporan.

**c. Risiko suku bunga**

Risiko suku bunga adalah risiko dimana nilai wajar atau arus kas masa datang dari suatu instrumen keuangan akan berfluktuasi akibat perubahan suku bunga pasar. Eksposur Grup terhadap risiko perubahan suku bunga pasar terutama terkait dengan kas dan setara kas, deposito berjangka, pinjaman bank, dan liabilitas sewa.

Analisis sensitivitas untuk risiko suku bunga

Grup memiliki pinjaman dengan tingkat suku bunga variabel sehingga Grup terekspos risiko suku bunga arus kas. Untuk mengelola risiko tingkat bunga, Grup memiliki kebijakan dalam memperoleh pembiayaan yang akan memberikan campuran yang sesuai atas tingkat suku bunga mengambang dan tingkat bunga tetap.

**40. FINANCIAL RISK MANAGEMENT (continued)**

**(1) Financial risk factors (continued)**

**b. Foreign currency risk (continued)**

*The linkage of the price fluctuations of the Group's products following the prices traded on international markets with the fluctuations in currency exchange rates is considered a natural hedge for reducing the Group's foreign currency risk.*

*If the Rupiah weakens or strengthens by 5% as compared to the US Dollar or vice versa, on December 31, 2025 (assuming all other variables remain unchanged), the consolidated profit before tax of the Group for the year ended December 31, 2025 will decrease or increase approximately by Rp2,735,804 (2024: Rp3,314,322), mainly as a result of foreign exchange losses or gains on the translation of the net liabilities denominated in foreign currency as at the reporting date.*

**c. Interest rate risk**

*Interest rate risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to the risk of changes in market interest rates that relate primarily to its cash and cash equivalents and time deposits, bank borrowings, and lease liabilities.*

Sensitivity analysis for interest rate risk

*The Group has borrowings that are subject to variable interest rates, as such the Group is exposed to cash flow interest rate risk. To manage the interest rate risk, the Group has a policy of obtaining financing that would provide an appropriate mix of floating and fixed interest rate.*

**(1) Faktor risiko keuangan (lanjutan)**

**c. Risiko suku bunga (lanjutan)**

Analisis sensitivitas untuk risiko suku bunga (lanjutan)

Grup memiliki pinjaman dengan tingkat suku bunga variabel sehingga Grup terekspos risiko suku bunga arus kas. Untuk mengelola risiko tingkat bunga, Grup memiliki kebijakan dalam memperoleh pembiayaan yang akan memberikan campuran yang sesuai atas tingkat suku bunga mengambang dan tingkat bunga tetap.

Analisis sensitivitas di bawah ini telah ditentukan berdasarkan eksposur suku bunga untuk non-derivatif pada akhir tahun pelaporan. Untuk liabilitas tingkat bunga mengambang, analisis tersebut disusun dengan asumsi jumlah liabilitas terutang pada akhir periode pelaporan itu terutang sepanjang tahun. Kenaikan atau penurunan sebesar 0,5% digunakan ketika melaporkan risiko suku bunga secara internal kepada manajemen kunci dan merupakan penilaian manajemen terhadap perubahan yang mungkin terjadi pada suku bunga.

Pada tanggal 31 Desember 2025, jika suku bunga pinjaman naik/turun sebesar 0,5% (dengan semua variabel lainnya dianggap tidak berubah), maka laba sebelum pajak penghasilan Grup akan menurun/meningkat sekitar Rp526.184 (2024: Rp509.231).

**d. Risiko kredit**

Risiko kredit adalah risiko dimana salah satu pihak akan gagal memenuhi kewajiban kontraktualnya.

**40. FINANCIAL RISK MANAGEMENT (continued)**

**(1) Financial risk factors (continued)**

**c. Interest rate risk (continued)**

Sensitivity analysis for interest rate risk (continued)

The Group has borrowings that are subject to variable interest rates, as such the Group is exposed to cash flow interest rate risk. To manage the interest rate risk, the Group has a policy of obtaining financing that would provide an appropriate mix of floating and fixed interest rate.

The sensitivity analysis below has been determined based on the exposure to interest rates for non-derivative instruments at the end of the reporting year. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 0.5% increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

As at December 31, 2025, if the loan interest rates had increased/decreased by 0.5% (assuming all other variables remain unchanged), the profit before income tax of the Group would have been lower/higher by approximately Rp526,184 (2024: Rp509,231).

**d. Credit risk**

Credit risk is the risk that the counterparty will fail to discharge its contractual obligation.

**d. Credit risk (continued)**

The Group has put in place credit policies and procedures to ensure ongoing credit evaluation and active account monitoring. The Group manages its credit risk exposure from its deposits in banks by monitoring banks reputations, credit ratings and limiting the aggregate risk to any individual counterparty. In order to manage the credit risk related to trade receivables, the Group trades only with recognized and creditworthy third parties. One of the Group's policy is that all customers who wish to trade on credit terms are subject to credit verification procedures and terms of payment either through SKBDN or a letter of credit and have clear policies on the selection of customers, as well as having legally binding agreements in place for mineral commodity transactional sales. In addition, receivable balances are monitored on an ongoing basis in order to reduce the exposure to bad debts.

The balances of the trade receivables and other receivables are as follows:

Management has determined the operating segments based on the reports reviewed by the Board of Directors that are used to make strategic decisions. The Board of Directors considers the business operations from the perspective of the business type. The Group's business segments can be classified into six major business operations, consisting of (a) Coal; (b) Gold and other precious metals; (c) Aluminium; (d) Tin metal and tin solder; (e) Nickel and ferromnickel; (f) Others; and (g) Head office. Other operations primarily consist of trading, purification of metals, construction, mining services and plantation business services. All transactions between the segments have been eliminated.

The Board of Directors uses the measure of revenue to assess the performance of the operating segments.

All of the Group's significant operational activities are located in Indonesia. The Group's other operational activities that occur outside Indonesia are mainly commodity trading conducted by MIT and Indometal (London) Limited, which are domiciled in Singapore and England, respectively. The amount of non-current assets outside Indonesia is immaterial.

The original consolidated financial statements included herein are in the Indonesian language.
