## Penjelasan Sampul

### Cover Explanation

## Menavigasi Haluan Negeri di Tengah Ketidakpastian Global

### Navigating the Nation's Direction in the Middle of the Raging World

Desain ini mengkonseptualisasikan peran vital MIND ID melalui citra kuat sebuah kapal navigasi kecil yang memandu kapal pengangkut raksasa. Kapal kecil yang tangguh ini melambangkan MIND ID, yang mengemban tanggung jawab rumit untuk mengarahkan kapal masif yang dipandunya. Kapal besar tersebut merepresentasikan visi bangsa untuk menciptakan harmonisasi bagi rakyat melalui pemberdayaan masyarakat, yang bergerak dengan momentum global yang signifikan.

Visualisasi ini mempertegas urgensi MIND ID sebagai seorang "Navigator". Layaknya pemandu ahli yang menentukan jalur paling aman dan efisien melalui selat yang sempit, MIND ID menetapkan arah masa depan bagi upaya Indonesia dalam membangun resiliensi melalui pemberdayaan masyarakat. Di era yang diwarnai oleh turbulensi geopolitik, konflik internasional, dan kesenjangan sosial, pergerakan strategis MIND ID yang presisi memastikan bahwa visi Indonesia bagi rakyatnya tidak sekadar berjalan, melainkan berhasil dikemudikan menuju kemakmuran nasional dan stabilitas global.

This design conceptualizes MIND ID's vital role through the powerful imagery of a small navigation vessel leading a monumental carrier. The small, powerful vessel symbolizes MIND ID, tasked with the intricate responsibility of maneuvering the massive ship it guides. This larger vessel represents the vast and abundant natural wealth of the Indonesian archipelago, moving with significant global momentum.

The visualization highlights MIND ID's critical importance as a "Navigator." Much like an expert guide determining the safest and most efficient path through narrow straits, MIND ID defines the future direction of Indonesia's mineral sector. In an era defined by geopolitical turbulence, international conflict, and market volatility, MIND ID's precise, strategic movements ensure that Indonesia's valuable resources are not merely transported, but successfully steered toward national prosperity and global stability.

President Commissioner and Independent Commissioner

## Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Izinkan saya mewakili Dewan Komisaris MIND ID menyampaikan syukur atas kelancaran operasi dan bisnis Perusahaan di sepanjang tahun 2025. Terbentuknya Badan Pengaturan Badan Usaha Milik Negara (BP BUMN) serta Badan Pengelola Investasi (BPI) Danantara menjadi rujukan penting dari perjalanan MIND ID di tahun 2025 dan ke depan, khususnya ketika sinergi antar BUMN didorong sebagai lokomotif bagi pertumbuhan perekonomian nasional. Untuk itu, izinkan kami menyampaikan laporan pengawasan atas jalannya operasi dan bisnis Perusahaan di sepanjang 2025.

## Mendukung Asta Cita, Bersama Mewujudkan Indonesia yang Lebih Baik

Pemerintah Indonesia telah menetapkan visi Asta Cita untuk merumuskan arah strategis Indonesia ke depan. Dalam visi tersebut, terdapat beberapa poin di mana MIND ID berperan cukup penting dan strategis, seperti hilirisasi, kedaulatan pengelolaan sumber daya alam, ketahanan energi, hingga ekonomi kerakyatan.

Pada titik ini, MIND ID selaku Holding BUMN Pertambangan memegang peranan krusial sebagai “mesin penggerak” dalam mewujudkan Asta Cita, khususnya pada visi kemandirian bangsa dan hilirisasi industri. Melalui operasional yang dilakukan entitas anak atau anggota Holding, MIND ID berupaya melanjutkan hilirisasi dan industrialisasi di mana poin ini menjadi “panggung utama” bagi Grup MIND ID. Hilirisasi bertujuan menciptakan nilai tambah di dalam negeri agar Indonesia tidak lagi sekadar mengeksport tanah dan air. Tak hanya itu, hilirisasi memberikan fondasi bagi kedaulatan pengelolaan sumber daya alam, di mana pembangunan *smelter* tembaga di Gresik oleh PT Freeport Indonesia dan *smelter* bauksit oleh INALUM memastikan pemurnian logam terjadi 100% di dalam negeri, yang meningkatkan pendapatan negara secara signifikan.

Selain itu, MIND ID juga berperan dalam pembentukan ekosistem energi terbarukan, di mana Grup MIND ID menyuplai mineral kritis seperti tembaga, nikel, dan bauksit yang merupakan bahan baku utama infrastruktur energi bersih, seperti panel surya dan turbin angin. Melalui integrasi nikel dari PT ANTAM dan pengembangan industri baterai dari PT IBC, MIND ID memposisikan Indonesia sebagai pemain kunci dalam rantai pasok global masa depan.

MIND ID juga mendukung penguatan ketahanan energi terutama dalam menjaga pasokan energi nasional. Pengelolaan batu bara bukan hanya dilakukan untuk pemenuhan kebutuhan ekspor, tetapi juga memastikan pasokan domestik (*Domestic Market Obligation*) untuk pembangkit listrik tetap stabil di masa transisi menuju energi hijau di masa depan.

## Dear Shareholders and Stakeholders,

On behalf of the MIND ID Board of Commissioners, allow me to express my gratitude for the expediency of operational and business of the Company throughout 2025. The establishment of the State-Owned Enterprises Regulatory Agency (BP BUMN) and the Danantara Investment Management Agency (BPI) serve as important references for MIND ID's journey in 2025 and beyond, particularly as synergy between SOEs is promoted as a driving force for national economic growth. Therefore, allow us to submit a supervisory report on operational and business of the Company throughout 2025.

## Supporting Asta Cita, Together Creating a Better Indonesia

The Indonesian government has established the Asta Cita vision to define Indonesia's future strategic direction. This vision identifies several key strategic areas where MIND ID plays a crucial role, including downstreaming, natural resource management sovereignty, energy security, and a people-oriented economy.

At this point, MIND ID as the State-Owned Mining Company Holding plays a crucial role as a “driving engine” in realizing Asta Cita, especially in the vision of national independence and industrial downstreaming. Through operational conducted by subsidiaries or members of the Holding, MIND ID strives to continue downstreaming and industrialization where this point becomes the “main stage” for the MIND ID Group. Downstreaming aims to create added value domestically so that Indonesia is no longer merely exporting soil and water. Not only that, downstreaming provides a foundation for sovereign natural resource management, where the construction of a copper smelter in Gresik by PT Freeport Indonesia and a bauxite smelter by INALUM ensures that metal refining occurs 100% domestically, which significantly increases state revenue.

In addition, MIND ID also plays a role in the development of a renewable energy ecosystem. The MIND ID Group supplies critical minerals such as copper, nickel, and bauxite, which are key of raw materials for clean energy infrastructure, such as solar panels and wind turbines. Through the integration of nickel from ANTAM and the development of the battery industry from PT IBC, MIND ID is positioning Indonesia as a key player in the future global supply chain.

MIND ID also supports strengthening energy security, particularly in maintaining the national energy supply. Coal management is not only aimed at meeting export needs but also ensuring a stable domestic supply (*Domestic Market Obligation*) for power plants during the transition to a green energy future.

Dalam hal mewujudkan kemandirian ekonomi dan kedaulatan sumber daya, MIND ID berperan sebagai instrumen negara untuk mengambil alih kedaulatan atas kekayaan alam. Keberhasilan peningkatan saham di PT Freeport Indonesia dan PT Vale Indonesia Tbk merupakan bukti konkret dukungan terhadap Asta Cita dalam hal kedaulatan sumber daya nasional. Di samping itu, sebagai Holding, MIND ID menyetorkan dividen, pajak, dan PNPB yang masif untuk membiayai berbagai program pembangunan Pemerintah Indonesia lainnya. MIND ID juga memiliki peran dalam memperkuat pembangunan manusia, sains, dan teknologi, di mana sektor pertambangan modern memerlukan penguasaan teknologi tinggi.

Dukungan lainnya yang tak kalah penting adalah pelestarian lingkungan hidup melalui upaya mendorong praktik *Environmental, Social, & Governance* (ESG). Di tengah tekanan isu praktik ESG yang semakin masif, Grup MIND ID menjadi laboratorium penting dalam mengintegrasikan standar ESG ke dalam operasional tambang. MIND ID memastikan lahan bekas tambang dikelola kembali menjadi hutan atau area produktif lainnya; melakukan upaya dekarbonisasi dengan mengurangi emisi karbon dalam proses produksi *smelter* melalui penggunaan energi yang lebih bersih, selaras dengan komitmen *Net Zero Emission* Pemerintah Indonesia.

Kunci penting dalam pelaksanaan peran ini muncul dari upaya pengelolaan tantangan yang ada, baik eksternal maupun internal. Fluktuasi komoditas mineral akibat volatilitas ekonomi politik global, perekonomian Indonesia yang berupaya terus tumbuh di tengah tekanan yang ada, menjadi beberapa hal penting yang harus disikapi dengan cermat untuk dapat mewujudkan peran dan kontribusi MIND ID dalam mendukung perwujudan Indonesia yang lebih baik ke depan.

### Pengawasan Dewan Komisaris serta Frekuensi dan Cara Pemberian Nasihat kepada Direksi

Pembentukan organ Dewan Komisaris dan Direksi sebagai organ utama merupakan bagian dari kepatuhan terhadap peraturan dan perundang-undangan yang berlaku. Direksi berperan mengelola operasi dan bisnis Perusahaan, sedangkan Dewan Komisaris memiliki peran untuk mengawasi pengelolaan operasi dan bisnis yang dijalankan Direksi.

Hubungan kerja antara kedua organ ini dibangun dengan saling menghormati antar keduanya. Terdapat batasan dari tanggung jawab dan peran yang dijalankan baik oleh Dewan Komisaris maupun Direksi. Kami bertugas melakukan pengawasan atas jalannya pengelolaan Perusahaan oleh Direksi, memberi nasihat kepada Direksi, serta memastikan bahwa Perusahaan melaksanakan prinsip Tata Kelola Perusahaan yang Baik atau *Good Corporate Governance* (GCG).

In realizing economic independence and resource sovereignty, MIND ID serves as a state instrument for asserting sovereignty over natural resources. The successful increase in shares in PT Freeport Indonesia and PT Vale Indonesia is concrete evidence of support for Asta Cita in terms of national resource sovereignty. Furthermore, as a holding company, MIND ID contributes substantial dividends, taxes, and non-tax state revenues to finance various other development programs of the Indonesian government. MIND ID also plays a role in strengthening human development, science, and technology, where the modern mining sector requires high-tech expertise.

Another equally important support is environmental preservation through efforts to promote Environmental, Social, & Governance (ESG) practices. Amidst intensifying scrutiny over ESG compliance, the MIND ID Group has become a critical testbed for integrating ESG standards into mining operations. MIND ID ensures that ex-mining land is re-managed as forest or other productive areas; and implements decarbonization efforts by reducing carbon emissions in the smelter production process through the use of cleaner energy, in line with the Indonesian Government's Net Zero Emission commitment.

A key factor in fulfilling this role lies in managing existing challenges, both external and internal. Fluctuations in mineral commodities due to global political and economic volatility, and the Indonesian economy's continued growth amidst pressures, are some of the key factors that must be carefully addressed to realize MIND ID's role and contribution in supporting a better Indonesia in the future.

### Supervision of the Board of Commissioners and the Frequency and Method of Providing Advice to the Board of Directors

The establishment of the Board of Commissioners and the Board of Directors as the primary organs is part of compliance with applicable laws and regulations. The Board of Directors is responsible for managing operational and business of the Company, while the Board of Commissioners oversees the management of the operational and business conducted by the Board of Directors.

The working relationship between these two organs is built on mutual respect. There are boundaries between the responsibilities and roles of both the Board of Commissioners and the Board of Directors. Our role is to supervise the management of the Company by the Board of Directors, provide advice to the Board of Directors, and ensure that the Company adheres to the principles of Good Corporate Governance (GCG).

Dalam merancang dan merumuskan target serta rencana kerja, kami berperan untuk memastikan bahwa aspirasi seluruh pemangku kepentingan, termasuk diantaranya investor dan pemegang saham, tercakupkan dengan baik. Bentuk pengawasan dilakukan melalui rapat-rapat yang diadakan Dewan Komisaris, baik rapat internal maupun rapat bersama dengan mengundang Direksi atau menghadiri undangan dari Direksi. Di sepanjang tahun 2025 kami menggelar 13 kali rapat internal dan 14 kali rapat dengan mengundang Direksi. Berbagai rapat tersebut menjadi forum bagi kami selaku Dewan Komisaris untuk melakukan evaluasi intensif dan mendalam terhadap berbagai hal terkait kinerja MIND ID, baik dalam merumuskan dan memantau pencapaian kinerja, pengelolaan operasi dan bisnis serta kinerja keuangan Perusahaan, perkembangan investasi dan proyek, penanganan permasalahan, penerapan GCG, pengelolaan Sumber Daya Manusia (SDM), arus kas dan permodalan, hingga penerapan keberlanjutan berbasis pendekatan *Environmental, Social, and Governance* (ESG).

Di samping itu, kami juga melakukan pemantauan langsung ke lapangan untuk mendapatkan informasi terkini terkait dengan kinerja operasional masing-masing entitas anak atau anggota Holding.

Kami mengapresiasi berbagai kebijakan strategis yang telah dilakukan Direksi, khususnya dalam mengelola operasional *Holding* BUMN Pertambangan dan seluruh anggotanya. Beberapa rekomendasi yang telah kami berikan atas pengelolaan Perusahaan oleh Direksi di tahun 2025 antara lain rekomendasi atas aspek keuangan, pengembangan bisnis, perencanaan strategis, pelaksanaan proyek strategis, kegiatan eksplorasi cadangan dan produksi mineral dan batu bara, tindak lanjut hasil audit internal dan eksternal, aspek tata kelola portofolio, aspek tata kelola dan kepatuhan (GCG), *Health, Safety, Security and Environment* (HSSE), Manajemen Risiko, dan *Human Capital*.

## Penilaian atas Kinerja Direksi Mengenai Pengelolaan Perusahaan dan Dasar Penilaiannya

Penilaian kinerja Direksi dilakukan melalui pencapaian kontrak manajemen atau *Key Performance Indicator* (KPI) sebagaimana telah disepakati bersama-sama dengan Pemegang Saham pada Rapat Umum Pemegang Saham (RUPS). Penilaian terhadap kinerja individu Direksi juga dilakukan dengan mengacu pada Surat Kementerian BUMN No. S-45/DSI.MBU/03/2024 yang memperhatikan pada aspek Kinerja, yang terdiri dari penilaian terhadap hasil kerja (*result*) dan perilaku (*behavior*), dan Kapasitas, yang terdiri dari penilaian terhadap kompetensi aktual serta kemauan dan kecepatan belajar (*learning agility*).

In designing and formulating targets and work plans, we play a role in ensuring that the aspirations of all stakeholders, including investors and shareholders, are well-informed. Supervision is performed through meetings held by the Board of Commissioners, both internal meetings and joint meetings inviting the Board of Directors or attending invitations from the Board of Directors. Throughout 2025, we held 13 internal meetings and 14 meetings inviting the Board of Directors. These various meetings served as a forum for us as the Board of Commissioners to conduct intensive and in-depth evaluations of various matters related to MIND ID's performance, both in formulating and monitoring performance achievements, managing operational and business and the Company's financial performance, investment and project developments, problem handling, GCG implementation, Human Resources (HR) management, cash flow and capital, and the implementation of sustainability in accordance with the Environmental, Social, and Governance (ESG) approach.

In addition, we also conduct direct monitoring in the field to obtain the latest information regarding the operational performance of each subsidiary or Holding member.

We appreciate the various strategic policies implemented by the Board of Directors, particularly in managing the operational of the State-Owned Mining Holding Company and all its members. We have provided several recommendations for management of the Board of Directors of the Company in 2025, including recommendations on financial aspects, business development, strategic planning, strategic project implementation, exploration activities for mineral and coal reserves and production, follow-up on internal and external audit results, portfolio governance aspects, governance and compliance (GCG), Health, Safety, Security and Environment (HSSE), Risk Management, and Human Capital.

## Performance Assessment of the Board of Directors Concerning Company Management and the Basis for the Assessment

Performance assessment of the Board of Directors is performed through the achievement of management contracts or Key Performance Indicators (KPIs) as agreed upon with Shareholders at the General Meeting of Shareholders (GMS). The assessment of the individual performance of the Board of Directors is also performed by referring to the Letter of the Ministry of State-Owned Enterprises No. S-45/DSI.MBU/03/2024 which pays attention to the Performance aspect, which consists of an assessment of work results and behavior, and Capacity, which consists of an assessment of actual competencies as well as the willingness and learning agility.

Dari penilaian yang telah dilakukan, tercatat bahwa realisasi KPI Direksi mencapai angka 90,19 dari bobot 100,00. Pencapaian di atas bobot yang ditetapkan mencerminkan keberhasilan Direksi dalam memanfaatkan seluruh potensi yang ada untuk dapat meraih hasil yang optimal. Meskipun demikian, terdapat beberapa aspek penilaian yang masih menjadi evaluasi bagi pengembangan Perusahaan di masa mendatang.

Sejalan dengan hasil KPI tersebut, kami mengapresiasi bahwa Direksi telah menjalankan tugas dan tanggung jawabnya dengan sangat baik. Hal ini tercermin dari capaian kinerja Perusahaan secara umum terhadap target Rencana Kerja dan Anggaran Perusahaan (RKAP) dan KPI Perusahaan. MIND ID berhasil menghadapi berbagai tantangan dan ketidakpastian sehingga mampu mencatatkan kinerja yang solid.

Kami meyakini bahwa pencapaian kinerja yang membanggakan ini merupakan hasil dari konsistensi Direksi dalam menerapkan strategi yang adaptif, *agile* dalam mengoptimalkan strategi restrukturisasi Perusahaan seperti meningkatkan pertumbuhan eksplorasi dan produksi secara agresif, daya saing biaya melalui digital, membangun hilirisasi aset serta aliansi strategis yang dibangun Perusahaan untuk ekspansi bisnis baru.

### Perkembangan Tata Kelola Perusahaan dan Upaya Menjaga Operasi dan Bisnis yang Berkelanjutan

Regulator yang berkepentingan pada perkembangan dunia usaha Indonesia telah berkomitmen untuk mendorong penerapan prinsip dan praktik GCG sebagai sebuah nilai yang wajib diemban oleh setiap entitas usaha yang berdomisili di Indonesia. MIND ID menyambut dengan tangan terbuka atas niat baik dari regulator, terutama karena penerapan GCG terbukti memberikan dampak yang positif bagi keberlanjutan dunia usaha dan iklim investasi.

Sebagai organ yang bertugas melakukan pengawasan terhadap pelaksanaan penerapan GCG oleh Direksi, kami selaku Dewan Komisaris memandang implementasi GCG di lingkup MIND ID serta seluruh Anggota *Holding* BUMN Pertambangan terus mengalami peningkatan dari waktu ke waktu. Pengembangan perangkat kebijakan yang terus diperbaharui, hingga evaluasi dan pemantauan GCG, menjadi cerminan komitmen Manajemen untuk dapat menerapkan prinsip dan praktik GCG di seluruh elemen operasi dan bisnis Perusahaan.

Kami memandang, perkembangan penerapan prinsip GCG di lingkungan MIND ID telah memenuhi berbagai ketentuan yang berlaku. Direksi dan seluruh jajarannya terus berupaya untuk membentuk dan mengembangkan implementasi prinsip GCG, terutama terhadap kepatuhan atas peraturan yang berlaku. Pembentukan berbagai organ pendukung yang membantu Dewan Komisaris dan Direksi merupakan alat untuk memastikan

Based on the assessment, the realization of the Board's KPIs reached a score of 90.19 out of a target weight of 100.00. ### Development of Corporate Governance and Efforts to Maintain Sustainable Operational and Business

Regulators concerned with the development of the Indonesian business sector have committed to promoting the implementation of GCG principles and practices as a mandatory value for every business entity domiciled in Indonesia. MIND ID welcomes good intentions of the regulators, particularly given the proven positive impact of GCG implementation on business sustainability and the investment climate.

We believe that the implementation of GCG principles within MIND ID has complied with various applicable regulations. The Board of Directors and all its staff continue to strive to establish and develop the implementation of GCG principles, particularly concerning compliance with applicable regulations. The establishment of various supporting organs to assist the Board of Commissioners and the Board of Directors demonstrates the

Catatan penting bagi perkembangan GCG di lingkup Perusahaan adalah pengendalian internal dan pengelolaan risiko sesuai dengan bisnis inti dan penyesuaian terhadap tren pengelolaan risiko dari waktu ke waktu. Direksi bersama-sama dengan Dewan Komisaris telah berupaya untuk mengembangkan sistem pengendalian internal dan manajemen risiko sebagai salah satu cara dalam menerapkan GCG terkait perkembangan GCG.

sound implementation of GCG within MIND ID. The harmonious cooperation between the Audit Committee under the Board of Commissioners and Internal Audit under the Board of Directors demonstrates commitment of MIND ID to establishing a balanced and measurable internal control process.

## Pandangan atas Pengelolaan *Whistleblowing System* (WBS) Perusahaan dan Peran Dewan Komisaris dalam WBS Perusahaan

Salah satu bentuk komitmen MIND ID dalam menerapkan prinsip GCG dilakukan melalui pembentukan Sistem Pelaporan Dugaan Pelanggaran atau *Whistleblowing System* (WBS). Sistem ini memungkinkan pemangku kepentingan untuk dapat melaporkan dugaan pelanggaran termasuk tindakan kecurangan (*fraud*) yang terjadi dalam rantai nilai Perusahaan. Sistem ini juga memungkinkan pelapor untuk terlindungi identitasnya, selama laporan yang diberikan dapat dipertanggungjawabkan.

MIND ID telah menyusun kebijakan mengenai Sistem Pelaporan Pelanggaran sebagai sarana untuk menerima pengaduan baik dari dalam maupun luar Grup MIND ID, yang tertuang dalam Kebijakan Pelaksana tentang Pedoman Sistem Pelaporan Pelanggaran Terintegrasi Grup MIND ID (MIND ID Group *Integrated Whistle Blowing System*), serta Peraturan Direksi tentang Sistem Penanganan Pengaduan Dugaan Pelanggaran (*Whistleblowing System*/WBS). Sistem yang diberi nama "OpenMIND" ini menjadi sarana untuk menerima pengaduan baik dari dalam maupun luar Grup MIND ID. Dalam pengelolaan pengaduan, MIND ID membentuk Tim Pengelola dan Tim Independen yang bertugas menerima dan menindaklanjuti pengaduan yang masuk melalui sistem OpenMIND.

Di sepanjang tahun 2025 OpenMIND menerima 47 laporan pengaduan, dengan status seluruh laporan telah ditindaklanjuti sesuai dengan ketentuan yang berlaku. Dewan Komisaris terus mendorong Direksi dan seluruh Insan MIND ID untuk dapat memanfaatkan, mensosialisasikan, dan mengoptimalkan keberadaan WBS MIND ID sebagai salah satu alat bagi penguatan penerapan GCG untuk mencapai praktik terbaik.

### Susunan Dewan Komisaris

Berdasarkan Keputusan RUPS tanggal 3 Maret 2025, Pemegang Saham memutuskan untuk memberhentikan dengan hormat Nicolaus Teguh Budi Harjanto dari posisinya sebagai Komisaris. Pada kesempatan yang sama, Pemegang Saham mengangkat Agung Setya Imam Effendi untuk mengemban jabatan Komisaris Independen. Kemudian pada 4 Maret 2025, Pemegang Saham mengangkat Tri Winarno sebagai Komisaris. Pada 10 Juni 2025, Pemegang Saham memutuskan untuk memberhentikan dengan hormat Pamitra Wineka dan Agung Setya Imam Effendi dari jabatan Komisaris Independen.

## Views on the Management of *Whistleblowing System* (WBS) of the Company and the Role of the Board of Commissioners in WBS of the Company

One form of commitment of MIND ID to implementing GCG principles is the establishment of a *Whistleblowing System* (WBS). This system allows stakeholders to report suspected violations, including fraud, within the company's value chain. The system also protects the whistleblower's identity, as long as the report is accountable.

MIND ID has developed a policy concerning the *Whistleblowing System* as a means to receive complaints from both within and outside the MIND ID Group, which is stated in the Implementing Policy on Guidelines for the MIND ID Group Integrated *Whistleblowing System*, as well as the Board of Directors Regulation on the *Whistleblowing System* (WBS). The system, named "OpenMIND," is a means to receive complaints from both within and outside the MIND ID Group. In managing complaints, MIND ID has formed a Management Team and an Independent Team tasked with receiving and following up on complaints received through the OpenMIND system.

Throughout 2025, OpenMIND received 47 complaints, with all reports being followed up in accordance with applicable regulations. The Board of Commissioners continues to encourage the Board of Directors and all MIND ID personnel to utilize, disseminate information, and optimize the MIND ID WBS as a tool for strengthening GCG implementation and achieving best practices.

### Composition of the Board of Commissioners

In accordance with the Resolution of the GMS dated March 3, 2025, the Shareholders decided to honorably dismiss Nicolaus Teguh Budi Harjanto from his position as Commissioner. On June 10, 2025, the Shareholders decided to honorably dismiss Pamitra Wineka and Agung Setya Imam Effendi from their positions as Independent Commissioners.

Pada kesempatan yang sama, Pemegang Saham mengangkat Muhammad Fadil Imran sebagai Komisaris dan Carmelita Hartoto selaku Komisaris Independen. Pemegang Saham juga menetapkan jabatan Grace Natalie Louisa dari sebelumnya Komisaris menjadi Komisaris Independen. Kemudian, pada 6 November 2025, Pemegang Saham memutuskan untuk mengangkat Wahyu Kuncoro untuk menjabat Komisaris.

Dengan demikian, susunan Dewan Komisaris per 31 Desember 2025 adalah sebagai berikut:

- Komisaris Utama merangkap Komisaris Independen: Fuad Bawazier
- Komisaris Independen: Nugroho Widyotomo
- Komisaris Independen: Grace Natalie Louisa
- Komisaris Independen: Carmelita Hartoto
- Komisaris: Astera Primanto Bhakti
- Komisaris: Tri Winarno
- Komisaris: Muhammad Fadil Imran
- Komisaris: Wahyu Kuncoro

Tidak terdapat perubahan susunan Dewan Komisaris dalam periode 31 Desember 2025 hingga ditandatanganinya laporan ini per tanggal 19 Mei 2026.

## Memandang Prospek di Masa Depan

Tahun 2026 diprediksi masih akan diliputi ketidakpastian. Organization for Economic Cooperation and Development (OECD) memroyeksikan pertumbuhan Produk Domestik Bruto (PDB) dunia akan melambat menjadi 2,9% pada 2026 dibandingkan tahun 2025 dengan proyeksi sebesar 3,2%. Hal ini tak lepas dari adanya perang tarif yang diinisiasi Amerika Serikat dan ketidakpastian kebijakan yang menghambat investasi dan perdagangan.

Dalam Rancangan Anggaran Pendapatan dan Belanja Negara (RAPBN) tahun 2026 yang telah disahkan pada September 2025, Pemerintah Indonesia menetapkan belanja negara akan berfokus pada kedaulatan pangan, energi, dan ekonomi. Dalam penetapan RAPBN 2026 tersebut, Pemerintah Indonesia menetapkan sejumlah asumsi seperti pertumbuhan ekonomi Indonesia mencapai 5,2% hingga 5,8%, serta inflasi dapat terjaga pada level yang stabil sebesar 1,5% hingga 3,5%.

On the same occasion, the Shareholders appointed Muhammad Fadil Imran as Commissioner and Carmelita Hartoto as Independent Commissioner. The Shareholders also appointed Grace Natalie as Independent Commissioner from Commissioner. Then, on November 6, 2025, the Shareholders decided to appoint Wahyu Kuncoro to the position of Commissioner.

Therefore, the composition of the Board of Commissioners as of December 31, 2025, is as follows:

- Presiden Commissioner concurrently serving as Independent Commissioner: Fuad Bawazier
- Independent Commissioner: Nugroho Widyotomo
- Independent Commissioner: Grace Natalie Louisa
- Independent Commissioner: Carmelita Hartoto
- Commissioner: Astera Primanto Bhakti
- Commissioner: Tri Winarno
- Commissioner: Muhammad Fadil Imran
- Commissioner: Wahyu Kuncoro

There were no changes to the composition of the Board of Commissioners between December 31, 2025 and the signing of this report on May 19, 2026.

## Looking at Future Prospects

The year 2026 is predicted to remain shrouded in uncertainty. The Organization for Economic Cooperation and Development (OECD) projects global Gross Domestic Product (GDP) growth will slow to 2.9% in 2026, compared to the 3.2% projected in 2025. This is due in part to the tariff's war initiated by the United States and policy uncertainty that hampers investment and trade.

In the 2026 Draft State Budget (RAPBN), ratified in September 2025, the Indonesian government determined that state spending would focus on food sovereignty, energy, and the economy. In establishing the 2026 RAKBN, the Indonesian government established several assumptions, such as Indonesia's economic growth reaching 5.2% to 5.8% and inflation being maintained at a stable level of 1.5% to 3.5%.

Di tahun 2026, kebijakan fiskal dan operasional industri ekstraktif Indonesia berfokus pada transisi dari ekonomi berbasis komoditas mentah menuju kekuatan industri manufaktur global. Anggaran Pendapatan dan Belanja Negara (APBN) 2026 dirancang sebagai instrumen utama untuk mengamankan visi Asta Cita, di mana MIND ID menjadi ujung tombak di sektor mineral.

Dalam APBN 2026, pemerintah mengalokasikan stimulus besar untuk mempercepat hilirisasi nasional dengan fokus untuk memastikan kekayaan alam keluar dalam bentuk produk jadi. Pembentukan Badan Pengaturan BUMN (BP BUMN) serta Badan Pengelola Investasi (BPI) Danantara menjadi landasan penting bagi Pemerintah Indonesia untuk dapat mengonsolidasikan berbagai aset MIND ID dalam rangka mendapatkan pendanaan global yang lebih kompetitif tanpa membebani surat utang negara secara langsung.

Salah satu prioritas APBN 2026 melalui PTBA sebagai salah satu anggota Holding adalah Proyek *Coal-to-Chemical*, yaitu penyelesaian fasilitas gasifikasi batu bara menjadi *Dimethyl Ether* (DME) di Tanjung Enim. Proyek ini menargetkan produksi 1,4 juta ton per tahun untuk menggantikan impor LPG. Di samping itu, Pemerintah Indonesia juga akan mendorong terbentuknya kolaborasi MIND ID dan PT Pertamina (Persero) selaku Holding BUMN Migas untuk memastikan hasil hilirisasi batu bara memiliki pembeli siaga (*offtaker*), sehingga infrastruktur distribusi energi nasional beralih dari berbasis impor menjadi sumber daya domestik.

Sebagai Holding BUMN Pertambangan, MIND ID juga menjalankan mandat strategis untuk memperkuat posisi tawar Indonesia di pasar mineral kritis dunia. Salah satu yang terpenting adalah ekosistem baterai yang terintegrasi. Di tahun 2026, instalasi manufaktur baterai skala besar telah memasuki masa rampung. MIND ID melalui ANTAM dan PT IBC memastikan pasokan nikel kelas satu mengalir ke pabrik sel baterai domestik, menjadikan Indonesia pusat rantai pasok EV dunia.

Secara keseluruhan, tahun 2026 menjadi tahun potensial bagi MIND ID untuk tidak lagi hanya dipandang sebagai perusahaan tambang, melainkan sebagai pengelola cadangan devisa berbasis mineral yang menjamin keberlanjutan fiskal Indonesia di tengah ketidakpastian ekonomi global.

Kami mendukung sepenuhnya proyeksi kinerja yang telah dicanangkan dalam RKAP MIND ID tahun 2026. Penyusunan target dan proyeksi Perusahaan ini telah sejalan dengan visi Asta Cita Pemerintah Indonesia, termasuk upaya *Net Zero Emissions* sebagai agenda bisnis tambang yang bertanggung jawab. Berbagai upaya yang dicanangkan diharapkan mampu membawa MIND ID sebagai pelaku usaha terkemuka di level dunia.

In 2026, Indonesia's fiscal and operational extractive industry policies will focus on transitioning from a raw commodity-based economy to a global manufacturing powerhouse. The 2026 State Budget (APBN) is designed as a key instrument to secure the Asta Cita vision, with MIND ID spearheading the minerals sector.

In the 2026 State Budget, the government allocated a significant stimulus to accelerate national downstreaming, with a focus on ensuring natural resources are exported as finished products. The establishment of the State-Owned Enterprises Regulatory Agency (BP BUMN) and the Danantara Investment Management Agency (BPI) provide a crucial foundation for the Indonesian government to consolidate MIND ID's various assets to secure more competitive global funding without directly burdening government bonds.

One of the priorities of the 2026 State Budget through PTBA as a member of the Holding is the Coal-to-Chemical Project, namely the completion of a coal gasification facility into Dimethyl Ether (DME) in Tanjung Enim. This project targets a production of 1.4 million tons per year to replace LPG imports. In addition, the Indonesian Government will also encourage the formation of collaboration between MIND ID and PT Pertamina (Persero) as the Holding of State-Owned Oil and Gas Companies to ensure that the results of coal downstreaming have standby buyers (*offtakers*), so that the national energy distribution infrastructure shifts from being import-based to domestic resources.

As a state-owned mining holding company, MIND ID also conducts its strategic mandate to strengthen Indonesia's bargaining position in the global critical minerals market. One of the most important is an integrated battery ecosystem. A large-scale battery manufacturing facility is expected to be completed by 2026. MIND ID, through ANTAM and PT IBC, ensures a steady supply of premium nickel to domestic battery cell factories, making Indonesia a hub for the global EV supply chain.

Overall, 2026 is a potential year for MIND ID to no longer be seen solely as a mining company, but rather as a manager of mineral-based foreign exchange reserves that guarantees Indonesia's fiscal sustainability amidst global economic uncertainty.

We fully support the performance projections outlined in MIND ID's 2026 Work Plan and Budget (RKAP). The Company's targets and projections align with the Asta Cita vision of Indonesian Government, including its Net Zero Emissions initiative as part of its responsible mining business agenda. These initiatives are expected to establish MIND ID as a leading global player.

## Penutup

Kepada Pemerintah Indonesia selaku pemegang saham, kami haturkan rasa terima kasih atas kepercayaan yang telah diberikan. Demikian pula kepada regulator dan seluruh pemangku kepentingan, kami menyampaikan rasa terima kasih sebesar-besarnya atas dukungan yang telah diberikan. Kepada Direksi dan karyawan, izinkan kami menyampaikan rasa bangga atas kerja keras yang telah ditunjukkan di tengah situasi yang masih diliputi ketidakpastian. Semoga seluruh jalin kelindan yang harmoni ini mampu menjadi dasar bagi MIND ID untuk dapat tumbuh secara berkelanjutan, dan mampu terus memberikan nilai tambah kepada pemegang saham dan segenap pemangku kepentingan.

## Closing

To the Indonesian Government, as our shareholder, we express our gratitude for the trust placed in us. Likewise, to the regulators and all stakeholders, we express our deepest gratitude for their support. To the Board of Directors and employees, allow us to express our pride in the hard work they have demonstrated amidst the ongoing uncertainty. May this harmonious interconnectedness serve as the foundation for MIND ID's sustainable growth and continued value-added to shareholders and all stakeholders.

Di tengah tekanan komoditas mineral, MIND ID tetap mampu menciptakan bisnis yang berkelanjutan melalui pendapatan yang terjaga dengan cukup baik.

Amidst pressure from mineral commodities, MIND ID has remained able to create a sustainable business through well-maintained revenue.

## Pemegang Saham dan Para Pemangku Kepentingan yang terhormat,

Dengan penuh rasa syukur, izinkan saya atas nama Direksi dan seluruh jajaran MIND ID menyampaikan kinerja Perusahaan sebagaimana tertuang dalam Laporan Tahunan ini. Laporan ini menjadi bagian dari komitmen kami dalam menyampaikan kinerja Holding Badan Usaha Milik Negara (BUMN) Pertambangan, khususnya dalam menjaga transparansi dan akuntabilitas kepada seluruh pemangku kepentingan serta mendukung visi Asta Cita dari Pemerintah Indonesia.

## Dinamika 2025

Memasuki tahun 2025, Perusahaan dihadapkan pada dinamika eksternal yang cukup menantang, terutama dari sisi pergerakan harga komoditas utama dan kondisi makro ekonomi. Fluktuasi nilai tukar serta tren harga global memberikan dampak signifikan terhadap kinerja keuangan dan perencanaan biaya. Di samping itu, nilai tukar Rupiah terhadap Dolar Amerika Serikat (AS) mengalami pelemahan moderat dibandingkan asumsi yang digunakan MIND ID dalam perumusan Rencana Kerja dan Anggaran Perusahaan (RKAP) 2025, sementara pergerakan harga komoditas menunjukkan tren yang bervariasi.

### Emas

Tahun 2025 masih menunjukkan tren kenaikan harga emas yang cukup signifikan. Kenaikan harga emas ini terus meningkat tajam dari awal tahun 2024 hingga tahun 2025. Kenaikan harga emas dipengaruhi oleh berbagai faktor, baik motivasi investor dalam mengumpulkan aset “safe heaven” di tengah ketidakpastian kondisi ekonomi global; sentimen pasar terkait penurunan tingkat suku bunga acuan Bank Sentral Amerika yang menyebabkan investor lebih memilih emas dibandingkan aset berbunga lainnya; kenaikan permintaan emas fisik dari sektor perhiasan, elektronik, dan terutama bank sentral dunia; hingga pelemahan nilai tukar Rupiah terhadap Dolar AS yang berdampak pada perdagangan komoditas emas dalam Dolar AS.

### Batu Bara

Harga batu bara Newcastle di tahun 2025 mengalami penurunan dibandingkan dengan tahun sebelumnya. Rata-rata harga batu bara Newcastle sebesar USD104,52 per ton, turun hingga 22% dibandingkan tahun 2024 sebesar USD133,89 per ton. Demikian pula tren harga batu bara termal Indonesia menurut Indonesia Coal Index (ICI) untuk ICI-3 (GAR 5000) tahun 2025 juga mengalami penurunan. Secara rata-rata, harga ICI di tahun 2025 adalah sebesar USD62,51 per ton, turun 16% dibandingkan tahun 2024 sebesar USD74,59 per ton. Rata-rata indeks Harga Batu Bara Acuan (HBA) sebesar USD111,60 per ton, sedangkan rata-rata HBA pada tahun 2024 sebesar USD121,07 per ton.

## Dear Shareholders and Stakeholders,

With gratitude, allow me, on behalf of the Board of Directors and all members of MIND ID, to convey the Company's performance as outlined in this Annual Report. This report is part of our commitment to communicating the performance of Holding of State-Owned Mining Enterprise (SOE) in Mining, particularly in maintaining transparency and accountability to all stakeholders and supporting the Asta Cita vision of the Indonesian Government.

## Dynamics 2025

Entering 2025, the Company faces challenging external dynamics, particularly in terms of key commodity price movements and macroeconomic conditions. Exchange rate fluctuations and global price trends significantly impact financial performance and cost planning. Furthermore, the Rupiah exchange rate against the United States (US) dollar has moderately weakened compared to the assumptions used by MIND ID in formulating the 2025 Corporate Work Plan and Budget (RKAP), while commodity prices have shown varying trends.

### Gold

2024 brought major changes to the gold market, with gold prices showing a significant upward trend. This increase in gold prices continued to rise sharply from early 2024 to 2025. The increase in gold prices was influenced by various factors, including investor motivation to accumulate “safe haven” assets amidst global economic uncertainty; market sentiment related to the US Federal Reserve's benchmark interest rate cut, which led investors to prefer gold over other interest-bearing assets; increased demand for physical gold from the jewelry and electronics sectors, and especially global central banks; and the weakening of the Rupiah against the US Dollar, which impacted gold commodity trading in US Dollars.

### Coal

Newcastle coal prices in 2025 will decline compared to the previous year. The average Newcastle coal price will be USD104.52 per ton, down 22% compared to USD133.89 per ton in 2024. Similarly, the price trend for Indonesian thermal coal, according to the Indonesia Coal Index (ICI) for ICI-3 (GAR 5000) in 2025, will also decline. On average, the ICI price in 2025 will be USD62.51 per ton, down 16% compared to USD74.59 per ton in 2024. The average Reference Coal Price (HBA) index is USD111.60 per ton, while the average HBA in 2024 is USD121.07 per ton.

## Aluminium

Di sepanjang 2025 harga aluminium global bergerak fluktuatif dengan kisaran USD2.380 hingga USD2.650 per ton, dipengaruhi oleh dinamika pasokan, biaya energi, serta prospek ekonomi global di tengah pasang surut kebijakan tarif AS dan eskalasi geopolitik global. Permintaan aluminium secara umum tetap terjaga walaupun terdapat pelemahan, utamanya dari sektor konstruksi dan otomotif. Di sisi lain, pembatasan kapasitas produksi di Tiongkok serta kondisi pasar energi yang masih ketat menjaga harga pada level relatif tinggi. Setelah sempat melemah pada kuartal kedua, harga aluminium menunjukkan tren pemulihan hingga paruh akhir tahun 2025. Secara keseluruhan, keseimbangan antara permintaan dan keterbatasan pasokan menopang stabilitas harga aluminium di tingkat global sepanjang tahun 2025.

## Bauksit dan Alumina

Pasar bauksit Indonesia tahun 2025 masih berada dalam fase penyesuaian pasca larangan ekspor bijih mentah yang diberlakukan sejak pertengahan 2023. Kebijakan hilirisasi ini terus mendorong peningkatan kapasitas pengolahan di dalam negeri, meskipun realisasinya belum sepenuhnya seimbang dengan volume produksi nasional. Beberapa *smelter* baru mulai beroperasi pada pertengahan hingga akhir 2025 yang berimbas pada kapasitas input nasional. Namun, sejumlah pelaku tambang masih menghadapi tantangan karena belum seluruh bauksit terserap oleh fasilitas pengolahan, terutama di wilayah Kalimantan Barat dan Kepulauan Riau.

Di sisi lain, pendanaan dan transfer teknologi masih menjadi kendala utama pembangunan *smelter* baru, mengingat kebutuhan modal yang besar dan kehati-hatian lembaga keuangan dalam pembiayaan proyek mineral. Pemerintah Indonesia juga tengah menyiapkan mekanisme penetapan Harga Patokan Mineral Bauksit (HPM Bauksit) sesuai dengan Keputusan Menteri Energi dan Sumber Daya Mineral RI No. 268.K/MB.01/MEM.B/2025 tentang Pedoman Penetapan Harga Patokan untuk Penjualan Komoditas Mineral Logam dan Batu untuk memastikan keseimbangan antara produsen bijih dan pengolah alumina, seiring upaya menciptakan pasar domestik yang lebih transparan, adil, dan berdaya saing di tengah perubahan struktur industri pasca hilirisasi.

Pada triwulan IV 2025, pasar bauksit dan alumina berada dalam fase stabilisasi harga setelah tekanan koreksi yang terjadi pada pertengahan tahun. Harga bauksit spot ke Tiongkok bertahan di kisaran USD90 hingga USD100 per dmt CIF, ditopang oleh pasokan yang masih ketat akibat musim hujan di negara produsen serta kebijakan hilirisasi di Indonesia yang menekan ekspor bijih mentah. Sementara itu, harga alumina cenderung bergerak fluktuatif di rentang USD360 hingga USD390 per ton FOB Australia, seiring fluktuasi permintaan dari *smelter* aluminium Tiongkok dan India. Secara umum, permintaan tetap solid berkat aktivitas konstruksi dan otomotif yang masih kuat di Asia, namun risiko pelemahan harga tetap ada jika kapasitas produksi baru dari Guinea, Australia, dan beberapa *smelter* Asia mulai beroperasi penuh menjelang akhir tahun.

## Aluminum

Throughout 2025, global aluminum prices are expected to fluctuate between USD 2,380 and USD 2,650 per ton, influenced by supply dynamics, energy costs, and the global economic outlook amidst the ebb and flow of US tariff policies and global geopolitical escalation. Aluminum demand remains generally stable, despite some weakening, particularly in the construction and automotive sectors. Meanwhile, production capacity restrictions in China and tight energy market conditions keep prices relatively high. After weakening in the second quarter, aluminum prices show a recovery trend through the second half of 2025. Overall, the balance between demand and supply constraints supports global aluminum price stability throughout 2025.

## Bauxite and Alumina

The Indonesian bauxite market in 2025 will still be in an adjustment phase following the ban on raw ore exports, which took effect in mid-2023. This downstreaming policy continues to encourage increased domestic processing capacity, although its realization has not yet fully matched national production volumes. Several new smelters began operations in mid- to late 2025, impacting national input capacity. However, several mining players still face challenges because not all bauxite has been absorbed by processing facilities, particularly in West Kalimantan and the Riau Islands.

On the other hand, funding and technology transfer remain major obstacles to the construction of new smelters, given the large capital requirements and the caution of financial institutions in financing mineral projects. The Indonesian government is also preparing a mechanism for determining the Bauxite Mineral Benchmark Price (HPM Bauxite) in accordance with the Decision of the Minister of Energy and Mineral Resources of the Republic of Indonesia No. 268.K/MB.01/MEM.B/2025 concerning Guidelines for Determining Benchmark Prices for the Sale of Metal and Stone Mineral Commodities to ensure balance between ore producers and alumina processors, in line with efforts to create a more transparent, fair, and competitive domestic market amidst changes in the industrial structure after downstreaming.

In the fourth quarter of 2025, the bauxite and alumina markets were in a phase of price stabilization following the correction pressures that occurred mid-year. Spot bauxite prices to China remained in the range of USD 90 to USD 100 per dmt CIF, supported by tight supply due to the rainy season in producing countries and downstreaming policies in Indonesia that have suppressed raw ore exports. Meanwhile, alumina prices tended to fluctuate between USD 360 and USD 390 per ton FOB Australia, in line with fluctuations in demand from Chinese and Indian aluminum smelters. Overall, demand remained solid thanks to robust construction and automotive activity in Asia, but the risk of price weakness remains if new production capacity from Guinea, Australia, and several Asian smelters becomes fully operational towards the end of the year.

## Timah

Harga perdagangan logam timah global di London Metal Exchange (LME) berfluktuasi pada kisaran USD28.225 hingga USD38.575 per Mton dengan harga rata-rata berada di USD32.751,58 per Mton. Salah satu indikator naik turunnya harga adalah *supply & demand* yang dapat tergambarkan dari pergerakan stok fisik logam di LME yang ditutup pada kisaran volume 2.010 Mton, lebih rendah 57% dibandingkan tahun 2024. Hal ini menggambarkan bahwa volume *market* dalam keadaan defisit yang berimbas naiknya harga yang mencapai USD33.870 per Mton sebanding dengan kenaikan 12% dari harga rata-rata logam timah tahun 2024.

Meskipun serangkaian guncangan makro ekonomi yang membatasi konsumsi selama 5 (lima) tahun terakhir, timah mempertahankan optimisme prospek permintaan jangka panjang yang didukung oleh transisi digital dan energi. Meningkatnya kepemilikan *Electric Vehicle* (EV), penggunaan baterai, transisi teknologi 5G dan *Artificial Intelligence* (AI), serta meningkatnya penerapan energi terbarukan seperti energi surya diperkirakan akan mendorong konsumsi timah lebih tinggi ke depannya.

*Supply & demand* logam timah di sepanjang 2025 mengalami fluktuasi yang relatif melandai. Ekspor bijih timah dari Myanmar secara bertahap meningkat pada semester II 2025 dan ekspor ke Tiongkok meningkat pada triwulan IV 2025. Sektor elektronik global melanjutkan pemulihan bertahap, dengan permintaan yang didorong oleh AI dan EV memberikan dukungan berkelanjutan untuk timah. Namun, permintaan di Tiongkok tetap sama dikarenakan berakhirnya kebijakan *trade-in* barang konsumen dan produksi modul PV (tenaga surya) melambat di tengah surplus kapasitas yang berkelanjutan dan penurunan instalasi tenaga surya.

## Nikel dan Feronikel (FeNi)

Secara umum, nikel dunia masih akan mengalami surplus yang diprediksi masih akan terjadi ke depan. Hal ini didorong atas beberapa faktor seperti melemahnya pertumbuhan ekonomi global yang menyebabkan pertumbuhan pasar baja tahan karat (*stainless steel*) lebih kurang 80% permintaan atas nikel yang masih stagnan, permintaan atas kebutuhan baterai berbasis nikel yang belum sesuai ekspektasi serta masih meningkatnya suplai *Nickel Pig Iron* (NPI) dari Indonesia yang membanjiri pasar dunia.

Meskipun adanya surplus, kategori produk FeNi diproyeksikan akan mengalami penurunan suplai hingga di level defisit. Namun demikian, perlu dipahami bahwa tipe produk FeNi yang saat ini dikenal pasar merupakan "*Low Carbon FeNi*" dengan kadar di atas >25% dengan sulfur maksimum 0,06% seperti yang diproduksi oleh Western FeNi seperti Anglo American, Vale, dan Glencore. Sementara itu, NPI dengan kadar nikel yang lebih rendah (<17%) tetap mengalami pertumbuhan surplus hingga 2026.

## Tin

The global tin trading price on the London Metal Exchange (LME) fluctuated between USD28,225 and USD38,575 per metric ton, with an average price of USD32,751.58 per metric ton. One indicator of price fluctuations is supply and demand, as reflected in the movement of physical tin stocks on the LME, which closed at around 2,010 metric tons, 57% lower than in 2024. This indicates a market deficit, resulting in a price increase of USD33,870 per metric ton, equivalent to a 12% increase from the average tin price in 2024.

Despite a series of macroeconomic shocks that have constrained consumption over the past five years, tin maintains optimism for its long-term demand outlook, supported by the digital and energy transitions. Rising ownership of electric vehicles (EVs), battery usage, the transition to 5G and artificial intelligence (AI) technologies, and the increasing adoption of renewable energy sources such as solar energy are expected to drive higher tin consumption in the future.

Tin supply and demand will experience relatively modest fluctuations throughout 2025. Tin ore exports from Myanmar gradually increased in the second half of 2025, and exports to China increased in the fourth quarter of 2025. The global electronics sector continued its gradual recovery, with demand driven by AI and EVs providing continued support for tin. However, demand in China remained stable due to the end of the consumer goods trade-in policy and slowing PV (solar power) module production amidst a persistent capacity surplus and a decline in solar installations.

## Nickel and Ferronickel (FeNi)

In general, the global nickel surplus is expected to persist into the future. This is driven by several factors, including weakening global economic growth, which has stagnated stainless steels market (approximately 80% of nickel demand), lower demand for nickel-based batteries, and a continued surge in the supply of Nickel Pig Iron (NPI) from Indonesia, which is flooding the global market.

Despite the surplus, the FeNi product category is projected to experience a supply decline, reaching a deficit. However, it's important to understand that the type of FeNi currently known to the market is "*Low Carbon FeNi*," with a grade above 25% and a maximum sulfur of 0.06%, as produced by Western FeNi companies like Anglo American, Vale, and Glencore. Meanwhile, NPI with lower nickel grades (<17%) continues to experience surplus growth until 2026.

Berdasarkan *market outlook* yang disusun oleh Wood Mackenzie, konsumsi nikel global meningkat sebesar 3,3% pada 2025 menjadi 3,54 juta ton, sebagian besar didukung oleh Tiongkok di mana permintaan baja tahan karat (*stainless steel*) dan rantai pasok baterai (pCAM dan baterai) menguat pada kuartal ketiga. Pertumbuhan akan pulih pada tahun 2026, naik sebesar 9% menjadi 3,85 juta ton. Sebagian besar pertumbuhan ini terjadi di Tiongkok (+8%) di mana permintaan pCAM akan melonjak dengan penambahan banyak kapasitas baru.

Kapasitas baja tahan karat di Indonesia akan meningkatkan pertumbuhan di sana sementara pasar baja tahan karat yang lebih kuat akan mendorong pertumbuhan di India. Peningkatan moderat dalam produksi baja tahan karat Eropa, setelah kontraksi dalam 3 (tiga) tahun dari 4 (empat) tahun terakhir, juga akan mendukung perbaikan global. Konsumsi nikel global diperkirakan akan meningkat sebesar 6% lagi pada tahun 2027—di mana perekonomian dunia akan berfungsi dengan keyakinan yang lebih besar. Baja tahan karat tetap menjadi konsumen utama nikel, meskipun pangsa permintaan global untuk pCAM akan meningkat dari 16% pada tahun 2025 menjadi 18% pada tahun 2027.

Sedangkan pada nikel kelas-2 (FeNi dan NPI) diproyeksikan akan mengalami defisit pada tahun 2026 sebesar 23.000 ton, dan terus terakumulasi pada tahun-tahun selanjutnya. Pasar kelas-2 di Tiongkok mengalami kelebihan pasokan yang lebih besar tahun ini, karena tingkat produksi *stainless steel* yang lebih tinggi yang baru tercapai pada bulan Agustus.

Berdasarkan *forecast* dari Wood Mackenzie, didapati dampak dari peningkatan produksi tersebut akan menghasilkan defisit pada perimbangan tahun 2026.

Tantangan juga datang dari tekanan isu *Environmental, Social, & Governance* (ESG). Di tahun 2025, tekanan ESG terhadap industri pertambangan Indonesia mencapai intensitas yang belum pernah terjadi sebelumnya. ESG menjadi prasyarat penting bagi akses modal global di mana lembaga keuangan khususnya global semakin enggan menyalurkan pinjaman atau modal kepada pelaku tambang yang tidak memenuhi standar ESG. Bagi industri tambang Indonesia — yang sangat bergantung pada investasi asing dan akses pasar ekspor — ini bukan sekadar tekanan eksternal, melainkan ancaman nyata terhadap kelangsungan bisnis. Merespons kondisi ini, Asosiasi Penambang Nikel Indonesia (APNI) dan Perhimpunan Ahli Pertambangan Indonesia (PERHAPI) berinisiatif menyusun standar ESG yang sesuai dengan kondisi dan situasi Indonesia, yang diluncurkan dalam ESG Forum 2025 pada Juni 2025 di Jakarta, didukung Kementerian Investasi, Dewan Ekonomi Nasional, dan BAPPENAS. Isu ESG juga menerpa industri nikel. Adanya peristiwa banjir di Teluk Tomori, Morowali Utara, longsor di Dusun Towi, dan banjir di Bahodopi yang dicurigai dipicu deforestasi dan infrastruktur drainase yang tidak memadai akibat pembukaan lahan untuk penambangan nikel. Peristiwa ini menempatkan industri pertambangan berada dalam pusat perhatian. Demikian pula sektor batu bara yang dituding menciptakan dampak langsung terhadap energi fosil yang berdampak pada pemanasan bumi.

According to market outlook compiled by Wood Mackenzie's, global nickel consumption will increase by 3.3% in 2025 to 3.54 million ton, largely driven by China, where demand for stainless steel and the battery supply chain (pCAM and batteries) strengthened in the third quarter. Growth will recover in 2026, rising by 9% to 3.85 million tonnes. Most of this growth will occur in China (+8%), where pCAM demand will surge with the addition of significant new capacity.

Stainless steel capacity in Indonesia will boost growth there, while a stronger stainless steel market will drive growth in India. A moderate increase in European stainless steel production, after contraction in three of the last four years, will also support the global recovery. Global nickel consumption is expected to increase by another 6% by 2027, at which point the world economy will function with greater confidence. Stainless steel remains the leading consumer of nickel, although pCAM's share of global demand will increase from 16% in 2025 to 18% in 2027.

Meanwhile, grade-2 nickel (FeNi and NPI) is projected to experience a deficit of 23,000 ton in 2026, with a continued accumulation in subsequent years. China's grade-2 market is experiencing a larger oversupply this year due to higher stainless steel production levels, which were only reached in August.

In accordance with forecasts from Wood Mackenzie, the impact of this increase in production will result in a deficit in the 2026 balance.

Challenges also come from pressure from Environmental, Social, & Governance (ESG) issues. In 2025, ESG pressure on the Indonesian mining industry reached unprecedented intensity. ESG has become a crucial prerequisite for access to global capital, with financial institutions, particularly global ones, increasingly reluctant to provide loans or capital to mining players who do not meet ESG standards. For the Indonesian mining industry—which is heavily dependent on foreign investment and access to export markets—this is not simply external pressure but a real threat to business continuity. Responding to this condition, the Indonesian Nickel Miners Association (APNI) and the Indonesian Mining Experts Association (Perhapi) initiated the development of ESG standards appropriate to Indonesian conditions and situations. These were launched at the ESG Forum 2025 in June 2025 in Jakarta, supported by the Ministry of Investment, the National Economic Council, and BAPPENAS. ESG issues have also hit the nickel industry. Flooding in Tomori Bay, North Morowali, landslides in Towi Hamlet, and flooding in Bahodopi are suspected to be triggered by deforestation and inadequate drainage infrastructure resulting from land clearing for nickel mining. This incident has placed the mining industry in the spotlight, as has the coal sector, which has been accused of having a direct impact on fossil fuels, contributing to global warming.

## Strategi MIND ID Grup

Menghadapi berbagai dinamika yang ada, MIND ID berupaya merancang pendekatan strategis yang mampu menjawab situasi yang ada, khususnya dalam memenuhi Aspirasi Pemegang Saham sebagaimana tertuang dalam Pedoman Perencanaan Strategis BUMN dalam hal menuju visi BUMN 2034 “Membangun Masa Depan Indonesia yang Inklusif dan Tumbuh Berkelanjutan”. Untuk itu, kami menyusun 4 (empat) tema strategis.

Berdasarkan sasaran di atas, maka MIND ID telah disusun pendekatan strategis tahun 2025 yang tergambar pada bagan di bawah ini.

## MIND ID Group Strategy

Facing various existing dynamics, MIND ID strives to design a strategic approach that is able to answer the existing situation, especially in fulfilling the Aspirations of Shareholders as stated in the Guidelines for BUMN Strategic Planning in terms of moving towards the BUMN 2034 vision “Building an Inclusive and Sustainably Growing Future for Indonesia”. To that end, we have compiled 4 (four) strategic themes.

Based on the above targets, MIND ID has prepared a strategic approach for 2025 which is depicted in the chart below.

### Industri strategis: EV Battery Ecosystem Industry Strategy: EV Battery Ecosystem

Pada produk aluminium, secara garis besar PT Indonesia Asahan Aluminium ("INALUM") menjalankan 4 (empat) sasaran strategis meliputi peningkatan produksi aluminium, penguatan daya saing melalui *cost leadership*, membangun aset hilirisasi berskala global dan aliansi strategis untuk pengembangan hilirisasi. Pada 2025, INALUM berfokus pada peningkatan kapasitas *smelter* aluminium melalui *upgrading* dan optimasi pot serta persiapan pengembangan *smelter* aluminium baru hingga 611 ribu ton dengan target produksi penuh pada tahun 2029. MIND ID juga mengembangkan fasilitas *Caustic Soda* untuk meningkatkan keandalan pasokan bahan baku pabrik aluminium.

Komoditas batu bara yang dijalankan PT Bukit Asam Tbk ("PTBA") berfokus pada peningkatan produksi batu bara dengan tujuan melakukan percepatan monetisasi atas aset batu bara untuk memenuhi pasar domestik maupun negara berkembang sebelum terjadinya akselerasi transisi energi di dunia. Inisiatif peningkatan produksi batu bara ini didukung oleh peningkatan kapasitas angkutan/logistik dan peningkatan penjualan mulut tambang (FOBMV). Selain itu, dalam rangka hilirisasi batu bara, PTBA meningkatkan kapasitas Pembangkit Energi Listrik Tenaga Uap (PLTU) untuk mendukung produksi *smelter* aluminium maupun aktivitas komersil lainnya, serta pengembangan energi baru terbarukan melalui Pembangkit Listrik Tenaga Surya (PLTS) memanfaatkan lahan bekas tambang. PTBA juga tengah meneliti pengembangan teknologi konversi batu bara menjadi *artificial graphite* untuk anoda baterai yang berpotensi menjadi diversifikasi produk di masa akan datang.

Pada nikel dan feronikel, ANTAM berfokus untuk intensifikasi wilayah eksplorasi sehingga mendapatkan penambahan sumberdaya dan/atau cadangan untuk meningkatkan penguasaan sumberdaya dan/atau cadangan melalui aktivitas eksplorasi rutin maupun lelang IUP/IUPK, serta penyelesaian restrukturisasi kepemilikan saham bersama mitra strategis di JVCo yang didirikan untuk pengembangan IUPK Bahodopi Utara. ANTAM berfokus untuk memperkuat posisi dan pangsa pasar dalam rantai pasok industri nikel di Indonesia melalui intensifikasi dan optimasi produksi tambang/*upstream* di bijih nikel untuk memenuhi kebutuhan bijih berbagai *smelter* nikel domestik, serta terus berkomitmen dalam peningkatan nilai tambah bijih nikel melalui penyelesaian bisnis hilir seperti pengembangan ekosistem baterai kendaraan listrik, penyelesaian P3Fh, dan menjajaki kerja sama strategis lainnya untuk pemanfaatan *limonite ore* dan *low grade saprolite ore* baik dengan mitra strategis atau melalui penjualan kontrak jangka panjang.

In aluminum products, in general PT Indonesia Asahan Aluminum ("INALUM") conducts 4 (four) strategic targets including increasing aluminum production, strengthening competitiveness through *cost leadership*, building global-scale downstream assets and strategic alliances for downstream development. In 2025, INALUM focuses on increasing aluminum smelter capacity through upgrading and optimizing pots as well as preparing for the development of new aluminum smelters up to 611 thousand tons with a full production target in 2029. MIND ID is also developing a *Caustic Soda* facility to improve the reliability of raw material supplies for aluminum factories.

The coal commodity operated by PT Bukit Asam Tbk ("PTBA") focuses on increasing coal production with the aim of accelerating the monetization of coal assets to meet the domestic and developing countries markets before the acceleration of the global energy transition. This initiative to increase coal production is supported by increasing transportation/logistics capacity and increasing mine-mouth sales (FOBMV). In addition, in the context of coal downstreaming, PTBA is increasing the capacity of Steam Power Plants (PLTU) to support aluminum smelter production and other commercial activities, as well as the development of new renewable energy through Solar Power Plants (PLTS) utilizing ex-mining land. PTBA is also researching the development of coal conversion technology into artificial graphite for battery anodes which has the potential to become a product diversification in the future.

In nickel and ferronickel, PT Antam Tbk ("ANTAM") focuses on intensifying exploration areas to obtain additional resources and/or reserves to increase control of resources and/or reserves through routine exploration activities and IUP/IUPK auctions, as well as completing the restructuring of share ownership with strategic partners in the JVCo established for the development of the Bahodopi Utara IUPK. ANTAM focuses on strengthening its position and market share in the nickel industry supply chain in Indonesia through intensification and optimization of mining/*upstream* production in nickel ore to meet the ore needs of various domestic nickel smelters, and continues to be committed to increasing the added value of nickel ore through the completion of downstream businesses such as the development of an electric vehicle battery ecosystem, the completion of P3Fh, and exploring other strategic collaborations for the utilization of *limonite ore* and *low-grade saprolite ore* either with strategic partners or through the sale of long-term contracts.

Produk bauksit yang juga dikelola ANTAM berkomitmen mengembangkan hilirisasi bauksit sebagai bagian dari strategi jangka panjang untuk memperkuat posisi Indonesia dalam rantai pasok alumina global dan pengembangan rantai nilai aluminium di Indonesia. Dengan sumber daya bauksit yang signifikan di wilayah Kapuas Utara dan Selatan, ANTAM berfokus pada peningkatan produksi bijih bauksit untuk meningkatkan pangsa pasar bauksit ANTAM di Indonesia, mendukung hilirisasi melalui berbagai bagian dalam rantai pasok fasilitas pengolahan bauksit yang ada dalam Grup MIND ID (PT ICA dan SGAR PT BAI), serta menjajaki potensi pengembangan hilirisasi bauksit lainnya. Untuk alumina, ANTAM tidak hanya berfokus pada pasar domestik, tetapi juga meningkatkan diversifikasi pasar ekspor serta meningkatkan efisiensi dan menjaga kestabilan operasional.

Untuk komoditas emas, ANTAM secara bertahap terus meningkatkan penjualan emasnya baik dalam pasar dalam negeri maupun ekspor melalui optimalisasi kinerja butik-butik ANTAM, menjajaki pasar baru untuk potensi *demand* pasar emas di wilayah Indonesia Timur, serta inovasi produk emas sebagai instrumen investasi pada DPLK, Dana Haji, dan bisnis emas digital untuk mempertahankan posisi ANTAM sebagai *market leader*. ANTAM juga secara bertahap akan melakukan peningkatan kapasitas manufaktur dengan bahan baku emas yang dioptimalkan berasal dari fasilitas pemurnian (*Precious Metal Refinery*) PT Freeport Indonesia, Kontrak Karya, dan *sourcing import* sebagai penunjang untuk mendukung rencana penjualan emas ANTAM. Dalam rangka penguasaan sumber daya dan cadangan mineral emas, Perusahaan melakukan inisiatif pengembangan melalui keikutsertaan dalam lelang WIUP dan WIUPK yang dilaksanakan oleh Pemerintah Indonesia, eksplorasi lanjutan pada konsesi tambang emas Pongkor ANTAM, serta pelaksanaan akuisisi konsesi tambang emas baru.

Pada produk alumina, sebagai satu-satunya produsen *Chemical Grade Alumina* (CGA) di Indonesia, PT ICA secara bertahap akan meningkatkan kapasitas produksi dan penjualan. Dalam upaya ini, PT ICA tidak hanya fokus pada pasar domestik, tetapi juga meningkatkan diversifikasi pasar ekspor. Untuk mencapai tujuan tersebut, PT ICA menerapkan serangkaian kebijakan strategis yang mencakup peningkatan penjualan komoditas dengan melakukan kunjungan langsung kepada pelanggan dan/atau mengikuti lelang, pencarian pasar dan konsumen baru dengan aktif dalam mengikuti serangkaian konferensi dan/atau pameran yang sesuai, serta efisiensi dalam proses produksi dan operasi. Langkah-langkah ini diterapkan dengan tujuan dapat memperkuat posisi perusahaan di industri alumina global. Untuk meningkatkan efisiensi dan menjaga kestabilan operasional, PT ICA melakukan inisiasi konektivitas PLN dengan kapasitas 4,4 MW serta penambahan unit *press filter*. Langkah ini diharapkan dapat mendukung kebutuhan energi yang lebih stabil dan efisien, mengurangi *downtime*, dan meningkatkan produktivitas secara keseluruhan.

Bauxite products which are also managed by ANTAM are committed to developing bauxite downstreaming as part of a long-term strategy to strengthen Indonesia's position in the global alumina supply chain and the development of the aluminum value chain in Indonesia. With significant bauxite resources in the North and South Kapuas regions, ANTAM focuses on increasing bauxite ore production to increase bauxite market share of ANTAM in Indonesia, supporting downstreaming through sharing in the supply chain of bauxite processing facilities within the MIND ID Group (PT ICA and SGAR PT BAI), and exploring the potential for developing other bauxite downstreaming. For alumina, ANTAM not only focuses on the domestic market, but also increases export market diversification as well as improving efficiency and maintaining operational stability.

For gold commodities, ANTAM gradually continues to increase its gold sales both in the domestic market and exports through optimizing the performance of ANTAM boutiques, exploring new markets for potential gold market demand in Eastern Indonesia, as well as innovating gold products as investment instruments in DPLK, Hajj Funds, and digital gold businesses to maintain ANTAM's position as a market leader. ANTAM will also gradually increase its manufacturing capacity with optimized gold raw materials originating from PT Freeport Indonesia's Precious Metal Refinery, Contract of Work, and import sourcing as auxiliary to support gold sales plan of ANTAM. In order to control gold mineral resources and reserves, the Company is implementing development initiatives through participation in the WIUP and WIUPK auctions held by the Indonesian Government, continued exploration of Pongkor gold mining concession of ANTAM, and the implementation of the acquisition of new gold mining concessions.

For alumina products, as the sole producer of Chemical Grade Alumina (CGA) in Indonesia, PT ICA will gradually increase its production and sales capacity. In this effort, PT ICA will not only focus on the domestic market, but also increase the diversification of the export market. To achieve this goal, PT ICA has implemented a series of strategic policies that include increasing commodity sales by conducting direct visits to customers and/or participating in auctions, seeking new markets and consumers by actively participating in a series of appropriate conferences and/or exhibitions, and efficiency in production and operational processes. These steps are implemented with the aim of strengthening the company's position in the global alumina industry. To increase efficiency and maintain operational stability, PT ICA has initiated PLN connectivity with a capacity of 4.4 MW and the addition of a press filter unit. This step is expected to support more stable and efficient energy needs, reduce downtime, and increase overall productivity.

Untuk komoditas timah, sebagai salah satu produsen timah terbesar di dunia, PT Timah Tbk ("TIMAH") akan menjaga posisi *market share* dengan melakukan penambangan di lokasi baru yang belum ditambang sebelumnya serta meningkatkan utilitas aset penambangan, baik di darat maupun di laut. Dengan beroperasinya pabrik peleburan TSL *Ausmelt Furnace* di Bangka diharapkan dapat mengolah bijih timah dengan lebih optimal, *recovery* logam lebih baik dan biaya peleburan lebih efisien. Di sektor hulu, TIMAH juga akan meningkatkan kapasitas penambangan timah primer di darat serta upaya maksimal peningkatan sumberdaya dan cadangan sehingga umur tambang atau *Life of Mine* menjadi lebih panjang.

Selain di sektor komoditas timah dan turunannya, terdapat juga potensi keekonomian mineral ikutan timah yang akan dimanfaatkan oleh TIMAH, terutama zircon dan pasir silika. Selain itu, TIMAH juga melanjutkan pengembangan dan pemanfaatan monasit dengan melakukan modifikasi pada *plant existing* dengan *output* berupa RE-Carbonat. PT TIMAH Tbk juga akan berfokus pada optimalisasi tata kelola bisnis, baik pada aspek produksi maupun aspek komersialisasi, serta pemanfaatan *enablers* seperti digitalisasi, mitigasi risiko, efisiensi rantai pasok, efisiensi penggunaan bahan bakar, riset dan pengembangan, serta yang lainnya.

### Peranan MIND ID selaku Entitas Induk

Di tingkat MIND ID selaku Holding atau entitas induk, Perusahaan berfokus untuk menguasai cadangan mineral strategis dengan melakukan eksplorasi maupun pengambilalihan Izin Usaha Pertambangan (IUP) potensial lainnya untuk meningkatkan cadangan dan sumber daya, melakukan program pengembangan hilirisasi, meningkatkan kepemimpinan pasar sehingga MIND ID dapat menjadi perusahaan kelas dunia agar mampu bersaing dengan pelaku usaha pertambangan global yang salah satunya diindikasikan dengan masuknya MIND ID dalam daftar Perusahaan Fortune Global 500.

Dalam mendukung strategi Anggota Grup MIND ID, telah dilakukan beberapa inisiatif dan program yang dilakukan di tahun 2025, antara lain:

1. Efisiensi biaya melalui program pengadaan bersama, antara lain Bahan Bakar Minyak (BBM), asuransi, dan audit laporan keuangan.
2. Kajian bersama terkait restrukturisasi entitas anak baik langsung maupun tidak langsung.
3. Penjualan ekspor dan impor bahan baku melalui MIND ID Trading.
4. *Sharing platform market outlook AME Research* untuk memberikan data dan informasi terkini terkait kondisi pasar.

For tin commodities, as one of the largest tin producers in the world, PT Timah Tbk ("TIMAH") will maintain its market share position by mining in new locations that have not been mined before and increasing the utility of mining assets, both on land and at sea. With the operation of the TSL *Ausmelt Furnace* smelter in Bangka, it is expected to process tin ore more optimally, improve metal recovery and make smelting costs more efficient. In the upstream sector, TIMAH will also increase the capacity of primary tin mining on land and make maximum efforts to increase resources and reserves so that the mine life or *Life of Mine* becomes longer.

In addition to the tin and its derivatives commodity sector, TIMAH also has the economic potential of tin-related minerals, particularly zircon and silica sand, to be utilized by TIMAH. Furthermore, TIMAH is continuing the development and utilization of monazite by modifying its existing plant, producing RE-Carbonate as its output. PT TIMAH Tbk will also focus on optimizing business governance, both in production and commercialization, as well as utilizing enablers such as digitalization, risk mitigation, supply chain efficiency, fuel efficiency, research and development, and others.

### The Role of MIND ID as a Parent Entity

At the MIND ID level as a Holding or parent entity, the Company focuses on controlling strategic mineral reserves by conducting exploration and taking over other potential Mining Business Permits (IUP) to increase reserves and resources, implementing downstream development programs, increasing market leadership so that MIND ID can become a world-class company to be able to compete with global mining business players, one of which is indicated by MIND ID's inclusion in the Fortune Global 500 Company list.

In supporting the MIND ID Group Member strategy, several initiatives and programs have been performed in 2025, including:

1. Cost efficiency through joint procurement programs, including fuel oil (BBM), insurance, and financial report audits.
2. Joint study regarding the restructuring of subsidiary entities, both direct and indirect.
3. Export and import sales of raw materials through MIND ID Trading.
4. *Sharing platform market outlook AME Research* to provide the latest data and information regarding market conditions.

Kami selaku Direksi berperan penting dalam menjalankan kebijakan di atas. Kebijakan strategis MIND ID di atas dirumuskan dalam rencana kerja dan anggaran yang disusun oleh Direksi dan disetujui oleh Dewan Komisaris dalam Rapat Gabungan antara Dewan Komisaris dan Direksi, untuk kemudian disahkan bersama-sama dengan pemegang saham, Pemerintah Indonesia c.q Badan Pengaturan BUMN RI. Proses penyusunan kebijakan strategis Perusahaan dituangkan dalam bentuk Rencana Kerja dan Anggaran Perusahaan (RKAP) yang menjadi acuan target-target Perusahaan, untuk kemudian dituangkan dalam bentuk *Key Performance Indicator* (KPI).

Direksi bersama seluruh jajaran manajemen, melalui masukan dari Dewan Komisaris, melakukan pemantauan berkala terhadap penerapan kebijakan Perusahaan di seluruh level organisasi. Hal ini dilakukan untuk memastikan bahwa strategi dan kebijakan Perusahaan relevan dengan perkembangan bisnis dan penerapannya berjalan sesuai dengan tujuan dan target Perusahaan. Untuk itu, Direksi terlibat langsung dalam pengawasan implementasi strategi serta memastikan bahwa seluruh bagian organisasi memperoleh kesempatan yang sama dalam menyampaikan ide-ide dan inovasi yang dapat mendukung tercapainya tujuan Perusahaan.

Hal ini terlihat dari penyelenggaraan rutin rapat koordinasi. Di sepanjang tahun 2025, Direksi melaksanakan rapat formal sebanyak 31 kali dengan berbagai agenda dalam rangka merumuskan langkah adaptif atas dinamika operasi dan bisnis di lapangan.

## Kendala dan Tantangan serta Solusi yang Dilakukan

Di tingkat MIND ID selaku entitas Holding, kami tidak menemukan adanya permasalahan dan kendala yang cukup signifikan. Namun demikian, pada level entitas anak/anggota Holding, terdapat beberapa isu signifikan yang berhasil dikelola dengan cukup baik.

- Tren penurunan harga batu bara terus berlanjut  
Meskipun volume penjualan meningkat, penurunan harga jual komoditas batu bara berdampak pada tekanan margin yang kemudian berimbas pada penurunan laba bersih dibandingkan tahun lalu.

Menghadapi hal ini, PTBA berupaya mengoptimalkan bauran pasar domestik dan ekspor, melakukan efisiensi biaya, dan pengembangan infrastruktur angkutan untuk meningkatkan efisiensi distribusi.

We, as the Board of Directors, play a crucial role in implementing the above policies. The strategic policies of MIND ID are formulated in a work plan and budget prepared by the Board of Directors and approved by the Board of Commissioners in a Joint Meeting between the Board of Commissioners and the Board of Directors, to be subsequently ratified jointly by the shareholders, the Government of Indonesia c.q the Ministry of State-Owned Enterprises of the Republic of Indonesia. The Company's strategic policy formulation process is outlined in the Company Work Plan and Budget (RKAP) which serves as a reference for the Company's targets, to be further outlined in the form of Key Performance Indicators (KPI).

The Board of Directors, together with all levels of management, with input from the Board of Commissioners, regularly monitors the implementation of Company policies at all levels of the organization. This is done to ensure that the Company's strategies and policies are relevant to business developments and that their implementation is in line with the Company's goals and targets. The Board of Directors plays an active role in ensuring that all levels of the organization understand and consistently implement the Company's strategies in each unit. To that end, the Board of Directors is directly involved in overseeing strategy implementation and ensuring that all parts of the organization have equal opportunities to convey ideas and innovations that can support the achievement of the Company's goals.

This is evident in the regular holding of coordination meetings. Throughout 2025, the Board of Directors held 31 formal meetings with various agendas to formulate adaptive measures to address operational and business dynamics in the field.

## Constraints and Challenges and Solutions Implemented

At the MIND ID level as a holding entity, we did not encounter any significant issues or obstacles. However, at the subsidiary/member level, there were several significant issues that were successfully managed quite well.

- The downward trend in coal prices keeps continuing  
Despite the increase in sales volume, the decline in coal commodity selling prices has resulted in margin pressure, then affecting to a decrease in net profit compared to last year.

In response to this, PTBA is striving to optimize the domestic and export market mix, implement cost efficiencies, and develop transportation infrastructure to increase distribution efficiency.

- Gangguan pasokan dan penyesuaian produksi emas  
ANTAM menghadapi isu gangguan pasokan dan penyesuaian produksi emas, yang berdampak pada penurunan kinerja penjualan emas. Untuk itu, ANTAM berupaya memperkuat rantai pasok emas dengan memperbanyak pemasok dalam negeri.
- Kemunduran tahap komersial dari Proyek SGAR  
Proyek Smelter Grade Alumina Refinery (SGAR) yang berlokasi di Mempawah, Kalimantan Barat, mengalami kemunduran tahapan komersial. Proyek strategis kolaborasi INALUM dan ANTAM yang memproduksi alumina untuk bahan baku smelter aluminium INALUM ini didirikan dengan tujuan besar mengurangi ketergantungan impor. Kemunduran tahap komersial Proyek SGAR ini berimbas pada masih tingginya ketergantungan INALUM pada bahan baku alumina dan belum optimalnya pasokan alumina dari internal INALUM serta MIND ID Group. Dalam mengelola kendala ini, INALUM berupaya mempercepat integrasi hulu dengan percepatan Proyek SGAR.
- Pencapaian produksi bijih timah belum dapat mencapai target  
TIMAH menghadapi tantangan terkait volume penjualan bijih timah yang belum dapat mencapai target yang telah ditetapkan; meskipun kinerja keuangan TIMAH menunjukkan pencapaian target yang cukup baik. Untuk itu, TIMAH telah menyusun *recovery plan* untuk dapat meningkatkan realisasi produksi bijih timah.
- Supply disruptions and gold production adjustments  
ANTAM is facing issues of supply disruptions and adjustments to gold production, which have impacted its gold sales performance. Therefore, ANTAM is working to strengthen its gold supply chain by increasing domestic suppliers.
- Commercial stage setback of the SGAR Project  
The Smelter Grade Alumina Refinery (SGAR) project located in Mempawah, West Kalimantan, has experienced a delay in its commercial phase. This strategic collaborative project between INALUM and ANTAM, which produces alumina for the raw material of INALUM's aluminum smelter, was established with the primary goal of reducing dependence on imports. The delay in the commercial phase of the SGAR Project has resulted in continued high dependence of INALUM on alumina as a raw material and the suboptimal supply of alumina from within INALUM and the MIND ID Group. To address these obstacles, INALUM is striving to accelerate upstream integration by accelerating the SGAR Project.
- Tin ore production has not reached the target yet  
TIMAH faces challenges related to tin ore sales volumes that have not reached established targets yet, despite financial performance of TIMAH showing satisfactory achievement of these targets. Therefore, TIMAH has developed a recovery plan to increase tin ore production.

## Pencapaian Target 2025

Jika dibandingkan dengan target yang ditetapkan di awal tahun 2025, realisasi produksi serta penjualan dan pemasaran menunjukkan adanya deviasi. Hanya produksi aluminium yang mencatat kinerja di atas target yang ditetapkan, sedangkan komoditas lainnya belum menghadapi tantangan yang luar biasa. Demikian pula pada kinerja pemasaran, produk aluminium membukukan kinerja yang cukup baik di atas target yang telah ditetapkan, di sisi lain komoditas lainnya tercatat mengalami deviasi dari target yang telah ditetapkan. Tantangan volatilitas harga komoditas mineral dunia sebagaimana dijelaskan di atas berdampak pada kinerja produksi dan pemasaran dibandingkan asumsi target di awal tahun 2025.

Di luar kinerja produksi dan pemasaran yang secara umum mengalami tekanan, kami mampu meraih kinerja keuangan yang cukup positif. Pendapatan usaha tercatat mencapai 104,64% dari target, sedangkan laba bersih tahun berjalan mencapai hingga 116,06% dari target yang telah ditetapkan. Capaian ini menunjukkan bahwa MIND ID mampu mempertahankan profitabilitasnya di tengah dinamika pasar dan kondisi operasional yang berlangsung selama tahun berjalan.

## 2025 Target Achievement

When benchmarked against targets established at the commencement of fiscal year 2025, both production and sales & marketing performance recorded deviations from plan. Aluminium production was the sole commodity to exceed its designated target, while other commodity segments faced extraordinary challenges that constrained overall performance. A similar trend was observed across marketing performance, where aluminium registered above-target results, whereas the remaining commodities recorded deviations from their respective targets. The volatility of global mineral commodity prices, as elaborated above, exerted a material impact on production and marketing performance relative to the assumptions underlying the targets set at the beginning of 2025.

Notwithstanding the broad-based pressure on production and marketing performance, the Company achieved a commendable financial outturn for the year. Operating revenue reached 104.64% of target, while net profit for the period attained 116.06% of the established target. These results demonstrate MIND ID's capacity to sustain profitability amid dynamic market conditions and operational challenges encountered throughout the year.

Pada struktur permodalan dan pertimbangan posisi keuangan, kami berupaya menjaga risiko keuangan secara lebih hati-hati. Ekuitas Perusahaan tercatat mencapai 104,38%, di sisi lain liabilitas tercapai 94,16% dari target yang ditetapkan. Hal ini menunjukkan penguatan posisi permodalan MIND ID yang didorong oleh kinerja laba yang baik selama tahun 2025. Hal ini secara keseluruhan berimbang pada struktur keuangan Perusahaan menjadi lebih solid, di sisi lain kami terus berupaya menjaga struktur kewajiban agar tetap terkendali.

## Perkembangan Penerapan Tata Kelola Perusahaan

Salah satu fokus penting dalam penguatan organisasi MIND ID adalah penerapan prinsip GCG. Menyandang status sebagai Badan Usaha Milik Negara, MIND ID memiliki kewajiban untuk melaksanakan pengelolaan bisnis dengan yang mengedepankan terhadap peraturan perundang-undangan dan kebijakan yang berlaku. Tak hanya itu, MIND ID juga telah mengintegrasikan prinsip GCG sebagai salah satu dari 6 pilar *sustainability*.

Kami telah mengupayakan untuk melaksanakan seluruh prinsip-prinsip GCG tersebut yang dituangkan dalam skema organisasi dan perangkat kebijakan, maupun evaluasi dan pemantauan. Penerapan prinsip-prinsip GCG terdiri dari 2 (dua) aspek utama, yaitu Struktur Tata Kelola atau *Governance Structure*, serta Proses Tata Kelola atau *Governance Process* kedua. kedua aspek ini berkesinambungan satu dengan lainnya, yang pada akhirnya akan mencerminkan Hasil Tata Kelola atau *Governance Outcome* sesuai dengan yang diharapkan.

Ketiga organ Perusahaan sesuai dengan peraturan dan perundang-undangan yang berlaku, yaitu Pemegang Saham dan Rapat Umum Pemegang Saham (RUPS), Dewan Komisaris, serta Direksi, memiliki hubungan organisatoris yang diatur dalam berbagai perangkat kebijakan yang dimiliki Perusahaan. Pada perangkat kebijakan, kami bersama-sama dengan Dewan Komisaris menyusun berbagai pedoman dan kebijakan yang dapat memberikan batasan tanggung jawab pada setiap organ Perusahaan. Batasan ini menjadi penting agar pola hubungan antar organ dapat terjalin dengan independen dan harmonis, dan mampu mendukung pencapaian visi dan misi yang telah ditetapkan. Secara periodik kami melakukan tinjauan dan pengkinian atas perangkat kebijakan yang dimiliki, agar terus memiliki relevansinya baik terhadap perkembangan Perusahaan, perkembangan regulasi yang diberlakukan, maupun industri pertambangan nasional.

Manajemen risiko dan pengendalian internal juga menjadi bagian penting dalam pengelolaan Perusahaan. MIND ID terus melakukan pemetaan berbagai risiko yang muncul sebagai dampak, baik risiko dari eksternal maupun internal. Pemetaan ini penting, mengingat potensi risiko operasi, bisnis dan keuangan harus ditindaklanjuti dengan serangkaian strategi yang tepat agar kelangsungan usaha dapat terjaga dengan baik.

With respect to capital structure and the overall balance of the Company's financial position, the Company maintained a prudent approach to financial risk management. Equity reached 104.38% of target, while total liabilities were contained at 94.16% of plan. This outcome reflects a strengthening of MIND ID's capital position, underpinned by solid earnings performance throughout 2025. Collectively, these results have contributed to a more robust financial structure, while the Company remains committed to maintaining its liability profile within a well-managed and controlled range.

## Development of Corporate Governance Implementation

One of the key focus in strengthening MIND ID's organization is the implementation of GCG principles. As a state-owned enterprise, MIND ID is obligated to manage its business in a manner that prioritizes compliance with laws and regulations. Furthermore, MIND ID has also integrated Environmental, Social, and Governance (ESG) principles.

We have endeavored to implement all of the GCG principles outlined in the organizational structure and policy instruments, as well as evaluation and monitoring. The implementation of GCG principles consists of two main aspects: the Governance Structure and the Governance Process. These two aspects are interconnected, ultimately reflecting the Governance Outcome.

In accordance with applicable laws and regulations, the three Company organs, namely the Shareholders and the General Meeting of Shareholders (GMS), the Board of Commissioners, and the Board of Directors, have organizational relationships regulated by various Company policies. Within these policies, we, together with the Board of Commissioners, have developed various guidelines and policies that can provide limits on the responsibilities of each Company organ. These boundaries are important so that the pattern of relationships between organs can be established independently and harmoniously, and able to support the achievement of the established vision and mission. We periodically review and update the existing policy instruments, so that they continue to be relevant to the development of the Company, the development of applicable regulations, and the national mining industry.

Risk management and internal control are also crucial components of company management. MIND ID continuously maps various risks that arise as a result of both external and internal risks. This mapping is crucial, considering that potential operational, business, and financial risks must be addressed with a series of appropriate strategies to ensure business continuity.

Tak hanya itu, evaluasi secara berkala untuk pemantauan penerapan GCG dengan praktik terbaik juga dilakukan melalui penilaian penerapan GCG dengan menunjuk konsultan independen. Seluruh tindak lanjut ini dilakukan dalam rangka menciptakan proses bisnis yang sehat dan akuntabel, di mana ini menjadi landasan bagi keberlanjutan MIND ID.

Fondasi terpenting dalam pelaksanaan prinsip GCG adalah penerapan kode etik sebagai etika bisnis yang berlandaskan pada nilai integritas. Kami menempatkan nilai-nilai budaya korporasi sebagai salah satu landasan bagi pembentukan etika bisnis yang akan menciptakan pengelolaan operasi dan bisnis berbasis akuntabilitas. Melalui integritas, implementasi etika bisnis akan memiliki dasar yang kuat, yang akan menjadi modal bagi MIND ID untuk tumbuh lebih baik di masa-masa mendatang.

Pada 10 Juni 2025, Pemegang Saham kembali memutuskan untuk memberhentikan dengan hormat Dilo Seno Widagdo, Akhmad Fazri, dan Nur Hidayat Udin, dari posisinya masing-masing selaku Direktur Portofolio dan Pengembangan Usaha, Direktur Keuangan, dan Direktur Manajemen Risiko & HSSE. Furthermore, periodic evaluations to monitor GCG implementation using best practices are also conducted through GCG assessments conducted by an independent consultant. All of these follow-up actions are performed to create healthy and accountable business processes, which serve as the foundation for MIND ID's sustainability.

The most important foundation in implementing GCG principles is the implementation of a code of ethics, a business ethic founded on integrity. We place corporate cultural values as one of the foundations for establishing business ethics that will foster accountability-based operational and business management. Through integrity, the implementation of business ethics will have a strong foundation, which will serve as capital for MIND ID to grow even further in the future.

## Prospek dan Proyeksi ke Depan

Berdasarkan proyeksi Organization for Economic Cooperation and Development (OECD), pertumbuhan PDB global diperkirakan akan melambat 3,2% pada 2025 menjadi 2,9% pada 2026, seiring dengan kenaikan tarif dan ketidakpastian kebijakan yang berkelanjutan yang menghambat investasi dan perdagangan. Untuk perekonomian Indonesia, IMF, OECD, dan Fitch Ratings memperkirakan bahwa ekonomi Indonesia akan tumbuh di bawah 5,0% dalam rentang 4,7%-4,9% y-o-y di tahun 2026, akibat tantangan dari meningkatnya volatilitas harga pangan dan energi, dan meningkatnya ketidakpastian geopolitik. Sementara itu, Bank Dunia dan Bank Indonesia memproyeksikan bahwa pertumbuhan ekonomi Indonesia masih dapat bertahan di atas 5%, yaitu sebesar 5,1%.

Namun demikian, Kementerian Keuangan dalam Rencana Anggaran Pendapatan Belanja Negara (RAPBN) 2026 optimis menyepakati pertumbuhan ekonomi dalam rentang 5,2% hingga 5,8% y-o-y yang berfokus utama pada swasembada pangan, swasembada energi, peningkatan kualitas pendidikan, dan percepatan industrialisasi nasional.

Thus, the composition of the Board of Directors as of December 31, 2025 is as follows:

- President Director: Maroef Sjamsoeddin
- Deputy President Director: Dany Amrul Ichdan
- Director of Mineral Resources Processing Planning: Budi Santoso
- Director of Finance & Investment: Adityo Kusumo
- Director of Portfolio and Business Development: Kuswantoro Pranabudi
- Director of Risk Management, Legal & HSSE: Firman Shantyabudi
- Director of Downstream Strategy and Mineral Ecosystem: Tedy Badrujaman
- Director of Corporate Transformation and Human Capital Management: Pambudi Sunarsihanto

There are no changes to the composition of the Board of Directors in the period from 31 December 2025 until the signing of this report as of May 19, 2026.

## Future Prospects and Projections

In accordance with projections from the Organization for Economic Cooperation and Development (OECD), global GDP growth is expected to slow from 3.2% in 2025 to 2.9% in 2026, as rising tariffs and continued policy uncertainty hamper investment and trade. For the Indonesian economy, the IMF, OECD, and Fitch Ratings estimate that Indonesia's economy will grow below 5.0% in the range of 4.7%-4.9% y-o-y in 2026, due to challenges from increasing food and energy price volatility, and rising geopolitical uncertainty. Meanwhile, the World Bank and Bank Indonesia project that Indonesia's economic growth can still remain above 5%, namely at 5.1%.

However, the Ministry of Finance in the 2026 State Budget Plan ("RAPBN") optimistically agreed on economic growth in the range of 5.2% to 5.8% y-o-y with the main focus on food self-sufficiency, energy self-sufficiency, improving the quality of education, and accelerating national industrialization.

Mayoritas harga komoditas mineral diproyeksikan mengalami penurunan harga, terutama komoditas aluminium, bauksit, nikel, batu bara, dan timah. Kondisi ketidakpastian ekonomi khususnya berkaitan dengan kondisi geopolitik ke depan turut menekan harga komoditas. Mayoritas produksi grup MIND ID mengalami peningkatan di tahun 2026, kecuali perak yang disebabkan tambang Pongkor telah memasuki periode masa pasca tambang. Mayoritas penjualan komoditas mengalami peningkatan seiring dengan peningkatan kinerja operasi dan potensi permintaan pasar yang cukup tinggi, khususnya untuk pasar domestik.

Rencana penjualan komoditas Perusahaan telah mempertimbangkan berbagai faktor dengan skenario ketidakpastian (antara lain faktor global dan domestik, faktor persaingan, dan faktor ketidakpastian lainnya yang relevan) yang dihitung bersamaan dalam basis simulasi untuk memprediksi daya serap pasar dari komoditas yang dihasilkan.

Bersamaan dengan dinamika situasi yang ada, MIND ID telah menetapkan visi baru yaitu *"Mining for Indonesia and the World"* di mana Perusahaan menjadi pilar industrialisasi sumber daya alam di Indonesia dan perusahaan kelas dunia yang menyediakan *worldclass product* dan *worldclass talent*. MIND ID telah menyiapkan 18 program transformasi yang dibagi menjadi 5 (lima) tema strategis, yaitu *more upstream, profitable downstream, competitive, innovative, dan enabler*.

Memasuki tahun 2026, kami optimis untuk dapat memroyeksikan kinerja produksi dan penjualan komoditas mineral yang dikelola MIND ID Group. Volume produksi sebagian besar komoditas diproyeksikan meningkat dari tahun sebelumnya sejalan upaya optimalisasi operasi produksi di seluruh Anggota Holding MIND ID. Demikian pula proyeksi kinerja volume penjualan untuk sebagian besar komoditas juga diproyeksikan meningkat dari tahun sebelumnya, selaras dengan target produksi 2026 di komoditas-komoditas kunci MIND ID Group. Proyeksi positif ini menjadi fondasi bagi harapan untuk meningkatkan kinerja pendapatan dan laba bersih MIND ID secara konsolidasi di tahun 2026.

Prices for most mineral commodities are projected to decline, particularly aluminum, bauxite, nickel, coal, and tin. Economic uncertainty, particularly related to future geopolitical conditions, is also pressuring commodity prices. The majority of MIND ID Group production will increase in 2026, with the exception of silver, as the Pongkor mine has entered its post-mining period. Sales of most commodities will increase in line with improved operational performance and potentially high market demand, particularly in the domestic market.

The Company's commodity sales plan has taken into account various factors with uncertainty scenarios (including global and domestic factors, competitive factors, and other relevant uncertainty factors) which are calculated simultaneously on a simulation basis to predict the market absorption capacity of the commodities produced.

In line with the dynamics of the existing situation, MIND ID has established a new vision, namely *"Mining For Indonesia and For The World"* where the Company becomes a pillar of natural resource industrialization in Indonesia and a world-class company that provides world-class products and world-class talent. MIND ID has prepared 18 transformation programs divided into 5 (five) strategic themes, namely *more upstream, profitable downstream, competitive, innovative, and enabler*.

Entering 2026, we remain optimistic about projecting the production and sales performance of mineral commodities managed by the MIND ID Group. Production volumes for the majority of commodities are projected to increase compared to the previous year, in line with efforts to optimize production operations across all members of the MIND ID Holding. Likewise, projected sales volumes for most commodities are also expected to increase from the previous year, aligned with the 2026 production targets for the key commodities of the MIND ID Group. This positive outlook serves as a foundation for expectations of improved consolidated revenue and net profit performance for MIND ID in 2026.

Pada tanggal 15 November 2018, INALUM menerbitkan obligasi melalui pencatatan di Singapore Exchange Securities Trading Ltd., dengan Bank of New York Mellon ("BNY Mellon") sebagai Wali Amanat. BNY Mellon tidak mempunyai hubungan afiliasi dengan Grup, baik langsung maupun tidak langsung. Dana hasil obligasi, setelah dikurangi dengan biaya dan komisi dan biaya sehubungan dengan penerbitan obligasi, digunakan untuk mendanai pembelian saham di PT Freeport Indonesia ("PTFI") sesuai dengan Perjanjian Divestasi PTFI. INALUM telah menyelesaikan transaksi pembelian saham di PTFI pada tanggal 21 Desember 2018. Pada tanggal 6 Mei 2020, INALUM mengumumkan bahwa Inalum melakukan *tender offers* untuk pembelian seluruh Obligasi 2021 dan Obligasi 2023 milik Inalum. Tender offers tersebut jatuh tempo pada tanggal 12 Mei 2020.

On November 15, 2018, INALUM issued bonds through listing on the Singapore Exchange Securities Trading Ltd., with Bank of New York Mellon ("BNY Mellon") as Trustee. BNY Mellon has no affiliated relationship with the Group, either directly or indirectly. The proceeds from the bonds, after deducting fees and commissions and costs related to the issuance of the bonds, were used to fund the purchase of shares in PT Freeport Indonesia ("PTFI") in accordance with the PTFI Divestment Agreement. INALUM completed the share purchase transaction in PTFI on December 21, 2018. On May 6, 2020, INALUM announced that Inalum conducted tender offers to purchase all of Inalum's 2021 Bonds and 2023 Bonds. The tender offers matured on May 12, 2020.

Pada tanggal 15 Mei 2020, INALUM menerbitkan Obligasi 2025, Obligasi 2030 dan Obligasi 2050 dengan jumlah sebesar USD2,5 miliar atau setara dengan Rp37,27 triliun melalui pencatatan di Singapore Exchange Securities Trading Ltd., dengan BNY Mellon sebagai Wali Amanat. Dana hasil obligasi, setelah dikurangi dengan biaya dan komisi dan biaya sehubungan dengan penerbitan obligasi, digunakan untuk mendanai pembelian saham di PT Vale Indonesia Tbk ("PTVI") sesuai dengan Perjanjian Divestasi PTVI, serta pembayaran atas *tender offers* untuk pembelian Obligasi 2021 dan Obligasi 2023 milik INALUM, masing-masing sebesar USD501.079.000 (atau setara dengan Rp7,47 triliun) dan USD575.767.000 (atau setara dengan Rp8,58 triliun) dari jumlah awal yang diterbitkan di November 2018 masing-masing sebesar USD1 miliar untuk setiap obligasi sesuai dengan hasil *tender offers*. Dampak dari penyelesaian sebagian Obligasi 2021 dan Obligasi 2023 di tahun 2020 sebesar Rp560,11 miliar telah dicatat sebagai bagian dari biaya keuangan di laba rugi.

Pada tanggal 12 November 2021, INALUM telah melunasi seluruh Obligasi 2021 dengan nilai pokok sebesar USD498.921.000 (atau setara dengan Rp7,13 triliun). Pada tanggal 26 Juli 2022, INALUM melakukan pembelian kembali melalui tender offer atas sebagian Obligasi 2023, Obligasi 2028 dan Obligasi 2048 masing-masing sebesar USD363.294.000, USD400.807.000 dan USD393.768.000 (atau masing-masing setara dengan Rp5,71 triliun, Rp6,30 triliun, dan Rp6,19 triliun).

Berdasarkan Surat Ratifikasi No. SR-159/MBU/032023 tanggal 21 Maret 2023 tentang Persetujuan Ratifikasi Tindakan Pengurus, Penetapan Kantor Akuntan Publik, dan Penerimaan Aset dan Kewajiban pada PT Mineral Industri Indonesia (Persero), salah satu hal pentingnya menyebutkan untuk menyetujui penerimaan pengalihan dari PT Indonesia Asahan Aluminium ("INALUM") kepada MIND ID berupa *Global bonds* sebesar USD3.766.364.001.

Pada tanggal 25 April 2025, MIND ID telah menandatangani fasilitas pendanaan baru sebesar USD1.000.000.000 (satu miliar Dolar Amerika Serikat) atau sekitar Rp 16,72 triliun dalam bentuk fasilitas pinjaman berjangka pendek (*short term loan facility*) tanpa jaminan dengan jangka waktu 12 (dua belas) bulan yang dikoordinasikan oleh 4 (empat) bank sebagai Mandated Lead Arrangers, and Bookrunners ("MLAB") dengan PT Bank DBS Indonesia sebagai Agen Fasilitas dan Agen Pembayaran serta United Overseas Bank Limited sebagai Koordinator Tunggal (selanjutnya disebut "Project Suramadu") untuk melunasi seluruhnya surat utang obligasi MIND ID yang jatuh tempo di bulan Mei 2025 sebesar USD1.000.000.000. Adapun hingga akhir tahun 2025 fasilitas Project Suramadu yang digunakan sebesar USD700.000.000 (tujuh ratus juta Dolar Amerika Serikat) atau setara Rp11,7 triliun, sementara sisa USD300.000.000 (tiga ratus juta Dolar Amerika Serikat) atau setara Rp5 triliun menggunakan kas MIND ID untuk melunasi obligasi tersebut.

Di tahun 2025, terdapat kebutuhan *mandatory buyback* atas instrumen obligasi global bonds 2028 dan 2048 yang diakibatkan oleh peristiwa *change of control* yaitu ketika Pemerintah Republik Indonesia tidak lagi memiliki saham Perusahaan secara langsung

On May 15, 2020, INALUM issued 2025 Bonds, 2030 Bonds and 2050 Bonds totaling USD2.5 billion or equivalent to IDR37.27 trillion through listing on the Singapore Exchange Securities Trading Ltd., with BNY Mellon as Trustee. The proceeds from the bonds, after deducting fees and commissions and costs related to the issuance of the bonds, were used to fund the purchase of shares in PT Vale Indonesia Tbk ("PTVI") in accordance with the PTVI Divestment Agreement, as well as payment for tender offers for the purchase of INALUM's 2021 Bonds and 2023 Bonds, as much as USD501,079,000 (or equivalent to IDR7.47 trillion) and USD575,767,000 (or equivalent to IDR8.58 trillion) respectively from the initial amount issued in November 2018 of USD1 billion for each bond in accordance with the results of the tender offers. The impact of the partial settlement of the 2021 Bonds and 2023 Bonds in 2020 as much as Rp560.11 billion has been recorded as part of finance costs in profit and loss.

On November 12, 2021, INALUM fully repaid its 2021 Bonds with a principal value of USD498,921,000 (equivalent to IDR7.13 trillion). On July 26, 2022, INALUM repurchased part of its 2023 Bonds, 2028 Bonds, and 2048 Bonds through a tender offer for USD363,294,000, USD400,807,000, and USD393,768,000 (equivalent to IDR5.71 trillion, IDR6.30 trillion, and IDR6.19 trillion, respectively).

Based on the Ratification Letter No. SR-159/MBU/032023 dated March 21, 2023 concerning the Approval of Ratification of Management Actions, Determination of Public Accounting Firm, and Acceptance of Assets and Liabilities at PT Mineral Industri Indonesia (Persero), one of the important things mentioned is to approve the acceptance of the transfer from PT Indonesia Asahan Aluminium ("INALUM") to MIND ID in the form of Global bonds amounting to USD3,766,364,001.

On April 25, 2025, MIND ID has signed a new funding facility of USD1,000,000,000 (one billion United States Dollars) or approximately Rp16.72 trillion in the form of an unsecured short-term loan facility with a term of 12 (twelve) months coordinated by 4 (four) banks as Mandated Lead Arrangers, and Bookrunners ("MLAB") with PT Bank DBS Indonesia as Facility Agent and Payment Agent and United Overseas Bank Limited as Sole Coordinator (hereinafter referred to as "Project Suramadu") to fully repay MIND ID's bond debt securities maturing in May 2025 amounting to USD1,000,000,000. As of the end of 2025, the Suramadu Project facility used is USD700,000,000 (seven hundred million United States Dollars) or equivalent to Rp11.7 trillion, while the remaining USD300,000,000 (three hundred million United States Dollars) or equivalent to Rp5 trillion uses MIND ID cash to pay off the bonds.

In 2025, there is a mandatory buyback requirement for global bonds instruments 2028 and 2048 due to a change of control event, namely when the Government of the Republic of Indonesia no longer directly owns 75% of the Company's shares. This event

sebesar 75%. Peristiwa ini terpicu atas perubahan kepemilikan tidak langsung dari Pemerintah RI ke BP Danantara pada bulan Maret 2025. Pada saat terjadinya *Change of Control*, Perusahaan mengeluarkan opsi pembelian kembali atas surat utang obligasi tersebut dengan premi sebesar 1% dengan melakukan penawaran ke pasar (*Offer to Purchase*) pada 17 April 2025. Atas kejadian ini, maka pada 7 Juni 2025, perusahaan mengumumkan *Markdown* atas *Tender Offer* atas Obligasi 2028 (Reg S) sebesar USD8.367.000, Obligasi 2048 (Reg S) sebesar USD12.085.000 dan Obligasi 2048 (144 A) USD1.019.000 (atau masing-masing setara dengan Rp139,9 miliar, Rp202 miliar, dan Rp17,03 miliar).

was triggered by the change of indirect ownership from the Government of the Republic of Indonesia to BP Danantara in March 2025. At the time of the *Change of Control*, the Company issued a repurchase option for the bonds with a premium of 1% by making an *Offer to Purchase* on April 17, 2025. Due to this event, on June 7, 2025, the company announced a *Markdown* on the *Tender Offer* for the 2028 Bonds (Reg S) of USD8,367,000, the 2048 Bonds (Reg S) of USD12,085,000 and the 2048 Bonds (144 A) of USD1,019,000 (or equivalent to Rp139.9 billion, Rp202 billion, and Rp17.03 billion, respectively).

# Tinjauan Perekonomian dan Industri Pertambangan

## Overview of Mining Economy and Industry

Pada tahun 2025, perekonomian global bergerak dalam fase transisi dari normalisasi inflasi menuju perlambatan pertumbuhan. Kondisi moneter global cenderung lebih akomodatif dibandingkan tahun sebelumnya, tercermin dari penurunan suku bunga acuan di sejumlah aspek ekonomi utama. Di Amerika Serikat, Federal Reserve menurunkan target suku bunga kebijakan ke kisaran 3,50%–3,75% pada Desember 2025. Di Tiongkok, pertumbuhan ekonomi tetap mencapai 5,0% pada 2025, namun tekanan permintaan domestik masih terlihat karena inflasi konsumen sepanjang tahun tercatat relatif datar. Di Indonesia, perekonomian tetap resilien dengan pertumbuhan 5,11% pada 2025, inflasi Desember 2025 sebesar 2,92%, dan BI-Rate berada pada level 4,75% setelah penurunan pada September 2025. Hal ini menunjukkan adanya stabilisasi makro yang cukup baik dengan adanya dukungan suku bunga yang lebih rendah, meskipun permintaan pasar di beberapa pusat ekonomi dunia belum menunjukkan penguatan signifikan.

In 2025, the global economy transitioned from inflationary normalization to slowing growth. Global monetary conditions tend to be more accommodative than those of the previous year, as reflected in lower benchmark interest rates across several key economic sectors. In the United States, the Federal Reserve lowered its policy interest rate target to the 3.50%–3.75% range in December 2025. In China, economic growth remained at 5.0% in 2025, but domestic demand pressures continued to persist as consumer inflation remained relatively flat throughout the year. In Indonesia, the economy remained resilient with a growth of 5.11% in 2025, inflation of 2.92% in December 2025, and a BI Rate of 4.75% following a decline in September 2025. This shows exceptional macroeconomic stabilization supported by lower interest rates, although market demands in several global economic centers have yet to show significant improvement.

Memasuki 2026, prospek perekonomian global diperkirakan cenderung melambat. Organisation for Economic Co-operation and Development (OECD) memproyeksikan pertumbuhan Produk Domestik Bruto (PDB) global turun dari 3,2% pada 2025 menjadi 2,9% pada 2026, sebelum menguat tipis ke 3,1% pada 2027. OECD menganalisis risiko utama pelambatan ini berasal dari ketegangan geopolitik, guncangan energi, ketidakpastian perdagangan, dan hambatan investasi global. Dalam konteks Indonesia, Bank Indonesia (BI) masih melihat adanya peluang pertumbuhan 2026 pada kisaran 4,9%–5,7% dengan inflasi tetap dijaga dalam sasaran 2,5%±1%. Hal ini mengindikasikan bahwa ekonomi Indonesia masih dipercaya bisa tumbuh di tengah adanya tekanan energi, geopolitik, dengan tetap menjaga fiskal dan neraca belanja yang sehat.

Bagi industri pertambangan, 2025 menunjukkan bahwa siklus komoditas yang dinamis. Data World Bank Pink Sheet menunjukkan rata-rata harga aluminium naik dari US\$2.419/ton (2024) menjadi US\$2.632/ton (2025), tembaga naik dari US\$9.142/ton menjadi US\$9.947/ton, timah naik dari US\$30.066/ton menjadi US\$34.059/ton, emas naik dari US\$2.388/troy ounce menjadi US\$3.442/troy ounce. Sebaliknya, harga nikel cukup tertekan dari US\$16.814/ton (2024) menjadi US\$15.162/ton (2025), dan batu bara Australia turun dari US\$136,1/ton menjadi US\$108,4/ton. Perbaikan harga selama tahun 2025 untuk base metals ini didorong oleh adanya perbaikan demand dan kendala suplai di beberapa komoditas seperti timah, dan aluminium.

Untuk 2026 prospek industri pertambangan masih cenderung positif. World Bank pada Oktober 2025 memproyeksikan beberapa harga komoditas untuk tahun 2026 seperti harga aluminium di kisaran US\$2.600/ton; tembaga di US\$9.800/ton; nikel di US\$15.500/ton; timah di US\$34.000/ton; emas di US\$3.575/troy ounce; serta batu bara Australia di US\$100/ton pada 2026. Khusus untuk emas, para analis masih memproyeksikan pertumbuhan harga yang cukup signifikan yaitu hingga >US\$4.500/troy ounce. Hal ini didorong oleh isu krisis timur Tengah yang menjadikan emas sebagai alternatif investasi yang aman (*safe haven*).

Secara struktural, tembaga, aluminium, timah, dan emas masih berada pada posisi yang relatif lebih menarik dibandingkan nikel dan batu bara. Tembaga tetap diuntungkan oleh tren perluasan elektrifikasi, data center, jaringan listrik, dan kendaraan listrik. Aluminium tetap didukung oleh kebutuhan transportasi, energi baru terbarukan, konstruksi, dan substitusi material ringan. Timah memperoleh dukungan dari sektor elektronik, solder, semikonduktor, dan transisi energi. Emas tetap kuat sebagai aset *safe haven*; World Gold Council (WGC) mencatat total permintaan emas 2025 menembus 5.002 ton. Sebaliknya, nikel masih menghadapi tekanan oversupply jangka pendek meskipun

Upon entering 2026, there is a tendency of the global economic outlook being projected as slowing down. The Organization for Economic Co-operation and Development (OECD) projects the growth of the global Gross Domestic Product (GDP) to decline from 3.2% in 2025 to 2.9% in 2026, before strengthening slightly to 3.1% in 2027. The OECD analyzes the main risks of this slowdown as coming from geopolitical tensions, energy shocks, trade uncertainty, and obstacles to global investment. In the context of Indonesia, Bank Indonesia (BI) still sees an opportunity for growth in 2026 within the range of 4.9%–5.7%, with inflation being maintained within the target of 2.5%±1%. This indicates belief that the Indonesian economy is still able to grow amidst energy and geopolitical pressures, while maintaining healthy fiscal conditions and balance of expenditures.

As for the mining industry, 2025 represented a dynamic commodity cycle. World Bank Pink Sheet data showed that the average prices of aluminum increased from US\$2,419/ton (2024) to US\$2,632/ton (2025), copper increased from US\$9,142/ton to US\$9,947/ton, tin increased from US\$30,066/ton to US\$34,059/ton, and gold increased from US\$2,388/troy ounce to US\$3,442/troy ounce. Conversely, the price of nickel was maintained from US\$16,814/ton (2024) to US\$15,162/ton (2025), while the price of Australian coal declined from US\$136.1/ton to US\$108.4/ton. Such price improvements during 2025 for base metals were driven by improved demands and supply constraints in several commodities such as tin and aluminum.

Outlook of the mining industry remains positive for 2026. In October 2025, the World Bank projected several commodity prices for 2026, including aluminum at around US\$2,600/ton; copper at US\$9,800/ton; nickel at US\$15,500/ton; tin at US\$34,000/ton; gold at US\$3,575/troy ounce; and Australian coal at US\$100/ton in 2026. Specifically for gold, analysts still project significant price growth of up to >US\$4,500/troy ounce. This is driven by the Middle East crisis, which has made gold a safe haven investment alternative.

Structurally speaking, copper, aluminum, tin and gold remain relatively more attractive compared to nickel and coal. Copper continues to benefit from the expanding trends of electrification, data centers, power grids, and electric vehicles. Aluminum remains supported by needs for transportation, new renewable energy, construction, and lightweight material substitution. Tin receives support from the electronics, solder, semiconductor, and energy transition sectors. Gold remains strong as a safe haven asset; the World Gold Council (WGC) recorded total gold demands in 2025 to reach 5,002 tons. Conversely, nickel continues to face short-term oversupply pressures, although

diproyeksikan akan ada perbaikan harga karena adanya rencana pembatasan produksi nikel nasional di Indonesia pada tahun 2026. International Nickel Study Group (INSG) memperkirakan surplus pasar nikel global sebesar 209 ribu ton pada 2025 dan meningkat menjadi 261 ribu ton pada 2026, meskipun permintaan tetap bertumbuh. Untuk batu bara, International Energy Agency (IEA) memperkirakan permintaan global mencapai 8,845 miliar ton pada 2025, namun mulai menurun tipis pada 2026 dan cenderung plateau hingga akhir dekade dengan adanya narasi transisi energi.

Untuk aluminium dan rantai bauksit–alumina, MIND ID telah menyelesaikan Proyek SGAR (Smelter Grade Alumina Refinery) Fase I di Mempawah pada 2024 dan pada 2025–2026 memprioritaskan SGAR Fase II sebagai salah satu proyek utama selanjutnya. Keunggulan utama rantai aluminium MIND ID menjadi salah satu perhatian utama perusahaan untuk mencapai target integrasi pasokan domestik, pengurangan ketergantungan impor, dan sinergi lintas entitas. Untuk nikel, permintaan jangka panjang masih didukung oleh permintaan untuk industri stainless steel dan baterai. Sedangkan untuk emas, ANTAM pada tahun 2025 mencatat volume penjualan emas hingga 37.400 kilogram. Pada saat yang sama, optimasi Precious Metal Refinery (PMR) ditetapkan MIND ID sebagai salah satu prioritas 2025. Hal ini diharapkan bisa mendorong untuk penyediaan produk emas yang lebih baik dimasa depan. Untuk tembaga, posisi PTFI tetap menjadi salah satu penopang strategis utama MIND ID.

Untuk timah, kondisi pasar secara eksternal masih cukup mendukung, namun tantangan MIND ID lebih banyak berada di sisi operasi dan tata kelola pasokan bijih. Harga timah 2025 berada pada level yang relatif baik, dimana TIMAH pada tahun 2025 mencatat penjualan Tin Ingot sebanyak 16.634 Ton. MIND ID memproyeksikan harga jual timah yang relatif bisa lebih baik pada H1 2026 yang diharapkan kemudian bisa menjadi penopang perbaikan pendapatan perusahaan. Untuk batu bara, PTBA mencatat volume penjualan tahun 2025 hingga 47,23 juta ton. Meskipun tekanan transisi energi akan terus meningkat, perusahaan masih melihat sisi positif dari krisis timur tengah yang bisa memicu peningkatan permintaan batu bara global sebagai alternatif penggunaan migas dari Timur Tengah.

Secara keseluruhan, tinjauan 2025 dan proyeksi industri komoditas tambang MIND ID pada tahun 2026 mendatang menunjukkan bahwa MIND ID masih ada dalam arah pertumbuhan perusahaan yang positif. Tahun 2025 membuktikan bahwa perekonomian global lebih stabil dari sisi inflasi, namun pertumbuhannya mulai melambat dan kinerja komoditas menjadi makin dinamis. Proyeksi ekonomi dan industri tahun 2026 menunjukkan beberapa peluang yang menjadi sentimen positif bagi MIND ID meskipun tetap terdapat beberapa risiko yang perlu dimitigasi seperti volatilitas harga energi.

price improvements are projected due to the planned restriction of national nickel production in Indonesia in 2026. The International Nickel Study Group (INSG) estimated a global nickel market surplus of 209,000 tons in 2025 and increasing to 261,000 tons in 2026, despite continued demand growth. For coal, the International Energy Agency (IEA) estimated global demands to reach 8.845 billion ton in 2025, but beginning to decline slightly in 2026 and tending to plateau until the end of the decade with the energy transition narrative.

For aluminum and the bauxite–alumina chain, MIND ID completed the SGAR (Smelter Grade Alumina Refinery) Phase I Project in Mempawah in 2024 and prioritized SGAR Phase II as one of its next main projects in 2025–2026. The main advantages of MIND ID's aluminum chains are one of its main concerns in achieving the targets of integrating domestic supply, reducing import dependence, and synergizing across entities. For nickel, long-term demands remain to be supported by demands for the stainless steel and battery industries. As for gold, ANTAM in 2025 recorded gold sales volume of up to 37,400 kilograms. At the same time, the optimization of the Precious Metal Refinery (PMR) was set by MIND ID as one of its priorities for 2025. This is expected to encourage the provision of better gold products in the future. For copper, PTFI's position remains to be one of MIND ID's main strategic pillars.

For tin, external market conditions remained relatively supportive, but MIND ID's challenges occurred more in operational and ore supply management. Tin prices in 2025 remained relatively stable, with PT TIMAH recording 16,634 tons of Tin Ingot sales in 2025. MIND ID projected relatively better tin sales prices in H1 2026, which are later expected to support improved corporate revenues. For coal, PT Bukit Asam (PTBA) recorded sales volumes of up to 47.23 million tons in 2025. Although energy transition pressures will continue to increase, the Company still sees a positive side to the Middle East crisis, which may trigger increased global coal demands as an alternative to oil and gas from the Middle East.

Overall, MIND ID's 2025 outlook and mining commodity industry projections for 2026 showed that MIND ID remains to be on a positive corporate growth trajectory. While 2025 demonstrated a more stable global economy in terms of inflation, growth was beginning to slow down and commodity performance was becoming more dynamic. The economic and industry projections for 2026 highlighted several opportunities that provide positive sentiment for MIND ID although there remained some risks, such as energy price volatility, that need to be mitigated.

# Inisiasi dan Kebijakan Strategis Tahun 2025

## Strategic Initiatives and Policies for 2025

- 1. Penguasaan Cadangan dan Sumber Daya**  
MIND ID meningkatkan penguasaan Cadangan mineral dilakukan melalui eksplorasi organik dan anorganik dengan mempertahankan prinsip konservasi sumber daya dan cadangan sehingga kegiatan pengolahan dan industrialisasi berbasis komoditas pertambangan di Indonesia mendapatkan pasokan bahan baku yang mencukupi untuk jangka panjang.
- 2. Pengembangan Bisnis Hilirisasi**  
Pengembangan bisnis hilirisasi dilakukan secara selektif melalui kemitraan strategis serta penanaman modal pada industri hilir yang memiliki capex competitiveness, sehingga dapat mengoptimalkan tingkat pengembalian investasi yang berorientasi pada pasar.
- 3. Kepemimpinan Pasar (Market Leadership)**  
Kepemimpinan pasar melalui optimasi strategi pemasaran dan peningkatan volume produksi sehingga MIND ID dapat menjadi pemasok Utama komoditas mineral dan batu bara serta memiliki pengaruh terhadap pasar komoditas.

Strategi dan kebijakan MIND ID sesuai dengan RJPP 2025–2029 adalah sebagai berikut:

- 1. Peningkatan pengelolaan cadangan dan sumber daya.**  
Meningkatkan kegiatan eksplorasi secara agresif dan selektif baik secara organik ataupun anorganik, yaitu dengan melakukan akuisisi perusahaan tambang strategis, untuk memperpanjang umur cadangan untuk setiap cadangan logam dasar dan emas dengan *target life of mine* di atas 25 tahun dan rasio penggantian cadangan (*reserve replacement ratio*, 3R) lebih besar atau sama dengan 1.
- 2. Strategi kepemimpinan pasar, agresivitas produksi, dan kinerja operasi.** Strategi komersialisasi akan diperkuat melalui: Peningkatan volume produksi untuk memenuhi kebutuhan hilirisasi dan industrialisasi, pengembangan produk baru dan inovatif, ekspansi pasar, serta kemitraan strategis dengan pemain global sehingga MIND ID memiliki kemampuan mempengaruhi harga komoditas dunia. Selain itu, daya saing produk MIND ID dalam hal harga akan ditingkatkan melalui peningkatan efisiensi untuk menurunkan biaya.
- 3. Penguatan hilirisasi serta industrialisasi melalui dukungan terhadap pengembangan EV dan industri energi.** Peningkatan nilai tambah atas bahan baku mineral dan batu bara dilakukan dengan mengacu pada ketersediaan pasar, profitabilitas, serta kapabilitas MIND ID Grup sebagai kelompok usaha. Inisiatif hilirisasi yang sejalan dengan

In accordance with the previously approved Long-Term Plan of MIND ID for 2025–2029, the main targets to be achieved by MIND ID in the long term are to become a World Class Company with a business scale capable of competing with global mining companies and to become one of the largest companies in the world (Fortune Global 500) in the long term through 3 mandates:

- 1. Control over Reserves and Resources**  
MIND ID increases control over mineral reserves through organic and inorganic explorations by maintaining the principle of resource and reserve conservation, such that mining commodity-based processing and industrialization activities in Indonesia obtain sufficient raw material supplies for the long term.
- 2. Downstream Business Development**  
Downstream business development is conducted selectively through strategic partnerships and investments in downstream industries that have capex competitiveness, so as to optimize the level of market-oriented investment returns.
- 3. Market Leadership**  
through the optimization of marketing strategies and increase of production volume, such that MIND ID may become the main supplier of mineral and coal commodities and have influence on the commodity market.

The strategies and policies of MIND ID in accordance with the RJPP for 2025–2029 are as follows:

- 1. Improvements in the management of reserves and resources.** To aggressively and selectively increase exploration activities both organically and inorganically, namely by acquiring strategic mining companies, extending the reserve life of each base metal and gold reserve with a mine life target of over 25 years and a reserve replacement ratio (3R) of greater than or equal to 1.
- 2. Market leadership strategies, production aggressiveness, and operational performance.** Commercialization strategies will be strengthened through: Increasing production volumes to meet downstream and industrialization needs, developing new and innovative products, expanding markets, and strategic partnerships with global players so that MIND ID is capable of influencing global commodity prices. In addition, the competitiveness of MIND ID products in terms of price will be enhanced through increased efficiency to lower costs.
- 3. Strengthening of downstreaming and industrialization** through support for the development of EVs and the energy industry. The increase of added value of mineral and coal raw materials is performed by referring to market availability, profitability, and capabilities of the MIND ID Group as a business group. Downstreaming initiatives that are in line with

aspirasi Pemerintah kepada MIND ID, memiliki pangsa pasar, kompetitif dalam aspek biaya produksi (*cost leader*) di industrinya, memberikan tingkat pengembalian investasi yang mendukung pencapaian kriteria kinerja yang ditentukan oleh Pemerintah, dan mampu dilakukan oleh MIND ID, baik secara mandiri maupun kemitraan strategis, akan mendapat prioritas utama. Throughout 2025, the Company faced various dynamics that put pressure on the performance of the coal segment. These various external and operational conditions were factors that influenced the financial results of the Coal segment throughout the current year. One of the main challenges was a decline in global coal prices, as reflected in a decline in the Newcastle Coal Index (NCI) by 22% year-on-year (YoY) and the Indonesian Coal Index (ICI) of 3, which fell by 16% YoY. This price decline has put pressure on the revenues of the Coal segment, which revenues underwent a slight decline from Rp47.67 trillion in 2024 to Rp46.25 trillion in 2025.

Di sisi lain, perubahan kebijakan energi nasional, khususnya pencabutan subsidi bahan bakar minyak (BBM) serta implementasi program mandatori B40, turut mendorong kenaikan harga BBM sebesar 13% YoY. Kondisi ini berdampak langsung pada peningkatan biaya operasional, terutama pada komponen biaya produksi dan logistik. Selain itu, perubahan kebijakan terhadap peningkatan tarif royalti Batu bara turut memberikan tekanan terhadap margin segmen Batu Bara. Laba tahun berjalan segmen Batu Bara sebesar Rp1,40 triliun pada tahun 2025, turun 61,26% dari capaian tahun 2024 sebesar Rp3,61 triliun.

### Rencana Pengembangan ke Depan

Inisiatif-inisiatif strategis yang akan dilakukan ke depan berfokus pada (i) penguatan logistik dan infrastruktur angkutan untuk mempercepat monetisasi cadangan batu bara, dan (ii) akselerasi pengembangan bisnis hilirisasi dan energi. Untuk inisiatif yang berfokus pada logistik, antara lain:

1. Penyelesaian dan operasionalisasi CHF TLS 6&7 di Tanjung Enim untuk mendukung rute Tanjung Enim–Kramasan, bekerja sama dengan PT KAI dan PT KALOG.
2. Kajian penambahan kapasitas bongkar di Kertapati (Ekspansi Dermaga Kertapati) bekerja sama dengan PT KAI dan PT Semen Baturaja.
3. Kajian angkutan Kereta Api Tanjung Enim–Tarahan II, bekerja sama dengan PT KAI.

Sementara untuk inisiatif yang berfokus pada pengembangan bisnis hilirisasi dan energi, antara lain:

1. Kajian inisiasi pengembangan PLTU baik IPP maupun *captive* yang terintegrasi dengan industri, serta pengembangan Energi Baru dan Terbarukan (EBT).
2. Pelaksanaan *joint feasibility study Coal to Synthetic Natural Gas (SNG)* dengan PGN dan percepatan menuju tahap konstruksi.
3. Skalabilitas pilot plant Kalium Humat menuju skala komersial sebagai produk diversifikasi berbasis batu bara yang ramah lingkungan.
4. Penelitian dan Riset terkait pengembangan Coal to Anode Sheet sebagai bahan baku baterai, Coal to Asam Humat, dan Biomassa dari Kaliandra Merah sebagai bahan baku *co-firing* PLTU. Strategi ini diarahkan untuk memperluas sumber pendapatan dan memperkuat keberlanjutan usaha dalam jangka panjang.
5. Diversifikasi portofolio pelanggan dengan menjaga keseimbangan antara pasar domestik dan ekspor, dengan penetrasi ke pasar baru khususnya India dan Vietnam.

On the other hand, changes in national energy policies, particularly the revocation of fuel subsidies and the implementation of the mandatory B40 program, have contributed to a 13% year-on-year increase in fuel prices. This condition has had a direct impact on operational costs, particularly costs of production and logistics. Furthermore, policy changes related to increased Coal royalty rates have also put pressure on Coal segment margins. The Coal segment's current-year profits were projected to reach Rp1.40 trillion in 2025, down 61.26% from Rp3.61 trillion in 2024.

### Future Development Plans

Future strategic initiatives will focus on (i) strengthening logistics and transportation infrastructure to accelerate the monetization of coal reserves, and (ii) accelerating the development of downstream and energy businesses. Logistics-focused initiatives include:

1. Completion and operationalization of CHF TLS 6&7 in Tanjung Enim to support the Tanjung Enim–Kramasan route, in collaboration with PT KAI and PT KALOG.
2. Study on increasing unloading capacity at Kertapati (Kertapati Pier Expansion) in collaboration with PT KAI and PT Semen Baturaja.
3. Study of Tanjung Enim–Tarahan II Railway transportation, in collaboration with PT KAI.

Meanwhile, initiatives that focus on developing downstream and energy businesses include:

1. Initiation study of the development of PLTU, both IPP and *captive*, integrated with industry, as well as the development of New and Renewable Energy (EBT).
2. Implementation of a joint feasibility study on Coal to Synthetic Natural Gas (SNG) with PGN and acceleration towards the construction phase.
3. Scalability of pilot plant of the Kalium Humat towards commercial scale as an environmentally friendly coal-based diversification product.
4. Research and development related to the development of Coal to Anode Sheet as a battery raw material, Coal to Humic Acid, and Biomass from Red Kaliandra as a raw material for *co-firing* PLTU. This strategy is aimed at expanding revenue sources and strengthening long-term business sustainability.
5. Diversify customer portfolio by maintaining a balance between domestic and export markets, with penetration into new markets especially India and Vietnam.

## Emas dan Logam Mulia Lainnya

### Gold and other Precious Metals

#### Kegiatan Usaha serta Produk dan Jasa Segmen Emas dan Logam Mulia Lainnya

Segmen emas dan logam mulia lainnya merupakan proses bisnis dan rantai nilai yang dikembangkan oleh entitas anak, PT Aneka Tambang (Persero) Tbk ("ANTAM") dan seluruh entitas yang berada di bawah ANTAM. Komoditas yang dihasilkan dalam segmen ini mencakup emas dan logam mulia lainnya dengan kualitas tertentu.

#### Strategi Pengembangan Segmen Emas dan Logam Mulia Lainnya serta Kinerja Operasional, Produksi, dan Pemasaran serta Penjualan Segmen Emas dan Logam Mulia Lainnya Tahun 2024

Dalam rangka pengembangan usaha segmen emas serta kolaborasi strategis di dalam Grup MIND ID, ANTAM dan PT Freeport Indonesia ("PTFI") telah menandatangani kerja sama terkait jual beli emas dengan kadar kemurnian 99,99% pada tanggal 7 November 2024. Kolaborasi strategis tersebut dimaksudkan untuk memperkuat rantai pasok emas dalam negeri, meningkatkan efisiensi produksi dan distribusi, memastikan keberlanjutan pasokan logam mulia untuk kebutuhan industri dan investasi, serta meningkatkan daya saing produk emas di pasar global. Sebanyak 30 ton emas per tahun dengan kemurnian 99,99% akan dibeli ANTAM dari PTFI. Emas ini kemudian akan diolah untuk menjadi produk logam mulia ANTAM.

Di tahun 2025, inisiatif-inisiatif strategis pengembangan segmen emas antara lain:

1. Proyek Pengembangan Fasilitas Manufaktur Logam Mulia (JIIPE Gresik) — Proyek telah memasuki fase konstruksi pada triwulan IV tahun 2025. Dengan lokasi yang berdekatan dengan kawasan pemurnian emas, fasilitas ini diharapkan mampu meningkatkan efisiensi distribusi, mempercepat proses manufaktur, serta memperluas penetrasi pasar domestik, sekaligus mencerminkan respons ANTAM terhadap pertumbuhan permintaan emas ritel yang tetap kuat dan memperkuat posisinya sebagai pemain utama dalam industri logam mulia nasional. Fasilitas ini ditargetkan beroperasi komersial pada akhir tahun 2027.
2. Strategi Pemasaran Domestik — Seluruh penjualan emas pada tahun 2025 dialokasikan untuk pemenuhan pasar dalam negeri, sejalan dengan tumbuhnya tren kesadaran berinvestasi emas domestik. ANTAM memperkuat basis pelanggan domestik melalui inovasi penjualan produk-produk logam mulia dan perluasan jaringan distribusi.

#### Business Activities as well as Products and Services in the Gold and Other Precious Metals Segment

The gold and other precious metals segment represents business processes and value chains developed by MIND ID's subsidiary, PT Aneka Tambang Tbk ("ANTAM"), and all entities under ANTAM. Commodities produced in this segment include gold and other precious metals of varying qualities.

#### Development Strategies of the Gold and Other Precious Metals Segment as well as Operational, Production, and Marketing and Sales Performance of the Gold and Other Precious Metals Segment in 2024

In order to develop the gold segment business and strategic collaboration within the MIND ID Group, ANTAM and PT Freeport Indonesia ("PTFI") have signed a cooperation agreement related to the sale and purchase of gold with a purity of 99.99% on November 7, 2024. This strategic collaboration is intended to strengthen the domestic gold supply chain, increase production and distribution efficiency, ensure the sustainability of precious metal supplies for industrial and investment needs, and increase the competitiveness of gold products in the global market. A total of 30 tons of gold per year with a purity of 99.99% will be purchased by ANTAM from PTFI. This gold will then be processed into ANTAM's precious metal products.

In 2025, strategic initiatives for developing the gold segment include:

1. Development Project of Precious Metal Manufacturing Facility (JIIPE Gresik) — The project has entered the construction phase in the fourth quarter of 2025. Located close to the gold refining area, this facility is expected to improve distribution efficiency, accelerate the manufacturing process, and expand domestic market penetration, while reflecting ANTAM's response to the continued strong growth in retail gold demand and strengthening its position as a major player in the national precious metals industry. This facility is targeted for commercial operation by the end of 2027.
2. Domestic Marketing Strategy — All gold sales in 2025 allocated to meet the domestic market, in line with the growing trend of domestic gold investment awareness. ANTAM strengthened its domestic customer base through sales innovations in precious metal products and expanding its distribution network.

Volume produksi emas pada tahun 2025 sebesar 0,74 ton, menurun 27,45% atau setara dengan 0,28 ton dari tahun sebelumnya sebesar 1,02 ton. Sedangkan volume penjualan emas pada tahun 2025 mencapai 37,36 ton, menurun 14,66% atau setara dengan 6,42 ton dari tahun sebelumnya sebesar 43,78 ton. Penurunan ini disebabkan oleh maintenance peralatan dan penyesuaian kapasitas stockpile, serta revisi RKAB UBPE Pongkor yang baru diterima menjelang akhir tahun.

The volume of gold production in 2025 was 0.74 tons, a decreased of 27.45% or equivalent to 0.28 tons, from 1.02 tons in the previous year. Meanwhile, volume of gold sales in 2025 reach 37.36 tons, a decrease of 14.66% or equivalent to 6.42 tons, from 43.78 tons in the previous year. The decrease in production was primarily due to equipment maintenance and stockpile capacity adjustments, as well as a revised work plan and budget (RKAB) that was only received near the end of the year.

Untuk komoditas perak, pada tahun 2025 total volume produksi sebesar 4,58 ton, menurun 28,33% atau setara dengan 1,81 ton dari tahun sebelumnya sebesar 6,39 ton. Sedangkan volume penjualan perak mencapai 6,40 ton, turun 2,29% atau setara dengan 0,15 ton dari tahun sebelumnya sebesar 6,55 ton. Penurunan produksi ini disebabkan oleh keterlambatan revisi RKAB, sedangkan peningkatan penjualan perak disebabkan oleh meningkatnya permintaan pasar atas logam perak.

For the silver commodity, in 2025 the total production volume was 4.58 tons, a decrease of 28.33% or equivalent to 1.81 tons, from 6.39 tons in the previous year. Meanwhile, the volume of silver sales reached 6.40 tons, a decrease of 2.29% or equivalent to 0.15 tons, from 6.55 tons in the previous year. This decrease in production was due to delays in the revision of the Company Work Plan and Budget (RKAB), while the increase in silver sales was driven by increased market demand for silver.

Fasilitas ini akan meningkatkan kapasitas manufaktur produk emas Logam Mulia ANTAM, meningkatkan efisiensi distribusi, mempercepat proses manufaktur, serta memperluas penetrasi pasar domestik.
2. Penguatan ketahanan pasokan bahan baku melalui kerja sama jual beli emas dari PTFI sebesar 30 ton per tahun, sehingga pasokan emas untuk kebutuhan produksi logam mulia dapat lebih terjaga.
3. Penguatan strategi pemasaran domestik melalui inovasi produk logam mulia dan pengembangan kanal distribusi baru, seiring meningkatnya permintaan emas ritel domestik dan tren berinvestasi emas di dalam negeri.
4. Akselerasi investasi hilirisasi emas yang juga akan memberikan fondasi kuat bagi pertumbuhan jangka panjang Perusahaan, sejalan dengan arahan Pemerintah dalam mendorong hilirisasi dan industrialisasi sumber daya mineral dalam negeri.

The solid performance of the gold and other precious metals segment, supported by strong global gold prices, enabled the Company to maintain profitability. This shows that the price factor remains to be a key driver in maintaining the revenue performance of the gold and other precious metals segment. In terms of marketing strategy, the Company's gold sales strategies have continued to focus on the strengthening of its domestic customer base, in line with the growing positive trend of awareness on domestic gold investments. All gold sales in 2025 were allocated to meet domestic market demands.

### Future Development Plans

Future strategic initiatives in the gold and other precious metals segment will focus on strengthening manufacturing capacity and integrating the domestic gold supply chain, including:

1. Completion of the construction of the Precious Metal Manufacturing Facility at JIPE Gresik, which is targeted for commercial operation by the end of 2027. This facility will increase the manufacturing capacity of Precious Metal gold products of ANTAM, improve distribution efficiency, accelerate the manufacturing process, and expand domestic market penetration.
2. Strengthening the resilience of raw material supplies through a gold buying and selling cooperation with PTFI amounting to 30 tons per year, so that the gold supply for precious metal production needs can be better maintained.
3. Strengthening domestic marketing strategies through innovation in precious metal products and the development of new distribution channels, in line with the increasing demand for domestic retail gold and the trend of investing in gold within the country.
4. Accelerating gold downstream investment will also provide a strong foundation for long-term growth of the Company, in line with the Government's direction in encouraging downstreaming and industrialization of domestic mineral resources.

## Aluminium

### Aluminum

### Kegiatan Usaha serta Produk dan Jasa Segmen Aluminium

Segmen aluminium merupakan proses bisnis dan rantai nilai yang dikembangkan oleh entitas anak, PT Indonesia Asahan Aluminium ("INALUM") dan seluruh entitas yang berada di bawah INALUM. Kegiatan yang dilakukan dalam segmen ini mencakup produksi dan penjualan komoditas aluminium.

### Business Activities as well as Products and Services of the Aluminum Segment

The aluminum segment represents business processes and value chains developed by MIND ID's subsidiary, PT Indonesia Asahan Aluminium ("INALUM"), and all entities under INALUM. Activities conducted within this segment include the production and sales of aluminum commodities.

### Strategi Pengembangan Segmen Aluminium serta Kinerja Operasional, Produksi, dan Pemasaran serta Penjualan Segmen Aluminium Tahun 2025

Pengembangan segmen aluminium dilakukan MIND ID melalui INALUM dengan melaksanakan hal-hal sebagai berikut:

1. Proyek Smelter Grade Alumina Refinery (SGAR) Mempawah Fase 1 — INALUM bersama ANTAM melalui PT Borneo Alumina Indonesia (BAI) mengembangkan proyek SGAR dengan kapasitas produksi 1 juta ton SGA per tahun. Per 31 Desember 2025, kemajuan penyelesaian konstruksi mencapai 98,56% dan proyek ditargetkan beroperasi pada tahun 2026. SGAR dirancang untuk mengamankan pasokan alumina domestik guna mengurangi ketergantungan impor bahan baku, sekaligus memperkuat integrasi industri aluminium nasional
2. Optimalisasi Produk Value Added — INALUM mengoptimalkan bauran produk aluminium value-added (billet, alloy, molten) untuk meningkatkan margin. Pada 2025, produksi aluminium cair (molten) melonjak 426% menjadi 6.075 ton dari 1.156 ton di 2024, mencerminkan keberhasilan strategi diversifikasi produk.

Kinerja operasi segmen aluminium terlihat dari volume produksi dan penjualan yang dapat dilihat pada tabel di bawah ini.

### Development Strategy of the Aluminum Segment as well as Operational, Production, Marketing, and Sales Performance of the Aluminum Segment in 2025

MIND ID was developing the aluminum segment through INALUM by implementing the following:

1. Smelter Project Grade Alumina Refinery (SGAR) Mempawah Phase 1 — INALUM, together with ANTAM through PT Borneo Alumina Indonesia (BAI), was developing the SGAR project with a production capacity of 1 million tons of SGA per year. As of December 31, 2025, construction progress has reached 98.56%, and the project is targeted to be operational in 2026. SGAR is designed to secure domestic alumina supplies to reduce dependence on imported raw materials, while strengthening the integration of the national aluminum industry.
2. Optimization of Value-Added Products — INALUM optimized its value-added aluminum product mix (billet, alloy, molten) to increase margins. In 2025, molten aluminum production will surge 426% to 6,075 tons from 1,156 tons in 2024, reflecting the success of its product diversification strategy.

The operational performance of the aluminum segment is evident from the production and sales volumes as set out in the table below.

Perusahaan berhasil mencapai pendapatan dari segmen aluminium di tahun 2025 sebesar Rp13,97 triliun, meningkat 4,92% dari tahun sebelumnya sebesar Rp13,32 triliun, didukung oleh tren positif kenaikan harga produk aluminium dan peningkatan kuantitas penjualan. Produk aluminium ingot masih menjadi produk utama bagi segmen aluminium. Tren positif pada pendapatan juga mendukung segmen aluminium untuk membukukan peningkatan laba bersih sebesar 42,89% dari Rp1,96 triliun pada tahun 2024 menjadi Rp2,8 triliun pada tahun 2025. Kinerja segmen aluminium menjadi salah satu perhatian utama Perusahaan untuk mencapai target integrasi pasokan domestik, pengurangan ketergantungan impor, dan sinergi lintas entitas.

### Rencana Pengembangan ke Depan

Inisiatif-inisiatif strategis ke depan pada segmen aluminium berfokus pada penguatan integrasi rantai nilai aluminium nasional dari hulu hingga hilir, antara lain:

1. Operasionalisasi SGAR Mempawah Fase 1 (kemajuan konstruksi 98,56%), dengan kapasitas 1 juta ton SGA per tahun. Beroperasinya SGAR akan memungkinkan INALUM mengamankan pasokan alumina domestik dan mengurangi ketergantungan impor secara signifikan, sekaligus memperkuat integrasi hulu-hilir industri aluminium. Peran ANTAM dalam proyek ini tidak hanya sebagai penyedia bahan baku, tetapi sebagai bagian dari integrasi industri aluminium yang lebih kuat dan berkelanjutan.
2. Pengembangan SGAR Fase II secara bertahap dengan tambahan kapasitas SGA hingga 1 juta ton per tahun untuk mendukung ketahanan mineral nasional dan memastikan ketersediaan bahan baku bagi industri manufaktur domestik, sejalan dengan strategi nasional dalam mengurangi ketergantungan terhadap impor produk hilir aluminium.
3. Peningkatan porsi produk *value added* (*billet, alloy, molten*) dalam bauran produksi untuk mengoptimalkan margin dan memenuhi permintaan industri hilir aluminium dalam negeri.
4. Penguatan sinergi lintas entitas dalam Grup MIND ID untuk memanfaatkan peluang integrasi rantai pasok aluminium dari bauksit–alumina–aluminium secara menyeluruh.

The Company successfully achieved revenues from the aluminum segment in 2025 of Rp13.97 trillion, an increase of 4.92% from the previous year's Rp13.32 trillion, as supported by a positive trend of increasing prices of aluminum products and increasing sales quantities. Aluminum ingot products continue to serve as the main product in the aluminum segment. The positive trend in revenues has also supported the aluminum segment in recording a 42.89% increase in net profits, from posting a 42.89% increase in net profits from Rp1.96 trillion in 2024 to Rp2.8 trillion in 2025. The performance of the aluminum segment has become one of the Company's main concerns in achieving the targets of integrating domestic supplies, reducing import dependence, and synergizing across entities.

### Future Development Plans

Future strategic initiatives in the aluminum segment focus on strengthening the integration of the national aluminum value chain from upstream to downstream, including:

1. The operationalization of SGAR Mempawah Phase 1 (construction progress 98.56%), with a capacity of 1 million tons of SGA per year. The operation of SGAR will enable INALUM to secure domestic alumina supply and significantly reduce import dependence, while strengthening the upstream-downstream integration of the aluminum industry. ANTAM's role in this project is not only as a raw material provider, but as part of a stronger and more sustainable aluminum industry integration.
2. The gradual development of SGAR Phase II with additional SGA capacity of up to 1 million tons per year will support national mineral security and ensure the availability of raw materials for the domestic manufacturing industry, in line with the national strategy to reduce dependence on imports of downstream aluminum products.
3. Increasing the portion of value-added products (*billet, alloy, molten*) in the production mix to optimize margins and meet the demand of the domestic downstream aluminum industry.
4. Strengthening cross-entity synergies within the MIND ID Group to capitalize on opportunities for comprehensive aluminum supply chain integration from bauxite–alumina–aluminum.

## Logam Timah dan Tin Solder

### Tin Metals and Tin Solders

#### Kegiatan Usaha serta Produk dan Jasa Segmen Logam Timah dan Tin Solder

Segmen timah dan tin solder merupakan proses bisnis dan rantai nilai yang dikembangkan oleh entitas anak, PT Timah (Persero) Tbk ("TIMAH") dan seluruh entitas yang berada di bawah TIMAH. Komoditas yang dihasilkan dalam segmen ini mencakup timah dan tin solder dengan kualitas tertentu.

#### Strategi Pengembangan Segmen Logam Timah dan Tin Solder serta Kinerja Operasional, Produksi, dan Pemasaran serta Penjualan Segmen Logam Timah dan Tin Solder Tahun 2025

Pengembangan segmen timah dilakukan MIND ID melalui TIMAH dengan mengoptimalkan kinerja produksi dengan melakukan penambangan di tempat-tempat baru yang belum pernah di tambang sebelumnya serta meningkatkan utilitas dari aset penambangan, baik di *offshore* maupun *onshore*.

Di tahun 2025, inisiatif-inisiatif strategis pengembangan segmen timah antara lain:

1. Pengembangan Penambangan Timah Primer — TIMAH melaksanakan pengembangan penambangan timah primer di berbagai wilayah operasional baru, termasuk eksplorasi organik dan anorganik di wilayah laut dan darat. Perusahaan juga mengajukan IUP baru sebagai bagian dari strategi penguatan sumber daya jangka panjang.
2. Modernisasi Teknologi Penambangan — TIMAH menerapkan inovasi teknologi berupa pengembangan Kapal Produksi Timah (KPT) dengan teknologi *bore-hole mining*, mekanisasi Ponton Isap Produksi (PIP), serta digitalisasi proses penambangan. Pengembangan *command center* dan *dashboard* kinerja operasional juga mulai dirintis pada tahun 2025.
3. Penguatan Hilirisasi dan Diversifikasi Produk — Melalui PT Timah Industri (TI), TIMAH mengembangkan produk turunan bernilai tambah tinggi berupa tin solder, tin chemical, tin powder, serta mengeksplorasi potensi mineral ikutan bernilai tinggi seperti monazit untuk mendukung pengembangan industri energi hijau. Kajian pengembangan DMT Solid dan Rare Earth Elements (REE) juga terus dilaksanakan.
4. Optimalisasi Mineral Ikutan — TIMAH mengoptimalkan pemanfaatan mineral ikutan seperti zircon, ilmenite, dan pasir silika sebagai sumber pendapatan tambahan.

#### Business Activities as well as Products and Services of the Tin Metal and Tin Solder Segment

The tin metal and tin solder segment represents business processes and value chains developed by MIND ID's subsidiary, PT Timah Tbk ("TIMAH"), and all entities under TIMAH. Commodities produced in this segment include tin and tin solders of varying qualities.

#### Development Strategies of the Tin Metal and Tin Solder Segment as well as Operational, Production, and Marketing and Sales Performance of the Tin Metal and Tin Solder Segment in 2025

The development of the tin segment is conducted by MIND ID through TIMAH by optimizing production performance by mining in new places that have never been mined before and increasing the utility of mining assets, both offshore and onshore.

In 2025, strategic initiatives for developing the tin segment include:

1. Primary Tin Mining Development — TIMAH was developing primary tin mining in various new operational areas, including organic and inorganic exploration in offshore and onshore areas. The company was also applying for new IUPs as part of its long-term resource enhancement strategy.
2. Mining Technology Modernization — TIMAH was implementing technological innovations in the form of developing a Tin Production Vessel (KPT) with bore-hole mining technology, mechanizing the Production Suction Pontoon (PIP), and digitizing the mining process. Development of a command center and operational performance dashboard had been established in 2025.
3. Strengthening Downstream Processing and Product Diversification — Through PT Timah Industri (TI), TIMAH developed high-value derivative products such as tin solder, tin chemicals, and tin powder, and explores the potential of high-value by-products such as monazite to support the development of the green energy industry. Studies on the development of DMT Solid and Rare Earth Elements (REE) were also still performed.
4. Optimization of Associated Minerals — TIMAH optimized the utilization of associated minerals such as zircon, ilmenite, and silica sand as additional sources of income.

Pada tahun 2025, produksi timah tercatat sebesar 17.815 ton, menurun 5,82% atau setara dengan 1.100 ton dari tahun sebelumnya sebesar 18.915 ton. Volume penjualan timah tahun 2025 sebesar 16.684 ton, menurun 4,70% atau setara dengan 823 ton dari tahun sebelumnya sebesar 17.507 ton. Penurunan ini terutama disebabkan oleh penurunan penjualan dan produksi logam timah utamanya disebabkan oleh berakhirnya sebagian besar IUP pada pertengahan tahun 2025 serta hambatan dalam proses perpanjangan dan penyesuaian RKAB.

In the fiscal year 2025, tin production volume recorded at 17,815 metric tons, reflecting a decline of 5.82% or approximately 1,100 metric tons compared to the prior year figure of 18,915 metric tons. Correspondingly, tin sales volume for 2025 reached 16,684 metric tons, representing a decrease of 4.70% or equivalent to 823 metric tons against the previous year's 17,507 metric tons. The aforementioned contraction in both production and sales volume is primarily attributable to the expiration of the majority of Mining Business Licenses (IUP) in mid-2025, compounded by delays and regulatory complexities encountered in the renewal and adjustment processes of the Annual Work Plan and Budget (RKAB).

Untuk segmen industri tin solder dan tin chemical, produksi tin solder pada tahun 2025 tercatat sebesar 615 ton, meningkat 14,53% atau setara dengan 78 ton dari tahun sebelumnya sebesar 537 ton. Volume penjualan tin solder tahun 2025 sebesar 654 ton, meningkat 18,05% atau setara dengan 100 ton dari tahun sebelumnya sebesar 554 ton. Kenaikan ini terutama disebabkan oleh meningkatnya *demand* dari tin solder sehingga bauran produksi tin solder ditingkatkan.

For the tin solder and tin chemical industry segment, tin solder production in 2025 was recorded at 615 tons, an increase of 14.53% or equivalent to 78 tons from the previous year's 537 tons. The sales volume of tin solders in 2025 was 654 tons, an increase of 18.05% or equivalent to 100 tons from the previous year's 554 tons. This increase was primarily due to an increased demand for tin solders, resulting in an increase in tin solder production mix.

Lalu untuk produksi tin chemical pada tahun 2025 tercatat sebesar 5,4 kilo ton, menurun 28,24% atau setara dengan 2.124 ton dari tahun sebelumnya sebesar 7.521 ton. Volume penjualan tin chemical tahun 2025 sebesar 6,6 kilo ton, meningkat 2,20% atau setara dengan 143 ton dari tahun sebelumnya sebesar 6.511 ton. Penurunan ini terutama disebabkan menurunnya *demand* dari tin chemical sehingga bauran tin chemical diturunkan.

As for tin chemical production in 2025, it was recorded at 5.4 kilo tons, a decrease of 28.24% or equivalent to 2,124 tons from the previous year's 7,521 tons. The sales volume of tin chemicals in 2025 was 6.6 kilo tons, an increase of 2.20% or equivalent to 143 tons from the previous year's 6,511 tons. This decrease was mainly due to a decline in demands for tin chemicals, resulting in a decline in tin chemical mix.

Pendapatan segmen Logam Timah dan Tin Solder tercatat sebesar Rp15,04 triliun, naik 10,03% dari tahun 2024 sebesar Rp13,67 triliun. Segmen Logam Timah dan Tin Solder juga berhasil mencapai laba bersih sebesar Rp2,07 triliun pada tahun 2025, meningkat 53,15% dari tahun 2024 sebesar Rp1,35 triliun. Peningkatan ini dipengaruhi oleh ketersediaan logam siap jual, permintaan pasar, waktu pengiriman, dan pelaksanaan strategi pemasaran. MIND ID menjadi salah satu eksportir timah terbanyak di dunia, dimana penjualan logam timah sebanyak 90% dipasarkan ke dalam pasar internasional, dan 10% dialokasikan untuk pasar domestik. Pasar ekspor masih menjadi tujuan utama penjualan Perusahaan sejalan dengan terbatasnya serapan industri hilir timah di dalam negeri. Dari total ekspor tersebut, sekitar 67–70% diarahkan ke pasar Asia, terutama Tiongkok, Jepang, dan

The Tin Metal and Tin Solder segment recorded revenues of Rp15.04 trillion, up 10.03% from Rp13.67 trillion in 2024. The Tin Metal and Tin Solder segment also achieved net profits of Rp2.07 trillion in 2025, a 53.15% increase from Rp1.35 trillion in 2024. This increase was influenced by the availability of ready-to-sell metals, market demands, delivery times, and the implementation of marketing strategies. MIND ID has become one of the largest tin exporters in the world, with 90% of tin sales being marketed internationally and 10% being allocated to the domestic market. Export markets continue to be the Company's primary sales destination, in line with the limited absorption of the domestic downstream tin industry. Of total exports, approximately 67–70% were directed to Asian markets especially China, Japan and Korea, while approximately 14% were marketed to European

Korea, sekitar 14% ke pasar Eropa, dan sisanya ke kawasan Amerika. Komposisi tersebut mencerminkan posisi Asia sebagai pusat permintaan utama logam timah global, terutama untuk kebutuhan industri elektronik, semikonduktor, solder, dan teknologi.

MIND ID, melalui Timah, juga mengarahkan strategi pemasaran pada segmen yang memiliki prospek permintaan jangka panjang dan potensi premium harga yang lebih baik, terutama industri teknologi, produsen tin solder, pusat data, semikonduktor, dan perangkat elektronik. Segmen ini menjadi penting karena lebih dari separuh konsumsi logam timah global masih digunakan untuk tin solder, yaitu material yang berperan penting dalam penyambungan komponen elektronik. Dengan demikian, strategi pemasaran Perusahaan tidak hanya diarahkan untuk menjaga volume penjualan, tetapi juga untuk memperoleh nilai penjualan yang lebih optimal melalui pemilihan pasar dan pelanggan yang tepat.

### Rencana Pengembangan ke Depan

Inisiatif-inisiatif strategis yang akan dilakukan ke depan berfokus pada memperkuat fondasi operasional, komersial, dan organisasi Perseroan. Direksi menetapkan enam fokus strategi yang diarahkan untuk memastikan pertumbuhan yang berkelanjutan, antara lain:

1. Penguatan tata kelola dan transformasi proses bisnis sebagai fondasi peningkatan produktivitas, sehingga setiap aktivitas operasional dapat berjalan sesuai koridor regulasi sekaligus mendukung pencapaian kinerja secara lebih efektif.
2. Penyelarasan rantai pasok operasional dari hulu ke hilir melalui penetapan service level agreement yang lebih terukur pada setiap titik rantai pasok, mulai dari lokasi tambang ke Gudang Biji Timah, fasilitas smelter, hingga pelabuhan, guna meningkatkan kepastian pasokan dan konsistensi penjualan logam timah.
3. Perluasan pasar ekspor secara lebih selektif, terutama ke Asia Tenggara (Filipina, Thailand) yang telah dirintis sejak 2025, serta India yang dinilai memiliki potensi pertumbuhan konsumsi logam timah tinggi sejalan dengan perkembangan industri teknologinya.
4. Akselerasi digitalisasi proses bisnis dan operasional melalui penyempurnaan command center dan dashboard kinerja operasional agar proses pemantauan kinerja dapat dilakukan secara lebih cepat, akurat, dan terintegrasi.
5. Penguatan manajemen sumber daya manusia melalui peningkatan produktivitas dan efektivitas karyawan untuk memastikan transformasi proses bisnis dan operasional didukung oleh kapabilitas organisasi yang memadai.
6. Penguatan eksplorasi untuk menambah sumber daya dan cadangan, mengingat eksplorasi yang dilakukan saat ini akan menentukan kemampuan produksi Perseroan dalam dua hingga tiga tahun mendatang. Kegiatan eksplorasi pada tahun 2026 dipandang sebagai investasi strategis untuk menjaga umur operasi dan keberlanjutan jangka panjang.

markets and the remainder to the Americas. This composition reflects Asia's position as the main center for global tin demands, especially for the needs of the electronics, semiconductor, solder and technology industries.

Through PT Timah, MIND ID has also directed its marketing strategies to segments with long-term demand prospects and better price premium potential, particularly the technology industry, tin solder manufacturers, data centers, semiconductors and electronic devices. This segment has become important since more than half of global tin metal consumption continues to be used for tin solder, a material that plays a crucial role in connecting electronic components. The Company's marketing strategies are therefore not only directed at maintaining sales volume, but also at obtaining more optimal sales value through the selection of appropriate markets and customers.

### Future Development Plans

Future strategic initiatives will focus on strengthening the Company's operational, commercial, and organizational foundations. The Board of Directors has established six strategic focuses aimed at ensuring sustainable growth, including:

1. Strengthening governance and transforming business processes as a foundation for increasing productivity, so that every operational activity can run according to regulatory corridors while supporting more effective performance achievement.
2. Alignment of the operational supply chain from upstream to downstream by establishing more measurable service level agreements at each point in the supply chain, from the mining site to the Tin Ore Warehouse, smelter facilities, to the port, in order to increase the certainty of supply and consistency of tin metal sales.
3. More selective expansion of export markets, particularly to Southeast Asia (Philippines, Thailand), which has been pioneered since 2025, as well as India, which is considered to have high potential for growth in tin metal consumption in line with the development of its technology industry.
4. Accelerate the digitalization of business and operational processes by improving the command center and operational performance dashboard so that performance monitoring can be carried out more quickly, accurately, and in an integrated manner.
5. Strengthening human resource management through increasing employee productivity and effectiveness to ensure that business and operational process transformation is supported by adequate organizational capabilities.
6. Strengthening exploration to increase resources and reserves, considering that current exploration will determine production capacity of the Company in the next two to three years. Exploration activities in 2026 are seen as a strategic investment to maintain operational longevity and long-term sustainability.

## Nikel dan Feronikel

### Nickel and Ferronickel

#### Kegiatan Usaha serta Produk dan Jasa Segmen Nikel dan Feronikel

Segmen nikel dan feronikel merupakan proses bisnis dan rantai nilai yang dikembangkan oleh entitas anak, PT Aneka Tambang (Persero) Tbk ("ANTAM") dan seluruh entitas yang berada di bawah ANTAM. Komoditas yang dihasilkan dalam segmen ini mencakup nikel dan feronikel dengan kualitas tertentu.

#### Strategi Pengembangan Segmen Nikel dan Feronikel serta Kinerja Operasional, Produksi, dan Pemasaran serta Penjualan Segmen Nikel dan Feronikel Tahun 2025

Pengembangan komoditas nikel dan feronikel dilakukan MIND ID melalui ANTAM dengan beberapa pelaksanaan proyek sebagai berikut:

1. Proyek Pengembangan Ekosistem EV Battery ANTAM-CBL (Grup CATL) — Pada Kuartal 4 tahun 2025, proyek telah memasuki fase konstruksi EPC di Halmahera Timur, menandai milestone penting dalam pengembangan ekosistem baterai kendaraan listrik di Indonesia dari hulu ke hilir. Proyek ini mencakup penyelesaian pekerjaan awal, proses perizinan, serta persiapan pendanaan untuk mendukung penyelesaian konstruksi sesuai target.
2. Proyek Pengembangan Ekosistem EV Battery ANTAM-HYD (Zhejiang Huayou Cobalt) — ANTAM bersama PT Industri Baterai Indonesia (IBC) dan mitra HYD menandatangani Framework Agreement pada 30 Januari 2026 sebagai kerangka awal percepatan program hilirisasi nikel dan investasi ekosistem baterai terintegrasi, mencakup pengelolaan sumber daya nikel, pengolahan dan pemurnian, hingga produksi baterai.
3. Penguatan Posisi Pasar Bijih Nikel Domestik — Seluruh penjualan bijih nikel tahun 2025 diserap oleh pasar domestik, seiring meningkatnya kapasitas pengolahan bijih nikel di dalam negeri. Komoditas feronikel sepenuhnya diserap oleh pasar ekspor, dengan profil pelanggan sebagian besar merupakan industri baja tahan karat di Asia Timur (Tiongkok, Hongkong) dan India di Asia Selatan.

#### Business Activities as well as Products and Services of the Nickel and Ferronickel Segment

The nickel and ferronickel segment represents business processes and value chains as developed by its subsidiary, PT Aneka Tambang Tbk ("ANTAM"), and all entities under ANTAM. Commodities produced in this segment include nickel and ferronickel of varying qualities.

#### Development Strategy of the Nickel and Ferronickel Segment as well as Operational, Production, Marketing, and Sales Performance of the Nickel and Ferronickel Segment in 2025

The development of nickel and ferronickel commodities is conducted by MIND ID through ANTAM with several project implementations as follows:

1. Development Project of EV Battery Ecosystem of ANTAM-CBL (CATL Group) — In Q4 2025, the project entered the EPC construction phase in East Halmahera, marking a significant milestone in the development of Indonesia's electric vehicle battery ecosystem from upstream to downstream. The project includes completion of preliminary work, the permitting process, and funding preparation to support the on-target construction completion.
2. Development Project of EV Battery Ecosystem of ANTAM-HYD (Zhejiang Huayou Cobalt) — ANTAM together with PT Industri Baterai Indonesia (IBC) and partner HYD signed a Framework Agreement on January 30, 2026 as an initial framework for accelerating the nickel downstreaming program and investing in an integrated battery ecosystem, covering nickel resource management, processing and refining, and battery production.
3. Strengthening Domestic Nickel Ore Market Position — All nickel ore sales in 2025 will be absorbed by the domestic market, as domestic nickel ore processing capacity increases. Ferronickel will be fully absorbed by the export market, with customers primarily representing the stainless steel industry in East Asia (China, Hong Kong) and India in South Asia.

Produksi bijih nikel pada tahun 2025 mencapai 16.114,10 kilo wmt, meningkat 62,19% atau setara dengan 6.178,70 kilo wmt dari tahun sebelumnya sebesar 9.935,40 kilo wmt. Di tahun 2025 ANTAM berhasil melakukan penjualan bijih nikel sebanyak 14.583,79 kilo wmt, meningkat 74,57% atau setara dengan 6.229,56 kilo wmt dari tahun sebelumnya sebesar 8.354,23 kilo wmt. Kenaikan ini terutama disebabkan oleh meningkatnya demand bijih nikel domestik, seiring dengan meningkatnya kapasitas pengolahan bijih nikel di dalam negeri.

Nickel ore production in 2025 amounted to 16,114.10 kilo wet metric tons (kilo WMT), marking a substantial increase of 62.19%, equivalent to 6,178.70 kilo WMT, relative to the prior year figure of 9,935.40 kilo WMT. In parallel, nickel ore sales volume for 2025 reached 14,583.79 kilo WMT, growing by 74.57% or 6,229.56 kilo WMT compared to the preceding year's 8,354.23 kilo WMT. This significant growth is driven primarily by heightened domestic demand for nickel ore, in line with the expanded processing capacity of nickel beneficiation facilities within the country.

Untuk feronikel, volume produksi feronikel pada tahun 2025 sebanyak 16.064 tNi, menurun 20,09% atau setara dengan 4.039 tNi dari tahun sebelumnya sebesar 20.103 tNi. Sedangkan untuk volume penjualan feronikel pada tahun 2025 sebesar 10.040 tNi, menurun 48,39% atau setara dengan 9.412 tNi dari tahun sebelumnya sebesar 19.452 tNi. Penurunan ini terutama disebabkan oleh penerapan harga patokan mineral (HPM) feronikel, Dimana HPM feronikel diatas harga pasar untuk feronikel, sehingga penjualan feronikel hanya dapat dilakukan dengan buyer yang memiliki *Long term contract* sebelum aturan HPM diberlakukan.

Ferronickel production volume in 2025 stood at 16,064 tNi, declining by 20.09% or 4,039 tNi compared to the prior year's 20,103 tNi. Ferronickel sales volume for the same period amounted to 10,040 tNi, representing a marked decrease of 48.39% or 9,412 tNi compared to 19,452 tNi in the previous year. The significant reduction in ferronickel sales is principally attributable to the implementation of the Mineral Benchmark Price (HPM) for ferronickel, which has been set above prevailing market prices. As a consequence, ferronickel sales transactions were exclusively executed with buyers holding long-term contracts established prior to the enforcement of the HPM regulation.

Komoditas feronikel sepenuhnya diserap oleh pasar ekspor dengan profil pelanggan sebagian besar merupakan industri baja tahan karat yang tersebar di Asia Timur seperti Tiongkok dan Hongkong, serta dan India di Asia Selatan.

Ferronickel commodities were fully absorbed by export markets, with customer profiles mostly being the stainless steel industry spread across East Asia such as China and Hong Kong, as well as India in South Asia.

Pergerakan harga nikel global sepanjang tahun 2025 masih diwarnai oleh ketidakpastian ekonomi dan dinamika geopolitik yang memengaruhi volatilitas pasar komoditas. Dalam menghadapi kondisi tersebut, Perusahaan, melalui ANTAM sebagai entitas anak, secara konsisten menjalankan strategi mitigasi risiko sekaligus memperluas peluang pasar melalui diversifikasi basis pelanggan serta penguatan penetrasi pasar, baik domestik maupun ekspor. Upaya ini memungkinkan Perseroan untuk tetap menjaga stabilitas kinerja operasional dan komersial Segmen Nikel.

Global nickel price movements throughout 2025 continued to be characterized by economic uncertainty and geopolitical dynamics that influenced commodity market volatility. To address these conditions, the Company through its subsidiary ANTAM consistently implemented risk mitigation strategies, while expanding market opportunities through customer base diversification and strengthening market penetration both domestically and for export. These efforts enabled the Company to maintain stable operational and commercial performance in the Nickel Segment.

Pada tahun 2025, segmen Nikel dan Feronikel menjadi kontributor ketiga dari total pendapatan Perusahaan tahun 2025. Segmen Nikel dan Feronikel memberikan kontribusi positif sebesar Rp15,07 triliun atau setara 9,45% dari total pendapatan Perusahaan tahun 2025. Profitabilitas segmen Nikel dan Feronikel pada tahun 2025 juga menunjukkan peningkatan signifikan. Seluruh penjualan komoditas feronikel diarahkan ke pasar ekspor dengan negara tujuan utama meliputi Tiongkok, India, dan Korea Selatan sebagai pusat industri baja nirkarat global, sedangkan penjualan bijih nikel sepenuhnya diserap oleh pasar domestik, baik untuk memenuhi kebutuhan internal maupun permintaan pihak ketiga dalam negeri.

Laba usaha segmen Nikel dan Feronikel tahun 2025 tercatat sebesar Rp4,51 triliun, meningkat signifikan 444,06% dibandingkan tahun 2024 sebesar Rp828,65 miliar. Peningkatan profitabilitas pada tahun 2025, mencerminkan kemampuan Perusahaan dalam menjaga keseimbangan antara pertumbuhan volume penjualan, efisiensi biaya, serta ketahanan operasional di tengah volatilitas harga dan dinamika regulasi industri.

### Rencana Pengembangan ke Depan

Inisiatif-inisiatif strategis ke depan pada segmen nikel dan feronikel berfokus pada akselerasi hilirisasi nikel dan penguatan ekosistem baterai kendaraan listrik nasional, antara lain:

1. Kelanjutan konstruksi dan akselerasi proyek EV Battery bersama CBL (Grup CATL) di Halmahera Timur. Rangkaian inisiatif ANTAM pada segmen nikel ini menegaskan konsistensi ANTAM dalam mengarahkan investasi secara selektif dan terukur untuk memperkuat integrasi rantai nilai nikel dari hulu hingga hilir. Upaya ini tidak hanya memperluas kapasitas hilirisasi, tetapi juga memperkuat fondasi ekosistem industri berbasis baterai yang berdaya saing global.
2. Implementasi Framework Agreement EV Battery bersama HYD (Zhejiang Huayou Cobalt) yang mencakup pengembangan terintegrasi dari pengelolaan sumber daya nikel, pengolahan dan pemurnian, hingga produksi baterai. Inisiatif ini mencerminkan kesiapan ANTAM dalam mengakselerasi pengembangan rantai nilai nikel secara terintegrasi, tidak hanya sebagai pemasok bahan baku, tetapi juga sebagai bagian dari ekosistem industri baterai kendaraan listrik yang bernilai tambah tinggi.
3. Penguatan peran ANTAM sebagai pemasok mineral strategis dalam ekosistem EV Battery nasional, didukung oleh kualitas cadangan dan sumberdaya bijih nikel ANTAM yang solid, sejalan dengan kebijakan hilirisasi mineral nasional dan meningkatnya kebutuhan nikel dalam rantai pasok industri baterai kendaraan listrik global.
4. Untuk feronikel, strategi diarahkan pada peningkatan efisiensi operasional, pengendalian biaya produksi, serta optimalisasi kontrak penjualan jangka panjang guna menjaga stabilitas volume penjualan dan visibilitas pendapatan di tengah dinamika regulasi HPM dan fluktuasi harga nikel internasional.

In 2025, the Nickel and Ferronickel segment became the third largest contributor to the Company's total revenues in 2025. The Nickel and Ferronickel segment contributed Rp15.07 trillion, or 9.45% of the Company's total revenues in 2025. The profitability of the Nickel and Ferronickel segment in 2025 also showed a significant increase. All ferronickel commodity sales were directed to export markets, with main destination countries including China, India and South Korea as centers of the global stainless steel industry, while nickel ore sales were fully absorbed by the domestic market to meet internal needs and domestic third party demands.

Operating profits of the Nickel and Ferronickel segment in 2025 were recorded at Rp4.51 trillion, a significant increase of 444.06% compared to Rp828.65 billion in 2024. The increased profitability in 2025 reflected the Company's ability to maintain a balance between sales volume growth, cost efficiency, and operational resilience amidst price volatility and industrial regulatory dynamics.

### Future Development Plans

Future strategic initiatives in the nickel and ferronickel segment will focus on accelerating nickel downstreaming and strengthening the national electric vehicle battery ecosystem, including:

1. The continued construction and acceleration of the EV Battery project with CBL (CATL Group) in East Halmahera. This series of ANTAM initiatives in the nickel segment affirms ANTAM's consistency in directing selective and measured investments to strengthen the integration of the nickel value chain from upstream to downstream. This effort not only expands downstream capacity but also strengthens the foundation of a globally competitive battery-based industrial ecosystem.
2. The implementation of Framework Agreement between the EV Battery with HYD (Zhejiang Huayou Cobalt) encompasses the integrated development of nickel resource management, processing and refining, and battery production. This initiative reflects ANTAM's readiness to accelerate the development of an integrated nickel value chain, not only as a raw material supplier but also as part of the high-value-added electric vehicle battery industry ecosystem.
3. Strengthening ANTAM's role as a strategic mineral supplier in the national EV Battery ecosystem, supported by the solid quality of ANTAM's nickel ore reserves and resources, is in line with the national mineral downstreaming policy and the increasing demand for nickel in the global electric vehicle battery supply chain.
4. For ferronickel, the strategy is directed at increasing operational efficiency, controlling production costs, and optimizing long-term sales contracts to maintain sales volume stability and revenue visibility amidst the dynamics of HPM regulations and fluctuations in international nickel prices.

Secara umum, pangsa pasar MIND ID pada 2025 menunjukkan bahwa Grup tetap memiliki fondasi posisi pasar yang kuat, terutama di pasar domestik. Hal ini terlihat dari pangsa yang tinggi pada emas (46,9%), aluminium (36,8%), dan timah (27,3%), yang menegaskan bahwa MIND ID masih menjadi pemain penting di dalam negeri. Di pasar global, walaupun pangasanya relatif lebih kecil, MIND ID tetap menunjukkan keberadaan yang relevan, terutama pada nikel (5,2%) dan timah (4,5%). Secara keseluruhan, data ini menunjukkan bahwa MIND ID sudah memiliki basis pasar yang kuat untuk menjadi modal utama dalam mendorong pertumbuhan lebih lanjut, baik melalui penguatan penetrasi domestik maupun ekspansi yang lebih terarah di pasar global.

Overall, MIND ID's market share projections for 2025 demonstrated that the Group continues to maintain a strong market position, particularly in the domestic market. This is evident from its high market shares in gold (46.9%), aluminum (36.8%) and tin (27.3%), confirming its continued presence as a key player domestically. Despite its relatively smaller shares in the global market, MIND ID maintains a significant presence, particularly in nickel (5.2%) and tin (4.5%). Overall, this data demonstrated that MIND ID already has a strong market base to serve as a key asset in driving further growth, both through strengthening domestic penetration and more targeted expansion in the global market.

Dibandingkan 2024, perkembangan 2025 juga memberi sinyal positif, terutama dari nikel yang mencatat kenaikan sangat kuat baik di pasar global (0,6% menjadi 5,2%) maupun domestik (5,0% menjadi 8,1%), serta batu bara yang tumbuh di pasar global (0,5% menjadi 1,9%). Sementara itu, pada komoditas seperti aluminium, timah, dan batu bara domestik, penurunan pangsa pasar dapat dilihat sebagai ruang perbaikan dan peluang untuk memperkuat strategi komersial ke depan, bukan semata-mata pelemahan.

Dengan basis pasar yang sudah besar, ruang optimisasi pada distribusi, penetrasi pelanggan, sinergi Grup, dan penguatan eksekusi pasar masih terbuka lebar. Posisi 2025 tetap memberi pesan yang konstruktif dimana MIND ID masih memiliki peluang untuk tumbuh lebih kuat pada tahun-tahun berikutnya dengan harapan adanya perbaikan industri yang mendorong pertumbuhan permintaan logal mineral.

Compared to 2024, developments in 2025 also showed positive signs, particularly for nickel, which recorded very strong increases in both the global market (0.6% to 5.2%) and domestic market (5.0% to 8.1%), as well as coal, which grew in the global market (0.5% to 1.9%). Meanwhile, for commodities such as aluminum, tin and domestic coal, declining market shares may be seen as room for improvement and an opportunity to strengthen future commercial strategies, rather than simply a weakening.

With a large market base, the room for optimization in distribution, customer penetration, Group synergies and strengthening of market execution remains wide. The outlook for 2025 remains positive, with MIND ID still having the potential for stronger growth in the coming years with the expectation of industry improvements driving demand for metal minerals.

## Penelitian dan Pengembangan

### Research and Development

Fungsi riset MIND ID berperan sebagai *enabler* teknis bagi agenda hilirisasi Grup, dengan fokus pada tiga hal utama: pengembangan teknologi proses dan produk bernilai tambah tinggi, peningkatan efisiensi operasional fasilitas anggota grup, serta penguatan tata kelola riset lintas entitas. Sepanjang 2025, kegiatan riset diarahkan untuk memberikan *proof of concept* yang terukur, menjadi dasar pengambilan keputusan investasi, dan sekaligus membangun kapabilitas nasional di bidang teknologi pengolahan mineral dan batu bara.

Tema utama pertama pada 2025 adalah hilirisasi komoditas inti Grup MIND ID menjadi produk turunan bernilai tambah tinggi. Rangkaian program riset prioritas difokuskan pada pemanfaatan residu, pengembangan material fungsional, dan penguatan posisi Indonesia di rantai nilai baterai dan material maju.

Program prioritas yang dikategorikan sebagai riset prioritas meliputi:

MIND ID's research function serves as a technical enabler for the Group's downstreaming agenda, focusing on three key areas: developing high-value-added process and product technologies, improving the operational efficiency of group members' facilities, and strengthening cross-entity research governance. Throughout 2025, research activities were directed towards providing measurable proof of concept, providing a basis for investment decision-making and simultaneously building national capabilities in mineral and coal processing technology.

The first key theme for 2025 was the downstreaming of MIND ID Group's core commodities into high-value-added derivative products. A series of priority research programs focused on the utilization of residues, development of functional materials, and strengthening of Indonesia's position in the battery and advanced material value chains.

Priority programs categorized as priority research include:

## Non Current Liabilities per 2021 - 2025

### Liabilitas Jangka Panjang Setelah Dikurangi Bagian yang Jatuh Tempo dalam Satu Tahun - Pinjaman Bank

Pada tahun 2025, Perusahaan mencatatkan pinjaman bank yang telah dikurangi bagian yang jatuh tempo dalam satu tahun sebesar Rp20,97 triliun, meningkat 22,75% atau setara dengan Rp3,89 triliun dibandingkan tahun sebelumnya sebesar Rp17,09 triliun. Kenaikan ini terutama disebabkan oleh penambahan pinjaman sindikasi jangka panjang United Overseas Bank Ltd. oleh Antam sebesar Rp2,94 triliun yang digunakan untuk kebutuhan modal kerja dan pinjaman sindikasi jangka panjang dengan bank Mandiri, BRI dan BNI untuk pembiayaan konstruksi aset tetap tertentu milik PT Bukit Asam dan entitas anaknya sebesar Rp1,29 triliun.

### Liabilitas Jangka Panjang Setelah Dikurangi Bagian yang Jatuh Tempo dalam Satu Tahun - Utang Obligasi

Pada tahun 2025, Perusahaan mencatatkan utang obligasi yang telah dikurangi bagian yang jatuh tempo dalam satu tahun sebesar Rp36,40 triliun, mengalami penurunan 4,99% atau setara dengan Rp1,91 triliun dibandingkan tahun sebelumnya sebesar Rp38,32 triliun. Penurunan ini terutama disebabkan oleh pembelian kembali atas sebagian Obligasi 2028, 2048 dan 2050 yang menggunakan internal kas, namun terkompensasi dengan pelemahan kurs Rupiah.

### Provisi

Pada tahun 2025, Perusahaan mencatatkan provisi jangka pendek dan jangka panjang sebesar Rp4,64 triliun, mengalami penurunan 8,24% atau setara dengan Rp416,79 miliar dibandingkan tahun sebelumnya sebesar Rp5,06 triliun. Penurunan ini terutama disebabkan oleh perkembangan putusan kasus hukum dan penyesuaian harga emas batangan serta penyesuaian jumlah provisi atas biaya lingkungan hidup dan reklamasi untuk mencerminkan luas area terganggu terbaru.

### Ekuitas

Jumlah ekuitas Perusahaan tahun 2025 mencapai Rp172,07 triliun meningkat 7,38% dibandingkan tahun 2024 sebesar Rp160,24 triliun. Pada Laju Pertumbuhan Majemuk Tahunan atau Compound Annual Growth Rate (CAGR) 2021-2025, jumlah ekuitas Perusahaan mengalami pertumbuhan 18,51%

### Long-Term Liabilities After Deducting the Portion Due in One Year - Bank Loans

In 2025, the Company recorded bank loans that were already reduced by portions due within one year amounting to Rp20.97 trillion, an increase of 22.75% or equivalent to Rp3.89 trillion compared to the previous year's Rp17.09 trillion. This increase was mainly due to the addition of long-term syndicated loans from United Overseas Bank Ltd. by ANTAM amounting to Rp2.94 trillion which was used for working capital needs, and long-term syndicated loans with Mandiri, BRI and BNI banks for the financing of construction of certain fixed assets owned by PT Bukit Asam and its subsidiaries amounting to Rp1.29 trillion.

### Long-Term Liabilities After Deducting Portions Due Within One Year - Bond Payables

In 2025, the Company recorded bonds payable, net of current maturities, amounting to Rp36.40 trillion, representing a decrease of 4.99% or equivalent to Rp1.91 trillion compared to Rp38.32 trillion in the previous year. The decrease was primarily attributable to the buyback of a portion of the 2028, 2048, and 2050 Bonds using internal cash reserves, partially offset by the depreciation of the Rupiah exchange rate.

### Provision Fees

In 2025, the Company recorded short-term and long-term provision fees of Rp4.64 trillion, a decrease of 8.24% or equivalent to Rp416.79 billion compared to Rp5.06 trillion in the previous year. This decrease was primarily due to changes in provision fees for legal cases based on developments in legal case decisions and adjustments to gold bullion prices related to ongoing legal disputes, as well as adjustments to total provision fees for environmental and reclamation costs to reflect the latest size of disturbed areas.

### Equity

Kenaikan ekuitas ini terutama disebabkan oleh kenaikan saldo laba belum dicadangkan utamanya karena laba tahun berjalan yang diatribusikan kepada entitas induk dan berkurang karena dividen tahun berjalan, serta kenaikan pada penghasilan komprehensif lain terutama karena selisih penjabaran laporan keuangan diakibatkan oleh kurs Dollar AS mengalami kenaikan sebesar 558 poin dari 31 Desember 2024 Rp16.162 menjadi Rp16.720 pada 31 Desember 2025.

The Company's total equity throughout 2025 amounted to Rp172.07 trillion, an increase of 7.38% or equivalent to Rp11.82 trillion compared to Rp160.24 trillion in 2024. This increase in equity was primarily caused by an increase in retained earnings not yet appropriated, mainly due to current year profits being attributed to the parent entity and reduced by current year dividends, as well as an increase in other comprehensive income mainly due to the difference in financial statement translation resulting from the US Dollar exchange rate increasing by 558 points from Rp16,162 on December 31, 2024 to Rp16,720 on December 31, 2025.

The exposure of the MIND ID Group to exchange rate fluctuations primarily comes from cash and cash equivalents, time deposits, Accounts Receivable, other receivables, financial assets at fair value through other comprehensive income, trade payables, accruals, bank loans, lease liabilities, bond payables and other payables. The connection of commodity price fluctuations in accordance with prices traded in international markets with currency exchange rate fluctuations is considered a natural hedge to mitigate the foreign currency risk of the MIND ID Group.

If the Rupiah exchange rate weakens or strengthens by 5% compared to the US Dollar exchange rate or vice versa, on December 31, 2025 (with all other variables deemed constant), the Group's consolidated profits before income tax for the year ended December 31, 2025 will decrease or increase by Rp2,735,804 (2024: Rp3,314,322), mainly resulting from losses or gains on the translation of net liabilities denominated in foreign currencies on the reporting date.

Law Number 2 of 2025 concerning the Fourth Amendment to Law Number 4 of 2009 concerning Mineral and Coal Mining ("UU 2/2025")

Penjelasan atas Peraturan dan/atau Perundang-undangan yang Diberlakukan  
Penjelasan atas Peraturan dan/atau Perundang-undangan yang Diberlakukan

: Pada tanggal 19 Maret 2025, Pemerintah telah menetapkan UU 2/2025 yang mengatur diantaranya terkait:

- Prioritas pemberian izin usaha pertambangan (IUP) kepada koperasi, Usaha mikro, kecil dan menengah (UMKM), organisasi masyarakat keagamaan, serta badan Usaha milik negara (BUMN) dalam rangka hilirisasi dan meningkatkan kemandirian dan keunggulan perguruan tinggi.
- Prioritas pemberian izin usaha pertambangan khusus (IUPK) kepada BUMN, badan usaha milik daerah (BUMD), koperasi, UMKM, organisasi masyarakat keagamaan, BUMN, BUMD atau badan usaha swasta dalam rangka meningkatkan kemandirian dan keunggulan perguruan tinggi.
- Pemegang IUP/IUPK tahap kegiatan Operasi Produksi wajib memenuhi kebutuhan dalam negeri sebelum ekspor dan mengutamakan kebutuhan BUMN (disektor kelistrikan, energi dan pupuk bagi kebutuhan Masyarakat luas dan industri strategis nasional). Pelanggaran terhadap ketentuan tersebut, dapat dikenakan sanksi administratif.

On March 19, 2025, the Government has established Law 2/2025 which regulates, among other things:

- Priority for granting mining business permits (IUP) to cooperatives, micro, small and medium enterprises (MSMEs), religious community organizations, and state-owned enterprises (SOEs) in the context of downstreaming and increasing the independence and excellence of higher education institutions.
- Priority for granting special mining business permits (IUPK) to SOEs, regionally-owned enterprises (BUMD), cooperatives, MSMEs, religious community organizations, SOEs, BUMD or private business entities in order to increase the independence and excellence of higher education institutions.
- IUP/IUPK holders in the Production Operations phase are required to meet domestic needs before exports and prioritize the needs of SOEs (in the electricity, energy, and fertilizer sectors for the needs of the wider community and national strategic industries). Violations of these provisions may result in administrative sanctions.

Dampak (kualitatif/kuantitatif) Terhadap Perusahaan  
Impact (qualitative/quantitative) on the Company

: BUMN dan BUMD tidak lagi menjadi pihak yang mendapatkan prioritas untuk mengusahakan WIUPK. WIUP dan WIUPK juga dapat diprioritaskan untuk beberapa pihak (koperasi, UMKM, organisasi masyarakat keagamaan). Akibatnya BUMN dalam mengelola WIUPK secara prioritas berkompetisi dengan pihak lain sesuai dengan tujuan dan latar belakangnya.

SOEs and BUMD are no longer prioritized for managing WIUPK (Special Mining Business License) areas. WIUP and WIUPK can also be prioritized for certain parties (cooperatives, MSMEs, and religious organizations). Consequently, SOEs compete with other parties in managing WIUPKs based on their respective objectives and backgrounds.

**Peraturan Pemerintah Nomor 39 Tahun 2025 Tentang Perubahan Kedua Atas Peraturan Pemerintah Nomor 96 Tahun 2021 Tentang Pelaksanaan Kegiatan Usaha Pertambangan Mineral dan Batu Bara ("PP 39/2025")****Government Regulation Number 39 of 2025 concerning the Second Amendment to Government Regulation Number 96 of 2021 concerning the Implementation of Mineral and Coal Mining Business Activities ("PP 39/2025")**

Dampak (kualitatif/kuantitatif) Terhadap Perusahaan  
Impact (qualitative/quantitative) on the Company

- :
- a. BUMN dan BUMD tidak lagi menjadi pihak yang mendapatkan prioritas untuk mengusahakan WIUPK. WIUP dan WIUPK juga dapat diprioritaskan untuk beberapa pihak (koperasi, UMKM, organisasi masyarakat keagamaan). Akibatnya BUMN dalam mengelola WIUPK secara prioritas berkompetisi dengan pihak lain sesuai dengan tujuan dan latar belakangnya.
  - b. WIUP MIND ID Group yang tumpang tindih dengan sektor lain, berdasarkan PP 39/2025 berpotensi diciutkan sehingga berpotensi mengurangi luas wilayah.
  - c. Peluang strategi pengembangan komoditas logam tanah jarang, yang mendukung strategi MIND ID.
- 
- a. SOEs and BUMD are no longer prioritized for managing WIUPK areas. WIUP and WIUPK can also be prioritized for certain parties (cooperatives, MSMEs, and religious organizations). Consequently, BUMN compete with other parties in managing WIUPK based on their respective objectives and backgrounds.
  - b. WIUP of MIND ID Group that overlap with other sectors, based on PP 39/2025, have the potential to be reduced, thus potentially reducing the area.
  - c. Strategic opportunities for the development of rare earth metal commodities, supporting MIND ID's strategy.

Regulation of the Minister of Energy and Mineral Resources Number 18 of 2025 concerning Regulations Implementation of Government Regulation Number 39 of 2025 concerning the Second Amendment to Government Regulation Number 96 of 2021 concerning the Implementation of Business Activities of Mineral and Coal Mining ("ESDM Regulation 18/2025")

On November 18, 2025, the Government has stipulated ESDM Ministerial Regulation 18/2025 which regulates, among other things:

- a. detailed technical and administrative requirements for priority and WIUP auctions.

  - 1). Make a cooperation agreement with a university with a willingness to provide at least 60% of the net profit.
  - 2). Higher education institutions are located in 1 (one) province with a WIUP/WIUPK location or higher education institutions outside the WIUP/WIUPK location province if cooperation with higher education institutions within 1 province has been fulfilled.
- c. The Minister of Energy and Mineral Resources may grant approval for the extension of the Mineral and Coal IUP/IUPK in the event that the permit has expired, but still requires time, including for the completion of other permits and/or the construction of supporting facilities and infrastructure for mining activities.
- d. Determination of WIUP and management of Radioactive Minerals (thorium and uranium) and rare earth metal commodity minerals (LTJ) by BUMN. The BUMN's determination must include at least: 1) a map of the WIUP to be developed and utilized; 2) an order for payment of compensation for data and information; 3) an order for the placement of a guarantee for the seriousness of the implementation of exploration activities in the form of a time deposit.
- e. The government can combine IUPs in the following cases:
  - 1). The IUP or IUPK area is in one location, expanse and overlapping
  - 2). have the same commodity
  - 3). have the same activity stages

Impact (qualitative/quantitative) on the Company

: Perjanjian kerjasama antara BUMN dan BUMD untuk prioritas WIUPK dalam rangka peningkatan kemandirian perguruan tinggi dengan pemberian paling sedikit 60% dari keuntungan bersih, dinilai berpotensi tidak menarik bagi BUMN dan BUMD, mengingat BUMN dan BUMD bertujuan mencari profit.

# Prospek Usaha Tahun 2026

## Business Prospects for 2026

Lembaga ekonomi terkemuka yaitu Organization for Economic Cooperation and Development (OECD) memproyeksikan terjadinya perlambatan pertumbuhan PDB global, dari yang sebelumnya sebesar 3,2% pada 2025 menjadi 2,9% pada 2026. Hal yang senada juga diproyeksikan oleh Lembaga Ekonomi lainnya seperti World Bank dan International Monetary Fund (IMF) dengan kisaran angka yang tidak jauh berbeda, 2,6% dan 3,1%. Perlambatan pertumbuhan ekonomi dunia disebabkan oleh ketegangan geopolitik, termasuk diantaranya perang dagang dan kenaikan tarif, perang di Timur Tengah antara Amerika Serikat-Israel dengan Iran, perang Rusia dan Ukraina, serta potensi perang China dan Taiwan, ataupun ketidakpastian kebijakan yang berkelanjutan mengakibatkan terhambatnya investasi dan perdagangan.

Faktor geopolitik menciptakan ketidakpastian yang kemudian akan mengganggu stabilitas harga energi, menekan ekspor, memicu capital outflow, dan memperlemah nilai tukar rupiah. Adapun asumsi nilai tukar yang digunakan selaras dengan RAPBN tahun 2026 di mana kurs Rp16.500 per USD. Selain itu, suku bunga beberapa negara maju juga berada di level yang cukup tinggi sehingga dapat menekan rupiah yang kemudian akan menahan laju konsumsi dan investasi di dalam negeri. Adapun asumsi tingkat suku bunga yang digunakan selaras dengan RAPBN tahun 2026 dengan suku bunga SUN 10 tahun di level 6,9%.

Sesuai dengan RKAP MIND ID tahun 2026, mayoritas harga komoditas diproyeksikan mengalami penurunan harga, terutama komoditas aluminium, bauksit, nikel, batu bara, emas, dan timah. Meskipun tren harga komoditas pada setengah tahun terakhir 2025 hingga memasuki tahun 2026 menunjukkan performa yang positif, proyeksi analisis terhadap harga komoditas secara keseluruhan tetap menurun. Hal ini dikarenakan kondisi ketidakpastian ekonomi yang khususnya berkaitan dengan kondisi geopolitik ke depan akan menekan permintaan global yang pada akhirnya akan menekan harga komoditas.

Namun, dengan berbagai tantangan yang ada di tahun 2026, produksi komoditas MIND ID secara konsolidasian diproyeksikan secara mayoritas mengalami kenaikan. Di sisi pemasaran, seluruh volume penjualan komoditas MIND ID diproyeksikan akan meningkat seiring dengan peningkatan kinerja operasi dan potensi permintaan pasar yang cukup tinggi khususnya untuk pasar domestik. Dari kinerja volume penjualan yang dipengaruhi oleh harga jual komoditas, pendapatan usaha diharapkan akan meningkat dengan proporsi dominasi komoditas batu bara dan emas serta pergeseran pendapatan dari komoditas lainnya mengingat berjalannya proyek pengembangan hilirisasi.

The leading economic institution, the Organization for Economic Cooperation and Development (OECD), projects a slowdown in global GDP growth, from the previous 3.2% in 2025 to 2.9% in 2026. Similar projections are also made by other economic institutions such as the World Bank and the International Monetary Fund (IMF) with similar figures, ranging from 2.6% and 3.1%. The slowdown in global economic growth is caused by geopolitical tensions, including trade wars and tariff increases, the war in the Middle East between the United States, Israel and Iran, the war between Russia and Ukraine, and the potential war between China and Taiwan, as well as ongoing policy uncertainty resulting in hampered investment and trade.

Geopolitical factors create uncertainty that will disrupt energy price stability, suppress exports, trigger capital outflows, and weaken the rupiah. The exchange rate assumptions used align with the 2026 Draft State Budget, which holds a rate of IDR 16,500 per USD. Furthermore, interest rates in several developed countries are also at relatively high levels, putting pressure on the rupiah, which in turn will restrain domestic consumption and investment. The interest rate assumptions used align with the 2026 Draft State Budget, with the 10-year government bond (SUN) rate at 6.9%.

According to MIND ID Work Plan and Budget (RKAP) in 2026, the majority of commodity prices are projected to decline, particularly for aluminum, bauxite, nickel, coal, gold, and tin. Although commodity price trends in the last half of 2025 and into 2026 showed positive performance, analysts' projections for overall commodity prices remain downward. This is because economic uncertainty, particularly related to future geopolitical conditions, will suppress global demand, ultimately depressing commodity prices.

However, despite the various challenges facing 2026, MIND ID's consolidated commodity production is projected to increase by a large margin. Marketing-wise, overall MIND ID commodity sales volume is projected to increase in line with improved operational performance and potentially high market demand, particularly in the domestic market. Based on sales volume performance, which is influenced by commodity selling prices, operating revenue is expected to increase, with a dominant proportion of coal and gold commodities, as well as a shift in revenue from other commodities due to ongoing downstream development projects.

Seiring dengan pergantian manajemen dan penyesuaian strategi perusahaan, MIND ID pada tahun 2026 berkomitmen untuk menjalankan transformasi menyeluruh yang difokuskan pada peningkatan kinerja operasional, efisiensi perusahaan, digitalisasi proses bisnis, serta transformasi model usaha. Langkah tersebut dilakukan untuk memperkuat daya saing perusahaan sekaligus mengoptimalkan peluang pertumbuhan dengan tetap menerapkan prinsip kehati-hatian dan pengelolaan risiko yang baik.

Dalam mendukung arah strategis tersebut, MIND ID juga berencana melakukan penataan dan perampingan portofolio anak dan cucu perusahaan agar lebih selaras dengan aspirasi Danantara. Selain itu, Perseroan akan mendorong ekspansi usaha melalui pengembangan proyek-proyek baru dan diversifikasi produk maupun jasa. MIND ID turut memperkuat implementasi program ESG (*Environmental, Social, and Governance*) sebagai bagian dari komitmen terhadap praktik bisnis berkelanjutan yang sejalan dengan perkembangan dan tuntutan industri global.

In line with management changes and corporate strategy adjustments, MIND ID is committed to implementing a comprehensive transformation in 2026, focused on improving operational performance, corporate efficiency, digitizing business processes, and transforming its business model. This initiative aims to strengthen the company's competitiveness and optimize growth opportunities while adhering to prudent principles and sound risk management.

To support this strategic direction, MIND ID also plans to restructure and streamline the portfolio of its subsidiaries and subsidiaries to better align with Danantara's aspirations. Furthermore, the Company will encourage business expansion through the development of new projects and the diversification of products and services. MIND ID is also strengthening the implementation of its ESG (*Environmental, Social, and Governance*) program as part of its commitment to sustainable business practices that align with global industry developments and demands.

Volume produksi untuk sebagian besar komoditas diproyeksikan meningkat dari tahun sebelumnya yang sejalan dengan upaya peningkatan target RKAB maupun optimalisasi operasi produksi di seluruh Anggota Holding MIND ID.

Production volumes across the majority of commodities are projected to increase from prior year levels, consistent with the Company's strategy to enhance RKAB targets and optimize operational performance across all MIND ID Holding Member companies.

Volume penjualan untuk sebagian besar komoditas juga diproyeksikan meningkat dari tahun sebelumnya, selaras dengan target produksi 2026 di komoditas-komoditas kunci MIND ID Group.

Dari sisi pendapatan, Perusahaan diperkirakan akan membukukan pendapatan sebesar Rp 193,447 Miliar atau meningkat 5% dari tahun 2025. Peningkatan ini didukung oleh optimasi volume penjualan untuk mayoritas komoditas, terutama emas, Batu Bara dan timah. Namun demikian, mayoritas harga komoditas diproyeksikan menurun selain emas dan aluminium mengingat adanya kondisi ketidakpastian ekonomi khususnya berkaitan dengan kondisi geopolitik ke depan turut menekan harga komoditas.

Peningkatan laba bersih diperkirakan meningkat 10% dari tahun 2025 yang ditopang dari optimasi kinerja Anggota Holding MIND ID ditengah adanya dampak dari insiden force majeure yang memengaruhi operasional PTFI sejak September 2025 dan diperkirakan baru dapat beroperasi secara normal mulai tahun 2027.

Adapun peningkatan interest bearing debt Grup MIND ID mencapai 18% dari tahun 2025, disebabkan adanya kebutuhan pendanaan untuk kegiatan investasi yang ditargetkan sekitar Rp17,5 Triliun terutama terkait dengan proyek strategis hilirisasi (EV Ecosystem, SGA Refinery, Smelter dan sebagainya) serta pengembangan kapasitas logistik.

Secara keseluruhan, tahun 2026 menjadi periode dengan tantangan yang tinggi bagi Perusahaan. Namun demikian, Perusahaan mengupayakan optimasi operasional melalui peningkatan produksi dan penjualan di 2026 dan efisiensi bisnis secara berkelanjutan di tengah tantangan tekanan harga di sebagian komoditas Grup MIND ID.

Sales volumes for the majority of commodities are likewise projected to increase from prior year levels, aligned with the 2026 production targets across MIND ID Group's key commodity segments.

From a revenue perspective, the Company is projected to record revenue of Rp193,447 billion, representing an increase of 5% compared to 2025. This growth is supported by the optimization of sales volumes across most commodities, particularly gold, coal, and tin. Nevertheless, the majority of commodity prices are projected to decline, except for gold and aluminum, amid ongoing economic uncertainty, particularly related to future geopolitical conditions, which continue to exert pressure on commodity prices.

Net profit is projected to increase by 10% compared to 2025, supported by the optimization of performance across MIND ID Holding Members despite the impact of the force majeure incident that has affected PTFI's operations since September 2025 and is expected to normalize only starting in 2027.

Meanwhile, MIND ID Group's interest-bearing debt is projected to increase by 18% compared to 2025, driven by funding requirements for investment activities targeted at approximately Rp17.5 trillion, particularly related to strategic downstream projects (EV Ecosystem, SGA Refinery, Smelter, and others) as well as logistics capacity development.

Overall, 2026 will be a highly challenging period for the Company. Nevertheless, the Company continues to pursue operational optimization through increased production and sales in 2026, as well as sustainable business efficiency initiatives amid pricing pressures across several MIND ID Group commodities.

# Peta Jalan Usaha: Rencana Jangka Panjang

## Business Roadmap: Long-Term Plan

Mandat utama MIND ID untuk menjadi perusahaan global diterjemahkan dalam bentuk sasaran strategis, yaitu menjadi salah satu perusahaan yang masuk ke dalam pemeringkatan Fortune Global 500 (FG500). Sasaran tersebut direncanakan untuk diraih dalam periode 10 tahun ke depan.

MIND ID's primary mandate to become a global company is translated into a strategic goal, namely to become a Fortune Global 500 (FG500) company. This goal is planned to be achieved within the next 10 years.

Parameter yang ditinjau dalam pemeringkatan Fg500 adalah pendapatan. Dengan mengasumsikan rata-rata pertumbuhan industri sebesar 2,8% sesuai data historis, maka pendapatan yang perlu diraih MIND ID pada tahun 2034 untuk dapat masuk pada pemeringkatan tersebut setidaknya sebesar USD 35,95 miliar atau setara dengan Rp546,4 triliun. Target pendapatan tersebut akan dicapai secara bertahap dengan menjaga Compound Annual Growth Rate (CAGR) pendapatan periode 2025–2029 pada level 15,05%. Dengan demikian, MIND ID menargetkan pendapatan pada tahun 2029 sebesar USD17,47 miliar atau setara dengan Rp265,6 triliun.

Guna memenuhi tujuan dan sasaran strategis MIND ID tahun 2025 yang merupakan turunan dari mandat Pemerintah Republik Indonesia melalui Kementerian BUMN serta Rencana-rencana strategis nasional yang dituangkan dalam rancangan teknokratik RPJMN 2025– 2029, dan *Masterplan* BUMN Klaster Minerba 2025–2029, MIND ID merumuskan lima tema strategis yang membentuk RJP MIND ID 2025–2029. Setiap tema strategis dijabarkan ke dalam inisiatif-inisiatif strategis yang jelas dan terukur, dengan uraian sebagai berikut:

The parameters reviewed in the Fg500 ranking is revenues. Assuming an average industry growth rate of 2.8% pursuant to historical data, MIND ID needs to achieve at least USD 35.95 billion or Rp546.4 trillion in revenues by 2034 to be included in the ranking. This revenue target will be achieved gradually by maintaining a Compound Annual Growth Rate (CAGR) of 15.05% for the period of 2025–2029. Therefore, MIND ID is targeting revenues of USD 17.47 billion, or equivalent to Rp265.6 trillion, in 2029.

In order to fulfill the strategic goals and objectives of MIND ID in 2025 which are derived from the mandate of the Government of the Republic of Indonesia through the Ministry of State-Owned Enterprises and the national strategic plans outlined in the technocratic draft of the 2025–2029 RPJMN and the 2025–2029 BUMN Minerba Cluster Masterplan, MIND ID formulated five strategic themes that form the MIND ID Long-Term Plan for 2025–2029. Each strategic theme is translated into clear and measurable strategic initiatives, with the following description:

1. Peningkatan pengelolaan cadangan dan sumber daya  
Meningkatkan kegiatan eksplorasi secara agresif dan selektif baik secara organik ataupun anorganik, yaitu dengan melakukan akuisisi perusahaan tambang strategis, untuk memperpanjang umur cadangan untuk setiap cadangan logam dasar dan emas dengan target *life of mine* di atas 25 tahun dan rasio penggantian cadangan (*Reserve Replacement Ratio, 3R*) lebih besar atau sama dengan 1.
  2. Strategi kepemimpinan pasar, agresivitas produksi, dan kinerja operasi  
Strategi komersialisasi akan diperkuat melalui: Peningkatan volume produksi untuk memenuhi kebutuhan hilirisasi dan industrialisasi, pengembangan produk baru dan inovatif, ekspansi pasar, serta kemitraan strategis dengan pemain global sehingga MIND ID memiliki kemampuan memengaruhi harga komoditas dunia. Selain itu, daya saing produk MIND ID dalam hal harga akan ditingkatkan melalui peningkatan efisiensi untuk menurunkan biaya.
  3. Penguatan hilirisasi serta industrialisasi melalui dukungan terhadap pengembangan EV dan industri energi  
Peningkatan nilai tambah atas bahan baku mineral dan batu bara dilakukan dengan mengacu pada ketersediaan pasar, profitabilitas, serta kapabilitas MIND ID sebagai kelompok usaha. Inisiatif hilirisasi yang sejalan dengan aspirasi Pemerintah kepada MIND ID, memiliki pangsa pasar, kompetitif dalam aspek biaya produksi (*cost leader*) di industrinya, memberikan tingkat pengembalian investasi yang mendukung pencapaian kriteria kinerja yang ditentukan oleh Pemerintah, dan mampu dilakukan oleh MIND ID, baik secara mandiri maupun kemitraan strategis, akan mendapat prioritas utama. Perencanaan seluruh inisiatif strategis harus memenuhi kaidah review berjenjang berdasarkan kematangan perencanaan yang ditentukan melalui kriteria Front-End Loading (FEL). Dalam hal pengembangan hilirisasi melalui kemitraan, MIND ID mendorong mitra untuk melakukan alih teknologi melalui pengalihan lisensi penggunaan teknologi maupun pengalihan hak atas kekayaan intelektual (HAKI). MIND ID juga akan menjadikan alih ilmu pengetahuan melalui pengembangan sumber daya manusia sebagai perhatian utama dalam kemitraan.
  4. Transformasi Proses Bisnis  
MIND ID akan melakukan penataan ulang proses bisnis, restrukturisasi cucu dan cicit Perusahaan, serta menjadikan Kelompok Usaha MIND ID sebagai Kelompok Usaha yang memiliki tata kelola hulu hingga hilir yang baik, mengedepankan inovasi serta kepakaran, memiliki operasi yang efisien melalui penerapan teknologi digital, serta efisien dalam pengelolaan usaha melalui sentralisasi beberapa fungsi, antara lain logistik, jasa penambangan, perdagangan, dan fungsi-fungsi umum lainnya yang relevan.
1. Improved management of reserves and resources  
To increase exploration activities aggressively and selectively both organically and inorganically, namely by acquiring strategic mining companies, to extend the reserve life for each base metal and gold reserve with a target mine life of over 25 years, and a reserve replacement ratio (3R) of greater than or equal to 1.
  2. Market leadership strategy, production aggressiveness, and operational performance  
Commercialization strategy will be strengthened by: Increasing production volume to meet downstream and industrialization needs, developing new and innovative products, expanding markets, and entering into strategic partnerships with global players so as to enable MIND ID to influence global commodity prices. Furthermore, MIND ID's product competitiveness in terms of price will be enhanced through increased efficiency to lower costs.
  3. Strengthening downstreaming and industrialization through support for the development of EVs and the energy industry.  
The increasing of added value of mineral and coal raw materials is conducted by referring to market availability, profitability, and the capabilities of MIND ID as a business group. Downstream initiatives that are in line with the Government's aspirations for MIND ID, have market share, are competitive in terms of production costs (cost leaders in their industry), provide a level of return on investment that supports the achievement of performance criteria determined by the Government, and are capable of being conducted by MIND ID, either independently or through strategic partnerships, will receive top priority. Planning for all strategic initiatives must meet tiered review standards in accordance with planning maturity determined through the Front-End Loading (FEL) criteria. In terms of developing downstreaming through partnerships, MIND ID encourages partners to perform technology transfer through the transfer of technology use licenses or the transfer of intellectual property rights (IPR). MIND ID will also make knowledge transfer through human resource development a primary concern in the partnership.
  4. Business Process Transformation  
MIND ID will restructure its business processes, restructure its grandchildren and great-grandchildren, and make the MIND ID Business Group a Business Group that has good upstream to downstream governance, prioritizes innovation and expertise, has efficient operations through the application of digital technology, and is efficient in business management through the centralization of several functions, including logistics, mining services, trade, and other relevant general functions.

5. Pengembangan *center of excellence* dan optimasi portofolio

Seluruh inisiatif strategis pada sisi hulu hingga hilir rantai nilai komoditas mineral, batu bara, serta turunannya memerlukan dukungan dalam hal kapabilitas untuk mengoptimalkan portofolio. MIND ID akan menjadikan Kelompok Usaha MIND ID sebagai *center of excellence* industri pertambangan nasional. Hal ini dilakukan melalui pengembangan organisasi dan budaya yang unggul, peningkatan kompetensi dan aset intangible, manajemen portofolio secara efektif untuk mendukung bisnis berkelanjutan. Inisiatif terkait hal ini antara lain peningkatan modal untuk melakukan investasi hilir, penelitian dan pengembangan dengan melibatkan mitra-mitra strategis baik di dalam maupun luar negeri, pengembangan kapabilitas perusahaan melalui pengembangan internal maupun kemitraan strategis untuk menciptakan keunggulan kompetitif, penguatan tata kelola perusahaan, serta pengelolaan lingkungan dan pemberdayaan masyarakat. Dalam memperkuat aspek pengelolaan lingkungan, MIND ID ke depannya dapat meningkatkan serta mendorong program-program terkait keberlanjutan lingkungan baik di MIND ID maupun entitas anak dan portofolio di bawahnya.

5. Development of centers of excellence and portfolio optimization.

All strategic initiatives across the upstream and downstream value chains of mineral, coal, and derivative commodities require capability support to optimize the portfolio. MIND ID will establish the MIND ID Business Group as a center of excellence for the national mining industry. This is achieved through the development of a superior organization and culture, enhancement of competencies and intangible assets, and effective portfolio management to support sustainable business. Related initiatives include increasing capital for downstream investments, research and development involving strategic partners both domestically and internationally, developing corporate capabilities through internal development and strategic partnerships to create competitive advantages, strengthening corporate governance, and environmental management and community empowerment. In strengthening environmental management aspects, MIND ID can further enhance and promote programs related to environmental sustainability within MIND ID, its subsidiaries, and its portfolios.

**Tata Kelola Perusahaan**  
Good Corporate Governance

## Penerapan Prinsip-prinsip Tata Kelola Perusahaan yang Baik

### Implementation of Good Corporate Governance Principles

Dalam upaya memperkuat industri pertambangan nasional yang lebih terintegrasi dan efisien, Pemerintah Republik Indonesia menetapkan Peraturan Pemerintah Republik Indonesia Nomor 45 Tahun 2022 dan Peraturan Pemerintah Republik Indonesia Nomor 46 Tahun 2022 sebagai landasan pembentukan *holding* BUMN sektor pertambangan, yaitu MIND ID. Kebijakan ini berperan strategis dalam mempercepat hilirisasi, meningkatkan nilai tambah sumber daya mineral, serta memperkuat kolaborasi antar entitas dalam ekosistem pertambangan nasional.

Pada tahun 2025, Pemerintah kembali memperkuat regulasi melalui Undang-Undang Nomor 1 Tahun 2025 dan Undang-Undang Nomor 16 Tahun 2025 sebagai perubahan atas Undang-Undang Nomor 19 Tahun 2003 tentang BUMN, guna memperkuat peran BUMN dalam menciptakan nilai berkelanjutan, meningkatkan daya saing, serta mendorong tata kelola yang lebih akuntabel dan transparan.

Sehubungan dengan telah dicabutnya Keputusan Sekretaris Kementerian Badan Usaha Milik Negara Nomor SK-16/S. MBU/2012 tentang Indikator/Parameter Penilaian dan Evaluasi atas Penerapan Tata Kelola Perusahaan yang Baik (*Good Corporate Governance*) pada Badan Usaha Milik Negara ("SK-16/2012"), MIND ID menggunakan kriteria penilaian dengan mengacu pada ASEAN *Corporate Governance Scorecard* (ACGS) yang merupakan sistem penilaian tata kelola perusahaan (*corporate governance*) yang dikembangkan oleh ASEAN Capital Market Forum (ACMF) dan OECD untuk meningkatkan kepercayaan investor internasional dengan tujuan meningkatkan standar, transparansi, dan akuntabilitas perusahaan terbuka (emiten) di kawasan ASEAN. Sehubungan dengan hal ini, peraturan di bidang pasar modal yang berlaku di Indonesia telah mengakomodir sebagian besar prinsip-prinsip ACGS.

In accordance with the revocation of the Decision of the Secretary of the Ministry of State-Owned Enterprises Number SK-16/S. MBU/2012 concerning Indicators/Parameters for Assessment and Evaluation of the Implementation of Good Corporate Governance in State-Owned Enterprises ("SK-16/2012"), MIND ID uses assessment criteria with reference to the ASEAN Corporate Governance Scorecard (ACGS) which is a corporate governance assessment system developed by the ASEAN Capital Market Forum (ACMF) and the OECD to increase international investor confidence with the aim of improving standards, transparency, and accountability of public companies (issuers) in the ASEAN region. In this regard, the regulations in the capital market sector applicable in Indonesia have accommodated most of the ACGS principles.

Memperhatikan bahwa MIND ID merupakan BUMN yang tidak berstatus perusahaan terbuka (emiten) dan tidak tunduk pada ketentuan di bidang pasar modal, sehingga penilaian tata kelola MIND ID terhadap standar ACGS disesuaikan (sebagaimana diperlukan)

Considering that MIND ID is a SOE that does not have the status of a public company (issuer) and is not subject to provisions in the capital market sector, therefore the assessment of governance of MIND ID against the ACGS standards is adjusted

dengan memperhatikan peraturan perundangan dan *best practices* yang relevan terhadap MIND ID. Hal ini mempengaruhi penilaian tingkat kepatuhan tata kelola MIND ID terhadap standar ACGS. Berdasarkan hasil penilaian ACGS (secara *standalone* untuk entitas MIND ID), MIND ID memperoleh skor sebesar 97,60 pada tahun buku 2024 dengan tingkat pengadopsian sebesar 82,39% yang termasuk dalam predikat “*Very Good*”. Hasil pencapaian skor tersebut menunjukkan implementasi tata kelola perusahaan sebagian besar sudah memenuhi standar internasional sebagaimana disyaratkan oleh ACGS.

Sehubungan dengan tindak lanjut atas rekomendasi hasil penilaian, MIND ID (dibantu oleh konsultan independen yaitu PT Dinamika Pasifik Solusindo) memproyeksikan peningkatan skor menjadi 98,93 dengan tingkat pengadopsian sebesar 83,02% untuk tahun buku 2025. Proyeksi tersebut disusun berdasarkan penambahan poin atas rekomendasi yang telah ditindaklanjuti sesuai hasil penelaahan dokumen dan informasi yang diperoleh, tanpa dilakukan analisis ulang terhadap prinsip utama ACGS yang telah dinilai pada periode sebelumnya.

Selanjutnya, hasil penilaian berdasarkan prinsip ACGS untuk anak perusahaan di bawah pengelolaan MIND ID yang berstatus Tbk (termasuk ANTAM, PTBA, TIMAH) untuk tahun buku 2024 menunjukkan telah memenuhi sebagian besar kriteria ACGS, dengan 2 (dua) perusahaan di antaranya (ANTAM dan PTBA) berhasil meraih penghargaan sebagai salah satu perusahaan terbuka di Indonesia yang masuk dalam kategori ASEAN Asset Class Public Listed Company (“*ASEAN Asset Class*”). ASEAN Asset Class merupakan penghargaan kepada perusahaan terbuka di Asia Tenggara yang mencapai skor tata kelola perusahaan (*corporate governance*) tinggi dalam penilaian ACGS. Penghargaan ini diakui secara regional oleh ASEAN Capital Markets Forum (ACMF) dan Asian Development Bank (ADB) untuk menandai perusahaan dengan standar transparansi dan akuntabilitas terbaik, menjadikannya target investasi berkualitas di ASEAN.

Adapun secara umum berikut penerapan GCG yang telah diterapkan di MIND ID berdasarkan kriteria ASEAN Corporate Governance Scorecard:

(as necessary) by paying attention to laws and best practices relevant to MIND ID. This affects the assessment of the level of compliance of governance of MIND ID with the ACGS standards. Based on the results of the ACGS assessment (on a standalone basis for the MIND ID entity), MIND ID obtained a score of 97.60 in the fiscal year 2024 with an adoption rate of 82.39% which is included in the predicate “*Very Good*”. The results of achieving this score indicate that the implementation of corporate governance has largely met international standards as required by ACGS.

In connection with the follow-up on the recommendations of the assessment results, MIND ID (assisted by an independent consultant, namely PT Dinamika Pasifik Solusindo) projects an increase in the score to 98.93 with an adoption rate of 83.02% for the fiscal year 2025. The projection is compiled based on the addition of points for recommendations that have been followed up according to the results of the review of documents and information obtained, without re-analyzing the main principles of ACGS that have been assessed in the previous period.

Furthermore, the assessment results based on the ACGS principles for subsidiaries under the management of MIND ID with Tbk status (including ANTAM, PTBA, TIMAH) for the fiscal year 2024 showed that they had met most of the ACGS criteria, with 2 (two) of these companies (ANTAM and PTBA) successfully achieving awards as one of the public companies in Indonesia that were included in the ASEAN Asset Class Public Listed Company (“*ASEAN Asset Class*”) category. ASEAN Asset Class is an award for public companies in Southeast Asia that achieve high corporate governance scores in the ACGS assessment. This award is recognized regionally by the ASEAN Capital Markets Forum (ACMF) and the Asian Development Bank (ADB) to mark companies with the best standards of transparency and accountability, making them quality investment targets in ASEAN.

In general, the following is the implementation of GCG that has been implemented at MIND ID based on the ASEAN Corporate Governance Scorecard criteria:
